

Supporting NM Schools

Glossary of what each designation means:

- **New Mexico Spotlight Schools:** Scoring above the 75th percentile
- **Traditional Support Schools:** Scoring above the threshold for support and improvement
- **Targeted Support and Improvement (TSI):** Consistently underperforming subgroup(s) Public Schools (Title I and non-Title I) with one or more subgroups that meet the state’s definition of consistently underperforming.
- **Additional Targeted Support and Improvement (ATSI):** Public Schools (Title I) with one or more subgroups performing as poorly as the lowest performing 5 percent of Title I schools identified for Comprehensive Support and Improvement (CSI).
- **Comprehensive Support and Improvement Student Group:** Title I schools that were previously identified for additional targeted support and improvement and that did not meet the statewide criteria for exiting ATSI status within the number of years determined by the state.
- **Comprehensive Support School and Improvement Graduation Rate:** All public high schools in the state (Title I) with a four-year graduation rate below 66.67% for at least two out of the past three years.
- **Comprehensive Support School and Improvement Low Performing:** Schools scoring in the bottom 5% of all Title I schools.
- **More Rigorous Intervention (MRI):** If a CSI School does not satisfy exit criteria within the three-year period of identification, they are identified as MRI. If an MRI School does not satisfy exit criteria within the identification period, they will have demonstrated persistent failure. PED will require more forceful restructuring, such as requiring staffing changes, “restarting” the school with a proven operator, or working with a district or authorizer to close the school by 2027.

Award Letters

Timeline

1. Letters out by June 26, 2023.
2. Funding distributed to local education agencies will depend upon the number of schools.

Money for Support

Grant funding will be allocated to support Additional Targeted Support and Improvement (ATSI) schools, Comprehensive Support and Improvement (CSI) schools, and More Rigorous Intervention (MRI) schools to engage in high-quality, sustainable and strategic improvement planning processes. An estimated \$51,000 is available to ATSI, TSI, CSI and MRI district/schools to support initial implementation activities and stakeholder engagement through September 2023. Additional grant funding will be available for CSI and MRI Schools upon the completion of the School Support and Readiness Assessment to support implementation of evidence-based interventions December 2024-September 2027. PED is making multi-year awards (2023-2026), through the period of availability of funds, to successful applicants. Ninety percent of the maximum funding requests for each period must be directed toward school-level activities supporting the implementation of the evidence-based intervention.

What Support Will Look Like

Differentiated System of Support for Districts and Schools 2023
