## About Me

[neepa.acharya@adhara.health](mailto:neepa.acharya@adhara.health)

# Principles

- 01** Regulate Harm – not just technology

---

- 02** Differentiate Between Risk Levels

---

- 03** Don't Accidentally Regulate Small Business Out of Innovation

---

- 04** Transparency Builds Trust

---

- 05** Make NM the Best State to Build Responsible AI

## Healthcare Example

# TEFCA: Why Health Data Infrastructure Matters for AI

*"The future of AI oversight is not simply about regulating artificial intelligence. It is about governing the entire ecosystem in which AI operates"*

How do we govern the digital infrastructure that AI depends on?

- Interoperability paired with transparency, accountability and community-based governance
- Oversight that is comprehensive, practical & innovation-friendly

Meet the 2026 Cohort.

- AI is an economic development opportunity
- Businesses want clear, consistent, risk-based oversight
- Good governance connects to AI
- Oversight builds trustworthy AI

*NM creates trusted AI through thoughtful regulation that protects people while giving innovators confidence to build*

***NM has an opportunity to lead– by creating a uniquely New Mexican model built on trust, innovation, collaboration & responsible growth.***
