

Date: November 20, 2019 **Prepared By:** Simon and Terrazas

Purpose: Review statutory requirements for the use of funds generated through the at-risk index and state oversight mechanisms to ensure school districts and charter schools are complying with the statutory requirements.

Witness: Ryan Stewart, Ed.L.D., secretary-designate, PED; Adán Delgado, deputy secretary, PED; Joseph Simon and Denise Terrazas, LESC staff

Expected Outcome: Understand state-level processes for ensuring school districts and charter schools are utilizing at-risk funds consistent with state law.

School District Use of At-Risk Funds in FY20

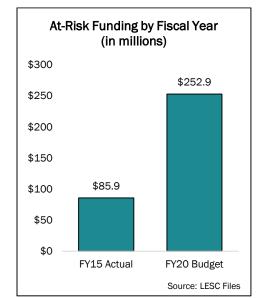

The Public School Finance Act authorizes additional funding through the public school funding formula's at-risk index, for school districts and charter schools that provide extra services to improve the academic outcomes of at-risk students. To

generate this funding, statute requires a school district or charter school to report to the state how they use the funds associated with the at-risk index and the outcomes they expect to see from their investment. During the 2019 legislative session, the Legislature appropriated an additional \$113.2 million to increase the at-risk index; however, many school districts have stated that much of the at-risk funding was used to fund increases to educator salaries, rather than expand at-risk services, raising concerns that at-risk funding is not being used as required by statute.

An LFC analysis of budget data submitted to PED by school districts and charter schools statewide indicates returning teacher salaries were increased by \$99.7 million between FY19 and FY20, but it only cost \$79.8 million to raise salaries for those teachers by 6 percent or to the statutory minimum salary.

At-Risk Funding Requirements and Oversight

In recent years, funding generated through the at-risk index has increased substantially, from \$85.9 million in FY15 to an estimated \$252.9 million in FY20. (See Attachment 1: At-Risk Funding by School District and Charter School for change in funding between FY19 and FY20.) As the Legislature has approved increases in at-risk funding, the reporting requirements associated with at-risk funding have been improved. Since the addition of the at-risk index in 1997, school districts and charter schools have been required to report specified services to the state, but in 2014 the statute was amended to require school districts and charter schools to identify the ways school districts and individual schools use at-risk funding. In 2019, the law was further amended to require at-risk funds to be used on research-based or evidence-based social, emotional or academic interventions and included examples of such interventions.

The Importance of At-Risk Services

Laws 2019, Chapters 206 and 207 (Senate Bill 1 and House Bill 5) provided additional clarification on which services school districts and charter schools could fund with at-risk dollars, requiring at-risk funds to be used for "research-based or evidence-based social, emotional, or academic interventions," such as the following (See Attachment 2: Senate Bill 1 With Amendments in Context):

- Case management, tutoring, reading interventions and after-school programs delivered by social workers, counselors, teachers or other professional staff;
- Culturally relevant professional and curriculum development, including those necessary to support language acquisition, bilingual, and multicultural education:
- Additional compensation strategies for high-need schools;
- Whole school interventions, including school-based health centers and community schools;
- Educational programming intended to improve career and college readiness of at-risk students, including dual or concurrent enrollment, career and technical education, guidance counseling services, and coordination with post-secondary institutions; and
- Services to engage and support parents and families in the education of students.

Research shows social-emotional learning interventions increase both academic achievement and positive social interactions, while decreasing negative outcomes later in life. According to the Collaborative for Academic, Social, and Emotional Learning, social-emotional learning focuses on improving students' ability to manage emotions, achieve positive goals, make responsible decisions, maintain positive

Experts have said students can better respond to the effects of trauma by developing social-emotional competencies. The brain's neuroplasticity makes it possible for repeated experiences to shape the brain and even reverse the effects of chronic stress.

relationships, and show empathy for others. After reviewing over 213 studies on the impacts of social-emotional learning, researchers found that students who participated in these programs showed 11 percentile-point gains in academic achievement compared with those who were not part of the programs. Participants also demonstrated improved classroom behavior, an increased ability to manage stress and depression, and better attitudes about themselves, others, and schools.

Additionally, research on culturally responsive teaching has shown students learn more effectively when the knowledge and skills taught are presented within the context of their own experiences and cultural frames of reference. Addressing student's needs through school-based health centers or strategies aligned with the community school model, such as parent and family engagement, support student learning by mitigating out-of-school barriers to their education.

Finally, educational programming intended to improve career and college readiness is critical to improving postsecondary success. College- and career-ready graduates should be able to enter and succeed in postsecondary courses without the need for remediation. According to the American Institutes for Research, a lack of preparation forces many students to spend resources, including student loans and scholarships, on remedial coursework in addition to or in place of credit-bearing courses. The lack of preparation at the onset of a student's educational career is indicative of non-matriculation, which leads to fewer opportunities for success and higher quality of life.

Allocation of At-Risk Funding

The state has several options when deciding how to allocate funding for additional services to at-risk students. One option is to increase the amount of at-risk dollars that flow through the public school funding formula by increasing the weight of the at-

risk index. This method allows school districts and charter schools statewide to generate additional funding based on their at-risk populations. However, this method gives significant discretion to school districts and charter schools over how to spend the dollars made available by the state.

The state has also funded some programming designed to improve the outcomes of at-risk students outside the public school funding formula by appropriating funds to the Public Education Department (PED) for special programs, sometimes called "below-the-line" appropriations. However, there are drawbacks with this approach. First, not all school districts and charter schools will necessarily be awarded funding from special program appropriations. Additionally, in previous years, PED has used funding appropriated to special programs to supplement departmental operating expenses, in some instances in a manner inconsistent with legislative intent. For example, in June 2019, PED used \$68 thousand from an appropriation for truancy and dropout prevention programs to purchase computer equipment.

PED's Budget Review Authority

While school districts and charter schools are generally given discretion over how to budget formula funds received from the state, PED has significant authority to oversee public school spending. The 1st Judicial District Court's ruling in the consolidated *Martinez* and *Yazzie* lawsuit found PED had failed to exercise its power to monitor or audit school districts' and charter schools' use of funds and failed to use its statutory power to ensure school districts and charter schools use their funding to improve outcomes for at-risk students. In defense of the state, PED argued that the department could not control school district and charter school spending or be responsible for their failure to provide programs that would benefit at-risk students. The court rejected this defense, finding that PED has read its authority under state statutes too narrowly and that the department's authority is broad enough for PED to assure that school districts and charter schools are using funding to provide programs to at-risk students.

For many years, PED has conducted technical program budget reviews with between 15 and 20 school districts and charter schools — for FY18 the department conducted 19 technical reviews — but with significant changes to the public school funding formula for FY20, the department decided to only conduct about six technical reviews. PED leadership indicated the department considered 2019 to be a transition year after the adoption of new accountability

PED may need to increase personnel to provide robust oversight of school district and charter school at-risk spending. PED staff have indicated it may not be appropriate for budget office staff to conduct program reviews of at-risk programs and new employees may need to be hired to help oversee these programs.

requirements in SB1 and HB5, despite the fact statutory requirements for at-risk spending predate this legislation. In response to language included in the General Appropriation Act of 2019, PED technical budget reviews in FY20 were only conducted on school districts and charter schools with lower than average spending on instruction and student services. The department points out budget office analysts and other department staff are engaging in more informal conversations with school district and charter school budget officials as part of the regular budget review process, but staffing limitations impacted the ability of the department to provide the detailed oversight of \$4.3 billion in public school spending the 1st Judicial District Court says the department should be providing.

Although statute requires a school district receiving additional at-risk program units to report the ways in which the school district and individual public schools use funding from the at-risk index, it is unclear if PED has ever required reporting at an individual public school level.

For FY20, PED reintroduced program and budget review questionnaires, to help the department identify the school districts and charter schools most in need of support in development of the educational plan, required in SB1 and HB5, beginning with FY21 budget submissions. While not meant as an accountability tool for FY20 budgets, these submissions include some data on how school districts and charter schools budgeted

at-risk funds. The questionnaires ask for a narrative regarding the at-risk services provided by the school district or charter school, as well as an accounting of at-risk spending by the school district or charter school. (See Attachment 3: Public Education Department 2019-2020 Operating Budget Documentation for Program/Budget Review). However, the categories presented in the accounting portion of the questionnaire include examples – such as student information systems or security personnel – that are not well aligned with the newly enacted statutory requirements, alongside interventions that are clearly aligned with statute — such as tutoring, after school programs, and support services, including guidance or health services. The detail included in school districts' and charter schools' responses varies. Some school districts and charter schools did not provide a detailed accounting of atrisk funds, while others included detailed accounting, including services provided with federal or other sources of funding. In general, most school districts reported spending less than their funding formula allocation for the at-risk index, but in some

Some school districts and charter schools might benefit from considering how much the state allocates for services to at-risk students when creating their annual operating budget. Based on FY2O responses, it appears that some school districts may not have considered this when developing a budget for at-risk programs.

cases, the school district noted an at-risk service in the provided narrative, but does not note that service in the detailed accounting. As a result, FY20 submissions probably do not present a true picture of at-risk spending, something that should be improved in the future. PED staff indicate the department will require additional time and training of local school district and charter school personnel to ensure these are useful tools in assessing school district and charter school budgets.

Conclusion

In recent years, school districts have argued the Legislature should prioritize funding — including funding for services to at-risk students — to the public school funding formula rather than to special department appropriations. Stakeholders have argued that increasing formula funding with state oversight through a program approval process is preferable because it allows school districts and charter schools more flexibility in building at-risk programming that meets the needs of their unique populations.

It is imperative that school districts and charter schools think strategically when building at-risk services, and prioritize funding to services that have been shown to improve outcomes for at-risk students. PED will need to support school districts and charter schools in this, and provide oversight through a robust program approval process. PED must be willing to hold school districts and charter schools accountable in the allocation of at-risk funds and ensure they meet the requirements of statute. To make this possible, the Legislature must ensure the department has sufficient resources to support its budget oversight function. Although the court has made clear that PED has tools to ensure at-risk funds are being used on programs to serve at-risk

students, the Legislature should be prepared to provide PED with additional authority if it is to meet the court's expectations of state oversight.

"22-8-6. OPERATING BUDGETS--EDUCATIONAL PLANS-SUBMISSION--FAILURE TO SUBMIT.--

A. Prior to April 15 of each year, each local school board shall submit to the department an operating budget for the school district and any <u>locally chartered</u> charter [schools] school in the school district for the ensuing fiscal year.

[Upon written approval of the state superintendent]

 $\underline{\text{B.}}$ The date for the submission of the operating budget for each school district and each charter school as .212362.1

required by this section may be extended to a later date fixed by the [state superintendent] secretary.

- [B.] C. The operating budget required by this section may include:
- estimates of the cost of insurance policies for periods up to five years if a lower rate may be obtained by purchasing insurance for the longer term; or
- (2) estimates of the cost of contracts for the transportation of students for terms extending up to four years.
- [C.] D. The operating budget required by this section shall include a budget for each charter school of the membership projected for each charter school, the total program units generated at that charter school and approximate anticipated disbursements and expenditures at each charter school.
- E. For fiscal year 2021 and subsequent fiscal years, each school district's and each locally chartered or statechartered charter school's educational plan shall include:
- (1) information on the instructional time offered by the school district or charter school, including the number of instructional days by school site and the number of hours in each instructional day and the frequency of earlyrelease days;
- (2) a narrative explaining the identified services to improve the academic success of at-risk students; .212362.1

(3) a narrative explaining the services

provided to students enrolled in the following programs:

HAFC→(a) bilingual multicultural

education programs; ← HAFC

HAFC→(b) (a)←HAFC extended learning time

programs, including a report of how the extended learning time

is used to improve the academic success of students and

professional learning of teachers; and

HAFC→(c) (b)←HAFC K-5 plus programs;

(4) a narrative explaining the school

district's or charter school's beginning teacher mentorship

programs as well as class size and teaching load information;

(5) a narrative explaining supplemental

programs or services offered by the school district or charter

school to ensure that the Bilingual Multicultural Education Act,

the Indian Education Act and the Hispanic Education Act are

being implemented by the school district or charter school;

(6) a narrative describing the amount of program cost generated for services to students with disabilities and the spending of these revenues on services to students with disabilities, which shall include the following:

(a) program cost generated for students enrolled in approved special education programs;

(b) budgeted expenditures of program cost, for students enrolled in approved special education .212362.1

programs, on students with disabilities;

(c) the amount of program cost generated for personnel providing ancillary and related services to students with disabilities;

(d) budgeted expenditures of program cost for personnel providing ancillary and related services to students with disabilities, on special education ancillary and related services personnel; and

(e) a description of the steps taken to

ensure that students with disabilities have access to a free and

appropriate public education; and

(7) a common set of performance targets and performance measures, as determined by the department in consultation with the department of finance and administration, the legislative finance committee and the legislative education study committee.

of a charter school fails to submit [a] an operating budget pursuant to this section, the department shall prepare the operating budget for the school district or charter school for the ensuing fiscal year. A local school board or governing board of a charter school shall be considered as failing to submit [a] an operating budget pursuant to this section if the budget submitted exceeds the total projected resources of the school district or charter school or if the budget submitted

does not comply with the law or with rules and procedures of the department."

"22-8-23.3. AT-RISK PROGRAM UNITS.--

A. A school district is eligible for additional program units if it establishes within its department-approved educational plan identified services to assist students to reach their full academic potential. A school district receiving additional at-risk program units shall include a report of specified services implemented to improve the academic success of at-risk students. The report shall identify the ways in which the school district and individual <u>public</u> schools use funding generated through the at-risk index and the intended outcomes. For purposes of this section, "at-risk student" means a student who meets the criteria to be included in the calculation of the three-year average total rate in Subsection B of this section. The number of additional units to which a school district is entitled under this section is computed in the following manner:

At-Risk Index x MEM = Units

where MEM is equal to the total district membership, including early childhood education, full-time-equivalent membership and special education membership and where the at-risk index is calculated in the following manner:

[(1) for fiscal year 2019,

Three-Year Average Total Rate x 0.130 = At-Risk Index;

(2) for fiscal year 2020,

Three-Year Average Total Rate x 0.140 = At-Risk Index; and

16

.212362.1

(3) for fiscal year 2021 and subsequent fiscal years]

Three-Year Average Total Rate x [0.150] 0.25 = At-Risk Index.

- B. To calculate the three-year average total rate, the department shall compute a three-year average of the school district's percentage of membership used to determine its Title [\(\frac{1}{2}\)] \(\frac{1}{2}\) allocation, a three-year average of the percentage of membership classified as English language learners using criteria established by the [\(\frac{federal}{2}\)] office [\(\frac{of}{2}\)] \(\frac{for}{2}\) civil rights of the United States department of education and a three-year average of the percentage of student mobility. The department shall then add the three-year average rates. The number obtained from this calculation is the three-year average total rate.
- C. The department shall recalculate the at-risk index for each school district every year. HEC→"←HEC
- HEC→D. For purposes of this section, "services" means research-based or evidence-based social, emotional or academic interventions, such as:
- (1) case management, tutoring, reading interventions and after-school programs that are delivered by social workers, counselors, teachers or other professional staff;
 - (2) culturally relevant professional and

.212362.1

curriculum development, including those necessary to support language acquisition, bilingual and multicultural education;

- (3) additional compensation strategies for high-need schools;
- (4) whole school interventions, including school-based health centers and community schools;
- (5) educational programming intended to improve career and college readiness of at-risk students, including dual or concurrent enrollment, career and technical education, guidance counseling services and coordination with post-secondary institutions; and
- (6) services to engage and support parents and families in the education of students."←HEC
