

Transportation Infrastructure Revenue Subcommittee

Updates on Transportation and Road Issues in Artesia, NM

1. Request to install a traffic signal at 285 and Mill Rd.
 - The City has established a warrant for this intersection based on the Multi-Way Stop & Signal Warrant Analysis of January 2011.
2. Rehabilitation of the inside lanes of Main St. from 7th to 13th St. (*pictured on the back*)
 - The road in this area is showing road failure and severe fatigue cracking.
 - Request to replace or upgrade the traffic signal at 7th and Main St. This is the second oldest traffic signal in the community and has had a repetitive history of failure in the last five years.
 - Request to install ADA Ramps and a crosswalk for the community.
3. The City would like to request replacement or upgrade of the traffic signal on 20th and Main St.
 - This is the oldest traffic signal in the community and has also had a repetitive history of failure in the last 5 years.
4. Rehabilitation of 285 (1st St.) and Main St. (*pictured on the back*)
 - Heavy road traffic in the area has caused the intersection to experience severe rutting, especially in the Northbound section of 285.
5. Intersection of Mill Rd and 285 (1st St.)
 - The City would like to request a deceleration lane for Northbound traffic for a left-turning lane hold and queue.
 - Due to the existence of a business at the intersection, the left-turn holding queue was overlooked or not installed which causes a safety risk to the public driving on 285.

#2 Main St. From 7th-13th St

#4 285 (1st St) & Main
