

Community Solar: Savings for EPE Customers

Overview

What	Community solar projects built to bring savings to local households
Where	Projects built in Doña Ana County county
Who	Open to income-qualified EPE customers
When	Projects expected to turn on by the end of 2025

Subscription Details

Savings Rate	28% on Community Solar Credits
Cancellation Fee	The length of your subscription is a 1 year term that then auto-renews every year until cancellation.
Length of Subscription	There's no cancellation fee—just try to give us 90 days' notice so we can fill your spot. You'll continue to pay for credits applied to your bills during that time.
Billing Type	You'll get two bills each month: your electric bill with solar credits applied, and a separate Solstice invoice charging you for those credits at a discount. Together, they'll cost less than your usual bill.
Qualification Criteria	New Mexico community solar is for income-qualified households. Just confirm your income is below 80% of your area's median—Solstice will handle verification during signup.

How Community Solar Works

A nearby solar project is **built**, and both renters and homeowners can subscribe to a share that matches their energy usage.

Solar projects send **power through your utility's grid**, so there's nothing to install and no extra cost to take part.

You'll keep getting **electricity from your utility as usual**—no changes to your daily life, just monthly savings and the satisfaction of supporting clean energy.

Total Savings \$20.00

Electric charges (\$102.00) - Electric bill balance (\$32.00) - Solar bill balance (\$50.00)

How your utility bill shows your solar savings

1. Each month, you'll still get your usual electric bill—only now with solar credits that lower your utility charges. A small community solar fee will apply, but it's always less than your savings.
2. Separately, you'll receive a Solstice invoice for those credits, billed at your locked-in discount rate.

The Benefits

You'll enjoy dependable savings on your monthly electric costs—**no installation, no hidden fees.**

On top of that, you'll be supporting local, renewable energy that benefits your community. It's a simple way to save money and make a difference. Finally, an electric bill you can feel good about!
