

Cd. Juárez. Chihuahua, September 7, 2023

Marco Grajeda

Executive Director
New Mexico Border Authority

In the context of a mutual interest to enhance the economy and mobility of our region, we join in the efforts to promote, from the responsibility of each of us, the Modernization Project of the Jeronimo Crossing – Santa Teresa; we are convinced not only of the importance, if not of the need and urgency that we have to develop crossings with solid and dynamic infrastructure that respond to the immediate and future needs that concern us as a region.

Generating positive impacts on mobility, the environment, on the economy and on the socio-cultural relations of our ecosystem require a dynamic and fruitful alignment of binational efforts.

We express our commitment and interest in adding, from our organizations that we represent, so that this great project reaches an integral development that leads our region to position itself as the most important in the continent.

We extend a cordial greeting to you and your entire team.
