Honorable Members
Fifty-Sixth Legislature, Second Session
State Capitol
Santa Fe, NM 87501

Dear Legislators:

Despite a third year of robust revenues, impressive reserves, and projections that could have resulted in substantial spending in FY25, legislators—conscious of long-term forecasts of slowing revenue growth—exercised restraint on ongoing spending and continued to build on efforts to extend the benefits of the current boom by turning today’s dollars into future dollars.

Central to that effort was the transfer of \$838 million from the general fund to the newly created government results and opportunity expendable trust and its program fund for multiyear appropriations to pilot a range of initiatives, including an early childhood wage and career ladder, prevention and intervention services in child protection services, behavioral health programs, career exploration and pre-apprenticeship programs, and geothermal resource development. The General Appropriation Act of 2024 also transferred \$300 million from the general fund to fully capitalize the conservation legacy fund, which benefits natural resources programs, and boosted funds in the water trust fund.

For ongoing spending, the General Appropriation Act of 2024 authorizes \$10.2 billion in recurring general fund appropriations, a 6.8 percent increase over the operating budget for the current year. The GAA provides \$89 million for a public employee pay increase of 3 percent and targeted increases for state police and the Environment Department. We continued to prioritize early childhood, public schools, higher education, as well as health and human services agencies, with the latter receiving an increase of nearly \$230 million, including \$11.5 million for rural hospitals. In addition, the GAA authorizes nonrecurring spending of \$1.25 billion for public infrastructure, road projects, rural hospital expansions, and other one-time costs.

Sincerely,

A handwritten signature in black ink, appearing to read "George Muñoz".

Senator George Muñoz
Chairman

Fiscal Review and Outlook

After three consecutive years of continuous increases in the state revenue forecast, the December 2023 forecast moderated in advance of the 2024 legislative session. Recurring revenues for FY24 were estimated at just over \$12.77 billion, up \$157 million from the August estimate and up \$1.2 billion from estimates a year earlier. Fiscal year 2025 recurring revenues were estimated at just over \$13 billion, down slightly from the prior forecast as revenues return to prepandemic trends and tax cuts take effect. “New money,” or projected recurring revenues for the following fiscal year less current year recurring appropriations, was estimated at almost \$3.5 billion for FY25, representing 36.4 percent growth from the FY24 recurring budget.

Fiscal year 2023 ended with \$4.04 billion in general fund reserves, or about 48 percent of recurring appropriations. With healthy levels of “new money” and large reserves, the Legislature passed measures to improve the state’s economic position and support state programs serving New Mexicans. During the 2024 regular session, lawmakers provided for over \$260 million in recurring tax changes to lower the burden on families and provide incentives for targeted industries, over \$1.4 billion in infrastructure and capital outlay, and increased recurring budgets by 6.8 percent to \$10.2 billion in FY25. Fiscal year 2025 reserve balances are projected to end the fiscal year at 32.2 percent of recurring appropriations after governor vetoes.

General Appropriation Act of 2024

New Mexico’s financial boom extended into the 2024 legislative session, with strong revenue growth continuing to support unprecedented budget growth. New Mexico is projected to have \$13.05 billion in general fund revenue in FY25, including new money. The LFC recurring budget recommendation totaled \$10.1 billion, a 5.9 percent increase over the FY24 operating budget, with \$1.1 billion set aside for nonrecurring or special appropriations. Growth in the recommendation was driven by health and human services and education, with general fund recommendations growing over \$200 million for each of those sectors. General fund appropriations for the new Health Care Authority approached \$2 billion, up from \$1.6 billion in FY24, although a portion of that growth is attributable to absorption of programs from other agencies, including the Department of Health. The LFC budget plan also included a strategy to leverage over \$1 billion in new money for multiyear investments in evidence-based services, with guardrails included to measure implementation and outcomes, left reserves at 30 percent of planned spending, and left \$200 million for tax code changes.

The executive budget recommendation came in at \$10.5 billion, reflecting a proposed 10 percent increase in recurring spending and an additional \$2.1 billion in nonrecurring or special appropriations. Most executive agency budget

Fiscal Review and Outlook

recommendations were significantly higher than LFC's, except for compensation where LFC recommended a 4 percent increase for all employees compared to an executive recommendation of a 3 percent increase. The largest gap between the

LFC and executive recommendations was for the Health Care Authority, with the executive coming in \$197 million above LFC. However, a Medicaid forecast released after budget recommendations were made showed slower growth in cost and enrollment than anticipated, reflecting needs closer to the LFC recommendation.

The General Appropriation Act of 2024 (GAA), as passed by the Legislature and signed by the governor, authorizes \$10.2 billion in recurring general fund spending, a 6.8 percent increase over the FY24 operating budget. The GAA provides \$89 million for compensation increases, including a 3 percent compensation increase for all state employees and targeted increases for state police and the Environment Department.

The GAA continues to prioritize education by increasing recurring spending for early childhood, public schools, and higher education by over \$270 million. The increase further expands prekindergarten services, provides for prekindergarten and childcare quality supports, fully funds universal free school meals, and increases investments in literacy initiatives. Significant nonrecurring investments to education reflect over \$150 million for promising or proven initiatives, including literacy initiatives, career and technical education, community schools, educator fellows, out-of-school-time learning, special education initiatives, high dosage tutoring, health professional

loan repayment, and graduate scholarships for New Mexico high school graduates. Additionally, multiyear appropriations through the government results and opportunity program fund (GRO), created by Chapter 18 (HB196) includes funding to pilot an early childhood wage and career ladder, educator clinical practice, stipends and pay differentials for hard to staff special education positions, and workforce training at higher education institutions.

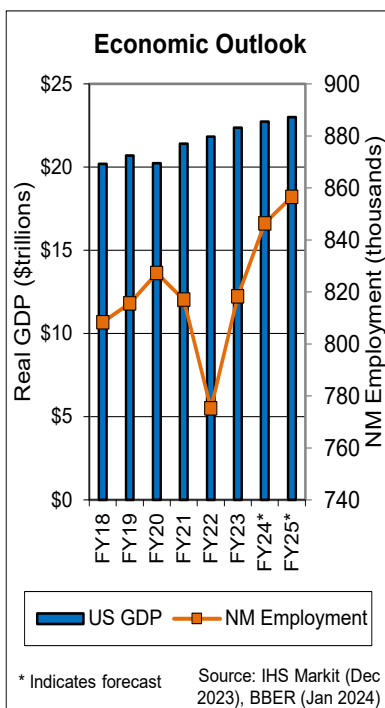

The GAA increases recurring appropriations to health and human services agencies by nearly \$230 million, increasing Medicaid rates for rural hospitals (\$11.5 million) and providing an additional \$8 million to increase Medicaid rates for services for people with developmental disabilities. Nonrecurring appropriations include \$50 million to support the operations of small hospitals and supports for vulnerable populations, with \$5 million for food banks, \$50 million for the housing trust fund, and \$125 million to the opportunity enterprise revolving fund earmarked for housing development projects. Additionally, the GRO appropriations include funding to address numerous needs at the Children, Youth and Families Department, including high staff vacancy and turnover rates, unleveraged federal funds, and significant unspent appropriations, through pilots to improve differential response, service availability; provider training; hiring, recruitment, retention of staff, and improved qualification of employees. Recognizing the need for additional oversight over health and human services agencies, the largest cost center in state government when considering all funding

Source: LFC files.

sources, House Bill 1, the “feed bill” that pays for legislative operations, provides LFC with additional resources supporting new positions for this purpose.

The 2024 GAA provides another massive influx of nonrecurring spending: nearly \$1.5 billion in special appropriations for FY24 and FY25 and another \$1.3 billion in fund transfers for future and multiyear spending. Nonrecurring spending includes major investments in transportation, law enforcement, housing, economic development, healthcare and services in rural areas, water and natural resources, quality of life, and higher education. In addition, \$512.2 million is allocated to the GRO expendable trust fund for future spending, and \$325.8 million is allocated to the GRO program fund for expenditure on pilot programs over the next three years (FY25-FY27).

The governor vetoed a few parts of the GAA, including language and special appropriations. Some vetoes are within constitutional boundaries, but some are potentially improper and seek to change, alter, or frustrate legislative intent (see Appendix D for a list of vetoes). Most concerning, the governor struck 12 of 27 pieces of language calling for use of evidence-based programs. The governor also struck several guardrails for oversight and reporting on program performance. Appropriations struck include funding for a creative media institute and appropriations for a school of public health. The governor also vetoed \$90 million that was contingent on the passage of companion legislation, although that funding was already eliminated by the failure of the companion legislation to pass.

Economic Outlook

New Mexico has experienced record revenues since 2021, with spikes in oil and gas prices and production, growing incomes, strong consumer spending, higher tax revenues as a result of stubborn inflation, and rebounding employment all contributing. While strong state revenues have inspired confidence in a stable economy without tipping into a recession, economists are predicting economic moderation, with revenues returning to prepandemic trends.

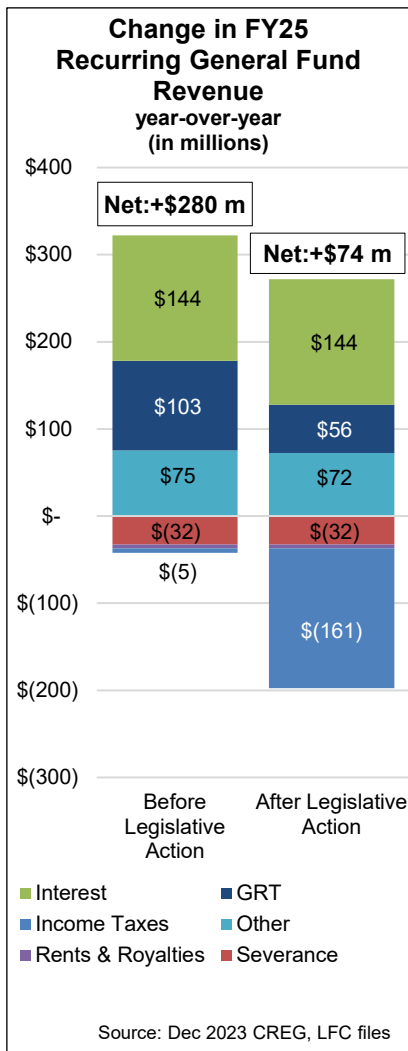

New Mexico total employment, which contracted by 12.2 percent during the pandemic, was up 12.4 thousand jobs in December 2023, or about 1.4 percent above the prepandemic peak, according to the U.S. Bureau of Labor Statistics. By mid-2022, unemployment had dropped to 3.4 percent, the lowest it has been since before the 2008 recession and equal to the national rate. However, unemployment is creeping up, increasing to 4 percent in December 2023, half a percentage point higher than six months prior and slightly above the national rate of 3.7 percent. With low unemployment, growing wages, and open jobs, New Mexico is likely at full employment. However, New Mexico’s labor force participation rate—the share of working-age New Mexicans with or seeking jobs—is 57.3 percent, significantly lower than the national rate of 62.5 and still 1.4 percent below prepandemic levels. However, New Mexico is gaining; the New Mexico labor force participation rates continue to climb into 2024 while U.S. rates are stagnating and possibly starting to decrease.

Over the last year, West Texas Intermediate oil prices have risen from \$68 per barrel in March 2023 to \$93 per barrel in September 2023, with prices

Change in FY25 Recurring Revenue Estimate
Before and After Legislative Action
FY24 vs FY25
(in millions)

Income Taxes	(\$5)	(\$170)	(\$175)
GRT	\$103	(\$31)	\$72
Other	\$75	(\$3)	\$72
Total	\$280	(\$204)	\$76

At a Glance: The 2024 Tax Package

House Bill 252 cut up to an estimated \$266.5 million in recurring revenues in a series of tax changes, including

- \$176 million for income tax rate and bracket restructure
- \$17 million in revenue gains to create a flat corporate income tax
- \$65 million in revenue gains to limit the capital gains deduction
- \$18.1 million for targeted expenditures for health care and childcare
- \$126 million for targeted expenditures for environmental initiatives
- \$12 million to indefinitely exempt some military retirement income from income tax
- \$6 million for a GRT exemption for dyed diesel used in agriculture
- \$8 million for targeted expenditures for wildfire victims
- \$2 million for angel investments

in 9 of the last 12 months averaging prices between \$70 per barrel to \$80 per barrel. The relative price stability and sufficiently high prices continue to provide incentive for oil production in New Mexico. The state’s oil production had remained stable around the record production levels in March 2023 before setting a new record in December 2023. The associated gas production has similarly set new highs, however at slowing acceleration. With the latest analysis suggesting the state needs more than 90 active drilling rigs to maintain current production levels, the state’s average of over 100 rigs suggests more growth is expected. However, the maximum growth potential remains ambiguous.

Legislation Affecting Revenues

In total, legislation passed during the 2024 regular session is estimated to reduce recurring general fund revenue by \$204.5 million in FY25, \$220 million in FY26, and \$259.7 million in FY27.

LFC-Endorsed Legislation

LFC endorsed eight bills for the 2024 session, with seven passing the Legislature—six signed by the governor and one vetoed. The enacted legislation:

- Chapter 18 (HB196) creates the government results and opportunity expendable trust and program fund.
- Chapter 4 (SB153) increases the distribution of the early childhood education and care program fund by \$95 million.
- Chapter 61 (SB159) creates the higher education financial aid endowment fund.
- Chapter 25 (SB116) removes the tobacco settlement fund from general fund reserves.
- Chapter 10 (HB232) creates the Infrastructure Planning and Development Division within DFA.
- Chapter 44 (SB161) provides quarterly subsidies to smaller acute care hospitals.

The LFC endorsed, but the governor vetoed, SB217, which would have ensured savings from avoided debt transfers to the severance tax permanent fund. LFC also supported SB222, which included reforms to the Local Economic Development, Act but the legislation died in committee.

Tax Changes

Chapter 67, the enacted version of the omnibus tax package contained in House Bill 252, was not significantly altered by governor vetoes from the version passed by the Legislature. The governor vetoed one severance tax exemption targeted at covering the cost of regulatory compliance for certain stripper (low producing and older) oil wells. This veto and the proposed provision have no immediate general fund impact because severance taxes flow into the severance tax bonding fund to be used for capital outlay before reaching the severance tax permanent fund, which is invested for the benefit of the general fund.

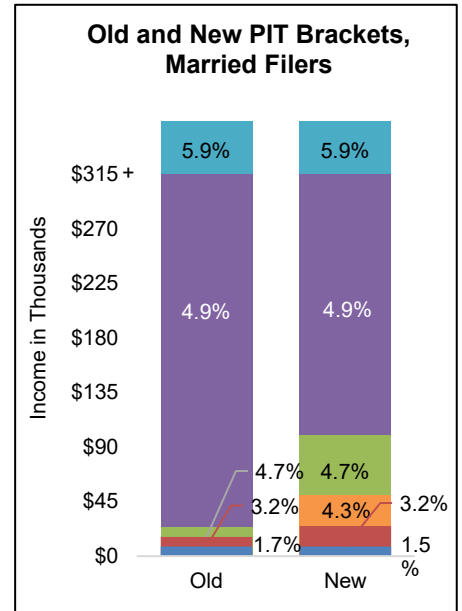

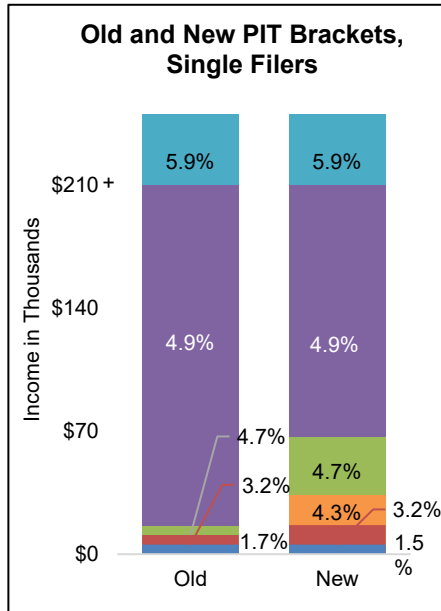

Chapter 67 restructures the personal income tax rates and income brackets to increase the number of brackets, adjust the rates, and change the income range within each bracket (see the personal income tax bracket comparison table below).

The new personal income tax structure decreases taxes for all taxpayers, with the rate decreases targeted at the lowest income earners. Single filers with incomes below \$66.5 thousand and married filers with incomes below \$100 thousand will see a tax rate decrease. Those with incomes above those thresholds maintain the same top tax rate as currently in statute but will see a tax liability decrease due to the marginal structure of personal income taxes.

Chapter 67 targets environmental initiatives with over \$126 million in credits and deductions. This includes up to \$56 million for electric and hybrid vehicle tax credits and electric vehicle charger tax credits, \$2 million for a deduction for energy storage facilities included in local industrial revenue bonds, \$15.4 million in credits for geothermal heat pumps and geothermal electricity generation, \$25 million for advanced energy equipment credits for utility-scale electricity production, and \$18 million for residential and commercial solar panel purchase and installation credits.

Chapter 67 includes over \$18.1 million from the general fund in targeted tax expenditures for healthcare and childcare, including over \$11 million to expand the rural practitioner health care credit, over \$4 million to exempt certain childcare providers from the gross receipts tax (GRT), and under \$1 million each to expand the special needs adopted child tax credit and to deduct up to \$1,000 of school supplies purchased by teachers.

Chapter 67 offers two forms of tax relief for victims of wildfires. First, it provides an income tax credit for taxpayers whose homes were destroyed in a wildfire between 2021 and 2023. The tax credit is equal to the full amount of the construction costs of a home up to \$50 thousand per home and can be used against taxpayer’s tax liability for up to three years. Second, it provides a GRT deduction for legal services provided in the recovery

Personal Income Tax Bracket Comparison

of federal compensation for damages related to the Calf Canyon/Hermits Peak federal assistance.

Finally, Chapter 67 raises some revenues by an estimated \$83.1 million. First, the corporate income tax rate was flattened to one rate at 5.9 percent, regardless of the profit of a corporation. Second, Chapter 67 limited the capital gains deduction to \$2,500, repealing the 40 percent deduction except in the case of a sale of a New Mexico business of up to \$1 million of income. Last, it brings certain corporate foreign income back into the tax base.

Other General Fund Revenue Legislation

The Legislature adopted nearly \$162 million of other revenue decreases and over \$116 million of revenue increases outside of the tax package.

The largest general fund impact outside of the tax package is from Chapter 14 (Senate Bill 17), which imposes assessments on most hospitals in the state based on non-Medicare utilization and assessments reimbursed back to participating hospitals with matching federal Medicaid dollars to improve and increase access to healthcare services in the state. The act takes advantage of the multiplier effect of an almost 75 percent Medicaid match (FMAP), with the assessment providing the state's 25 percent share and achieving a \$3 revenue impact for every \$1 assessment. This generates around \$115 million per year for the general fund from increased premiums and resulting premiums tax, and nearly \$1.5 billion for the new health care delivery and access fund.

Chapter 32 (Senate Bill 7) also addresses healthcare in the state by distributing around \$85 million of health insurance premium surtax revenues annually to the health care affordability fund (HCAF) instead of the general fund beginning in FY26. Chapter 27 (Senate Bill 151) similarly redistributes 5 percent, or roughly \$11 million annually, of health insurance premium tax revenues to the emergency medical services fund instead of the general fund beginning in FY26 to be used primarily for grants to local governments for emergency medical services.

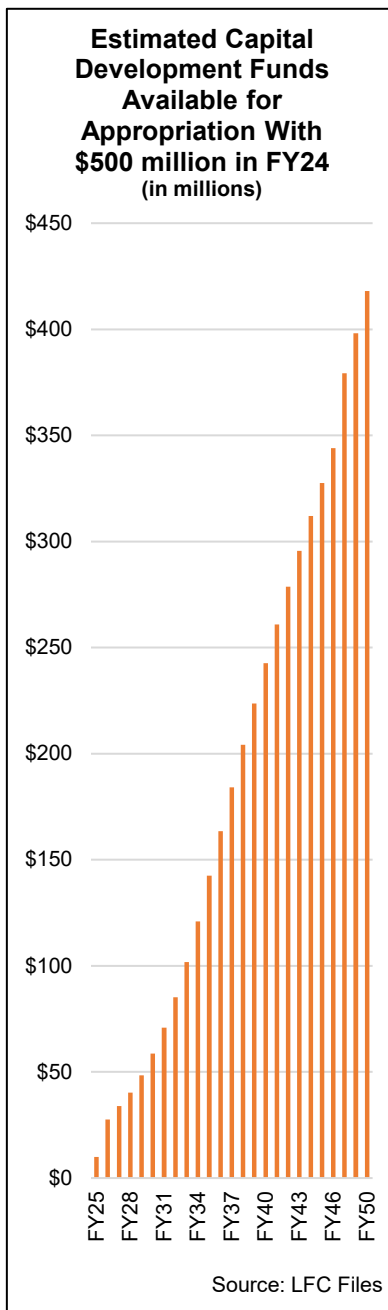

Chapter 59 (Senate Bill 148) fully eliminates administrative costs and fees that are currently withheld from local government tax receipts by the Taxation and Revenue Department for the cost of administering local taxes. The elimination of such cost sharing is expected to result in general fund revenue losses of over \$45 million, annually.

Chapter 24 (Senate Bill 108) creates an earmark of up to \$15 million from the general fund to the state election fund to be used by the Secretary of State for the administration of elections.

Lastly, Chapter 29 (Senate Bill 165) changes the formula for calculating legislators' pension benefits, increasing them by 50 percent and costing the general fund an estimated \$1.5 million per year.

Revenue Stabilization and Long-Term Planning

Following a year of study by the Legislative Finance Committee and the Revenue Stabilization and Tax Policy Committee in the 2023 interim, the Legislature

passed, and the governor signed, chapter 56 (House Bill 253) to address the fossil-fuel-related volatility of the capital outlay and severance tax bonding programs, to prepare for potential long-term declines in oil and gas revenues, and to prevent the state from taking on an excessive debt burden.

Chapter 56 makes several changes to the severance tax bonding act to mitigate risks to the capital outlay program and support the Legislature's ability to make robust investments in capital projects today and in the future. Capital outlay is the state program most reliant on oil and gas revenues. And though the Legislature has taken steps to insulate the general fund from oil and gas volatility, there was no back-up plan for the capital program. Due to the current surge in oil and gas revenues, the capital outlay program has unprecedented severance tax bonding capacity. But those revenues are expected to decline and, without Chapter 56, would have significantly reduced capital outlay capacity. Additionally, the dramatic increase in debt capacity in the severance tax bonding program presented a risk to state credit ratings.

Chapter 56 establishes mechanisms to address these separate but related problems and builds long-term resiliency for the capital program by tying bonding capacity to median state debt ratios to safeguard bond ratings and constrain the level of long-term debt issued every year. These constraints will still preserve significant levels of bonding capacity at levels far above historical availability.

Chapter 56 also includes a mechanism to turn today's surpluses into future recurring revenue for capital projects by distributing the savings from the reduced long-term bonding capacity to a new fund dedicated for capital outlay. The fund, managed by the State Investment Council, is the "plan b" for capital outlay as oil and gas revenues decline. This fund will act as a reserve for state debt, ready to cover existing or future debt service in the event of a sudden oil price crash or some other drop in revenues that could otherwise put the ability to repay debt at risk. Finally, each year the fund will spin off 5 percent of the balance to be appropriated by the Legislature for capital projects. Distributions would grow over time to more than \$400 million per year by FY50, assuming the Legislature does nothing to build the fund beyond what's stipulated in Chapter 56. Appropriations can be made for capital projects with a total cost of less than \$5 million and for planning and design of higher-cost capital projects.

Other Fiscal Legislation

Chapter 25 (Senate Bill 116) was endorsed by the Legislative Finance Committee and removed the tobacco settlement permanent fund from the general fund reserves so the fund could be invested with higher return targets and provide increasing distributions to tobacco treatment and cessation. It also helps to reflect reserve balances more accurately by showing only those accounts intended to be used in the event of a revenue downturn.

Chapter 18 (House Bill 196) created the government results and opportunity (GRO) expendable trust and the government results and opportunity (GRO) program fund. Each fiscal year, 25 percent of the balance of the trust will be transferred to the program fund, which is available for appropriation by the Legislature. The initial transfer of \$512.2 million into the trust will be expended by FY31 after accounting for investment earnings. In doing so, the Legislature will spread the

current surpluses over several years and ensure agencies can demonstrate effective implementation of proven programs before growing recurring base budgets for those uses. The bill also changed the overflow mechanism of the general fund operating reserve so that excess revenues are distributed to the GRO trust instead of the tax stabilization reserve. The balance in the GRO trust is used in the calculation of state reserves in FY25 only.

Fiscal Outlook

Despite the many tax changes made during the session, many state tax issues remain, including the need to broaden the tax base, modernize old tax structures, increase business competitiveness, and update the tax code for inflation.

Various tax credits, deductions, and exemptions including those passed this session have narrowed the tax base and encouraged high tax rates. While revenues are currently at record highs and the erosion of the tax base or increased earmarks away from the general fund is not an immediate concern, any shocks to the state’s main revenue streams, namely oil and gas revenues, GRT, and income taxes, could jeopardize current budget levels into the future. Narrowing the tax base, especially with piecemeal or highly targeted tax breaks, often results in inequities in taxation across demographics or income levels and creates uneven playing fields for businesses providing the same products or services. Tax reform should include a comprehensive review eliminating, capping, or adding sunsets to existing tax expenditures to broaden the tax base and reduce tax rates.

Although the progressivity of the personal income tax was addressed in Chapter 67 (House Bill 252), the new brackets maintain the so-called “marriage penalty.” This results in married filers moving into higher income tax brackets at lower incomes than equivalent single filers and, therefore, paying more taxes on the same individual income. Eliminating the marriage penalty could improve simplicity and horizontal equity in the personal income tax.

As the world transitions away from fossil fuels, the state will likely need to consider viable ways to bring wind, solar, and hydrogen-based energy into its recurring tax base while balancing the taxation of renewable energy with the state’s competitiveness for the industry to grow. As new markets are sought for inclusion in the tax base, more study is needed to determine the optimal balance between taxing and recruiting renewable energy production in New Mexico.

General Fund Financial Summary and FY24-FY26 Outlook

Due to a resurgent oil and gas market, general fund reserve balances ended fiscal year 2023 at 48 percent, or \$4.04 billion. Reserve balances were also propped up by growth in GRT and income tax collections, especially as inflation continues to prop up the tax brought in by both.

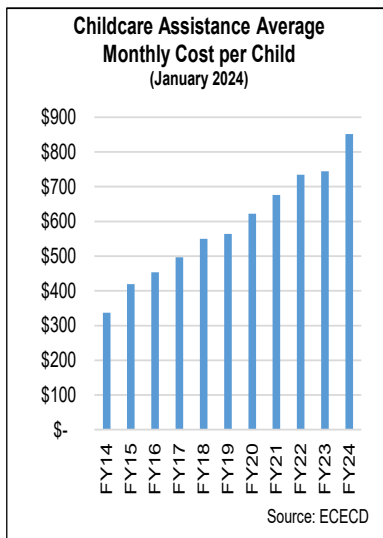

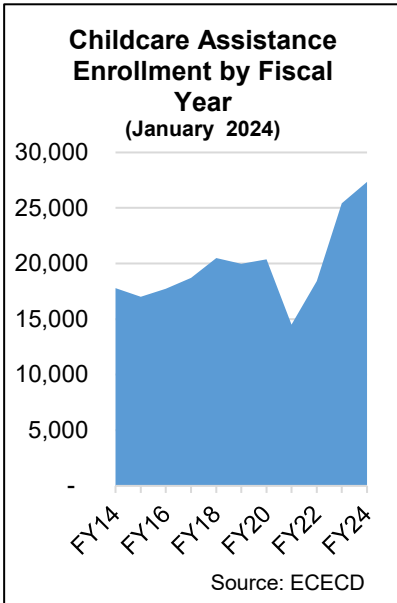

With a projected FY24 revenue increase of 10.1 percent and \$3.13 billion in nonrecurring spending authorized in FY24, reserve balances are projected to end FY24 at 29.7 percent of recurring appropriations, or \$2.8 billion. Recurring revenues, after accounting for legislation, are projected to grow only 0.6 percent in FY25. As recurring appropriations grow 6.7 percent, or \$642.3 million in FY25,

reserve balances for that fiscal year are estimated at 32.2 percent, or \$3.3 billion. Nearly 80 percent of reserve balances are held in the tax stabilization reserve, the state's "rainy day fund" and most restrictive reserve account. The projected reserve covers the amount the stress test of the December 2023 consensus forecast estimated the state would need to weather another moderate recession and an oil industry downturn. However, the state has created a number of new funds that act as a backup to reserves, necessitating a review of reserve targets in the future.

Appendix G details expectations for future recurring general fund revenue and appropriation amounts under certain spending scenarios. The outlook uses projections from the consensus revenue estimating group's December 2023 short-term forecast and 2023 long-term revenue forecast. For spending, the scenarios assume state spending will increase 3, 6, and 10 percent each year beginning in FY26. If spending continues to grow at the current rate, the state is estimated to reach annual deficits by FY29. Alternatively, the estimates show growth rates of 6 percent or lower, with no additional tax cuts, could be maintained through FY30.

Child Well-Being

The primary goal of New Mexico’s child well-being system is to reduce the impact of adverse childhood experiences, such as abuse, neglect, substance abuse in the household, parental incarceration, and other traumatic events. These experiences can hinder a child’s development and increase the risk of long-term issues like substance abuse, behavioral problems, and lower economic and educational achievements. To enhance child well-being, during the 2024 session the Legislature allocated significant funding for programs that support families and improve children’s long-term outcomes.

Early Childhood Education and Care Department

For FY25, the Legislature appropriated \$347.7 million in recurring general fund revenue for the Early Childhood Education and Care Department (ECECD), a 6 percent increase from the FY24 operating budget. Most of the increase came from revenues generated through a constitutional amendment that increases distributions from the land grant permanent fund for prekindergarten.

The Legislature provided over \$17 million to continue expanding prekindergarten for 3-year-olds. The expansion of services follows a historic investment in FY24 of \$100 million for 3-year-olds and 4-year-olds, which increased the number of prekindergarten slots statewide, increased the number of hours in a day for wrap-around care and added days for prekindergarten services. New Mexico prekindergarten, implemented by private providers and public schools, originally was a half-day program, but most prekindergarten programs now cover six to eight hours a day of care for most of the year. In FY24, the state contracted for 17,473 children to receive prekindergarten services, including extended-day services. National reports show significant declines in reading and math proficiency due to the pandemic; the legislative funding prioritizes prekindergarten to improve young children’s educational outcomes while providing more comprehensive care hours to allow families to participate in the workforce.

The department will also receive an additional \$100 million from the early childhood trust fund (ECTF), a significant portion of which is to continue child care assistance benefits expanded during the pandemic but at risk of being discontinued due to the expiration of federal pandemic response funds. Previously, these nonrecurring federal revenues were used to broaden childcare assistance eligibility, modify family co-payments, and increase provider rates. Without the expanded ECTF revenues, the state would have likely needed to roll back these policy decisions.

Average monthly enrollment in childcare assistance, which subsidizes the cost of care for eligible families, has increased significantly since a historical decline during the global pandemic, doubling from 13 thousand in January 2021 to over

27 thousand in January 2024. Average monthly enrollment in FY24 is running 8 percent above enrollment in FY23, while the cost per child is up by 14 percent.

Average monthly enrollment ranged between 18 thousand and 25 thousand in the previous few fiscal years. From 2020 through 2023, ECECD implemented several significant policy changes that continue to drive increases in enrollment and the cost per child, including expanded income eligibility, elimination of family copayments, and rate increases.

Additionally, \$12.3 million from the ECTF will be transferred to the Health Care Authority for federal Medicaid matching revenues for infant and maternal health services, doula and lactation support and home visiting services. Revenues from this fund were also increased by \$12.2 million for department operational costs and quality support and improvement services for childcare and prekindergarten.

Children, Youth and Families Department

For FY25, the Legislature sought to improve child outcomes by aligning the department’s budget with national child welfare best practices and trends and prioritized evidence-based strategies for developing and retaining a professional workforce, implementing prevention and early intervention programs, and recruiting and retaining foster care families, consistent with needed improvements in response to the Kevin S. lawsuit settlement. The Legislature considered significant operating budget increases CYFD has received in recent years, including a total budget increase of 36 percent between FY21 and FY24, and spending that has not fully leveraged available resources. The Legislature maintained a relatively flat agency operating budget, while making significant multiyear, nonrecurring appropriations to the department to pilot and evaluate evidence-based workforce development and prevention and early intervention programs, before moving these programs into the agency’s base operating budget.

FY25 recurring appropriations increase CYFD’s operating budget by 0.6 percent, including \$2.5 million from the general fund for tribal liaisons in response to the Kevin S. settlement, revenue to backfill lost fees and fines in the domestic violence program, and general fund revenue to replace social security administration revenue previously used to provide care and support for foster youth. A total of \$17.8 million in federal TANF revenue was appropriated for foster care services, implementation of the state’s multilevel response system, as outlined in Section 32A-4-4.1 NMSA 1978, family support and preservation services, evidence-based prevention and intervention services, and services for youth aging out of foster care. The TANF appropriation reflects an increase of \$1 million over the prior year for supportive housing for youth participating in the Fostering Connections program who are aging out of foster care.

The General Appropriation Act includes a total of \$24 million in nonrecurring, special appropriations to CYFD, including \$18.6 million in the government results and opportunity fund (GRO) to pilot and evaluate the following programs over three years:

- \$1.69 million for a pilot program to incentivize masters-level social work licensure to develop and retain caseworkers,

During the 2024 Legislative session, the following bills related to CYFD were passed:

SM5 creates a task force comprising 12 members identified by legislative leadership, the governor, chief justice, and other stakeholders involved in the child welfare system and convened by the Legislative Finance Committee. The memorial intends to augment and enhance the governor’s executive order efforts to improve the child welfare system.

HM10 convenes a joint task force by the Children, Youth and Families Department and the Health Care Authority to help remedy the minimal behavioral health services and residential treatment facilities for older foster youth.

SB152 amends criminal background check procedures and requirements for ECECD and CYFD. The bill requires employees and volunteers of ECECD and student interns at certain facilities and programs with primary custody of children to undergo background checks.

- \$4.2 million to expand evidence-based implementation of multi-level response in the Child Protective Services program, pursuant to Section 32-4-4.1,
- \$9 million to implement and expand evidence-based community-based prevention and intervention programs that will be eligible for Title IV-E or Medicaid reimbursement in the future,
- \$3.75 million to recruit, train, support, and retain treatment foster care providers

The language associated with these programs included performance measures the department should report to track and evaluate the impact of these investments. However, governor vetoes changed the legislative intent of the appropriations for prevention and early intervention, removing language directing the department to invest in evidence-based approaches that may be eligible for federal funding in the future.

The GRO fund also includes a total of \$3.7 million in special appropriations for expenditure in FY25 and FY26 for domestic violence programs, the Children's Trust Fund, and personnel in the Protective Services Program.

The Legislature also reappropriated nonrecurring funding from prior years that went unspent by the department, clarifying the intended use and extending the period of time the department has to use the funds, including \$3 million to implement a workforce plan to recruit, develop, and retain social workers and \$20 million to the Health Care Authority and CYFD to support start-up costs associated with evidence-based children's behavioral health services that may be eligible for Medicaid reimbursement in the future. Governor vetoes also changed the intent of workforce development appropriation, removing the expectation that funds be used for evidence-based approaches and striking language directing the focused use of funds for the recruitment, development, and retention of licensed social workers. The impact of these vetoes may be that the department uses the funds to recruit staff without focused attention on the recruitment of licensed social workers.

Leveraging significant growth in oil and gas revenues, the Legislature set aside nearly one billion dollars to establish a trust fund for student financial aid and continued growing public school funding. Alongside revisions to high school graduation requirements to support career readiness, the Legislature made substantial investments in workforce development initiatives through expansions of career and technical education, apprenticeships, and trades programs.

Public Schools

Recurring FY25 general fund appropriations for public schools grew by 6 percent, an increase of \$251.2 million over the prior year, reaching \$4.43 billion. Over \$200 million went toward operational–state equalization guarantee (SEG)–funding for schools in the form of increased salaries and benefits and operating costs for longer school years and state-driven education reforms. These reforms reflect ongoing demands for stronger programs centered on early literacy, career and technical education (CTE), community schools, and teacher mentorship.

Even after depleting the public education reform fund, the Legislature maintained support for key state initiatives through nonrecurring appropriations, allocating \$353 million for public education interventions. The Legislature prioritized resources primarily toward early literacy initiatives, tribal education initiatives, CTE pilots, educator clinical practice programs, universal school meals, and learning time initiatives. Part of the nonrecurring investment also included \$82 million into the government results and opportunity (GRO) fund to pilot differentials for hard-to-staff special education positions, educator clinical practice initiatives, and various programs in select districts and charters statewide.

School Operations

K-12 Plus Programs. Significant growth in K-12 Plus program units in FY24, use of nonrecurring appropriations for out-of-school-time program units, and new Public Education Department (PED) regulations requiring all districts and charters to provide 180 days of instruction per year, with limited exceptions, prompted the Legislature to grow base SEG appropriations for learning time and additional education reforms. Pushback from teacher unions and schools with four-day school weeks on the 180-day rule led to the addition of language in the General Appropriation Act (GAA) prohibiting PED from implementing or enforcing the rule. However, the governor vetoed this language, as well as language prohibiting the expansion of four-day school weeks.

Additional Education Reforms. Overwhelming support for CTE, community schools, early literacy, and universal school meals resulted in notable recurring investments in the SEG and PED budgets. In addition to the allocation of over \$105 million in nonrecurring appropriations for these initiatives, the Legislature

further boosted school operational dollars by \$30 million to support these programs through the SEG. The dual funding of these programs through the SEG and PED budgets will allow the state to identify revenue streams that can be earmarked for evidence-based programming, particularly to improve student outcomes as federal and state accountability efforts are reinstated. Additionally, growth in SEG funding for related PED initiatives presents an opportunity to create local and state contributions to sustain these efforts beyond administrations.

Wages, Benefits, and Working Conditions. Continuing momentum in raising educator pay, the Legislature appropriated \$95.6 million to provide a 3 percent salary increase for all school personnel. The GAA also included \$26.3 million to address rising insurance costs. Although bills to increase minimum wages and salaries for school personnel (House Bill 199) and reduce class sizes (House Bills 215 and 227) were introduced in the House, none of these proposals made it to the Senate chamber.

Governance and Policy

High School Graduation Requirements. In conjunction with growing demand for career-ready high school graduates, the Legislature passed and the governor signed Chapter 2 (House Bill 171), changing high school graduation requirements to remove algebra 2, add personal financial literacy, and increase local flexibility and control over course requirements. Total course units in the law remain the same as the current requirements of 24 units, unlike a similar bill from the previous session, which the governor flagged for reducing requirements to 22 units.

School Board Training. Unlike the failure of previous attempts to improve school governance in the prior session, the state enacted Chapter 43 (Senate Bill 137) this year, increasing the requirement for new school board members to receive 10 hours of annual training, requiring board meetings to be webcast and archived online, requiring all board members to report campaign contributions and spending in excess of \$1,000, and prohibiting changes to superintendent contracts within 60 days of convening a newly elected school board.

State Board of Education. Two resolutions, House Joint Resolution 6 and Senate Joint Resolution 9, were introduced to change state governance of PED back to its former model under an elected board of education. While neither resolution passed both chambers, the continued push for board oversight over public education reflects concerns about high turnover in PED secretaries and discontinuity of education reforms.

Capital Outlay Funding

Continued growth in bonding capacity allowed the Legislature to use public school capital outlay funds toward several large statewide initiatives, including \$30 million for a structured literacy building, \$29 million for school bus replacements, and \$5 million for prekindergarten classrooms. With the removal of legislative offsets from the prior year, several districts and charters individually secured operational and capital outlay funds outside of the SEG and standard process through the Public School Capital Outlay Council (PSCOC).

Two bills amended provisions relating to public school capital outlay funding. Chapter 37 (House Bill 207) requires PSCOC to increase lease assistance to charter schools based on inflation, rather than make discretionary adjustments, and Chapter

22 (Senate Bill 76) qualifies additional districts for a waiver of the local match requirement for state-funded capital projects. Both laws seize on the current bonding capacity of the state to increase state funding for school capital outlay.

School Supports

Educator Pipeline. With teacher residencies, educator fellowships, and other promising educator pipeline initiatives demonstrating stronger preparation practices and more diverse cohorts, the Legislature invested \$60 million over the course of three years into the GRO fund to continue monitoring results from residency and clinical practice initiatives. Additionally, the Legislature appropriated \$20 million in nonrecurring funds for educator fellows, replacing federal pandemic aid used to establish the program, and \$15 million through the GRO fund to fill hard-to-staff special education positions statewide.

Early Literacy. Support for structured literacy initiatives and related requests surrounding the science of reading movement swelled during the session, leading to a \$3.5 million appropriation to continue training elementary teachers, \$5 million appropriation to train secondary teachers, \$30 million appropriation for a structured literacy building, and \$30 million appropriation to provide a summer reading program for 10 thousand students.

Tribal Education. Despite the availability of a \$50 million appropriation to establish a tribal education trust fund, House Bill 134 did not reach the governor’s desk for signature, resulting in a failed contingency for the appropriation. Disagreements on tribal representation in determining distributions stalled passage of the bill, despite multiple amendments.

Higher Education

Recognizing the increasing costs of scholarship programs, the Legislature passed and the governor signed Chapter 61 (Senate Bill 159) creating a higher education trust fund. The law transfers \$959 million from the tax stabilization reserve fund to the higher education trust fund to be invested by the State Investment Council. The trust fund would then make annual distributions of 5 percent of the fund balance to the higher education program fund for use to pay student tuition and fees for state financial aid programs authorized by law. The fund will provide approximately \$48 million for this purpose in FY25.

The Legislature created the opportunity scholarship in 2022 to pay tuition and fees for returning and part-time students. At the time of enactment, the program was anticipated to cost \$100 million. After the first year of opportunity scholarship program awards, the cost estimate was revised to \$146 million, which was included in the HED recurring base budget in FY24. However, the costs continue increasing due to increasing tuition and enrollment and are projected to be approximately \$160 million in FY25.

Costs of the state’s second largest scholarship, the lottery scholarship, are approximately \$70 million per year while recurring lottery revenue is approximately \$45 million. The Legislature appropriated \$130 million in 2022 to “pre-pay” the annual deficit in the lottery scholarship program. Projections show this funding

will pay costs of the program through FY28, but there will be an annual shortfall of \$27 million beginning in FY29.

Recurring Appropriations

The Legislature increased recurring appropriations to higher education institutions by \$43 million, or 3.5 percent. The increase included \$11.9 million to distribute through the funding formula, \$10 million for faculty and graduate assistant compensation, and \$3 million for student support services (see appendix K).

During the 2023 interim, LFC convened a higher education subcommittee to discuss the funding formula, among other items. As a result of the work of the subcommittee, the FY25 funding formula distribution doubled the performance funding component of the formula from 10 percent to 20 percent to direct more of the “new money” to institutions showing improvement in performance measures including graduation and retention.

At the end of the 2023 legislative session, the Senate Finance Committee requested the Higher Education Department work with LFC and Department of Finance and Administration (DFA) staff to identify research and public service projects (RPSPs) that should be moved into the regular instruction and general (I&G) base. The department worked with higher education institutions to create criteria and the RPSPs identified for selection were reviewed by HED, LFC, and DFA staff during the fall budget review process. As a result, 57 RPSPs totaling nearly \$10 million were discontinued as independent items within the General Appropriation Act (GAA) and moved into the I&G base budget.

The FY25 budget included an additional \$3 million for student support services to distribute based on the size of each institution. This is the second consecutive year for a targeted appropriation for student support services, reflecting the Legislature’s continued interest in improving student retention and graduation outcomes, which rank among the lowest in the nation.

A total of \$10 million in compensation funding was provided for targeted salary increases for faculty and graduate assistants, in addition to other compensation appropriations in the GAA. The appropriations included \$7 million for faculty raises and distributed based on institution size. An additional \$1 million was provided to the University of New Mexico Health Sciences Center specifically for medical faculty. The GAA also includes \$2 million to increase compensation for graduate students at research and comprehensive institutions to distribute based on the number of graduate assistants at each college. All of these appropriations were made directly to the I&G base.

Nonrecurring Appropriations

The Legislature made nonrecurring appropriations totaling \$189 million to HED and higher education institutions statewide to invest in boosting human capital, expanding the healthcare workforce, and upgrading campus facilities. The appropriations included \$69.5 million in the government results and opportunity expendable trust. These appropriations are made for three years to pilot various initiatives. The Legislature appropriated \$60 million for community colleges and regional universities to pay the full cost of tuition and fees and internship and

apprenticeship subsidies for workforce credential programs. An additional \$6 million was appropriated for the expansion of adult integrated basic education and skills training programs.

*Reflects full amount of three-year GRO Appropriations

Health and Communities

The 2024 legislative session will bring considerable change to the state's healthcare system. Seeking to address access to healthcare, the Legislature passed legislation to increase Medicaid hospital reimbursements by over \$1 billion and an appropriations bill that included rate adjustments for maternal and child health, physical health, behavioral health, developmental disability providers, and several other provider types. However, implementation will play a key role in determining whether these efforts are successful in improving access and improving outcomes.

While strengthening the financial viability of hospitals, developmental disabilities providers, and others was the goal of this year's legislative session, ensuring these efforts result in improved outcomes and the availability of high-quality evidence-based services will be the goal moving forward. For example, significant expansions passed by the Legislature for hospital subsidies, hospital rate adjustments, grants to hospitals for service expansions, and other hospital grants suggest that, in the future, more New Mexicans will have access to services they did not have in the past. However, because significant structural barriers will remain, improving access will take more than increasing funding and will require the state to address barriers such as healthcare workforce shortages, geographic constraints, transportation, and adequate health insurance coverage. The state has made progress in these areas too, but more work remains and oversight of these efforts will play a determining role.

Health Care Authority

The newly established Health Care Authority—formerly the Human Services Department, but now incorporating the Developmental Disabilities Support Program and the Division of Health Improvement from the Department of Health, as well as the State Health Benefits Program from the General Services Department—received its first budget for FY25. The \$12.1 billion all funds recurring budget includes \$1.9 billion from the general fund and represents a 12.2 percent general fund increase, not accounting for increases from newly added programs. Aside from physical health, the authority's budget includes increases for behavioral health in both recurring and nonrecurring funding, increases in the social safety net, and expansions in the authority's administrative role.

The administrative expansions are becoming increasingly crucial due to the demand for enhanced actionable data and the urgency to expedite the development of the long-delayed Medicaid management information system replacement project. This delay is affecting most of the authority's programs, several other departments, and consequently, the larger strategic goals discussed above and others. Since 2015, the state spent nearly \$200 million on the project and has appropriations to continue spending significantly in the next few years.

Medicaid

State-funded Medicaid, consisting of the Medical Assistance Program, Medicaid Behavioral Health, and the Developmental Disabilities Support Program, received nearly \$1.8 billion in recurring general fund revenue, an 11.6 percent increase. The need to sustain financial viability, improve access, and replace reductions in federal funds were the primary drivers of the FY25 Medicaid budget. Rate adjustments totaled \$106.7 million in general fund revenue and, when matched with Medicaid, will total about \$474.8 million. From general fund revenue, the largest rate adjustments included \$28.1 million for maternal and child health and physical health, \$26 million to maintain rate competitiveness for the rates that were adjusted in FY24, \$20.4 million for developmental disability providers, \$11.3 million for the state's 20 smallest hospitals, and \$7.1 million for behavioral health providers.

Nonrecurring Medicaid Funding. To improve financial viability and access, the Medicaid programs received \$140 million in nonrecurring funding. These

Chapter 25 (Senate Bill 116) provides stability for programs funded by tobacco settlement revenue by removing the permanent fund from state reserves, allowing it to be invested to garner a higher rate of return and to distribute 4.7 percent of the permanent fund to the program fund each year.

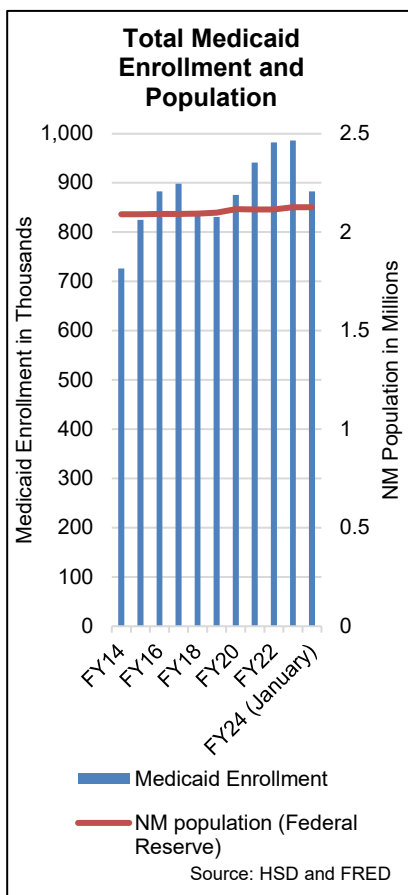

Chapter 32 (House Bill 7) increases the distribution from the health insurance premium surtax to the health care affordability fund to 55 percent starting in September 2025. Without the change, the distribution would have been 30 percent starting in July 2024.

Chapter 33 (House Bill 33) creates prescription drug transparency by requiring those in the drug supply chain to report drug prices and trends to the Office of Superintendent of Insurance (OSI) annually. The bill also requires OSI to publish a report based on the data.

Chapter 39 (Senate Bill 14) moves oversight of the health care affordability fund from OSI to the Health Care Authority (HCA), repeals the rural health care delivery fund, and makes a long list of other changes that clarify HCA's responsibilities, given the establishment of HCA in 2023.

Chapter 40 (Senate Bill 15) gives OSI the power to review hospital consolidation and other hospital transactions that may affect the health of New Mexicans.

Chapter 44 (Senate Bill 161) provides acute care facility subsidies to facilities that may be struggling financially. The bill lists the maximum subsidy each of the 11 hospitals may receive.

amounts included a total of \$44 million for a nonfederal hospital in McKinley County, a primary care building in Taos County, the Epi Duran Regional Recovery Center in San Miguel County, and a hospital in Quay County. Another \$50 million was set aside for subsidies to certain eligible healthcare facilities experiencing financial hardship, based on Chapter 44 (Senate Bill 161). An additional \$46 million was included, adding to the \$80 million appropriated in FY24, for grants to hospitals and other providers to defray the costs of starting up or expanding new primary care, maternal and child health, and behavioral health services.

Hospital Access and Sustainability. The state also enacted the Health Care Delivery and Access Act expected to inject another \$1.1 billion into the state’s hospitals, likely starting in FY26. The act imposes assessments on most hospitals with the funds being used as the state match for federal Medicaid revenue and returned to the hospitals in the form of rate increases, bringing them to the average commercial rate. The bill also devotes 40 percent of the funding generated by the assessment and matched Medicaid revenue for a newly established quality incentive program. Funding not used for quality incentives or administrative costs would be used for uniform rate increases.

Out-of-Pocket Costs. In the past, because Medicaid reimbursements may not have been adequate to cover the costs of providing care to Medicaid patients (constituting roughly half the state’s population) private insurers and other payers may have been offsetting the cost of providing care to these patients. Now that Medicaid reimbursements to hospitals will be substantially higher, there should be an offset in the costs of providing health insurance to state and local government workers and in the private sector, leading to lower out of pocket costs. The bill will also increase revenues to the state through gross receipts taxes and premium taxes. About \$17.3 million in additional revenue is expected to go to the health care affordability fund, currently used to subsidize health coverage for people on the state’s health insurance exchange with incomes too high for Medicaid.

Medicaid and Developmental Disabilities Enrollment. The Health Care Authority’s December 2023 monthly statistical report, released in February, indicates 882,487 individuals received Medicaid, 12.2 thousand fewer individuals than the department’s January projection indicated. Actual enrollment continues to trend downward given the end of the public health emergency and economic improvement, including increased labor force participation. Even with this, the Medical Assistance Division ended up receiving about a \$27 million increase for utilization and enrollment.

Last year the state eliminated the waiting list for the Medicaid waiver for people with developmental disabilities. However, there continues to be demand and expected growth in enrollment because some people previously on the list may have delayed enrolling and other factors. Because of the expected growth, the department received \$12.4 million.

Reduced Federal and Other Funds. Several sources of federal and other state funds are expected to decrease or end in FY25, and the state needed to replace these revenue sources to ensure services were not impacted. For federal funds, because the state’s economy is doing better, the federal government will reduce the rate at which it matches state funding. The reduced federal medical assistance

percentage rate of 0.91 percent from the prior year will cost the state about \$68.9 million. Also, in prior years the state was permitted by the federal government to carry over federal American Rescue Plan Act funds and use those funds as a state match. These funds ran out this year and cost \$37.3 million.

Because \$16.2 million in nonrecurring tobacco settlement program fund balances were used in the department's recurring FY24 budget and because total tobacco settlement revenue for FY25 is projected to be \$6.5 million less than was appropriated in FY24, the budget reduces revenue from the tobacco settlement program fund for the authority by \$12 million and backfills this revenue with general fund revenue. Revenue to the tobacco settlement permanent fund declined recently due to less tobacco use and because the Attorney General's Office and tobacco defendants arbitrate tobacco settlement revenue amounts on an annual basis. The result has been wide variation in the amount of tobacco settlement revenue available each year, with an overall downward trend. Because of the projected decrease, the budget replaces tobacco settlement revenue with general fund revenue for the other agencies that benefited in recent years from the revenue, including University of New Mexico Health Sciences Center and the Department of Health.

Income Support

The Income Support Program received a 26.4 percent increase in general fund revenue. The increase included \$14.1 million to increase the Supplemental Nutrition Assistance Program's (SNAP) threshold to 200 percent of the federal poverty level and to increase benefits for clients with higher incomes than SNAP supports and who are elderly or disabled from \$32 monthly to \$150 monthly. However, recent performance reporting from the authority indicates the agency may be struggling to serve its existing SNAP clients. Since June 2022, SNAP has not met the federal target of 95 percent of its applications processed within 45 days, indicating the program is having trouble serving all its existing clients in a timely manner. As of August 2023, only 39 percent of applications were processed within 30 days.

Department of Health

The FY25 general fund appropriations to the Department of Health (DOH) total \$198.5 million, a 7.3 percent increase over the adjusted FY24 operating budget. The Facilities Management Program will receive an additional \$6.8 million from the general fund for personnel due to low census resulting in declining revenues. The program, which runs several state hospitals and other facilities, continues to experience significant declines in bed occupancy, resulting in reduced revenues from third-party billings. Despite decreased occupancy, vacancy rates remained relatively stable, resulting in pressure on the program operating budget. At the close of FY23, occupancy was close to 43 percent. As of February 2024, the facilities census of licensed beds rose to nearly 55 percent. The average daily census statewide is close to 550 patients. The program will need to increase occupancy in FY25. Additionally, the department also received over \$4.6 million in nonrecurring revenues for a budget deficit in fiscal year 2023 and \$11 million for a budget supplement in fiscal year 2024 for facilities.

General fund appropriations for the Public Health Program include an increase of \$3.3 million, or 4.5 percent, including \$1 million to replace declining tobacco

settlement revenue for tobacco cessation programs and \$1.6 million to expand clinical services and operations at public health offices. The Public Health program also received \$450 thousand from the general fund for personnel. The Epidemiology and Response Program general fund revenue appropriation will increase by \$1.4 million, or 10 percent. The increase included \$1 million for the public health hotline due to a reduction in federal funds, \$100 thousand for vital records staff, and \$250 thousand to reduce the vacancy rate.

In FY25, the Developmental Disabilities Supports (DDSD) and Health Certification, Licensing, and Oversight (DHI) programs will transfer from DOH to the Health Care Authority (HCA), resulting in a large shift of revenues and oversight. The FY24 operating budget for DDSD and DHI is \$224.4 million, or 29 percent of the total operating budget.

Economic and Workforce Development

The Legislature invested in economic development in the General Appropriation Act of 2024 by appropriating \$46.7 million in nonrecurring funding to economic and tourism development projects and initiatives. Nonrecurring appropriations include \$20.8 million to the Economic Development Department for the Local Economic Development Act (LEDA), trail infrastructure, workforce development in the space industry, and healthy food financing initiatives, as well as \$23.5 million to the Tourism Department for advertising, tourism infrastructure, and litter control and beautification campaigns. The Workforce Solutions Department received an operating budget of \$121 million, and the Legislature made significant multiyear, nonrecurring investments for workforce development. The Economic Development, Tourism, and Workforce Solutions departments also received increases in recurring general fund revenue of 31.2 percent, 4.4 percent, and 17.6 percent, respectively.

Economic Development Department

During this legislative session, the Legislature built on previous significant investments of one-time and recurring funding to existing responsibilities and initiatives. For FY25, the Legislature increased the Economic Development Department’s recurring general fund revenue by \$6.2 million, an increase of 31.2 percent from the agency’s FY24 budget. New recurring funding includes an additional MainStreet representative, a program coordinator for the media academy, five positions to support the agency’s key industries, personnel for the Creative Industries Division, and \$200 thousand for creative industries grants. Most notably, the Legislature appropriated \$5 million in recurring funding for a new climate, energy, and water authority at EDD, but the legislature did not pass either of the bills establishing the responsibilities of the proposed authority. It is unclear how the department will use the additional funding. The department should draft a plan during the interim on the expected uses.

The Legislature appropriated recurring funding for personnel and grants for the Creative Industries Division created during the 2023 legislative session. This division will receive recurring funding for the first time in FY25. The Legislature also increased personnel funding and positions for the Economic Development Division to support the agency’s nine target industries. Currently, only two key industries—film/television and outdoor recreation—have dedicated personnel. While the Office of

Economic and Workforce Development

New Mexico's Target Industries

EDD's 20-year strategic plan, released in October 2021, identified nine key industries for diversifying New Mexico's economy. The key industries include:

1. Aerospace
2. Biosciences
3. Cybersecurity
4. Film and Television
5. Outdoor Recreation
6. Sustainable and Value-Added Agriculture
7. Intelligent Manufacturing
8. Global Trade
9. Sustainable and Green Energy

The plan focused on six strategies to build a diverse and robust economy. The strategies include modernizing the economic development ecosystem, strengthening community capacity, improving higher education and aligning workforce, promoting equity through economic development, building capacity for entrepreneurs, and diversifying New Mexico's economy.

Nonrecurring Appropriations for Workforce Solutions Department

The 2024 Legislature made significant nonrecurring appropriations to WSD for workforce development, including:

\$6 million to pilot and evaluate a trades career exploration program over three years through the GRO Fund.

\$1.8 million to implement and evaluate a youth re-employment and preapprenticeship program, targeted to disconnected young adults over three years through the GRO Fund.

\$30 million to implement HB5 and create the Workforce Development and Apprenticeship Fund.

Strategy, Science, and Technology (OSST) deals with matters related to the other key industries, the Legislature appropriated \$500 thousand and five positions for EDD to hire additional dedicated personnel.

The Legislature also appropriated \$20.8 million in one-time funding for various economic development initiatives through EDD. The General Appropriation Act (GAA) of 2024 includes \$10.5 million in general fund revenue for the Local Economic Development Act (LEDA) fund, including \$500 thousand for LEDA site readiness and \$10 million to the fund. The GAA includes an additional \$10 million to build and improve recreational trails through the Trails+ program. The Legislature also made additional one-time investments totaling \$1.8 million for entrepreneur training, film training programming, business development, and business incubation through economic development districts and councils of governments.

Tourism Department

The Tourism Department will receive \$25.4 million from the general fund for recurring appropriations, an increase of 4.4 percent from the agency's FY24 general fund operating budget. This increase includes an additional \$1.06 million in recurring funding for the cooperative marketing program, tourism event growth and sustainability program, and increases in personnel. For one-time funding, the department will receive \$23.5 million, including \$16 million for national marketing, \$1.9 million for the destination forward grant program for tourism infrastructure projects, and \$2 million for the Clean and Beautiful Program for litter pick up and beautification. Funding for the Special Olympics includes \$300 thousand in nonrecurring funding and \$350 thousand in the agency's existing recurring budget.

Workforce Solutions Department

For the Workforce Solutions Department (WSD), the Legislature added \$1.8 million to the Labor Relations Program to address caseloads and a recent court ruling, increasing general fund appropriations a total of \$1.96 million, or 17.6 percent, over FY25. This increase includes \$1.86 million to fill 12 positions in the Labor Relations Program. In addition, the Legislature made significant investments to develop the state's workforce through the government results and opportunity (GRO) Fund, totaling \$7.8 million to pilot programs designed to develop and train new workers for the state's workforce and \$30 million to create the workforce development and apprenticeship fund and expand apprenticeship programs. Language within the General Appropriation Act directed the department to target the use of these funds to disengaged and disconnected young adults who are unemployed or at risk of being unemployed, given the state's low labor force participation rate and high number of unemployed and disengaged young adults relative to other states. However, the governor vetoed the language about the targeted use of the funds, changing the legislative intent, though the department could still use the appropriations to serve a population disengaged or at risk of disconnecting from the labor force.

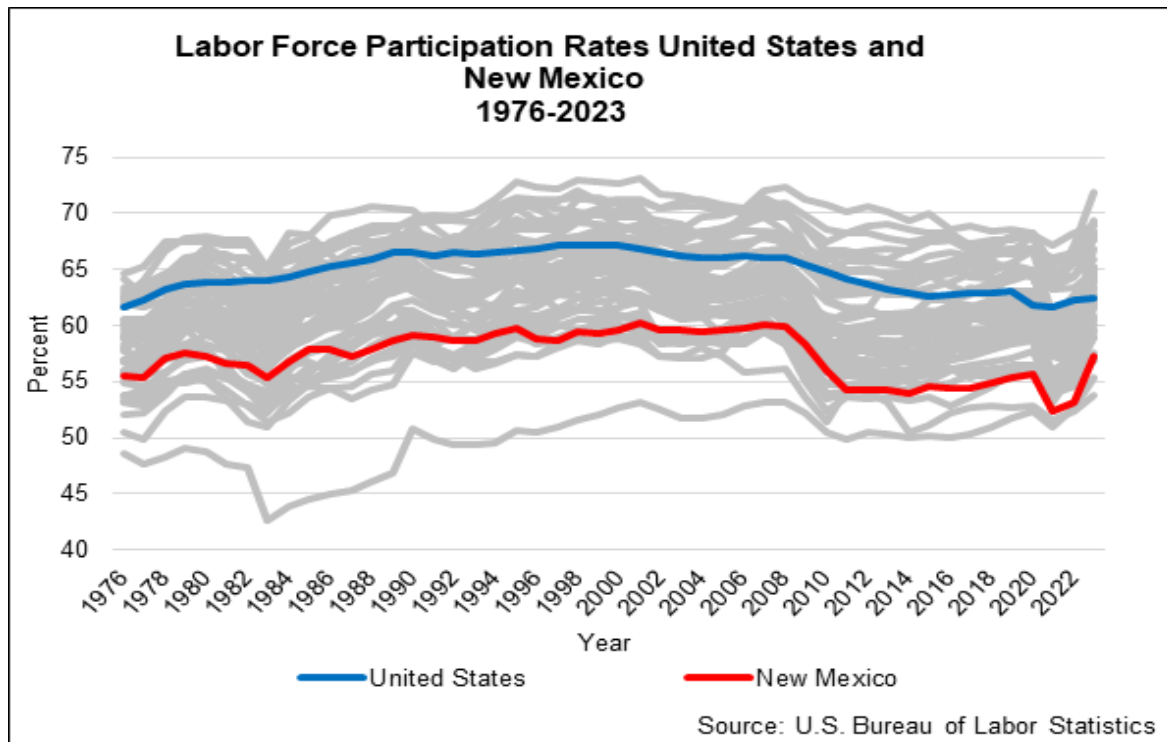

Labor Force Participation

While unemployment rates have largely recovered to prepandemic levels, the state's labor force participation is persistently low. If the state had the same

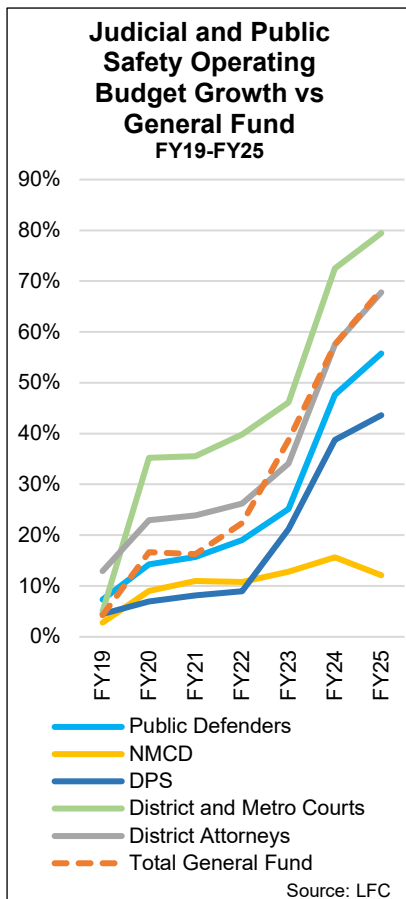

workforce participation rate as the rest of the United States, New Mexico would have roughly 100 thousand more workers, including 40 thousand more workers of prime working age. Social services, economic development, tax rates, pension systems, the service industry, and virtually every other area of the economy is impacted when there are fewer people working to support those who do not work. Adding labor force participants is essential.

The National Conference of State Legislatures (NCSL) says states should focus on strengthening workforce attraction, retention, and expansion programs. For example, some states are expanding access to higher education and workforce development programs while working on strategies to keep workers in the workforce by improving mental health access and worker accommodations. Other states are working to recruit out-of-state workers by marketing their states as desirable places to live and work. Additionally, many people involved in the criminal justice system are not in the labor force; according to the U.S. Census, national employment for these individuals has not recovered to the levels that existed prior to the 2008 recession.

As New Mexico makes significant investments in the state’s workforce, the state should track, monitor, and evaluate the impact of programs and their ability to bring new workers into the labor force.

Justice and Public Safety

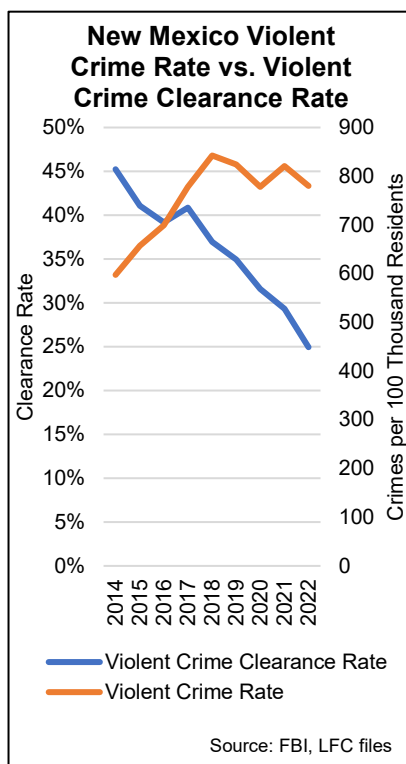

Public safety was a priority for both the Legislature and the executive in the 2024 session, with 17 bills passed by both chambers. The budgets for the upcoming fiscal year also increased across almost all agencies dealing with criminal justice, public safety, the courts, and law enforcement. The Legislature prioritized improved compensation for state police officers and funded several programs to improve services for crime victims and reduce recidivism among the state’s justice-involved population.

Crime and Law Enforcement

In October 2023, the FBI released detailed data on criminal offenses reported to the Uniform Crime Reporting (UCR) Program, mainly through the National Incident-Based Reporting System (NIBRS) and the Summary Reporting System (SRS). Violent crime in New Mexico fell 5 percent between 2021 and 2022; however, that still left the state with the second-highest violent crime rate in the United States. The FBI data shows that property crime rates, both in New Mexico and across the United States, increased from 2021 to 2022. New Mexico’s per capita property crime rate increased by about 7.6 percent. In the 2024 session, the Legislature focused on reducing crime by improving the swiftness and certainty of justice for repeat violent offenders and improving funding for law enforcement agencies statewide.

Department of Public Safety

The Department of Public Safety will see its general fund revenue increase by nearly \$7.9 million in FY25, with funding focused on adding truly recurring costs, such as ammunition, tasers, and body and in-car cameras, to the agency’s base budget while also increasing pay for staff at the forensics laboratory and the New Mexico State Police. This includes approximately \$2.1 million for incumbents in the NMSP career pay system. Chapter 64 (House Bill 308) also includes \$10 million for the Department of Information Technology (DoIT) to build a public safety radio communications system. The GAA also included \$2.8 million to DoIT for statewide emergency radio substations. In addition, DPS also received a reauthorization for its intelligence-led police effort and \$4 million to continue modernizing its criminal justice information system.

Officer Recruitment and Retention. Chapter 47 (House Bill 193) broadens the pool of officers eligible to receive retention bonuses after completing certain career tenure milestones (five, 10, 15, or 20 years of service) to include lateral transfers and officers who exceed the 20-year mark. While the solvency of the law enforcement retention fund (LERF) will largely depend on uptake by law enforcement agencies, the fund is estimated to have sufficient funding for FY25. Currently LERF revenues are 10 percent of all money received for fees, licenses, penalties, taxes from life, general casualty, and title insurance business (except for money received from health insurance).

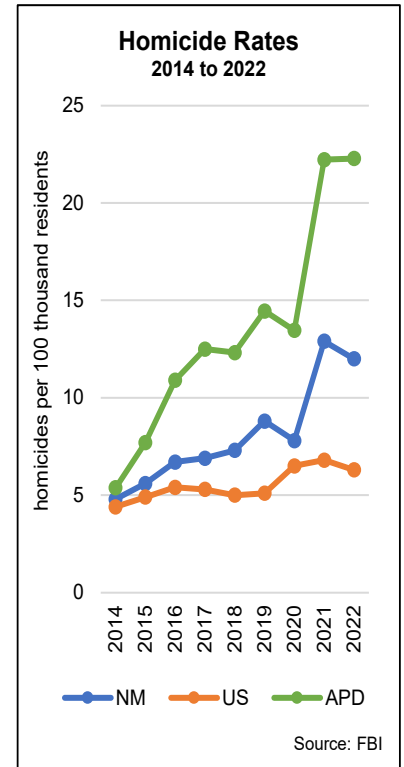

Firearms

Chapter 46 (House Bill 129) introduces a seven day waiting period for gun purchases requiring a background check and makes violation of this waiting period a misdemeanor punishable by up to a year in jail. Chapter 50 (Senate Bill 5) creates the new crime of carrying a firearm near a polling place while early voting is in progress or on election day, punishable by up to one year in jail.

Incarceration and Recidivism

Corrections Department

NMCD’s FY25 general fund appropriation will decrease by \$10.6 million, or 3.1 percent, compared with FY24, with a portion of the agency’s \$36 million in projected vacancy savings being redirected to fund other programmatic priorities. These include funding for veteran services, IT network improvements, transitional living services, increases in costs for prison operations, and medical and behavioral health contracts. Additionally, the GAA contains \$2 million from the penitentiary income fund to expand reentry services, treatment programs, housing opportunities, and Medicaid-funded services to access medication-assisted treatment. A recent settlement approved by a federal district court allows incarcerated individuals with opioid use disorder (OUD) in the custody of NMCD to continue taking buprenorphine, a medication for OUD, on entering custody. The settlement, resulting from a lawsuit mandates NMCD to provide buprenorphine to those currently receiving it and lifts prohibitions for individuals residing in halfway houses.

Probation and Parole

The Adult Parole Board (APB) received a 3.7 percent increase to its FY25 budget, mainly for additional costs related to accounting and auditing services. However, APB and Corrections will also receive some funding through an appropriation in the GAA to provide domestic violence training to municipal, county, and tribal law enforcement officers, probation and parole officers, court personnel, and victim advocates.

Victim and Community Services

Victim Services

The Crime Victim Reparations Commission’s (CVRC) FY25 budget will increase by approximately \$2.2 million, or 18.3 percent, compared with FY24. This includes funding for victim care and support, sexual assault services, and administrative costs associated with these programs. The agency also received nonrecurring special appropriations totaling \$7 million for these same purposes and also to fund law enforcement-based advocates for victims of violent crimes.

Victims of Crime Act Funding. Changes to the federal Victims of Crime Act (VOCA) funding formula are expected to reduce the amount of money the state receives for victim services by approximately 40 percent over the next five years. The Legislature replaced portions of this lost revenue with recurring and nonrecurring appropriations from the general fund. This included \$2 million in nonrecurring appropriations to CVRC to supplement federal grants and approximately \$1.2 million in recurring funding for administrative costs, victim care, and support.

Diversion and Early Intervention

Pretrial Services and Diversion

Many bills introduced this session sought to change the state’s policies regarding pretrial detention. Most centered on rebuttable presumptions, which place the burden on the defense to prove that the defendant can be released, while other bills sought to increase the likelihood of pretrial detention. The efforts to change the pretrial system were unsuccessful, but increases in pretrial detention did pass. As in previous sessions, LFC analysis and academic studies demonstrated such policies are unlikely to reduce violent crime while generating additional costs for counties and raising constitutionality concerns.

Chapter 53 (Senate Bill 271) amends an aspect of pretrial detention and release. It states, if a defendant, while on pretrial release for a felony, were to commit another felony, the defendant would be held in pretrial detention until a hearing had been set and heard to determine new terms of release. The new law raises concerns about whether it would supersede the authority of the judges, but proponents stated the law only required a conversation to be had, not to determine any judgement.

The Legislature continued its investment in the pretrial services and in judicial safety, with nearly \$1 million for pretrial officers and over a \$1 million for security contracts and equipment. The Administrative Office of the Courts (AOC) continues to work toward unified statewide implementation of pretrial justice best practices by FY25.

The Legislature also, through a combination of internal, consumer settlement, and general funds, replaced the post-adjudication fee revenue lost due to the passage of Chapter 184 (House Bill 139) in the 2023 session. These revenues were used for an array of programs and judicial functions administered predominantly by AOC. The replacement of these fees was a priority of the Legislature and the judiciary.

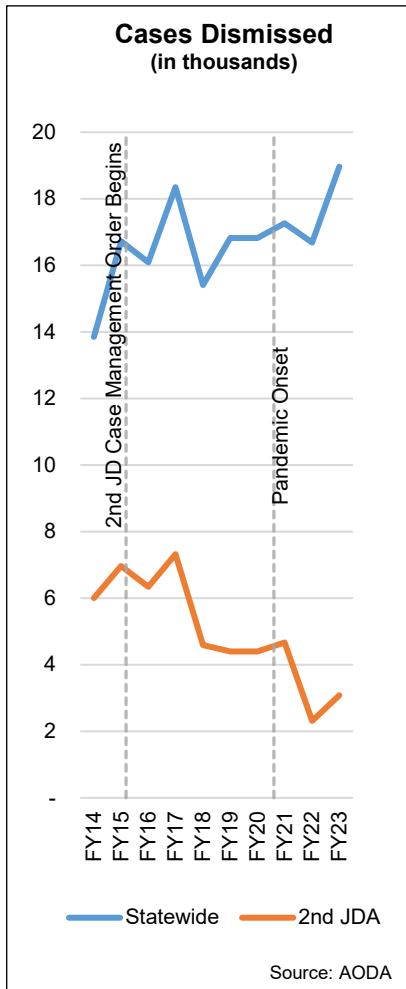

Courts and the Judiciary

Lawmakers prioritized investing in judges, recruitment, and safety, with the goal of increasing retention within the judicial system. The Legislature also invested in several recurring initiatives to address a lack of rural lawyers, with investments in the public defenders and in district attorneys to maintain swift and certain justice throughout the state.

Courts

The Legislature passed and the Governor signed Chapter 3 (House Bill 141) which raised judicial salaries while also decoupling magistrate justices from the judicial salary formula. This allowed for the judiciary to create a competitive salary for judges across all levels while also maintaining the current salary of magistrate judges, who have not seen the same level of recruitment and retention difficulty as other judge levels have in New Mexico.

The Legislature also appropriated a 17.1 percent increase to AOC’s operating budget. The increase is designed to cover lapsing court fee revenue and to

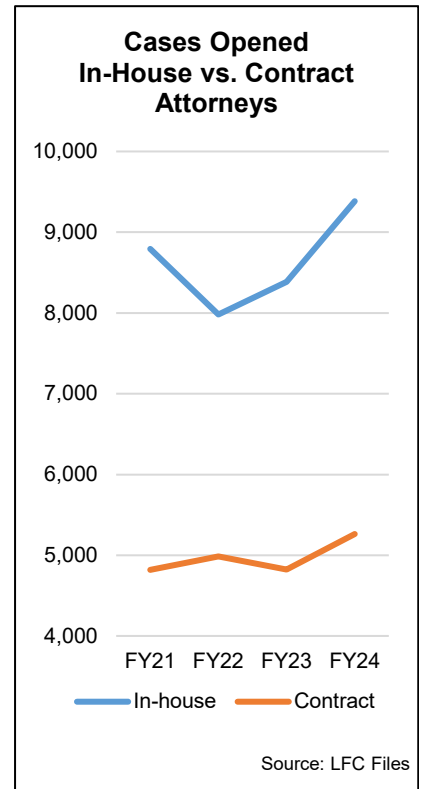

maintain funding levels for court functions. The increase, spread across AOC’s four divisions, predominantly went to the agency’s Magistrate Court division to cover the Magistrate Court Warrant Enforcement office. The office and its staff are transitioning from collection of fines, fees, or costs that are owed to the courts and will instead focus on compliance activities, statewide customer service, and additional avoidance practices to avoid the issuing of warrants. Consisting of 35 FTE, the office was traditionally funded through court fees but will now be covered through the general fund.

District Attorneys

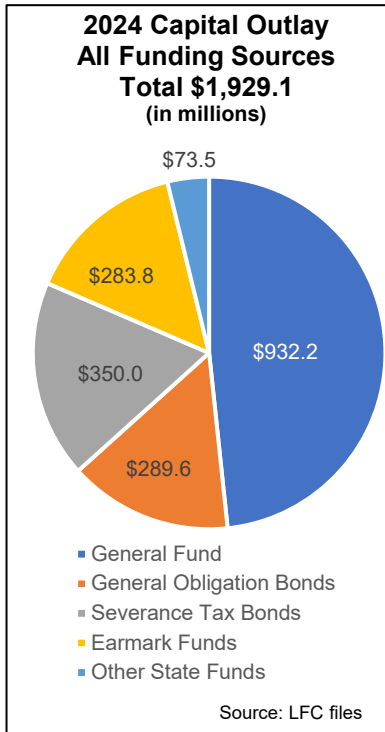

Recruitment and retention of attorneys, in particular rural attorneys, continues to hamper justice in New Mexico. To counteract this, the Legislature continued its investment in personnel within district attorney offices. Additionally, district attorneys requested more funding for contract attorneys to make up for the increased felony caseload. The increased funding will allow rural district attorneys to seek new ways to recruit and retain attorneys in the states more rural areas.

Public Defense

This session, the Legislature restated its priority of ensuring those accused of crimes receive a fair and effective defense. These initiatives were accomplished by appropriating \$1 million for rural public defenders and over \$1 million for investigators, social workers, and case managers. Nearly \$500 thousand was appropriated to the Law Office of the Public Defender (LOPD) for trial and contract expenses. Like other criminal justice partner, LOPD has faced problems with recruitment and retention. But with the continued funding the Legislature has provided, LOPD’s vacancy rate has continued to drop while its performance measures continue to grow, an indication that the investments made by the Legislature are so far productive.

Public Infrastructure and Transportation

A bill adopted by the Legislature and partially vetoed by the governor, the capital outlay bill authorizes \$1.4 billion from the general fund, severance tax bonds, and other state funds for state and local infrastructure projects. Additionally, the general obligation bond bill authorizes \$289.6 million for higher education, senior center, and library projects, and funding will also be available during the interim to local capital projects through funds for roads, public schools, water, colonias, housing, and tribal infrastructure. Those funds that receive earmarked bond proceeds will see another round of historically large distributions in 2024, with \$124.6 million to the water project fund, \$62.3 million each to the colonias and tribal infrastructure funds, and \$34.6 million to the housing trust fund project fund.

A surplus of nonrecurring general fund revenues related to historically high oil and gas production allowed the Legislature to primarily use cash for 2024 capital projects and rely less on bonding for the second consecutive year. Paying cash generates long-term savings by eliminating the cost of interest. Additionally, the severance tax revenues that would typically be dedicated to paying down debt could be transferred to the severance tax permanent fund to increase recurring general fund revenue. Senate Bill 217 would have ensured the state realized this benefit by requiring an annual distribution of \$82 million from the severance tax bonding fund to the permanent fund for 10 years, an amount equal to the long-term debt service avoided in 2024. However, the governor vetoed Senate Bill 217, citing the substantial distributions to the severance tax permanent fund that will begin in FY26 as the result of recent legislation and the need for further evaluation of existing efforts to save for the future.

From the capital outlay bill (Chapter 66, Senate Bill 275), the governor vetoed five general fund appropriations totaling \$557 thousand and partially vetoed language from another 11 general fund appropriations. In her veto message, the governor said the vetoes addressed projects that lack proper planning or are not ready to proceed.

Long-Term Debt and Revenue Volatility

Chapter 56 (House Bill 253) addresses two significant long-term risks to the capital outlay program: the potential negative impact of soaring debt capacity to the state's bond ratings and the long-term decline of dedicated capital outlay revenues from taxes on oil and gas. The bill amends the Severance Tax Bonding Act to, under certain circumstances, reduce maximum long-term debt capacity from the severance tax bonding program and distribute any cash savings to a new capital development and reserve fund. The bill also authorizes the Board of Finance to convert any excess cash available in the severance tax bonding fund at the end of FY24—up to \$500 million—into a one-time distribution to the new fund.

The reserve fund will make annual distributions equal to 5 percent of its average year-end value over the previous three years. The initial FY24 infusion could provide a significant boost to the growth of the reserve fund and, by extension, to the annual distributions from the fund that will be available to the Legislature for appropriation to capital projects.

Over time, distributions from the reserve fund will at least partially replace severance taxes as a dedicated revenue source for capital outlay, with the potential to increase total available funding in the future. While the reserve fund is growing and distributions are still modest, the impact to bonding available for capital appropriations from limits on long-term debt capacity could be mitigated by funding capital outlay with a mix of bond proceeds and general fund.

Support for Project Completion

Even in these years of historic surplus, capital outlay requests from state and local entities continued to exceed available funding. Requests totaled an estimated \$5.4 billion, including \$3.6 billion submitted for direct appropriations from House and Senate members and \$1.8 billion submitted through the state agency and higher education request processes.

The significant gap between requests and available funds, along with the practice of earmarking funding for individual legislators and the governor, undermines the state’s ability to use surging revenues to efficiently complete projects that represent the greatest needs or would produce the most public benefits. Local projects are not consistently vetted for need or readiness and often receive only piecemeal funding. Piecemeal funding can contribute to project delays and increase overall costs. About 45 percent of roughly 1,400 general fund projects authorized in Chapter 66 received 50 percent or less of the requested funds, with \$178.4 million in general fund appropriated to 642 projects for which \$1.5 billion was requested.

The absence of a state entity responsible for coordinating capital outlay with other available funding sources and assisting local entities in accessing those funds has exacerbated these delays. Chapter 10 enacts an LFC endorsed bill (House Bill

General Fund, Severance Tax Bonds, and Other State Funds

Chapter 66 (Senate Bill 275) appropriates \$1.4 billion for capital outlay projects statewide, including approximately \$932.2 million from the general fund, \$350 million from severance tax bonds, and \$73.5 million from other state funds. The bill includes \$406 million for statewide projects and \$526 million for projects sponsored by legislators and the governor, most of which benefit local entities. The \$350 million in severance tax bonds to be issued in FY25 includes \$320 million for nine named road projects and \$30 million in supplementary funding for existing tribal projects. The bill requires the Department of Transportation and Indian Affairs Department to certify the needs for the funds to the Board of Finance and to meet certain conditions in doing so. If the agencies do not certify need by the end of FY25, the authorizations are void.

General Obligation Bonds

Chapter 64 (House Bill 308) authorizes the issuance of general obligation bonds totaling approximately \$289.6 million. The bill proposes four bond issues, including capital expenditures for senior citizen facilities (\$30.4 million); library resource acquisitions (\$19 million); higher education, special school, and tribal school capital improvements and acquisitions (\$229.6 million); and statewide public safety radio communications (\$10 million). Issuance and sale of general obligation bonds, supported by a dedicated statewide property tax, requires approval by voters in the November 2024 general election. According to the Board of Finance, in the last fiscal year, the state collected \$138.3 million in revenues dedicated to servicing general obligation bond debt. The governor vetoed limited language from only two projects in the general obligation bond bill. Both involved projects that were requested by institutions but not recommended for funding by the Higher Education Department.

Reauthorization Bill

Chapter 65 with the governor's vetoes (Senate Bill 246) reauthorizes more than 200 projects authorized in previous years from various funds. The governor vetoed 32 reauthorizations in the bill and partially vetoed language for six reauthorized projects. The vetoed projects include 23 originally authorized in 2018 or earlier that had

been previously reauthorized. The original appropriation for the oldest project included in the bill dated to 2012 and was included in the vetoes. Reauthorizations may change the administering agency for a project, change or expand the purpose of a project, extend the reversion date, or some combination of those things. Most of the reauthorizations in the bill—181 of 253—were for the sole purpose of extending time. As of March 2024, the projects reauthorized in the bill had an estimated \$130 million in outstanding balances.

Change Agency and Change or Expand Purpose	6
Change Agency; Change/Expand Purpose and Extend	14
Change or Expand Purpose	25
Extend Time	181
Extend Time and Change of Purpose	27
Total	253

Housing

Housing insecurity and homelessness continue to be topics of concern statewide. The General Appropriation Act (GAA) included a record investment of nearly \$215 million in nonrecurring funding to support housing development and transitional and supportive housing statewide.

Housing Development. Chapter 8 (House Bill 195) amended the Opportunity Enterprise Act to expand eligibility for funding to include affordable and workforce housing. The bill created a housing development revolving fund administered by the New Mexico Finance Authority to which the Legislature appropriated \$125 million for housing development projects.

Chapter 15 (Senate Bill 216) makes housing projects by nonprofit housing developers eligible for financing through the public project revolving fund and adds affordable housing plans as a qualified use of the local government planning fund. Laws 2024, Chapter 12 (House Bill 29) appropriates \$2 million from the public project revolving loan fund (PPRF) to the local government planning fund.

The GAA also includes \$50 million for the New Mexico housing trust fund. The fund is administered by the New Mexico Mortgage Finance Authority and provides flexible funding for housing development and initiatives, rental and mortgage assistance, housing counseling, down payment assistance, home rehabilitation and weatherization, and programs to address homelessness.

Transitional and Supportive Housing. The GAA includes \$10 million for transitional housing and shelters for victims of domestic violence and \$19.7 million for homelessness initiatives. The bill also includes \$2 million to the Corrections Department to expand reentry services, treatment programs, housing opportunities, and Medicaid-funded services and an additional \$5 million for various local projects addressing homelessness, supportive housing, and rental assistance.

Office of Housing. For the second year, legislation to create an Office of Housing failed to pass the Legislature. The bill received one hearing and was passed out of committee without recommendation. Senate Bill 71 would have created an Office of Housing administratively attached to DFA with a director appointed by the governor to study housing issues and work with governments and private developers to plan projects and acquire funding to address housing needs. Although the bill did not pass, \$2 million was appropriated to DFA for housing assistance personnel and programs.

New Mexico Finance Authority Legislation

The following bills related to the New Mexico Finance Authority (NMFA) were passed during the 2024 session and signed into law by the governor:

Chapter 11 (House Bill 28) authorizes the NMFA to make loans of \$1 million or more from the public project revolving loan fund to 100 state and local government entities.

Chapter 12 (House Bill 29) appropriates \$13 million from the public project revolving fund for expenditure in FY25 and subsequent fiscal years. Appropriations are made to the following funds: \$6 million to the drinking water state revolving loan fund; \$2 million to the local government planning fund; and \$5 million to the cultural affairs facilities infrastructure fund. The appropriation to the drinking water state revolving loan fund will serve as the state match for federal funds.

Chapter 6 (House Bill 148) authorizes NMFA to make loans or grants from the water project fund to 55 entities for 65 projects. Entities submitted applications to the Water Trust Board totaling approximately \$275 million for an estimated \$115.7 million in available funding after a portion of the water project earmark is distributed to the State Engineer for adjudication, as required by statute. Final grant and loan determinations will be made by the Water Trust Board. The GAA appropriated \$50 million to the water project fund to address the funding gap for projects on the 2024 authorization list.

Chapter 9 (House Bill 211) amends the Water Project Finance Act for a number of purposes, including to make wastewater projects eligible for funding through the Water Trust Board, to allow water project funds to be used for technical assistance services, to direct the board to prioritize projects that address health and safety issues, and to temporarily reduce statutory distributions from the water project fund to the State Engineer for water rights adjudication.

Transportation

For FY25, the Department of Transportation (NMDOT) received a base budget of \$1.28 billion, an increase of \$4.7 million, or 0.4 percent. The department's operating budget is funded primarily with revenue from gasoline and diesel taxes, taxes on motor vehicle sales, and fees on commercial trucking operations, as well as federal grants to support road projects. For FY25, federal revenue is projected to increase by 4.5 percent from the FY24 operating budget and state revenue is projected to decrease by 2.7 percent, mostly due to a decrease in available fund balance. Revenue from gasoline taxes, once NMDOT's largest revenue source, are expected to fall in FY25 and into the future as consumers continue the shift

to more fuel efficient vehicles. Revenue estimates from NMDOT indicate overall state road fund revenue is expected to rise due mostly to increases in motor vehicle excises taxes, which increases with car prices, with annual increases in the future projected at about 1 percent growth per year.

The Legislature continued its recent practice of supplementing road user fees with additional general fund revenue for transportation projects, with \$205 million for road projects statewide included as special appropriations in the GAA, although the governor vetoed \$39 million earmarked for contracts with disadvantaged business enterprises. In addition, the Legislature authorized the issuance of \$320 million in short-term severance tax bonds for road projects around the state. Typically, when the Legislature authorizes debt for road projects, bonds are repaid with a combination of earmarked revenue from NMDOT and with federal transportation funds. In recent years, NMDOT has paid between \$168 million and \$194 million per year in debt service and the department has about \$700 million outstanding for FY25 and future years. A large balloon payment in FY24 will allow NMDOT to reallocate about \$80 million in annual debt service within its operating budget to fund additional road construction and maintenance projects. The FY25 severance tax bonds authorized by the Legislature in the capital outlay bill for road projects will not have an impact on NMDOT’s operating budget but will instead reduce available bonding capacity for next year’s capital outlay projects.

Special Transportation Appropriations (in thousands)

Project	Amount
Road maintenance statewide	\$120,000.0 \$84,000.0
Road construction projects	\$70,000.0
Essential air service	\$15,000.0
Road beautification	\$10,000.0 \$7,000.0
Wildlife corridors	\$5,000.0

Severance Tax Bonding Projects

1. Intersection of NM-213 and NM-404, near Chaparral;
2. Interstate 25, south of Santa Fe;
3. Interstate 40, near Church Rock;
4. US-380, from Roswell to Texas border;
5. Interchange at the intersection of I-25 and US-64 in Raton;
6. US-180 from 128.27 to 142.5
7. New interchange on I-25, near Los Lunas
8. NM-128 in Eddy County; and
9. Rio Bravo bridge replacement, Albuquerque.

Natural Resources

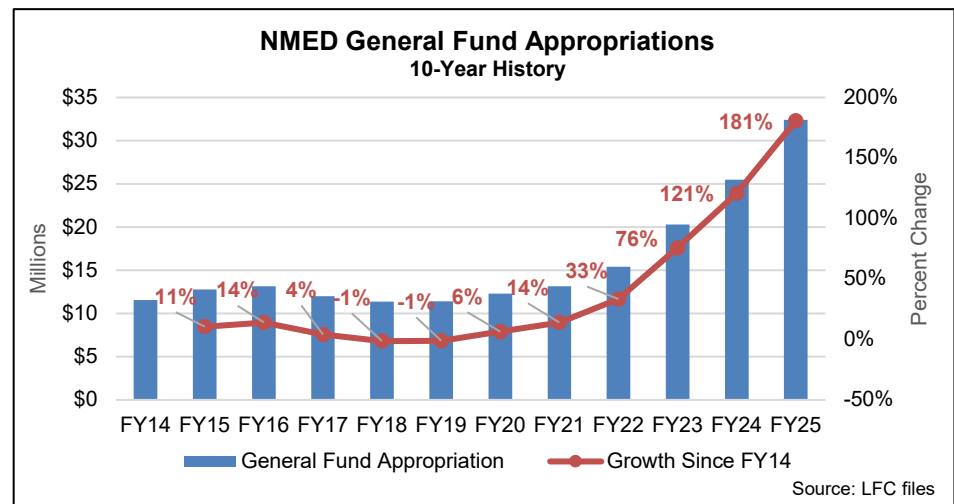

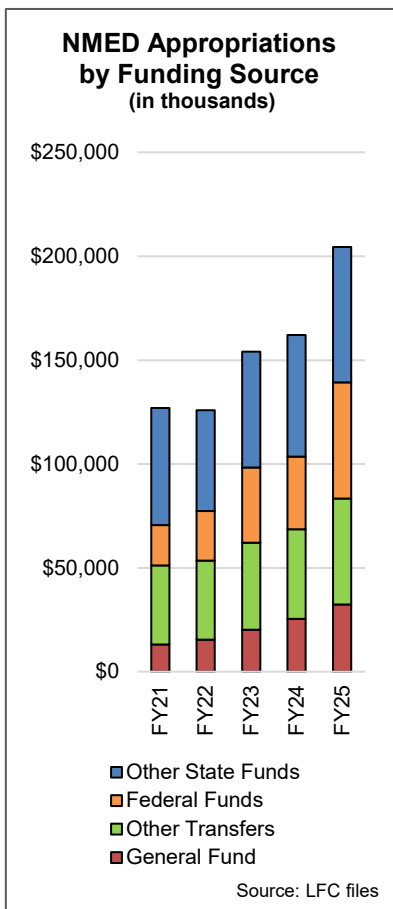

The General Appropriation Act of 2024 increased FY25 recurring general fund appropriations for key natural resources agencies—the Energy, Minerals and Natural Resources Department, the Office of the State Engineer, and the Environment Department—by \$12.2 million. Nonrecurring general fund appropriations to these agencies and others that support natural resources policy totaled \$352.3 million.

This amount includes a \$300 million appropriation to the Department of Finance and Administration for the conservation legacy permanent fund. Other recurring and nonrecurring investments were made for climate change response and damage mitigation (\$19.5 million); water conservation, management, and infrastructure improvements (\$30.8 million); the protection and remediation of natural lands and habitat (\$2.4 million); and oversight of the oil and gas industry (\$10.8 million).

Agency Operating Budgets

Environment Department

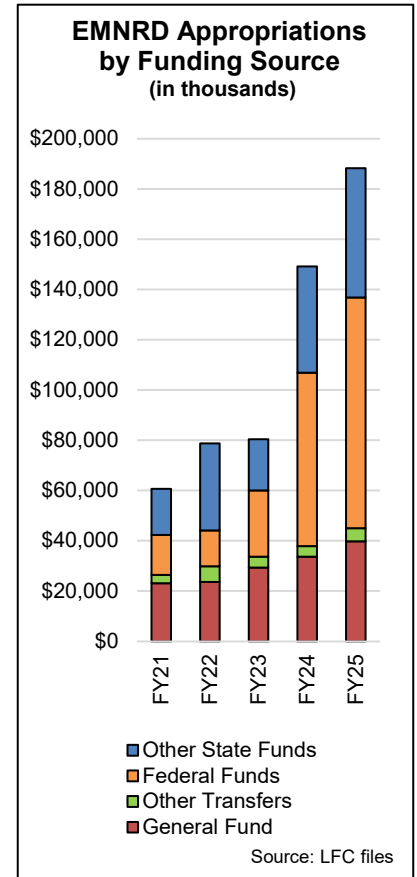

The General Appropriation Act of 2024 (GAA) increased recurring general fund appropriations to the Environment Department (NMED) by \$6.9 million, or 27.1 percent. The large majority of that increase, \$5.7 million, will fund agency-wide pay raises to support appropriate placement. The remainder will be used for NMED’s building leases for office space.

Energy, Minerals and Natural Resources Department

Recurring general fund appropriations to the Energy, Minerals and Natural Resources Department (EMNRD) increased by \$4.4 million in FY25, 12.5 percent compared with FY24. The increase comprised \$3.1 million in base funding and \$1.3 million for program expansions. Over \$1.2 million was invested in personnel resources for the State Forestry Division to staff a second “hotshot crew” for rapid wildfire response and to increase salaries for a new wildland firefighter job classification. The State Parks Division also received personnel funding to fill vacant positions.

The GAA funded program expansions for Water Data Act reporting requirements, environmental and underground injection control field staff, and a hearing examiner for the Oil Conservation Commission.

Office of the State Engineer

The GAA increased recurring general fund appropriations to the Office of the State Engineer (OSE) by \$2.7 million, or 8.9 percent. The budget increases will support program expansions across the agency for Water Security Planning Act implementation, active water resource management, and water infrastructure project funding and administration. The expansions related to water infrastructure were developed by OSE based on recommendations from the 2023 Water Policy and Infrastructure Task Force.

Nonrecurring Appropriations

Climate Change Response and Mitigation

More than \$18.2 million was appropriated in the 2024 GAA for initiatives to respond to and mitigate damage from climate change. These include new geothermal energy programs to conduct research and development at the New Mexico Institute of Mining and Technology and to provide grants and loans for

Trust Land Royalty Rates

An attempt to raise the maximum royalty rate on oil and gas production on certain high-value state trust land tracts passed the House but failed in the Senate in the fourth legislative attempt to raise the rate since 2017. New Mexico's 20 percent maximum royalty rate for oil and gas leases on trust land, last updated in the 1970s, is higher than those in most other states with trust land but less than that charged by Texas, New Mexico's competitor in the high-production Permian Basin. Raising the rate to 25 percent was expected to generate from \$50 million to \$75 million more a year for the land grant permanent fund. The State Land Office announced in early March 2024, shortly after the session ended, it would not include premium tracts in its monthly oil and gas lease sale until the rate is increased, arguing the state is losing money by offering to lease these lands at what it calls submarket rates.

cost-benefit studies and construction of geothermal energy projects. The grants and loans will be available through two new funds created by House Bill 91 (Laws 2024, Chapter 55) for the purpose of financing geothermal development projects.

EMNRD received \$10 million to administer low-interest loan programs for weatherization and adoption of renewable energy technologies in low-income communities. State funding for grid resilience and modernization grants will allow New Mexico to leverage an additional \$14 million in federal funding from the Infrastructure Investment and Jobs Act.

Water Conservation, Management, and Infrastructure

The Legislature appropriated \$20 million to OSE to support Indian water rights settlement projects through FY27. OSE also received nonrecurring appropriations to update physical and digital infrastructure that improves water data quality and management. The GAA appropriated \$7 million from the general fund to the water quality management fund, administered by NMED, for the development, implementation, and administration of state surface and ground water permitting programs.

Land and Habitat Protection

Legacy Fund. The General Appropriation Act includes a \$300 million transfer from the general fund to the conservation legacy permanent fund, which is invested to generate income for natural resources programs in six state agencies. The influx of cash will bring the funding in the permanent fund to a level that will generate more income sooner for the beneficiary agencies. Created in 2023 with an initial appropriation of \$50 million, the permanent fund must reach \$150 million before funds are transferred to the land of enchantment legacy fund, the program from which funds are distributed to the beneficiaries. The permanent fund was not projected to hit the threshold for 15 years. While the land of enchantment fund also received a \$50 million appropriation in 2023, that money was expected to run out in four years. The appropriation in the GAA brings the value of the permanent fund to \$350 million, above the threshold, and funds should start flowing from the permanent fund to the program fund in FY26.

Other appropriations will support conservation and remediation efforts by funding staff for the Rio Grande Trail Commission and activities that protect the public from emerging contaminants, such as PFAS.

Oil and Gas Industry Oversight

In addition to operating budget growth that continually increases the state's capacity to enforce regulatory compliance, the GAA includes nonrecurring appropriations to EMNRD and NMED to improve oversight of the oil and gas industry. The Oil Conservation Division in EMNRD received \$2.5 million to address inspection and compliance backlogs, and NMED received \$1 million for inspections and enforcement and \$600 thousand for its surface water discharge permitting program.

Government Administration

The General Appropriation Act of 2024 reflects some reorganization of government programs, including the transfer of the state’s employee health benefits program from the General Service Department to the Health Care Authority and the move of the food initiatives from the Department of Finance and Administration to the Public Education Department. In general, FY25 funding levels increased for general government agencies, with \$169 million for the General Services Department, \$765.4 thousand for the Secretary of State, and \$4.2 million for the Taxation and Revenue Department. However, the Department of Finance and Administration’s budget was reduced by \$20 million. In addition, the Office of the State Auditor received a \$1 million special appropriation for audits to local public bodies to assist with audit compliance for capital outlay projects.

General Services Department

The General Appropriation Act (GAA) includes a total of \$169 million for the General Services Department (GSD), a decrease of \$351.4 million due to the transfer of the employee group health benefits program to the Health Care Authority. Not considering the transfer, the department received an \$11.7 million increase, or 6.9 percent from FY24. Most of that additional revenue was in the risk management funds program, which includes appropriations from the public liability fund, the public property reserve fund, and the state’s workers’ compensation retention fund. That program received \$6.8 million, or 6.5 percent, reflecting higher liability claims costs, mostly from a small number of agencies. GSD has seen a number of high-dollar settlements in recent months from these agencies, pushing up costs for the public liability fund and reducing cash reserves available to the fund. For other programs, the agency is receiving a \$4.9 million increase.

The Facilities Management Division (FMD), which oversees the use of state buildings and operates state facilities in Santa Fe, received a \$1.5 million, or 7.1 percent increase, including \$1 million from the public buildings repair fund. Language included in the GAA made this fund contingent on the department establishing a schedule of building use fees; however, the contingency language was vetoed by the governor. State law allows the secretary of GSD to set these fees and deposit the revenue into the public buildings repair fund. However, without the additional revenue, the department will quickly exhaust existing fund balance. FMD is also responsible for managing capital outlay projects for most state agencies. Chapter 66, the capital outlay bill, included \$128.3 million in appropriations to the capital program fund for facility improvements and other capital projects.

FMD Managed Capital Projects
(in thousands)

Project	Amount
Northeastern New Mexico Correctional Facility Purchase	\$34,035.0
Behavioral Health Institute Construction	\$30,000.0
Bataan Building Restoration and Improvements	\$10,000.0
GSD Statewide Facilities	\$10,000.0
Corrections Facilities Security and Safety	\$9,000.0

Source: LFC files

2024 Election Legislation

During the 2024 legislative session, several bills passed related to elections:

Chapter 57 (House Bill 182) amends the Campaign Reporting Act by adding a disclaimer requirement for materially deceptive media and creating the crime of distributing materially deceptive media. This bill creates a misdemeanor on the first conviction of violation of the prohibition and a fourth-degree felony on the second conviction.

Chapter 50 (Senate Bill 5) changes the Election Code to prohibit the possession of a firearm at a polling place while early voting is in progress or on election day and creates a petty misdemeanor if found guilty.

Chapter 24 (Senate Bill 108) creates new distribution to the state election fund from the general fund. The distribution is to occur at the end of every fiscal year in the amount needed to raise the balance of the state election fund to \$15 million to support provisions required by the Election Code.

Secretary of State

For FY25, the GAA increases the general fund appropriation for the Secretary of State's office (SOS) by \$765.4 thousand, 4.7 percent over FY24. The budget provides increases in the Elections Program totaling \$531.8 thousand, 4.6 percent, to support an increase in personnel costs and a new position, and by \$233.6 thousand, 4.9 percent, for the Administration and Operations Program for an increase in personnel costs and new position.

Instead of funding election administration costs via the operating budget, Chapter 24 raises the state election fund to \$15 million by transferring money from the general fund outside of annual appropriations to pay for election costs and reimbursements to local governments. Chapter 24 accounts for the fluctuating general fund of SOS due to the rising costs of elections as well as certain fiscal years having multiple elections. If the current year balances in the election fund from Chapter 24 do not cover the costs of elections, SOS may apply for emergency funding. SOS received \$1 million for two different court cases and \$500 thousand for its automated voter registration system.

Department of Finance and Administration

For FY25, the GAA reduces the Department of Finance and Administration (DFA) general fund appropriations by \$20 million, or 35.5 percent. The agency's food initiative was transferred to the Public Education Department, causing a \$22.5 million reduction in the general fund.

The GAA also appropriates \$12.6 million from the enhanced 911 fund, \$23.7 million from the local DWI grant fund, and \$73 million from the county-supported Medicaid fund. The GAA authorizes transfers of up to \$4 million for the State Board of Finance emergency fund. Other special appropriations include \$50 million for water projects fund for projects authorized by the Legislature in 2024, \$20 million for firefighter recruitment, and \$22 million for the law enforcement protection fund.

Local Government Division

The recurring operating budget for DFA includes an increase of \$690.9 thousand for the Local Government Division, of which \$390.9 thousand will support four new positions for the Local Government Division, as well as a \$300 thousand increase for personnel. Nonrecurring appropriations in the GAA related to these efforts include \$75 million for local and federal match assistance through the New Mexico match fund, which allows the agency to use 3 percent of the fund for administration purposes. For the Civil Legal Services Program, the GAA includes \$2.9 million from the general fund, \$1 million from the civil legal services fund, and \$2.4 million in other nonrecurring appropriations for the fund, which includes \$160 thousand for civil legal services for people with disabilities.

Taxation and Revenue Department

For FY25, the Taxation and Revenue Department (TRD) received a general fund increase of \$2.6 million, 3.3 percent above the FY24 operating budget, to fund maintenance costs for technology contracts in Program Support for the tax

collections system (GenTax) for an increase in the pricing model for the contract. TRD also received a base budget increase of \$4.2 million in other state funds and federal funds (in contractual services) to support systems of record, 28.9 percent above the FY24 operating budget. The GAA also provides an increase of \$263.3 thousand from federal and other state funds in the personal services and employee benefits category.

In nonrecurring funds, the GAA provides \$3.9 million to develop, enhance, and maintain tax systems of record, which include GenTax and the system used by the motor vehicle program, Tapestry. GAA language provides TRD up to \$2 million to implement legislatively mandated tax and motor vehicle changes.

Office of the State Auditor

During the 2024 legislative session, the Office of the State Auditor (OSA) received a special appropriation of \$1 million aimed at aiding small local public bodies in achieving financial compliance. This assistance is pivotal to ensure these local public bodies can access both present and future capital outlay awards. Compliance with state financial reporting laws, as mandated by Executive Order 2013-006, is required for entities to receive capital outlay awards.

An FY23 LFC capital outlay report found that \$6 million in capital outlay funding earmarked for local public bodies is being withheld due to noncompliance with state financial reporting laws.

In FY23, OSA received a \$500 thousand special appropriation to gradually bring noncompliant small political subdivisions into compliance through a phased approach, which involved awarding grants to local public bodies. Currently, OSA is rolling out a new initiative focused on establishing contracts with independent public accountants to aid small local public bodies in achieving and maintaining financial compliance. Since the issuance of the executive order, OSA reports freeing up \$2.3 million in capital outlay funding for local public bodies.

2024 Legislation Affecting Taxation and Revenue Department

During the 2024 legislative session, several bills passed related to the Taxation Revenue Department (TRD):

Chapter 58 (House Bill 251) requires the Motor Vehicle Division (MVD) to apply for a long-term license from the U.S. Department of Agriculture Forest Service (USDA) to use the image and name of Smokey Bear for a new specialty plate. MVD would issue the Smokey Bear fire prevention special registration plate for \$50, in addition to regular motor vehicle registration fees. MVD would also charge a \$40 annual renewal fee.

Chapter 13 (Senate Bill 88) enables TRD to issue electronic credentials for driver's licenses and identification cards in addition to physical driver's license cards or physical identification cards.

Chapter 59 (Senate Bill 148) phases out administrative costs and fees currently withheld by TRD for the administration of local government revenues over the next five years. Specifically, administrative costs withheld will be reduced from 3 percent to 2 percent in FY27, further to 1 percent in FY28, and eliminated in FY29.

State Employment and Compensation

General Fund Salary Increases (in thousands)

Branch	Appropriation
Legislative	\$534.0
Judicial	\$12,692.9
Executive	\$33,595.2
Higher Education	\$33,134.8
Public Education	\$95,643.0

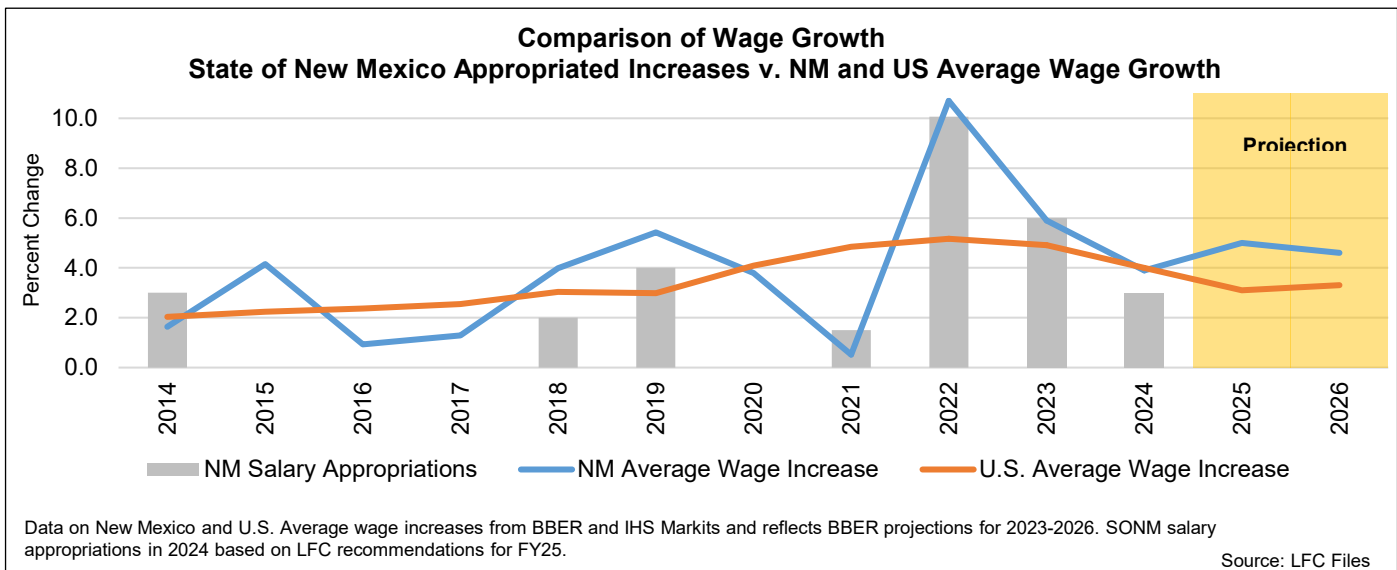

Source: LFC Files

Appropriations for salary increases included in the General Appropriation Act of 2024 totaled \$175.5 million, including \$46.8 for state employees, \$33.1 for higher education employees and \$95.6 million for public schools. In addition, the Legislature approved increases for state employee’s health benefits programs, including one-time funding to address current deficits in the program. To address high vacancy rates for employees of state and local government, the Legislature created a new return-to-work program for public safety employees and expanded to state police and correctional officer pension plan to include newly created firefighting positions in state government.

Employee Salaries

Significant budget growth in recent years has led to large surpluses in state agency budgets in the personal services and employee benefits category. For FY23, actual spending on personal services and employee benefits was \$148 million below amounts appropriated by the Legislature and LFC estimates total vacancy savings of up to \$200 million for FY24, based on salary data from the first half of the fiscal year.

For FY25, the Legislature included salary increases of three percent for all state, public school, and higher education employees, with a general fund cost of \$160 million. In addition, the Legislature included \$10.2 million for the Department of Public Safety to implement an enhanced pay plan for state police officers, in an effort to improve recruitment and retention of police officers and \$4 million to implement the provisions of Chapter 3 (House Bill 141), which increases judicial salaries.

In addition to direct compensation appropriations, the Legislature included additional appropriations in the personal services and employee benefits category of state agency operating budget to allow agencies to hire new staff or compensate their staff at a higher level. LFC staff estimate executive branch agency operating budgets for personal services and employee benefits will grow by more than \$100 million, or 5 percent of FY24 operating budgets for those agencies.

Health Insurance Benefits

The Legislature approved additional resources to remediate underfunding of the state’s employee group health benefits programs due to a multi-year rate holiday, providing more than \$140 million in one-time funding, on top of premium rate increases of 9.2 percent, which were built into agency operating budget requests for FY25. Including the prior year general fund appropriations, the Legislature has appropriated a total of \$175.5 million from the general fund to account for the failure to raise premiums between FY20 and FY24. Direct general fund appropriations has the effect of subsidizing other revenue sources, including other participating government entities, that would typically pick up these costs, at the expense of the general fund.

Chapter 39 finalizes the shift of the state’s group benefits program from the General Services Department to the Health Care Authority and outlines additional duties for the Health Care Authority. The authority anticipates changes approved by the Legislature will improve the coordination of the state’s joint purchasing program for public employee benefits. Previous LFC program evaluations have noted the state’s current system for joint purchasing of health insurance benefits fails to take advantage of economies of scale and better coordination could help limit costs increases in the future.

Post-Employment Benefits

Several bills were introduced during the 2024 session to address the post-employment benefits of public employees including the creation of new return-to-work programs—policies that allow an employee to retire and begin receiving a pension while simultaneously holding a job that would normally require the employee to suspend retirement and contribute to the pension system. Chapter 48 (House Bill 236) creates a new return-to-work program for the Public Employees Retirement Association (PERA), allowing retired PERA members to return to work in several public safety-related fields, including state corrections officers, local detention officers, emergency medical technicians and paramedics, investigators with the Attorney General, Child Protective Services, or with district attorneys’ offices, state and local firefighters, and state and local police officers and dispatchers. The new program would allow current retirees—but not future retirees—to seek reemployment with the state or a local government covered by PERA without needing to suspend their retirement benefit. To protect the solvency of PERA’s trust fund, the law requires these employees and their employers to make nonrefundable contributions to the trust fund.

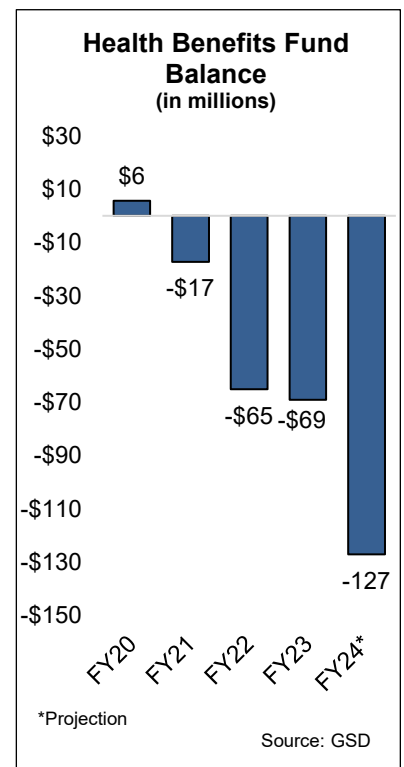

Chapter 52 (Senate Bill 128) expands the current pension plan that covers state police, adult correctional officers, and probation and parole officers to include new state firefighting positions created as part of the FY24 budget process (local police and fire are covered by separate plans). The law provides enhanced benefits for public safety employees, accounting for typically shorter service periods for these professions and providing for higher contribution rates to maintain fund solvency.

Executive Branch Appropriations Personal Services and Employee Benefits (in thousands)

FY24 OpBud	\$2,022,360.7
FY25 Section 4 Appropriations	\$2,061,247.5
FY25 Section 8 Compensation*	\$65,490.2
FY25 OpBud Total Estimate	\$2,126,737.7
Estimated Operating Budget Increase	\$104,377.0

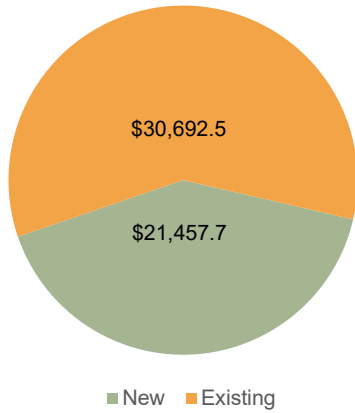

*LFC estimate; includes appropriations from both the general fund and other funds. Total general fund appropriations for executive branch agencies were \$36.5 million, including targeted compensation. The general fund share of compensation expenses varies by agency, but overall is 48.8 percent for the executive branch.

Source: LFC Files

Information Technology

FY25 Agency IT Projects
(in thousands)

Source: LFC files

The General Appropriation Act (GAA) of 2024 centralizes \$5.5 million in cybersecurity funding at the Department of Information Technology (DoIT) for higher education institutions and provides \$25 million to continue supporting broadband expansion projects. The GAA funds \$52.1 million for 19 key agency information technology (IT) projects and reauthorizes the spending of \$119 million of several prior-year appropriations through FY25.

Information Technology Projects

The Legislature appropriated just over \$52.1 million from all sources for 19 IT projects in the GAA, including \$28.1 million in general fund revenues, \$13.5 million in other state funds, and \$10.4 million in federal funds. Recommended items included eight new projects and 11 existing projects.

Appropriations to continue existing projects include \$7 million to the higher education institutions' shared services enterprise resource planning system; \$4 million for the Department of Public Safety's criminal justice information services; and \$3.5 million to continue the modernization of the Regulation and Licensing Department's permitting and inspection software. Funding for new initiatives includes \$11.2 million for the Workforce Solutions Department modernization of the existing unemployment insurance systems, \$3.17 million for the Public Education Department to enhance the current nova operating system, and \$800 thousand for the Environment Department to migrate and modernize current systems.

The GAA also extends the time to spend 35 prior-year IT appropriations that are unspent for a variety of reasons, including delays to project schedules, changes to project scope, or other issues within the implementing agency or project. The Department of Health, for example, requested extensions for 12 appropriations totaling \$54.5 million, of which only around \$11.7 million has been spent. The Legislature rejected three reauthorization requests for projects that have been extended more than three times previously or with small balances or no spending.

Other appropriations for IT in the GAA that were funded outside the computer systems enhancement fund include \$600 thousand to the Department of Finance for information technology upgrades. Capital outlay appropriations for IT include \$10 million to DoIT for the P25 public safety radio project and \$1.5 million to the Public Regulation Commission for information technology purchases.

FY25 Agency C2 Reauthorization Requests
(in thousands)

Agency	# of Reauthorization Requests	Amount Initially Appropriated	Balance
DOH	12	\$54,523.4	\$42,814.0
HCA	7	\$258,090.3	\$57,304.2
DFA	2	\$7,791.5	\$3,793.8

AODA	1	\$2,564.0	\$2,294.4
Total	35	\$379,681.8	\$129,123.8

Source: LFC files

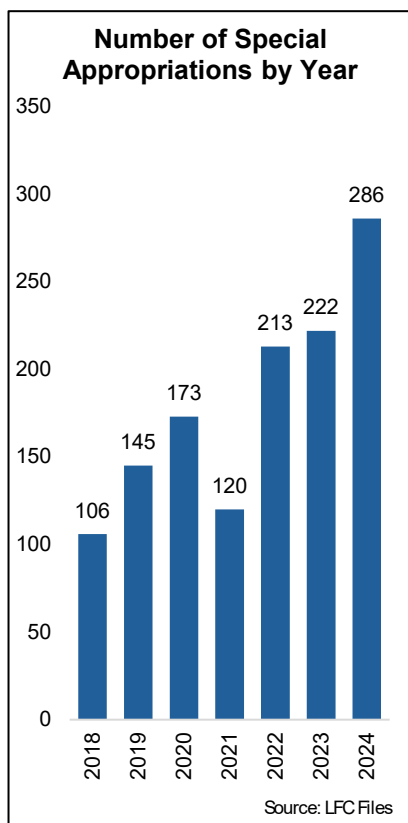

Broadband

Appropriations. The GAA for FY25 included a general fund revenue increase of \$339.7 thousand, or 24 percent over FY24, to provide personnel costs to the Office of Broadband Access and Expansion (OBAE). The GAA includes \$25 million in new general fund revenue for a special nonrecurring appropriation for broadband.

Cybersecurity

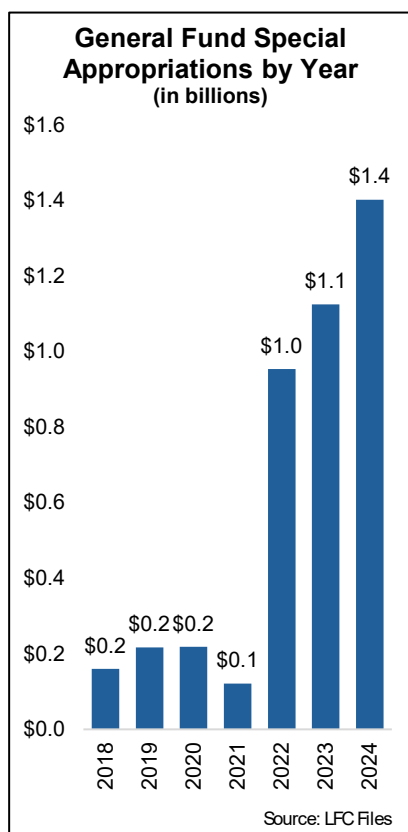

Appropriations. For cybersecurity, DoIT received a recurring operating budget increase of \$6.49 million for the newly created Cybersecurity Office pursuant to Laws 2023, Chapter 115. In addition, the GAA included a one-time nonrecurring appropriation to DoIT for cybersecurity for higher education institutions (\$5.5 million). DoIT reauthorized \$4.3 million in unspent funds from previous cybersecurity appropriations.

Special, Supplemental, Deficiency, and Other Nonrecurring Appropriations

Strong general fund revenues provided the Legislature with significant resources for nonrecurring investments. December 2023 revenue estimates projected year-end FY24 general fund reserves of \$5.1 billion, or 53 percent of FY24 recurring appropriations. With these resources, the Legislature made significant investments in public infrastructure and housing, to address healthcare needs in underserved areas, and to develop New Mexico’s workforce. Additionally, the Legislature set aside funds to provide opportunities for modest growth in recurring budgets even as long-term budget projects show slowing revenue growth. Special, supplemental, and deficiency appropriations total nearly \$1.875 billion, including \$1.402 billion in general fund revenue and \$473 million in other state and federal revenues. Fund transfers total \$1.317 billion, almost entirely from the general fund.

The number and total cost of special appropriations has increased dramatically in recent years. In 2018, the Legislature included 106 special, supplemental, and deficiency appropriations in the General Appropriation Act (GAA), for a total of \$160 million in general fund appropriations. By 2024, that number rose to 286 appropriations, including 60 appropriations reauthorizing prior-year special appropriations the agency anticipates will not be spent by the appropriation’s initial reversion date, a nine-fold increase in total appropriations in six years.

Government Results and Opportunity Expendable Trust

Chapter 18 (HB196) created a new tool for the Legislature to invest in promising programs within state agencies, while ensuring new programs are measured and evaluated to see if the program is achieving the desired outcomes for New Mexicans. The law created the government results and opportunity (GRO) expendable trust, which the GAA funds with a one-time transfer of \$512.2 million, with annual distribution to a program fund. LFC estimates annual distributions of more than \$100 million per year between FY26 and FY30 and a final, \$40 million distribution in FY31, available to the Legislature for appropriation to promising programs that should be studied prior to building funding for these programs into an agency’s base operating budget.

For FY25 through FY27, the GAA includes a total of \$216 million in appropriations for pilot programs, with equal amounts allocated in each year. This mechanism provides agencies with consistent funding while the project is being studied, without the need to continue to seek special appropriations in the future. At the same time, the Legislature will need to consider ongoing needs of pilot programs that are shown to be effective. As windfall revenues caused by increased oil and gas production come to an end, the Legislature may need to prioritize recurring

Special, Supplemental, Deficiency, and Other Nonrecurring Appropriations

budget increases to programs shown to be effective, limiting the ability to increase recurring budgets in other areas.

Education and Social Supports

The GAA of 2024 includes funding to address child well-being and educational programs, including \$324.8 million for the Public Education Department, \$194 million for the Health Care Authority, and \$26.8 million for the Children, Youth and Families Department. CYFD received a number of three-year appropriations from the GRO fund, including funds to promote masters-level social work licenses for CYFD’s workforce, funding to improve supports for children in foster care and for the Child Protective Services Division to study and implement multilevel response systems statewide.

Several large education programs continue to fund reforms that began in prior years. The GAA includes \$40 million for career and technical education programs and \$30 million for summer and reading interventions. PED also received \$60 million over three years from the GRO trust to support educator clinical practice programs.

Economic and Workforce Development

The Legislature invested heavily in programs to build New Mexico’s economy, with a total of \$20.6 million for the Economic Development Department, \$21.4 million for the Tourism Department, and \$181.6 million for higher education. Projects under the Local Economic Development Act will receive \$10 million, with an additional \$500 thousand for site readiness studies. EDD will also receive \$10 million to support trail and outdoor infrastructure grants, continuing a prior year appropriation to boost New Mexico’s outdoor economy. The GAA also includes \$15 million for tourism marketing, and \$1.9 million for local and tribal government to develop tourism-related infrastructure.

Several higher education appropriations are focused on workforce development, including \$60 million over three years to support workforce training courses that lead to industry-recognized credentials, or to subsidize the costs of apprenticeships or pre-apprenticeships. The bill also includes \$10 million to support those training in social work, \$10 million for graduate science, technology, engineering, and math education, and \$15 million to boost the health professionals workforce through loan repayment programs, as well as \$1.5 million to partner with a college of osteopathic medicine to boost health careers among young New Mexicans.

Infrastructure and Housing

The GAA includes several programs to ease rising housing costs and support construction of new housing in New Mexico. This includes \$175 million to the

Government Results and Opportunity Pilot Projects (in thousands)

Dept.	Appropriation	Amount
ECECD	Wage and Career Ladders	\$15,000
ALTSD	New Medicare	\$9,375
HCA	Behavioral Health Services	\$15,000
WSD	Career Exploration Pilot	\$6,000
WSD	Pre-Apprenticeship Programs	\$1,800
OFRA	Study Outcomes for Youth in Custody	\$6,188
CYFD	Master-Level Social Work Licensure	\$1,688
CYFD	Multi-level Response for CPS	\$4,200
CYFD	Prevention and Intervention Services	\$9,000
CYFD	Foster Care Support	\$3,750

Special, Supplemental, Deficiency, and Other Nonrecurring Appropriations

New Mexico Finance Authority for the opportunity enterprise revolving fund, which was expanded to by Chapter 8 (HB195) to support housing projects. Of the \$175 million, \$125 million was earmarked for housing development and \$50 million was earmarked for commercial enterprise development. The Legislature also approved a \$50 million transfer to the housing trust fund of the Mortgage Finance Authority to carry out the provisions of the Affordable Housing Act.

The Legislature continued the recent practice of supplementing the road user fees typically used to fund transportation infrastructure projects with additional general fund revenue, including \$205 million for projects statewide and \$15 million to support rural air service; however, a portion of this appropriation earmarked for disadvantaged business enterprises was vetoed by the governor. Additionally, separate legislation authorized an addition \$320 million in severance tax bonds for the Department of Transportation to undertake major infrastructure investments. The GAA also includes \$50 million for projects funded through the Water Trust Board and \$20 million for the Office of the State Engineer to support Indian water rights settlements.

Additional infrastructure appropriations are included to allow local and tribal governments and state agencies to leverage federal grant opportunities or to complete previously authorized capital outlay projects. Chapter 7 (House Bill 177) created the New Mexico match fund, administered by the Department of Finance and Administration, to give public entities in New Mexico a possible funding source for federal grant programs requiring a state match or to account for increased costs of federal requirements. The New Mexico match fund was seeded with a special appropriation of \$75 million.

General Fund Transfers (in thousands)

Receiving Fund	Amount
Government Results and Opportunity Expendable Trust	\$512,200
Government Results and Opportunity Program Fund	\$325,800
Conservation Legacy Perm. Fund	\$300,000
Water Trust Fund	\$50,000
New Mexico Housing Trust Fund	\$50,000
Public Liability Fund	\$20,000
Emergency Medical Services Fund	\$11,000

Source: LFC Files

Courts and Public Safety

Investments in the public safety workforce are also included in the GAA. To promote the employment of police officers and firefighters, \$25 million is appropriated to support recruitment and retention at local fire departments, including volunteer departments, and \$25 million to support recruitment in local police departments and the law enforcement retention fund received \$1 million. The Legislature also provided significant resources to support crime victims. The Crime Victims Reparation Commission received a total of \$7 million in special appropriations, including \$1 million for victims of sexual assault and \$4 million victims of homicide and other violent crimes.

Fund Transfers

The GAA includes a total of \$1.318 billion in fund transfers, including \$1.304 billion to set aside excess general fund revenue for future expenditures. Appropriations include \$300 million from the general fund to fully capitalize the conservation legacy permanent fund. That fund, created in 2023, distributes recurring revenue each year for environment and natural resources agencies. Additionally, the Legislature shored up the state's public liability fund, which has been hit by several large claims recently, and transferred an additional \$50 million to the water trust fund, in addition to the \$50 million for water projects appropriations.

Reserves as a Percent of Recurring Appropriations	48.0%	29.7%	32.2%

Notes:

1) Many nonrecurring appropriations, including specials and supplementals in the GAA, had authorization to spend in multiple fiscal years - amounts that were not distributed in the first year become encumbrances for the next year.

2) HB2 included \$227.5 million of spending from ARPA funds in FY23 and \$95 million of swaps of previous ARPA appropriations to general fund sources for a net spending of \$132.5 million of ARPA. The governor vetoed language sourcing \$23 million of appropriations to ARPA funds for GSD. Legal authority is unclear for those funds to then be general fund. This report assumes the \$23 million appropriation is vetoed with language veto.

Notes:

- 1) DFA using operating reserve to cover disaster allotments due to low balance in the appropriation contingency fund. FY20 includes \$35.5 million for COVID-19 related responses.
- 2) Recommendation includes removal from reserves.
- 3) Laws 2020, Chapter 34 (House Bill 341) transfers from the tax stabilization reserve to the operating reserve if operating reserve balances are below one percent of appropriations, up to an amount necessary for the operating reserve to be one percent of total appropriations. Transfer shown here in future year as the transfer occurs after all appropriations and revenues during the audit and cannot be used for spending in the current year.
- 4) Laws 2020, Chapter 3 (HB83, Section 4) provides that oil and gas school tax revenue in excess of the five-year average be transferred to the Early Childhood Trust Fund instead of the tax stabilization reserves if reserve balances exceed 25 percent of recurring appropriations.
- 9) Laws 2022, Chapter 54 includes authority of up to \$120 million from the operating reserve to the appropriation account to cover expenses. SB192 of the 2023 regular session includes authority for an additional \$430 million.

^Indicates improper veto that changes, alters, enlarges, or frustrates the will of the legislature (State ex rel. Segó V. Kirkpatrick, 1974-NMSC-059). Two remedies are possible 1) entire appropriation amount is not recognized and voided the appropriation or 2) the agency implements the reasonable contingency as passed by the legislature.

Light blue shaded lines note where partial veto struck funding amounts and this reduces total appropriation or a partial veto that rendered the appropriation nonsensical and thus voids fund amount or tried to void a condition precedent and keeps the funding. These amounts highlighted should not be budgeted by agencies.

Footnotes

1. Includes appropriations from the educator licensure fund.
2. Includes appropriations from the Temporary Assistance for Needy Families transfer.
3. HAFC includes the reauthorization of a prior appropriation for this purpose.
4. LFC transfers \$2 million from the public education reform fund (PERF) to the government results and opportunity (GRO) expendable trust fund for STEAM and CTE initiatives.
5. LFC transfers \$3.25 million from PERF to GRO. Distributions for educator clinical practice will come from PERF for the first year and from GRO in subsequent years.
6. HAFC authorizes the use of up to \$10 million from the state-support reserve fund to address projected FY24 unit value shortfalls.

Source: DDSD and LFC Files

DDSD General Fund Balance Estimate **\$ 17,165** **\$ 24,720** **\$ 32,021** *FY22 GF Cash Balance Unverified by LFC Staff

***Updated**

** Based on initial policy decision on ARPA spending.

*** Unspent ARPA fund balance is calculated from the 10% FMAP bump for 1915(c) waivers and may not reflect actual ARPA fund used to support the super allocation; negative balance means it will be covered by ARPA fund from the home and community based-service (HCBS) other than from the 1915(c) waivers.

SOURCE: Office of the Attorney General and LFC Files							
* Settlement language for some settling entities restricts the use of funds for specific purposes. NMAG anticipates some continued revenues from settlements with opioid companies in FY24. Litigation is ongoing and has not been completed, and FY24 projections are unavailable at this time.							
** 2023 Legislation (Laws XXXX) require that settlement revenue associated with several opioid manufacturers be moved out of the consumer settlement fund into a fund invested by the SIC. This document continues to account for them in the CSF for consistency, but opioid revenues will not be credited to the CSF in FY24 and onwards.							
***The opioid settlement with Walgreens is pending as of February 2023.

Climate, Energy, and Natural Resources Summary of Relevant Appropriations, 2024 General Appropriation Act (dollars in thousands)

Goal	Agency	Laws 2024, Chapter 69 Recurring		Laws 2024, Chapter 69 Nonrecurring	
		GF	Other	GF	Other
1 Respond to climate change and mitigate damage					
2 Emergency fire response (Hotshot Crews)	EMNRD	\$ 924.8			
3 Wildland firefighter salary increase	EMNRD	\$ 363.3			
4 Grid resilience and modernization grants (federal formula grants + state match)	EMNRD			\$ 1,705.0	\$ 14,000.0
5 Geothermal energy research and development (see Note A)	NMIMT			\$ 2,000.0	
6 Grants for geothermal development projects and cost-benefit studies of proposed projects (geothermal projects development fund)	EMNRD			\$ 2,500.0	
7 Loans for geothermal development projects (geothermal projects revolving loan fund)	EMNRD			\$ 2,500.0	
8 Federal Climate Policy Advisor	EMNRD		\$ 217.9		
9 Forest and watershed management projects, hazardous fuel reduction, tree thinning, and watershed restoration	EMNRD		\$ 22,300.0		
10 Administration of loan programs for adoption of wind, solar, and geothermal energy technologies and weatherization in low-income communities	EMNRD			\$ 10,000.0	
11 Subtotal		\$ 1,288.1	\$ 22,517.9	\$ 18,705.0	\$ 14,000.0
12 Improve Water Conservation, Management, and Infrastructure					
13 Improve quality of and access to water data					
14 Staff at Mining and Minerals Division to support Water Data Act reporting	EMNRD	\$ 144.5			
15 Software development services for Water Data Act reporting	EMNRD	\$ 200.0			
16 Water measurement and metering equipment operation and maintenance	OSE			\$ 500.0	
17 Hydrographic survey work to support water rights adjudications	OSE				\$ 5,000.0
18 Efficiently manage existing water resources					
19 Staff to support Water Security Planning Act implementation	OSE	\$ 1,307.1			
20 Active Water Resource Management	OSE	\$ 1,050.3			
21 Investment in Indian water rights settlement projects	OSE			\$ 20,000.0	
22 Water infrastructure project funding and administration (see Note B)	OSE	\$ 359.5			
23 Development, implementation, and administration of state surface and ground water permitting programs (water quality management fund)	NMED			\$ 7,000.0	
24 C2: modernize water rights adjudication tracking system applications and database	OSE			\$ 225.0	
25 Subtotal		\$ 3,061.4	\$ -	\$ 27,725.0	\$ 5,000.0
26 Preserve natural lands and habitat					
27 Improve agency capacity					
28 State Parks recruitment and retention	EMNRD	\$ 900.0			
29 IT services, utilities, and equipment	EMNRD	\$ 287.5			
30 Rio Grande Trail Commission staff	EMNRD			\$ 225.0	
31 Enhance statewide conservation and remediation efforts					
32 Sampling and community outreach for PFAS and other emerging contaminants	NMED			\$ 1,000.0	
33 Conservation and agricultural easements	EMNRD		\$ 1,406.3		
34 Orphaned well plugging	EMNRD		\$ 1,200.0		
35 Fully fund the Conservation Legacy Permanent Fund	DFA			\$ 300,000.0	
36 Subtotal		\$ 1,187.5	\$ 2,606.3	\$ 301,225.0	\$ -
37 Enhance oversight of the oil and gas industry					
38 Improve agency capacity (Oil Conservation Division)					
39 Underground Injection Control Bureau staff (Note C)	EMNRD	\$ 490.0			
40 Environmental Control bureau staff	EMNRD	\$ 380.0			
41 OCD hearing staff	EMNRD	\$ 119.8			
42 Inspection and compliance backlogs	EMNRD			\$ 2,525.0	
43 Improve agency capacity (Environment Department)					
44 Agency-wide salary increases	NMED	\$ 5,652.0			
45 Funding for inspections and enforcement	NMED			\$ 1,000.0	
46 Surface water discharge permitting program	NMED			\$ 600.0	
47 C2: Document digitization and management system	NMED				\$ 1,600.0
48 C2: Modernize & migrate applications to cloud, implement digital public portal	NMED				\$ 800.0
49 Subtotal		\$ 6,641.8	\$ -	\$ 4,125.0	\$ 2,400.0
50 2024 General Appropriation Act Total		\$ 12,178.8	\$ 25,124.2	\$ 351,780.0	\$ 21,400.0

Notes

- A Section 9 - Expendable trust appropriation (4 year expenditure with program evaluation criteria)
- B Based on recommendations from 2023 Water Policy and Infrastructure Task Force report
- C Anticipating EMNRD will apply to US EPA for primacy on enforcing Class VI wells (i.e. for Carbon capture and sequestration)

Section 9 A-C Government Results and Opportunity Expendable Trust					
Department	Language	Other State Funds (in thousands)	Inter-Agency (in thousands)	Total	Fiscal Year
<p>A. The following amounts are appropriated from the government results and opportunity program fund or other funds as indicated in fiscal year 2025 for the purposes specified, contingent on enactment of House Bill 196 or similar legislation of the second session of the fifty-sixth legislature creating the government results and opportunity expendable trust and providing for the distribution of the fund. The department of finance and administration and the legislative finance committee shall approve performance measures for agencies, including those specified in this section that shall be reported on a quarterly basis, and any independent impact evaluation plans and results of the evaluation, for the items in this section. Any unexpended balances of the appropriations remaining at the end of fiscal year 2025 shall revert to the government results and opportunity expendable trust fund or the appropriate fund.</p>					
4 Early Childhood Education and Care Department	To pilot a wage and career ladder for infant and toddler early educators in classrooms with children whose families are enrolled in childcare assistance and to fund a randomized-control study of the program.	\$ 5,000.0		\$ 5,000.0	FY25
5 Aging and Long-Term Services Department	For the New Medicare program and to fund a randomized-control study of the program.	\$ 3,125.0		\$ 3,125.0	FY25
6 Health Care Authority Department	For a pilot to expand evidence-based behavioral health services, including screening brief intervention and referral to treatment and certified community behavioral health clinics, to sustainably bill Medicaid once fully operational.	\$ 5,000.0		\$ 5,000.0	FY25
7 Workforce Solutions Department	For the implementation of a trades career exploration pilot program targeted towards disconnected and disengaged young adults and evaluation of employment outcomes of participants.	\$ 2,000.0		\$ 2,000.0	FY25
8 Workforce Solutions Department	To implement and evaluate youth re-employment, apprenticeship and pre-apprenticeship programs targeted toward disengaged and disconnected young adults who are currently unemployed or at risk of being unemployed and are not currently enrolled in high school.	\$ 600.0		\$ 600.0	FY25
9 Office of Family Representation and Advocacy	To conduct a pilot project and rigorous outcome evaluation of multidisciplinary team legal services for children, youth and adults whose children are in the custody of or are at risk of being in the custody of the children, youth and families department in Bernalillo and Dona Ana counties. The office of family representation and advocacy shall seek federal Title IV-E reimbursement for eligible multidisciplinary services.	\$ 1,625.0	\$ 437.5	\$ 2,062.5	FY25
10 Children, Youth and Families Department	To implement and evaluate outcomes of a pilot program to incentivize attainment of masters-level social work licensure to develop and retain caseworkers in the child protective services program. The children, youth and families department shall report quarterly on the number of caseworkers with a masters-level social work license in a child protective services caseworker position and of masters-level social workers retained more than twelve months in protective services caseworker roles.	\$ 562.5		\$ 562.5	FY25

GRO Spreadsheet with Vetoes

11	Children, Youth and Families Department	For a pilot to expand evidence-based implementation of multilevel response statewide in the child protective services program, pursuant to Section 32-4-4.1 NMSA 1978. The children, youth and families department shall report quarterly on the number of families receiving a multilevel response, the percentage of multilevel response eligible families who engage in services, the percentage of participating families in multilevel response who have a traditional child protective services investigation within a twelve-month period and the percentage of participating families in multilevel response with a substantiated case of child maltreatment.	\$ 1,400.0		\$ 1,400.0	FY25	11
12	Children, Youth and Families Department	For recruitment, training and support of treatment foster care and foster care providers to support hard-to-place children. The children, youth and families department shall report quarterly on the number of treatment foster and foster care families recruited, trained and have a child in custody of child protective services in their care, number of treatment foster and foster care families recruited and trained that maintain their provider status and the number of youth in child protective services care placed in an office, out-of-state, congregate care or shelter setting.	\$ 1,250.0		\$ 1,250.0	FY25	12
13	Children, Youth and Families Department	For a pilot to expand evidence-based prevention and intervention programs, including safe care home visiting, published in the federal Title IV-E prevention services clearinghouse or that may be reimbursed by medicaid . The children, youth and families department shall report quarterly on the number of families participating in evidence-based community based prevention and intervention programs that are in the Title IV-E clearinghouse or eligible for medicaid reimbursement , the percentage of participating families subject to a child protective services investigation and the percentage of participating families with a substantiated case of child maltreatment.	\$ 3,000.0		\$ 3,000.0	FY25	13
14	Public Education Department	For educator clinical practice programs.	\$ 20,000.0		\$ 20,000.0	FY25	14
15	Public Education Department	For stipends and pay differentials to fill hard to staff special education positions.	\$ 5,000.0		\$ 5,000.0	FY25	15

16	Higher Education Department	For New Mexico community colleges and regional universities to pay up to the full cost of student tuition and fees for workforce training courses not eligible for other -state financial aid and that result in an industry-recognized credential or endorsement. This funding may also be used to subsidize costs of students involved in apprenticeships or internships and for program development . Higher education institutions shall submit an implementation plan to the higher education department prior to receipt of funding and include identification of the types of certificates or credentials offered and the employers and industries eligible for internship and apprenticeship support. The higher education department shall distribute this funding to higher education institutions based on their proportional share of instruction and general funding no later than August 1st of each year.	\$ 20,000.0		\$ 20,000.0	FY25	16	
17	Higher Education Department	To pilot and evaluate the expansion of integrated basic education and skills training programs to provide basic skills and workforce development training for disengaged and difficult to reach adults who are unable to access other federal funds for integrated education training.	\$ 2,000.0		\$ 2,000.0	FY25	17	
18	New Mexico Institute of Mining and Technology	For geothermal resource development.	\$ 500.0		\$ 500.0	FY25	18	
19	Santa Fe Community College	For a suicide prevention training program.	\$ 500.0		\$ 500.0	FY25	19	
20	FY25 Subtotal		\$ 71,562.5	\$ 437.5	\$ 72,000.0		20	
21	<p>B. The following amounts are appropriated from the government results and opportunity program fund or other funds as indicated in fiscal year 2025 for the purposes specified, contingent on enactment of House Bill 196 or similar legislation of the second session of the fifty-sixth legislature creating the government results and opportunity expendable trust and providing for the distribution of the fund.
