

**GO-STATION**

*Electric Vehicle Charging*

---

*Solutions that power the future of mobility*

**GO-STATION**

Company Background

- Go-Station owned and operated network
- Out-side Client Services
  - Turn-key charging solution
  - Equipment,
  - Construction, management
  - Maintenance
  - 24/7 customer support
- Proprietary mobile app
  - Access to more then 45,000 charging ports nationwide
  - Rewards and incentives

# Brand Identity

## Go-Station has your back

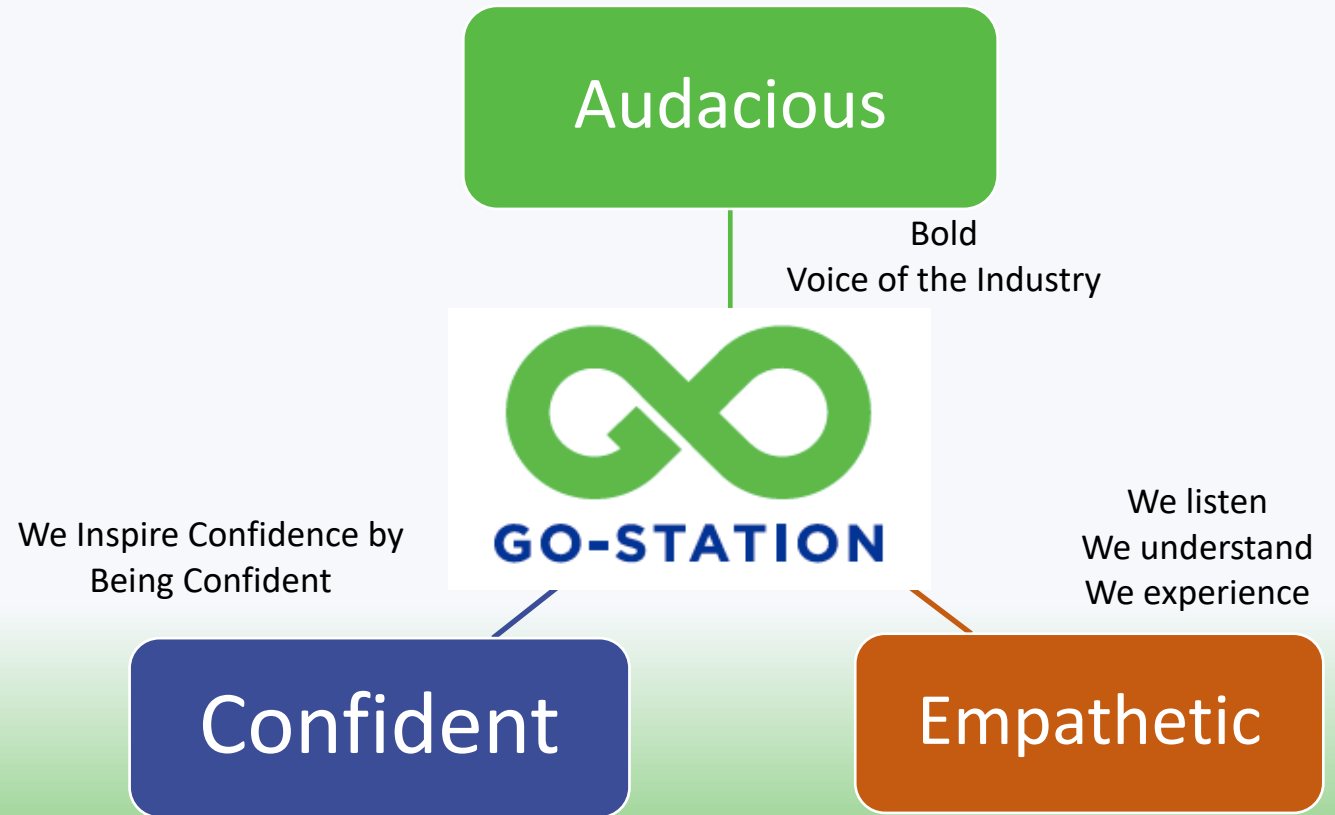

We identify what EV drivers want and then strive to exceed their expectations. The EV experience should be fun and stress free. Go-Station will be there as an exceptional traveling companion.

## Go-Station is environmentally conscious

We believe in the benefits of alternatively-fueled vehicles as much as our customers. Everything we do reflects our commitment to the environment.

## Go-Station is forward thinking

We know how important it is to address our customers' current pain points, but we also understand that the alternatively fueled community is evolving. We are committed to evolving with the industry, continuously innovating and devising ways to exceed expectations.

[Press Coverage](#)

**WALLENIUS WILHELMSEN  
LOGISTICS**

### **Background:**

- 128 vessels servicing 15 trade routes to six continents, together with a global inland distribution network, 121 in-land processing centers, and 9 marine terminals
- Their goal is a zero-emission full-lifecycle supply chain for vehicles

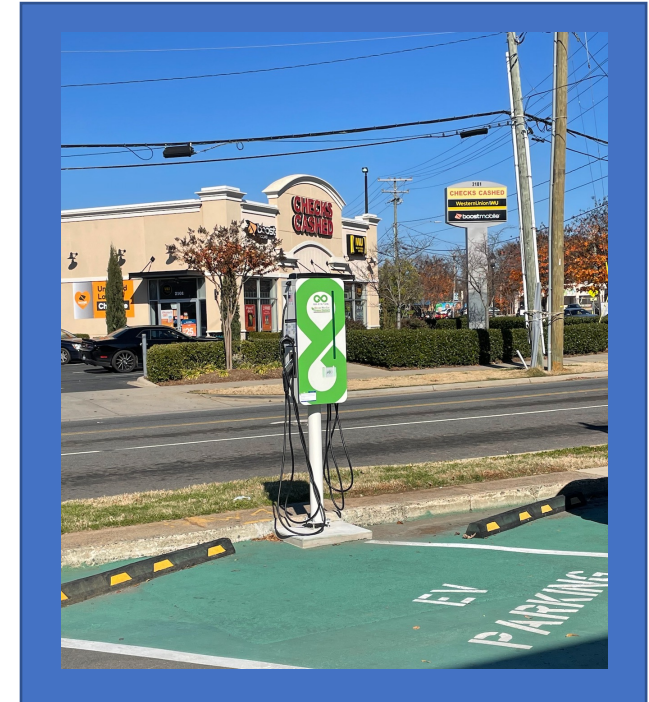

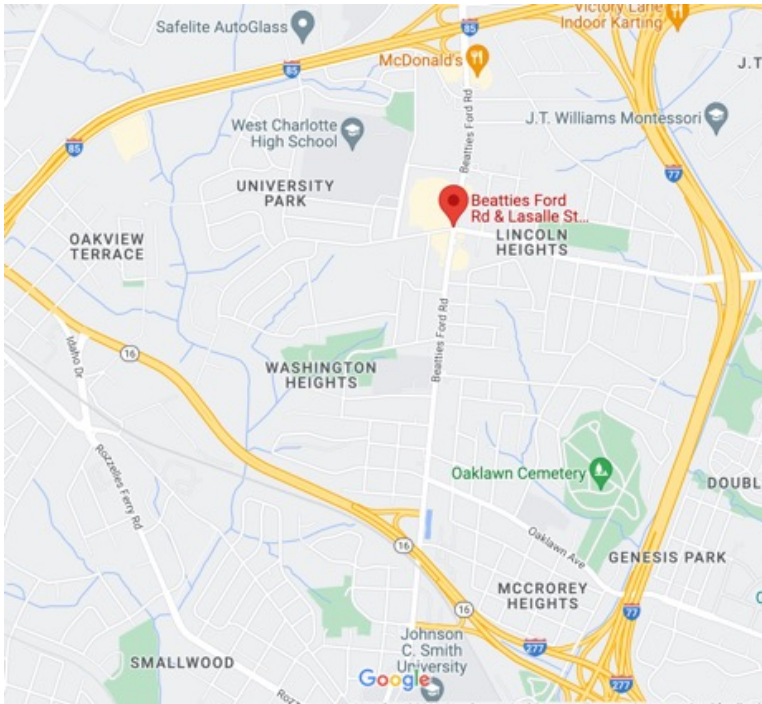

### **The Solution:**

- Deploy a distributed network of EV charging stations across 5 port locations servicing:
  - EVs from multiple brands
  - On-site forklifts
  - Port to truck terminal route infrastructure

# Beatties Ford Rd Charlotte, NC

In partnership with CleanAir NC and the Historic West End Green District, we are working at the intersection of Environment + Economy + Equity

Capabilities

# What We Do

## Discovery

- Needs, Wants, Desires -
- Short, Mid, Long-term Goals -

## Software

- Front end
  - Mobile app (Find & Reserve a Charge)
- Back-end
  - Remote monitoring
  - Custom policy/pricing plans
  - Sustainability metrics
  - Energy Management
- Reporting
  - Sustainability metrics

## Hardware

- Networked OCPP Compliant
- All power levels - L2 to 350kW DCFC (exploring mega-watt charging)
- Variety of configurations to fit the use case
  - Networked
  - RFID
  - Pedestal/Wall mount

## Services

- Consulting
- Site selection & evaluation
- Project management
- Construction
- Customer Support
  - (24/7) Driver Support

# Enablers for success....

**Future Proof Deployments:** Working with utilities and key stakeholders to build scalable solutions.

**Innovation:** Some chargers can use the equivalent power of 125 homes. On-site energy storage and integrated solar solutions can help mitigate stress on the grid. Additionally, considerations of mixed fuel site deployments that contemplate hydrogen.

**Customer Experience:** An interconnected network of reliable charging and accessible charging systems.
