

Rehoboth McKinley
Christian Health Care Services

Maridel Acosta-Cruz, MBA
Chief Executive Officer

Hospital Update

- **Serving the Gallup community, McKinley County, and the surrounding tribal and rural communities.**
- **Our hospital successfully completed its triennial accreditation survey conducted by the Center for Improvement in Healthcare Quality, or CIHQ, a CMS-approved accrediting organization. Our team performed exceptionally well, and we passed the survey with excellent results.**
- **One week later, our Rural Health Clinic underwent a separate accreditation survey conducted by The Compliance Team. Once again, our team performed very well. These successful surveys reflect the dedication of our employees, medical staff, leadership team, and Board of Trustees to providing safe, high-quality care.**
- **We remain focused on continuously improving the quality of care provided to the patients and families of our community.**
- **We are actively recruiting physicians and providers in several priority areas, including Cardiology, Orthopedic surgery, General Surgery, and Primary Care.**
- **We are working to streamline our processes, improve operational efficiency, and implement responsible cost-containment measures. These efforts are essential to strengthening the hospital's financial sustainability and ensuring that Rehoboth McKinley Christian Health Care Services remains available to serve this region for many years to come.**
- **We recognize that rural healthcare organizations continue to face significant workforce, financial, and access challenges. However, we are encouraged by our progress and optimistic about the future of our hospital.**

Thank you!
