Community Health Centers (CHCs)

Primary Care Clinics provide the **right** services at the **right** time, to New Mexico's most vulnerable citizens in their local communities.

CHCs provide care that **saves both lives and money**. They offer the most cost-effective health services, helping to prevent expensive specialty care and unnecessary emergency room visits.

CHCs serve all patients regardless of ability to pay. If patients lose Medicaid we still serve them on a sliding-fee scale.

Over 1.5 million visits annually to over 328,498 of New Mexico's most vulnerable.
