2013 Public School Data Reference Guide

The *Public School Data Reference Guide* is prepared for use by legislators and staff during the legislative session. The *Reference Guide* consists of information gathered on public schools by the Legislative Education Study Committee (LESC) staff covering a range of years, with special emphasis on the school years immediately preceding the upcoming legislative session. Intended as a companion to the LESK's *Annual Report*, the *Reference Guide* contains extensive data tables in support of that document.

Because the current school year is underway and certain financial estimates have not been finalized, the data contained in the *Reference Guide* generally reflects information from school year 2011-2012. In some instances, budgeted projections for the 2012-2013 school year have been included and when data were not available for 2011-2012, older data were used.

The *Reference Guide* is divided into four distinct sections: Public School Finance and Appropriations; Public School Employee Compensation; Public School Capital Outlay and Special Program Awards; and Public School Characteristics.

Public School Finance and Appropriations details the annual appropriation from the legislature for public education, including the Public Education Department (PED) budget, public school support, and supplemental distributions. It also provides details of the current and proposed funding formulas.

Public School Employee Compensation details the average salaries of teachers and top administrators by district.

Public School Capital Outlay and Special Program Awards explains the public school capital outlay process in addition to reporting the awards of special programs, such as Pre-K and K-3 Plus. This section includes charter school lease assistance awards and the replacement schedule for school buses, detailing the ownership of those buses whether school district and private contractor.

Public School Characteristics provides demographic information and academic performance of public schools. Academic performance includes subject proficiency rates and school performance as defined by PED's A-F school grading system.

¹ Early Childhood Education (ECE) program units include full- and half-day kindergarten units and 3- and 4-year-old developmentally disabled (DD) units.

² Special Education Units include related services (ancillary) staff units and A/B program units; C program units; D program units; and 3- and 4-year-old DD program units.

³ Size Adjustment Units include elementary/junior high units; senior high units; district size adjustment program units; and rural isolation adjustment units.

⁴ Beginning in FY 01, full-day kindergarten was phased in over five years.

⁵ Funding included adjustments for at-risk hold harmless.

⁶ In 2003, the funding formula was amended to: (1) change the way growth units are calculated; (2) add units for fine arts programs in elementary schools; and (3) add units for the number of National Board certified teachers on staff.

⁷ Beginning in FY 07, funding was based on the average of prior year membership of 80th and 120th school days.

⁸ In 2007, the funding formula was amended to include, beginning in FY 08, elementary physical education units and charter school and home school activity units.

⁹ Preliminary Budgeted.

¹⁰ Beginning in FY 13, first year of implementation of the 3- and 4-year old A/B .70 cost index.

¹ Funding formula credits include: federal Impact Aid (75 percent), federal Forest Reserve, and local property tax (0.5 mill levy).

² For FY 02 through FY 05, program cost did not align project program cost with actual program cost.

³ Appropriated FY 06 program cost contains an additional \$51.8 million to implement the third year of the five-year phase-in of the three-tiered licensure system. In FY 06, this funding was distributed based on need; in subsequent fiscal years, it was included in the calculation of unit value.

⁴ For FY 10, the unit value comprises \$3,458.06 from the General Fund and \$334.59 from the federal *American Recovery and Reinvestment Act of 2009* (ARRA). The Program Cost and SEG reflect both sources of funding.

⁵ For FY 11, the unit value comprises \$3,712.17 from the General Fund, \$37.85 from the federal ARRA, and \$101.98 in Education Jobs funds.

⁶ For FY 11, the SEG does not include the amounts for Excess Cash Balance, Utility Conservation Program Contract Payments, and 90 percent of the Certified Amount (*Energy Efficiency and Renewable Energy Bonding Act*) that the State deducts from the state program cost as aggregate information for these deductions including ARRA and Education Jobs funds is not readily available.

NOTE: Effective in FY 00, the law was amended to reduce credits to 75 percent instead of 95 percent of eligible federal and local revenues for operational purposes and to require districts to budget state funds equal to 20 percent for capital outlay. Effective in FY 06, the law was amended to remove the requirement that school districts budget an amount equal to 20 percent for capital outlay.

FIGURE 3 PROPOSED FUNDING FORMULA: DESCRIPTION

In both 2008 and 2009, the LESC endorsed legislation to amend the public school funding formula, or state equalization guarantee (SEG); however, the legislation did not pass. Based on a three-year study of the current formula, the proposed funding formula is based on four factors (notably fewer factors than the current funding formula, which is shown in Figure 2): poverty, as measured by the percent of students who qualify for Free and Reduced-Price Lunch; English language learners (ELL); special education (SPED), which is set at a census-based figure of 16 percent for all school districts, except for charter schools, whose special education adjustment is based on the actual percentage of students receiving services; and mobility rate.

The general formula is shown below, followed by the specific formulas for school districts and charter schools.

Base Per-Student Cost

- × Poverty Adjustment (Free and Reduced-Price Lunch)
- × English Learner Adjustment
- × Special Education Adjustment (Census-based)
- × Mobility Adjustment
- × Share 6-8 Enrollment Adjustment
- × Share 9-12 Enrollment Adjustment
- × Scale (Total District Enrollment) Adjustment
- × Adjusted Index of Staff Qualifications (not less than 1.000)

= **Sufficient Per-Student Cost**

Sufficient Per-Student Cost × Total District Enrollment = Sufficient Total Program Cost

Proposed Funding Formula School Districts	Proposed Funding Formula Charter Schools
<p>Base Per-Student Cost = <u>\$5,106</u></p> <ul style="list-style-type: none"> × (Poverty Index)^{0.375} × (English Learner Index)^{0.094} × (Special Education Index: <u>Census-based</u>)^{1.723} × (Mobility Rate Index)^{0.190} × (Grade 6-8 Enrollment Index)^{0.291}/<u>1.063</u> × (Grade 9-12 Enrollment Index)^{0.608}/<u>1.187</u> × (Enrollment)^{-0.575} × exp(ln(Enrollment)²)^{0.029}/<u>0.062</u> × Adjusted Index of Staff Qualifications (not less than 1.000) <p>= Sufficient Per-student Cost</p> <p>Sufficient Per-student Cost × Total District Enrollment = Sufficient Total Program Cost</p>	<p>Base Per-Student Cost = <u>\$6,907</u></p> <ul style="list-style-type: none"> × (Poverty Index)^{0.375} × (English Learner Index)^{0.094} × (Special Education Index: <u>Actual</u>)^{1.723} × (Mobility Rate Index)^{0.190} × (Grade 6-8 Enrollment Index)^{0.291}/<u>1.074</u> × (Grade 9-12 Enrollment Index)^{0.608}/<u>1.241</u> × (Enrollment)^{-0.307} × exp(ln(Enrollment)²)^{0.012}/<u>0.291</u> × Adjusted Index of Staff Qualifications (not less than 1.000) <p>= Sufficient Per-student Cost</p> <p>Sufficient Per-student Cost × Total District Enrollment = Sufficient Total Program Cost</p>

Underline denotes a difference between the two formulas.

In its final report to the Funding Formula Study Task Force, American Institutes for Research (AIR) explains the reason for the difference in size calculations as follows: “Because charter schools generally have enrollment levels that are far smaller than districts, the district-level formula adjustment for this cost factor is not applicable. Simply put, charter schools cannot be treated the same way districts are in analyzing the impact of scale. To address this difference, an additional regression procedure was run for charter schools that constrained all of the student need adjustments (i.e., for poverty, English learners, special education, and mobility) and enrollment composition to be identical to those produced by the district-level equation, but estimated a different relationship between enrollment and sufficient per pupil cost.”

Note: “exp” is the inverse of the natural log (ln). Natural logarithms are based on the constant e (2.71828182845904).

5	2007	\$5,113,148.0	\$2,293,467.1	\$161,565.5	44.9%	5
6	2008	\$5,674,955.6	\$2,484,677.9	\$191,210.8	43.8%	6
7	2009 (adjusted for solvency) ²	\$5,862,403.0	\$2,538,686.6	\$54,008.7	43.3%	7
8	2010 (adjusted for solvency) ³	\$5,269,834.6	\$2,230,429.2	(\$308,257.4)	42.3%	8
9	2011 (estimated) (adjusted for solvency) ⁴	\$5,353,883.2	\$2,431,226.9	\$200,797.7	45.4%	9
10	2012 (estimated)	\$5,431,310.5	\$2,393,379.6	(\$37,847.3)	44.1%	10
11	2013 (estimated)	\$5,649,606.1	\$2,455,341.4	\$61,961.8	43.5%	11

¹ Beginning in FY 06, Public Education includes Public School Support, funding for the Public Education Department, and special projects. Prior to FY 06, Public Education also included General Fund appropriations to the School for the Blind and Visually Impaired and the School for the Deaf.

² The FY 09 appropriation for Public Education does not include the one-time approximately \$35.8 million appropriation to the State Equalization Guarantee from the "education lockbox."

³ The FY 10 appropriation for Public Education does not include the \$210.2 million appropriation to the State Equalization Guarantee from the federal *American Recovery & Reinvestment Act of 2009* (ARRA).

⁴ The FY 11 appropriation for Public Education does not include the approximately \$23.9 million appropriation to the State Equalization Guarantee from ARRA.

2011-2012	\$3,585.97	\$3,598.87	(\$126.20)	-3.40%
2012-2013	\$3,668.18	\$3,673.54	\$69.31	1.93%

¹ The 1982-1983 General Fund appropriation was reduced by 2.0 percent.

² The final unit value includes \$10.87 due to the ½ mill redistribution (Laws 1985, Chapter 15).

³ The "floating" unit value went into effect.

⁴ The basis for funding changed to the prior-year average membership of the 40th, 80th, and 120th school days.

⁵ For FY 06, appropriated program cost contains an additional \$51.8 million to implement the third year of the five-year phase-in of the three-tiered licensure system. Although this funding was distributed based on need in FY 06, the \$51.8 million was included in the calculation of the unit value in FY 07.

⁶ The basis for funding changed to the prior-year average membership of the 80th and 120th school days.

⁷ The 2009 legislative session solvency measures resulted in a \$20.68 decrease in the FY 09 unit value.

⁸ FY 10 initial unit value comprises \$3,606.40 in General Fund dollars and \$256.39 in federal funding from the *American Recovery and Reinvestment Act of 2009* (ARRA).

⁹ FY 10 final unit value comprises \$3,458.06 in General Fund dollars and \$334.59 in federal ARRA funding.

¹⁰ FY 11 initial unit value comprises \$3,674.75 in General Fund dollars and \$37.70 in federal ARRA funding.

¹¹ FY 11 final unit value comprises \$3,572.34 General Fund, \$37.85 federal ARRA funding and \$101.98 in Education Jobs funding.

NOTES:

*The salary data presented in this table was provided by the school districts with their 2011-2012 Operating Budgets. Average salaries based on estimated contracts.

¹The subtotal for districts with charter schools is a weighted average of the school districts' and charter schools' data. For ranking purposes, the subtotal for districts with charter schools was used.

²Charter teachers are contracted through the University of New Mexico and are not contracted through the district.

³Salary Reduction.

SOURCES OF NEW MEXICO PUBLIC SCHOOL CAPITAL OUTLAY FUNDING

Public school capital outlay financing is both a local and state responsibility in the state of New Mexico. School districts can generate state revenues through two statutory measures. One measure is through direct legislative appropriations, which provides funding for specific needs. The second is through a standards based process under the Public School Capital Outlay Act. Locally, districts can generate capital outlay revenues from the sale of bonds, direct levies, earnings from investments, rents, sales of real property and equipment, as well as other miscellaneous sources.

The Public School Capital Outlay Act: The funding mechanism was established to ensure that through a standards-based process, for all school districts, the physical condition and capacity, educational suitability and technology infrastructure of all public school facilities in New Mexico meet an adequate level statewide. This process uses a statewide assessment database which ranks the condition of every school building relative to the statewide adequacy standards. The schools with the greatest facilities needs will be addressed first according to the New Mexico Condition Index (NMCI). The database will operate as an objective prioritizing and ranking tool to assist the Public School Capital Outlay Council (PSCOC) in allocating funds to school districts. The standards-based process also requires school districts who receive awards to provide a local match that will be determined by the state match distribution formula.

For allocation cycles beginning after September 1, 2003 the following provisions apply:

1. All districts are eligible to apply regardless of percentage of indebtedness;
2. Funding must be determined by using the statewide adequacy standards and the PSCOC must apply the standards to charter schools to the same extent;
3. The PSCOC must establish criteria to be used in public school capital outlay projects that receive grant assistance from Public School Capital Outlay Act;
4. No more than 10% of the combined total grants in a funding cycle shall be used for retrofitting existing facilities for technology infrastructure;
5. A formula will be used to determine the percentage participation of the state and the districts in the standards-based capital outlay process for projects approved by the council and must be funded within available resources in accordance with the funding formula;

FIGURE 4

6. Capital outlay grant awards made by the PSCOC will be reduced by a percentage of direct appropriations for capital outlay projects received by a school district. The amount of the reduction will be determined by the state-local match formula, and will equal the direct legislative appropriation percentage amount for the school district multiplied by the amount of the direct appropriations for individual school projects;
 - A) An appropriation is deemed to be accepted, for projects appropriated prior to 2010, unless written notification to reject the appropriation is received by DFA & PED;
 - B) The total offset should exclude any appropriation previously made to the subject school district that is reauthorized for expenditure by another recipient;
 - C) The total shall exclude one-half of the amount of any appropriation made or reauthorized after January 1, 2007 if the purpose of the appropriation or reauthorization is to fund, in whole or in part, a capital outlay project that, when prioritized by the council pursuant to this section either in the immediately preceding funding cycle or in the current funding cycle, ranked in the top one hundred fifty projects statewide;
 - D) The total shall exclude the proportionate share of any appropriation made or reauthorized after January 1, 2008 for a capital project that will be jointly used by a governmental entity other than the subject school district. Pursuant to criteria adopted by rule of the council and based upon the proposed use of the capital project, the council shall determine the proportionate share to be used by the governmental entity and excluded from the total;
 - E) Unless the grant award is made to the state-chartered charter school or unless the appropriation was previously used to calculate a reduction pursuant to this paragraph, the total shall exclude appropriations made after January 1, 2007 for non-operating purposes of a specific state-chartered charter school, regardless of whether the charter school is a state-chartered charter school at the time of the appropriation or later opts to become a state-chartered charter school;
7. "Subject school district," means the school district that has submitted the application for funding in which the approved PSCOC project will be located;
8. In those instances in which a school district has used all of its local resources, the PSCOC may fund up to the total amount of the project;
9. No application for grant assistance from the fund will be approved unless the PSCOC determines that:
 - A) The capital outlay project is needed and is included in the school districts five-year facilities plan among its top priorities;
 - B) The school district has used its resources in a prudent manner;
 - C) The school district has provided insurance for building of the district according to provisions of section 13-5-3 NMSA 1978;
 - D) The district has submitted a five-year facilities plan that has been approved by the PSCOC pursuant to section 22-24-5.3 NMSA 1978 and the capital needs of charter schools located in the district as well as projections for enrollment and facilities needed in order to maintain a full-day kindergarten are included;
 - E) The district is willing and able to pay any portion of the project that is not funded with grant assistance from the fund;
 - F) The application includes charter schools or the district has shown that charter schools meet the statewide adequacy standards; and
 - G) The district has agreed, in writing, any reporting requirements imposed by the PSCOC pursuant to sections 22-24-5.1 NMSA 1978.

The fund may be expended annually by the PSCOC for grants to school districts for the purpose of making lease payments for classroom facilities, including facilities leased by charter schools. The grant shall not exceed the annual lease payments owed for leasing classroom space for schools, including

FIGURE 4

charter schools, in the district; or seven hundred dollars (\$700) multiplied by the number of membership using the leased classroom facilities; provided that, in fiscal year 2009 and in each subsequent fiscal year, the amount shall be adjusted by the percentage in crease between the penultimate calendar year and the immediately preceding calendar year of the consumer price index for the United States.

All of the provisions of the Public School Capital Outlay Act [22-24-1 NMSA 1978] apply to an application by a state-chartered charter school for grant assistance for a capital project except:

1. The portion of the cost of the project to be paid from the fund shall be calculated pursuant to Paragraph (5) of Subsection B of Section 22-24-5 NMSA 1978 using data from the school district in which the state-chartered charter school is located;
2. In calculating a reduction pursuant to Paragraph (6) of Subsection B of Section 22-24-5 NMSA 1978, the amount to be used in Subparagraph (a) of that paragraph shall equal the total of all legislative appropriations made after January 1, 2007 for non-operating expenses either directly to the charter school or to another governmental entity for the purpose of passing the money through directly to the charter school, regardless of whether the charter school was a state-chartered charter school at the time of the appropriation or later opted to become a state-chartered charter school, except that the total shall not include any such appropriation if, before the charter school became a state-chartered charter school, the appropriation was previously used to calculate a reduction pursuant to Paragraph (6) of Subsection B of Section 22-24-5 NMSA 1978; and
3. The amount to be used in Subsection B of that paragraph shall equal the total of all federal money received by the charter school for non-operating purposes pursuant to Title XIV of the American Recovery and Reinvestment Act of 2009, regardless of whether the charter school was a state-chartered charter school at the time of receiving the federal money or later opted to become a state-chartered charter school, except that the total shall not include any such federal money if, before the charter school became a state-chartered charter school, the money was previously used to calculate a reduction pursuant to Paragraph (6) of Subsection B of Section 22-24-5 NMSA 1978; and
4. If the council determines that the state-chartered charter school does not have the resources to pay all or a portion of the total cost of the capital outlay project that is not funded with grant assistance from the fund, to the extent that money is available in the charter school capital outlay fund, the council shall make an award from that fund for the remaining amount necessary to pay for the project. The council may establish, by rule, a procedure for determining the amount of resources available to the charter school and the amount needed from the charter school capital outlay fund.

A program for assisting charter schools to be located in public buildings or in buildings being acquired by charter schools pursuant to a lease purchase agreement shall be developed under 22-24-6.2 NMSA 1978.

Supplemental Severance Tax Bonds: Supplemental Severance Tax Bonds (SSTB) are bonds issued by the State Board of Finance and paid for by revenue derived from taxes levied upon the natural resource products severed and saved from the soil and other sources as the New Mexico State Legislature may from time to time determine. This authorization does not require legislative reauthorization and may be considered a dedicated funding stream for public school capital outlay.

The Public School Capital Improvements Act: Commonly referred to as SB-9 or the “two-mill levy,” this funding mechanism allows districts to ask local voters to approve a property levy of up to two mills for a maximum of six years. Funds generated through imposition of the two-mill levy must be used to:

FIGURE 4

1. Erecting, remodeling, making additions to, providing equipment for, or furnishing public school buildings;
2. Purchasing or improving public school grounds;
3. Maintenance of public school buildings or public school grounds, including the purchasing or repairing of maintenance equipment, participating in the facility information management system as required by the Public School Capital Outlay Act [22-24-1 NMSA 1978] and including payments under contract with regional education cooperatives for maintenance support services and expenditures for technical training and certification for maintenance and facilities management personnel, but excluding salary expenses of school district employees;
4. Purchasing activity vehicles for transporting students to extracurricular activities; and
5. Purchasing computer software and hardware for student use in public school classrooms.

An individual school district may only use SB-9 funds for any or all of these purposes as stated in the school district's individual resolution. The Public School Capital Improvements Act contains provisions that provide a school district with a minimum level of funding. This minimum level of funding or "program guarantee" is calculated by multiplying a school district's 40th day total program units by the matching dollar amount (currently \$75.58 through fiscal year 2011) and in each subsequent fiscal year equal the amount for the previous year adjusted by the percentage increase between the next preceding year and the preceding calendar year of the consumer price index for the United States, all items, as published by the US Department of Labor.

If the local revenue generated by the two-mill levy is less than the program guarantee, the state funds the difference in the form of "matching" funds. State matching funds have some restrictions as to their use. For fiscal year 2011 the amount of state "matching" funds shall not be less than an amount currently equal to \$5.87 and in each subsequent fiscal year equal the amount for the previous year adjusted by the percentage increase between the next preceding year and the preceding calendar year of the consumer price index for the United States, all items, as published by the US Department of Labor.

Direct Legislative Appropriations: Direct Legislative Appropriations for capital outlay project funding are targeted for specific projects within the school district. Specific legislators sponsor these projects. Projects funded from these specific appropriations have become more sparsely used in recent years due to the shortfall. These allocations are funded by the general fund or from the proceeds of the sale of severance tax bonds.

Local General Obligation Bonds: Local school districts may issue general obligation bonds for the purpose of erecting, remodeling, making additions to and furnishing school buildings, or purchasing or improving school grounds, providing matching funds for capital outlay projects funded pursuant to the Public School Capital Outlay Act, or any combination of these purposes. In addition, a school district may also use bond proceeds to purchase computer equipment and software for student use in public school classrooms. The issuance of these bonds is subject to the provisions of Article 9, Section 11 of the Constitution of New Mexico. Prior to the issuance of bonds, several steps must be taken. One of these is the submission of PED form 995-10/89 to the School Budget Planning Unit at the Public Education Department to determine exactly how much bonding capacity remains. This must be accomplished prior to the election. Another step is the actual submission of the question to the voters by the local school board. Upon successful election results, the local school board may, subject to the approval of the Attorney General, proceed to issue the bonds. There are restrictions: (1) the district's ability to sell bonds is limited to 6% of its assessed valuation; (2) there is a four year period in which the bonds may be sold from a particular approved resolution (6-15-9 NMSA 1978).

FIGURE 4

This is only a summary of information associated with the issuance of school district general obligation bonds. Each school district should consult with their financial advisor for more specific information regarding elections and the issuance of local general obligation bonds.

NOTE: The tax rate associated with this type of funding is likely to fluctuate every year due to the timing of principal and interest payments as well as changes in assessed valuations.

The Public School Buildings Act: This Act, commonly referred to as HB-33, allows districts to impose a tax not to exceed 10-mills for a maximum of six years on the net taxable value of property upon approval of qualified voters. These funds are to be used for:

1. Erecting, remodeling, making additions to, providing equipment for or furnishing public school buildings;
2. Payments made pursuant to a financing agreement entered into by a school district or a charter school for the leasing of a building or other real property with an option to purchase for a price that is reduced according to payments made;
3. Purchasing or improving public school grounds;
4. Purchasing activity vehicles for transporting students to and from extracurricular activities, provided that this authorization for expenditure does not apply to school districts with a student MEM greater than sixty thousand; or
5. Administering the projects undertaken pursuant to items 1 and 3 of this section, including expenditures for facility maintenance software, project management software, project oversight and district personnel specifically related to administration of projects funded by the Public School Buildings Act; provided that expenditures pursuant to this subsection shall not exceed five percent of the total project costs.

There are limitations and restrictions associated with this act: (1) the authorized tax rate made under the Public Buildings Act, when added to the tax rates for servicing the debt of the school district and the rate authorized under the Public School Capital Improvements Act, cannot exceed 15-mills. If it does exceed 15-mills, the rate authorized under the Public School Buildings Act will be adjusted downward to compensate; and (2) the revenues generated from the Public School Buildings Act are only to be used for specific capital improvements (as defined above). This funding mechanism is most useful for districts with high-assessed valuation and low bonded indebtedness.

After July 1, 2007, a resolution submitted to the qualifying electors pursuant to Subsection A of 22-26-3 NMSA 1978 shall include capital improvements funding for a locally chartered or state-chartered charter school located within the school district if;

1. The charter school timely provides the necessary information to the school district for inclusion on the resolution that identifies the capital improvements of the charter school for which the revenue proposed to be produced will be used; and
2. The capital improvements are included in the five-year facilities plan:
 - a. of the school district, if the charter school is a locally chartered charter school; or
 - b. of the charter school, if the charter school is a state-chartered charter school.

The Public School Lease Purchase Act: The purpose of the Public School Lease Purchase Act is to implement the provisions of Article 9, Section 11 of the constitution of New Mexico, which declares that a financing agreement entered into by a school district or a charter school for leasing of a building or other real property with an option to purchase for a price that is reduced according to the payments made by the school district or charter school pursuant to the financing agreement is not a debt if:

FIGURE 4

1. There is no legal obligation for the school district or charter school to continue the lease from year to year or to purchase the real property;
2. The agreement provides that the lease shall be terminated if sufficient money is not available to meet the current lease payments.

A school district may apply any legally available funds to the payments due on or any prepayment premium payable in connection with lease purchase arrangements as they become due, including any combination of:

1. money from the school district's general fund;
2. investment income actually received from investments;
3. proceeds from taxes imposed to pay school district general obligation bonds or taxes imposed pursuant to the Public School Capital Improvements Act [22-25-1 NMSA 1978], the Public School Buildings Act [22-26-1 NMSA 1978] or the Educational Technology Equipment Act [6-15A-1 NMSA 1978];
4. loans, grants or lease payments received from the public school capital outlay council pursuant to the Public School Capital Outlay Act [22-24-1 NMSA 1978];
5. state distributions to the school district pursuant to the Public School Improvements Act;
6. fees or assessments received by the school district;
7. proceeds from the sale of real property and rental income received from the rental or leasing of school district property;
8. grants from the federal government as assistance to those areas affected by federal activity authorized in accordance with Title 20 of the United States Code, commonly known as "PL 874 funds" or "impact aid";
9. revenues from the tax authorized pursuant to Sections 8 through 12 [22-26A-8 through 22-26A-12 NMSA 1978] of the Public School Lease Purchase Act, if proposed by the local school board and approved by the voters; and
10. legislative appropriations.

A local school board has the option of adopting a resolution to submit to the qualified electors of the school district the question of whether a property tax should be imposed upon the net taxable value of property allocated to the school district under the Property Tax Code [7-35-1 NMSA 1978] for the purpose of making payments under a specific lease-purchase arrangement. The tax rate shall not exceed the rate specified in the resolution. A locally chartered or state-chartered charter school may also enter into a lease purchase arrangement provided that a governing body of a charter school shall not propose a tax or conduct an election. However, a charter school may receive revenue from a tax proposed by the local school board for the district in which the charter school is located and approved by the voters.

Educational Technology Equipment Act: Enacted in 1997, the Educational Technology Equipment Act provides a statutory basis for the implementation of a constitutional amendment approved by voters in the 1996 general election. Passage of the amendment allows school districts to create debt without submitting the question to voters to enter into a lease-purchase agreement to acquire educational technology equipment. Such debt is, however, subject to the Constitutional limitation that no school district shall become indebted in an amount exceeding 6% of the assessed valuation of the taxable property within the school district. The combination of outstanding bonds and lease-purchase principal cannot exceed this limit. If a district is already at this limit, it cannot enter into one of these agreements. A school district should consult with their bond attorney or bond advisor prior to entering into one of these arrangements. The purpose is to acquire tools used in the educational process that constitute learning resources.

FIGURE 5

How Offsets Work

The Public School Capital Outlay Offset for Direct Appropriations can be confusing. Here's a simple, practical explanation.

What It is

The law says that the PSCOC must “reduce any grant amounts awarded to a school district by a percent of all direct non-operational legislative appropriations for schools in that district that have been accepted, including educational technology and re-authorizations of previous appropriations.”¹

How It Works

The percent reduction mentioned in the law is each school district's local match percent for PSCOC award funding.

The offset applies to all PSCOC award allocations after January 2003.

The offset applies to the district, so if one school in a district receives a direct appropriation, other projects in the district that receive PSCOC award funding will be subject to an offset.

Offset amounts not used in the current year apply to future PSCOC grant amounts.

The law gives districts the right to reject a direct appropriation because of the effect of the offset. For example, a school district receives a direct legislative appropriation for a specific purpose. The effect of the offset would cause the district to accordingly receive reduced PSCOC award funding for what it considers a higher priority need, and it chooses to reject the appropriation.

An Example

Legislative appropriation to a school	\$1,000
PSCOC award to that school's district	\$2,000
That district's local match percent	40%
Offset reduction in district's PSCOC award allocation (\$1,000 x 40%)	(\$400)
District's net PSCOC award amount (\$2,000 - \$400)	\$1,600
Total funds received by district (\$1,000 + \$1,600)	\$2,600

Fiscal Effects

The most significant effect of the offset is not to reduce total funds that the district receives², but instead to potentially reduce funds available for higher priority needs, in the event that the direct appropriation was for a lower-priority project than projects for which the district had applied for PSCOC award funding. In this case, the higher priority projects would have funding levels reduced by the amount of the offset.

Why An Offset?

The Legislature enacted the offset as one of a number of initiatives it has taken recently to better equalize state funding of capital requests across all of New Mexico's school districts. The 2002 report of the Special Master appointed as a result of the Zuni lawsuit specifically highlighted “the *dis-equalizing effect of direct legislative appropriation to individual schools for capital outlay purposes.*” The offset was enacted to mitigate this concern.

¹ Section 22-24-5.B(6) NMSA 1978

² The post-offset net amount of a direct appropriation will always be revenue positive for the district, given current local match percentages.

* Albuquerque Public Schools has a tax rate of \$3.874 per each \$1,000.00 for residential property value and a tax rate of \$4.344 per each \$1,000.00 for non-residential property value.

** Now therefore be it resolved by the board of education of Artesia Public School District no.16 counties of Eddy and Chavez, New Mexico, that the School Budget Planning Unit of the Public Education Department adjust the Public School Buildings Act Tax Rate downward or upward for the duration of the current authorization (i.e. property tax years 2010, 2011, 2012, 2013, 2014 and 2015) so that the combined tax rate for both bond debt service and Public School Buildings Tax is equal to \$5.00/\$1,000.00 of assessed valuation.

*** Now therefore be it resolved by the board of education of the Dulce Independent School District No. 21, that the School Budget Planning Unit of the Public Education Department adjust the Public School Buildings Act Tax Rate downward for the duration of the current authorization (i.e. property tax years 2009, 2010, 2011, 2012, 2013 and 2014) so that the tax rate for the Public School Buildings Tax is equal to \$2.00/\$1,000.00 of assessed valuation.

**** Now therefore be it resolved by the board of education of the Las Cruces Public School District No. 2, that the School Budget Planning Unit of the Public Education Department adjust the Public School Buildings Act Tax Rate downward or upward for the duration of the current authorization (property tax years 2010, 2011, 2012, 2013, 2014 and 2015) so that the combined tax rate for the Public School Buildings Tax, Bond Debt Service Tax and Capital Improvements Assessment Tax is equal to \$9.514/\$1,000.00 of assessed valuation.

Official Grades, and Preliminary Grades**

A-F Grading System Introduction

During the 2011 Legislative Session, new sections of the *Public School Code* were enacted to comprise the *A-B-C-D-F Schools Rating Act*.

The legislation:

- provides that all New Mexico public schools shall be graded annually by the Public Education Department (PED), according to criteria established by the department's administrative code;
- enacts the A-B-C-D-F rating system, which does not align to the adequate yearly progress (AYP) system and is considered a separate and distinct system;
- requires interventions to be directed to D and F schools, with PED ensuring that local school boards and charter school governing authorities appropriately prioritize resources for schools receiving a D or an F under the new system;

On January 10, 2012, PED released a report of preliminary school grades. Preliminary grades were calculated using student assessment data from school years:

- 2008-2009;
- 2009-2010; and
- 2010-2011.

On July 9, 2012, PED released the official or final 2012 school grades. Official school grades were calculated using student assessment data from school years:

- 2009-2010,
- 2010-2011, and
- 2011-2012.

A memorandum was also issued in July 2012 to public school superintendents, charter school administrators, and directors of state educational institutions informing them of the school grades appeals process. Subsequently, an amended grades report was released after the evaluation of all appeals; resulting in the emendation of a total of 19 schools grades.
