FY23 Request High Level Breakdown

- GSD Appropriation Request consists of three budget components:

1. Program Operating Budgets $45.9 million
2. Risk Funds $104.5 million
3. Employee Health Benefits $421.5 million

Total FY23 GSD Request $571.9 million
FY23 Funding Sources by Amount & Percentage

1. General Fund accounts for 3% or $18.2 million of the request,

2. Other Revenue accounts for 94% or $538.8 million of the FY23 GSD request, (Health Benefits $421.5, Risk Funds $104.5 and Enterprise Funds $12.8),

3. Other Transfers (RMD Operating & Program Support) accounts for 3% or $14.9 million of the FY23 GSD budget request.
Overall Costs Comparison by Category FY22/FY23

- GSD’s total request (all funding sources) is an increase of 3.5%. Operating budgets are increased 7.3%, Risk funds are increased 7.8% and Health Benefits are increased 2.1%.

- In the 200s, 10.1% increase is necessary to fully fund underfunded and unfunded positions that are deemed critical for department operations. The request aligns the budget with current operational requirements. Administrative and labor costs have not grown at the same pace as the Department’s programmatic responsibilities. This includes a program expansion for FMD to addresses critical issues impacting the delivery of effective and efficient state government service and mitigate the State’s exposure.

- In the 300s, the 18.9% increase is predominantly to address contractual obligations in Health Benefits to cover fee increases and need for additional liability insurance for state agencies and local public bodies. This is to help mitigate information technology risk.

- In the 400s, the 1.6% increase is in the Health Benefits and Risk funds programs. The request for this year allows sufficient budget authority for RMD to prepare for unpredictable increases in claim costs and prepare for increases due to the COVID-19 pandemic. These are based on the actuarial estimates of claims costs.
