When you call them, email them or write them a letter remember to tell them you support the Tularosa Basin Downwinders Consortium and their efforts to amend the Radiation Exposure Compensation Act. You can add your own history and tell them about what has happened to you since the overexposure to radiation you received from the Trinity test. Tell them the stories of your family members as well and what it has meant to be ignored for the past 76 years. Please also share this information with your family and friends from throughout New Mexico and other parts of the country. We need everyone from every state to contact their members of Congress too. The original bill will end in 2022 so we only have a year left to get this done.
