

# Project ECHO<sup>®</sup>

1

Moving Knowledge, Not Patients

NM Legislative Education Study Committee

June 12, 2018 Aztec, NM11

Martin G. Kistin, M.D.

Associate Director, ECHO Institute

Professor of Medicine

University of New Mexico School of Medicine

MKistin@salud.unm.edu

# Goals and Objectives

- Share the history of Project ECHO
- Use of ECHO in Mental/Behavioral Health
- Update on Project ECHO today

## Hepatitis C - a huge problem

- In 2004 30,000 untreated cases in NM
- 2,300 prisoners in NM were HCV positive
- Untreated, leads to cirrhosis, variceal GI bleeding, encephalopathy, ascites, death
- Successful treatment, even in cirrhotics, reduces long term risks and cost by 90%

# New Mexico is a huge state 4

## Poor, Rural, Medically Underserved

- 120,000 square miles
- 2 million people
- 50% Hispanic
- 10% Native American
- 20% poverty
- 20% lacked insurance
- Medically Underserved
- Health Professional Shortage Areas

# Project ECHO

- Conceived and developed in Albuquerque by Dr. Sanjeev Arora at UNM to treat patients in NM with Hep C

# Principles

7

- Shortage of specialists
- Will never have enough specialists
- Think of specialty care vs specialists
- Need specialists to share their expertise
- Train in place “mini specialists”
- Increase specialty expertise exponentially
- Move knowledge to the need

# ECHO

8

Extension for **C**ommunity Healthcare Outcomes

- Modeled after agriculture extension agents
- Ag Agent or Extension Agent would go out to farmers and talk about new discoveries and best practices in farming
- Very effective
- Very inefficient

# Project ECHO<sup>9</sup>

- Uses video conferencing technology to train healthcare providers in underserved areas to care for patients with chronic diseases that otherwise would require specialty referral

# ECHO Model

10

- Use technology to move knowledge and leverage scarce resources
- Share “best practices” to reduce disparity
- Use case based learning like in residency to master complexity
- Monitor outcomes

Arora S, Geppert CM, Kalishman S, et al: *Acad Med*. 2007 Feb;82(2): 154-60

# Hubs and Spokes

- ECHO links specialist teams at an academic “hub” with primary care providers in local communities – the “spokes” of the model
- “Hubs” and “spokes” participate in weekly online teleECHO clinics
- Clinics combine patient case presentations with didactic learning and mentoring

# Case Based Learning 12

## ECHO

- Provider (“spoke”) sees a patient and presents the case by video to the expert (“hub”)
- They discuss the case and provider treats the patient
- Process is repeated over and over until the provider becomes expert at treating that disease
- The provider becomes the local expert for that condition

## Outcomes of Treatment for Hepatitis C Virus Infection by Primary Care Providers

Sanjeev Arora, M.D., Karla Thornton, M.D., Glen Murata, M.D.,  
Paulina Deming, Pharm.D., Summers Kalishman, Ph.D., Denise Dion, Ph.D.,  
Brooke Parish, M.D., Thomas Burke, B.S., Wesley Pak, M.B.A.,  
Jeffrey Dunkelberg, M.D., Martin Kistin, M.D., John Brown, M.A.,  
Steven Jenkusky, M.D., Miriam Komaromy, M.D., and Clifford Qualls, Ph.D.

- 407 patients with Hep C previously untreated
- 146 at UNM and 261 at 21 ECHO sites across NM
- Cure rate and safety were identical

Arora S, Thornton K, et al, *NEJM* 364:2199-2207, June 9, 2011

# Conclusions

- Comparable medical results
- Comparable safety
- Increased access to Rx for minorities
- Costs were decreased in 60% of patients

# ECHO Might Work for Other Diseases

- Common
- Chronic
- Complex with Changing Therapy
- High Societal Impact (Medical and Economic)
- Serious Outcomes of Untreated Disease
- Improved Outcomes With Treatment

# ECHO Partners Worldwide

22

ECHO is now used in over 25 countries by 110+ replicating partners.

Updated: Dec 22 2016

# Non Medical

- **Crisis Intervention Training**
- **Education**
- **Quality Improvement**
- **Hospital safety**
- **Food safety**

# Crisis Intervention Training - CIT

- Initially mandated by Dept of Justice
- Partnership between ECHO and APD
- To train law enforcement in behavioral health
- Now being replicated around the country

## Mental and Behavioral Health

- Most ECHOs imbed Behavioral Health in the Hub team to treat chronic diseases
- Some programs have had Behavioral Health in Hub and Spoke
- Integrated Addiction and Psychiatry
- Chronic Pain
- Opioid Use Disorder – 37 states use ECHO

# NM ECHO for Education

- College and Career Readiness NM PED
- Weekly 60 minute sessions
- Weekly topics from content experts
- “Cases”
  - Individual students
  - Systems issues

## Behavioral/Mental Health

- Need early diagnosis
  - Primary medical providers
  - Schools –teachers, nurses, counselors
- Need increased capacity to treat problems when identified
- Improved ability to diagnose and treat leads to better quality of life

## Behavioral/Mental Health

- Human trafficking
- Bullying
- Cyber bullying
- Sexting
- Sextortion
- Teachers, aids, school nurses, counselors can be trained to recognize and intervene

# ECHO Act

- In April 2016, Senator Orin Hatch (R UT) and Senator Brian Schatz (D HI) co sponsored S 2873 to investigate imbedding ECHO in federal healthcare systems (Medicare)
- In June 2016, HR 5395 was introduced to the House of Representatives by Representative Michael Burgess (R TX) and Representative Doris Matsui (D CA)
- Passed the Senate 97-0 on November 29, 2016 and passed the House by acclamation on December 6, 2016
- Signed into law by President Obama December, 2016

# In Conclusion

- Project ECHO – uses video conferencing, best practice protocols, case based learning, and monitoring of outcomes to safely and effectively train providers to treat common and complex diseases in rural and underserved areas in the US and around the world

# Want More Information?

- Orientation – one day on-site conference
- Immersion – three day on-site “How to”
- Go to [echo.unm.edu](http://echo.unm.edu)
  - Start an ECHO
  - Training events

# THANK YOU
