Ensuring Equity Through Spending: School-Level Spending Reported Pursuant to the Federal Every Student Succeeds Act Prepared by Joseph W. Simon, Principal Analyst, LESC

## Summary

- The federal Every Student Succeeds Act requires a school's report card to include expenditures of federal funds and state and local funds per student.
- Advocates proposed this provision to urge school districts to evaluate spending across individual school sites within a school district and start funding equity conversations within school districts.
- This summer, PED released per-pupil expenditure (PPE) data for FY191. The spending data includes amounts for instruction, student support services, and centralized costs, but excludes food service, capital outlay, and debt services.

## Data Limitations

- Comparability of data across school districts is limited because school districts are able to choose their method for allocating central costs.
- Only one year of data is available for analysis; these data may be inconsistent from year to year. In addition, school districts may not have considered site-level spending prior to this year.
- The data includes spending for special programs or populations of students that may not be uniform across school sites, such as special education.
