

\$5 BILLION FEDERAL PROGRAM PUTS ELECTRIC SCHOOL BUSES WITHIN REACH OF EVERY NEW MEXICO SCHOOL DISTRICT!

With Appropriate Support from the State of New Mexico, Our Most Vulnerable Students Could Soon Be Breathing Clean Air While More of Our Taxpayer Dollars Get Into Classrooms!

A Win, Win, Win, Win, Win!

Retiring Diesel buses in favor of Electric buses provides big benefits for New Mexico students, educators and communities, including:

- Reduction of asthma and other respiratory problems among students
- Reduces environmental and health disparities among NM students
- Students and staff will no longer be forced to breathe unhealthy diesel exhaust every day
- Improved health is directly linked to student's ability to perform better academically
- More funds can be used directly for instruction, rather than paying for high cost diesel fuel and diesel engine maintenance
- Rural New Mexicans can gain access to local EV chargers when Districts join with electricity providers as is being done in Southeast New Mexico's Lake Arthur
