

Broadband Contributions to Economic Development in NM

NM Interim Economic Development Committee

August 31, 2020

Sacred Wind Communications' Investments

Basic & Broadband Infrastructure

\$55 Million USDA/RUS loan

\$13.8 Million USDA/RUS Loan

\$10.6 Million SWC own funds

\$12.0 Million FCC e-rate grants

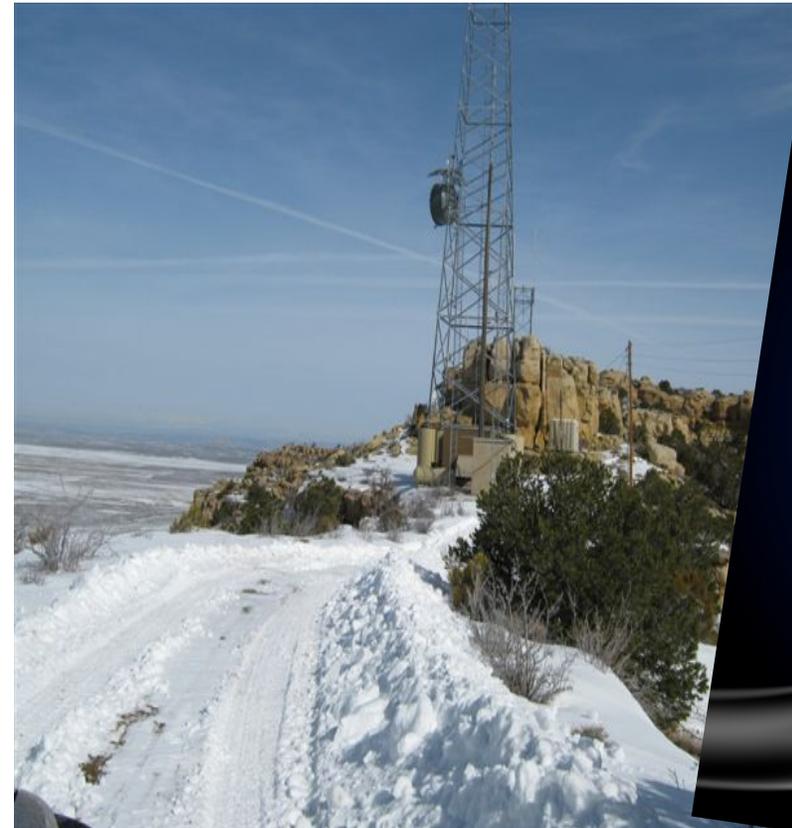

\$2.1 Million CAF II auction

\$1.5 Million Microsoft partner

\$8.3 Million USDA/NMDoIT grant

Fiber to Tower to Home

Fiber to the Home

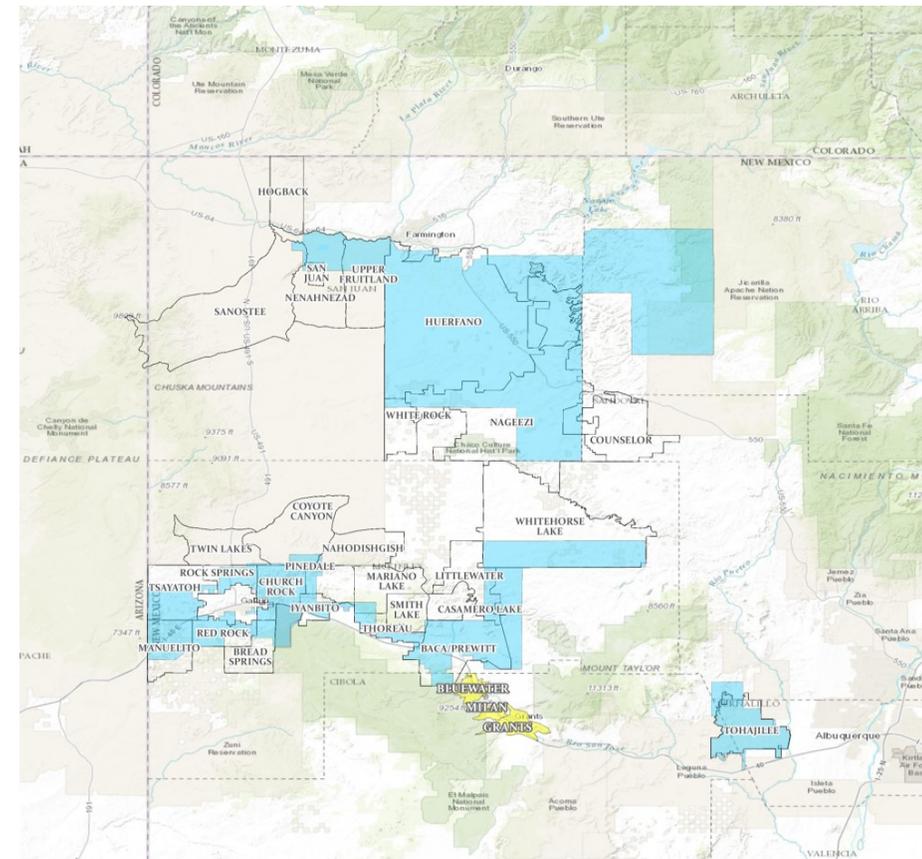

Sacred Wind's Broadband Achievements

Broadband Availability

- 10-100 Mbps - 3,200 sq miles
- 25-100Mbps add'l 400 sq. miles
- 1 Gbps - 30 GMCS D schools
- 1 Gbps Acoma School
- 1 Gbps – Hatch & TorC Schools
- 10-25 Mbps Laguna Pueblo
- 100 Mbps – Grants/Milan
 - Bluewater Village
 - San Rafael

Areas benefitted

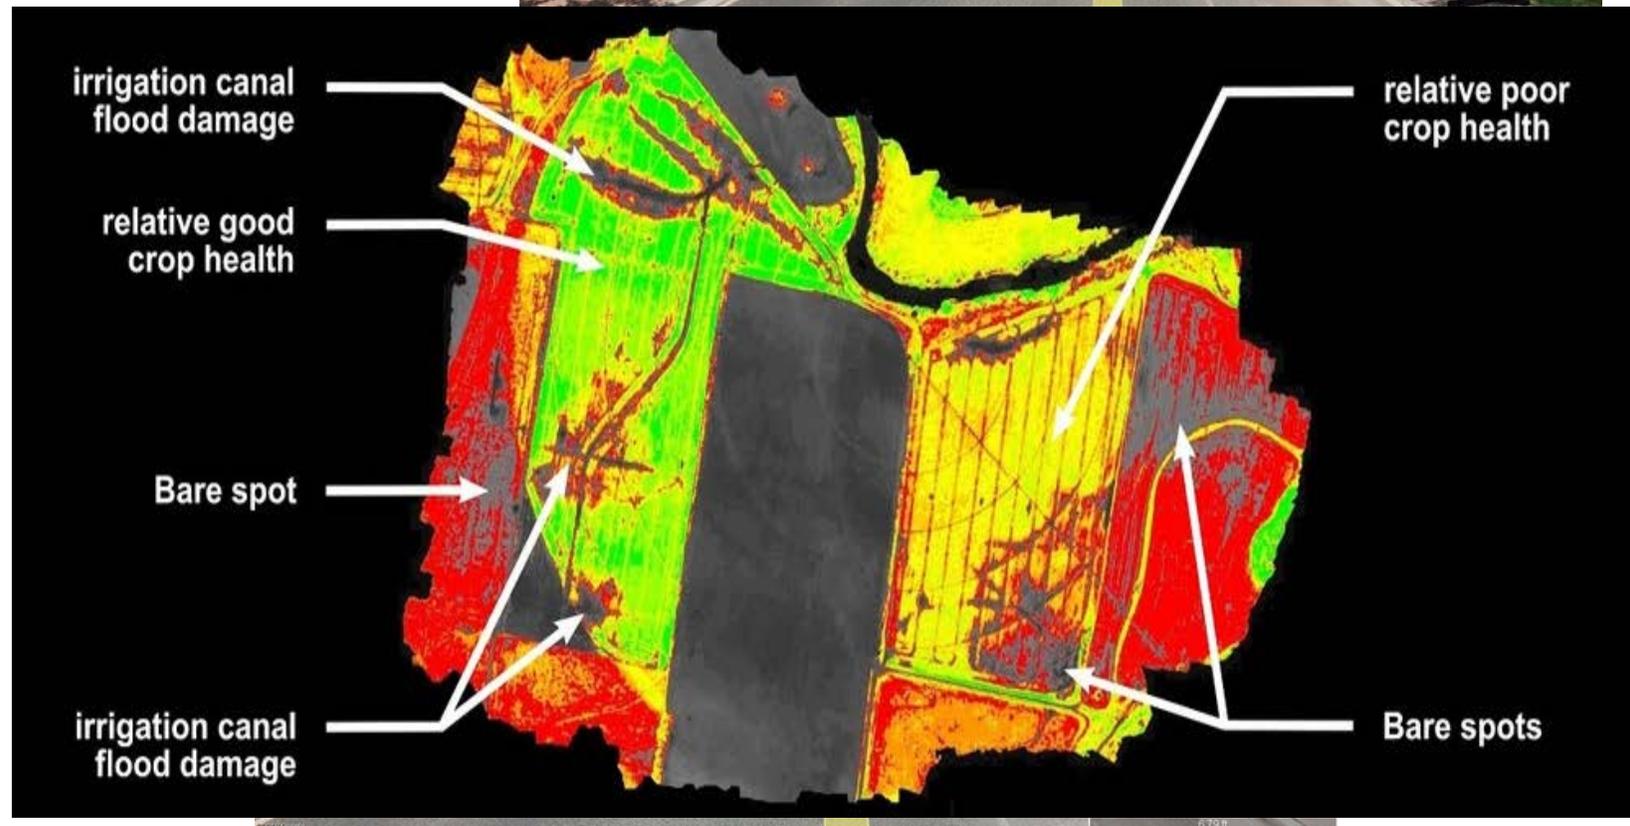

Sources: Esri, HERE, DeLorme, Intermap, increment P Corp., GEBCO, USGS, FAO, NPS, NRCAN, GeoBase, IGN, Kadaster NL, Ordnance Survey, Esri Japan, METI, Esri China (Hong Kong), swisstopo, MapmyIndia, © OpenStreetMap contributors, and the GIS User Community

Principal Messages

- Broadband is indeed a Tool, not an Outcome
- Rural broadband development must be planned
 - Rural locales must identify what they want & can do
 - State resources, augmented by federal resources, must be committed
- Broadband development is up to us.

Broadband Tools

- Agriculture
- Arts & Crafts
- Academics
- Architecture
- Biomedical research
- Online Services
- Tourism
- Etc.

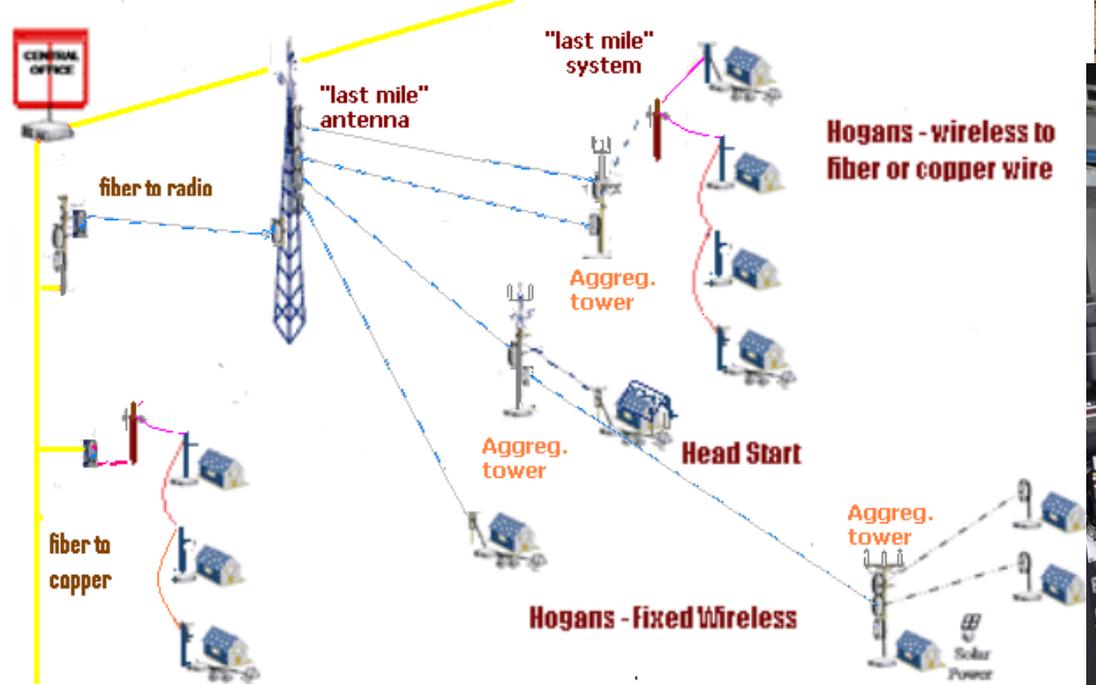

Broadband capacity or speeds

Number devices (laptop, iPhones)	Uses (Accumulative)	Download Speeds
1 - 2	Email, surfing, Facebook, YouTube	5-10 Mbps
2 - 3	Distance learning, moderate video streaming	25 Mbps
3 - 5	Gaming, heavy video streaming	50–100 Mbps
Above 5	Commercial graphics, heavy video streaming	100-200 Mbps

Broadband Technologies

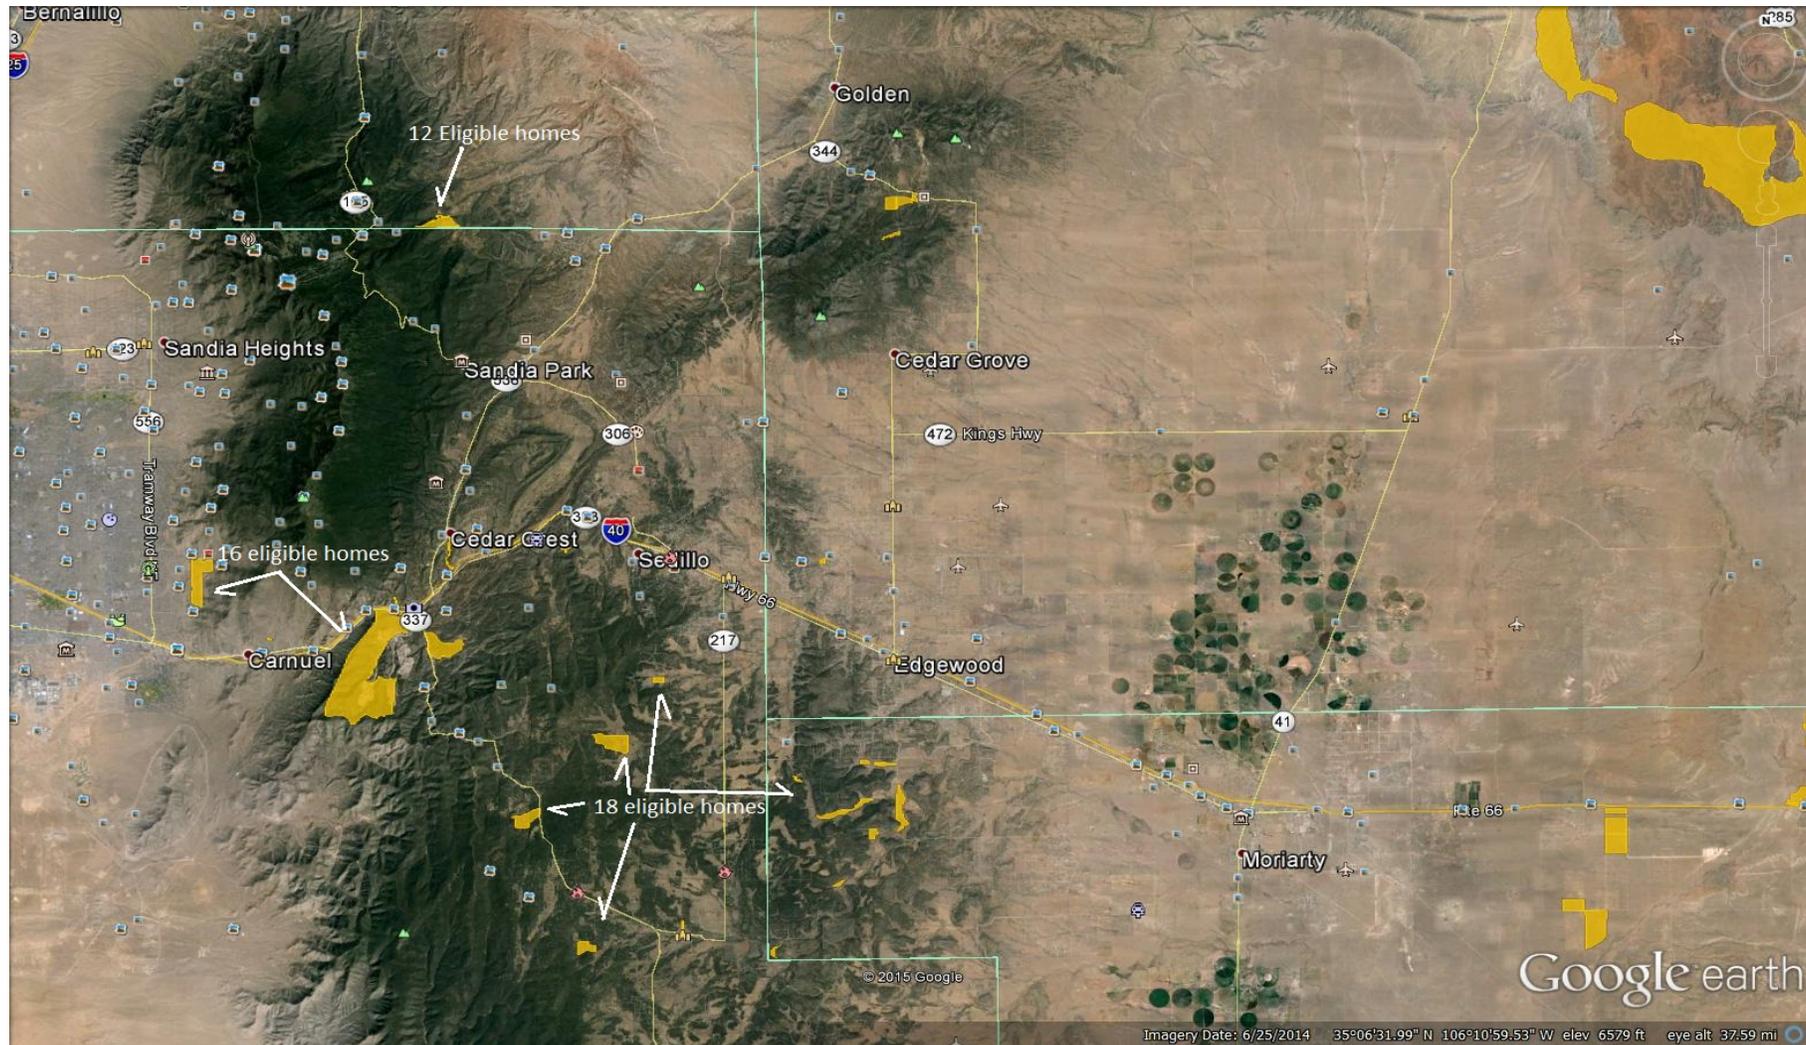

- Fiber to premise
- Fiber to copper to premise
- Fiber to fixed wireless
- Fiber to mobile tower
- Satellite
- Nascent alternatives

National Broadband Resources

- ARRA 2009 (“Stimulus Act”)
- USDA/RUS Grants & Loans
 - ReConnect & CCG grants
 - Rural economic development grants
- NTIA, EDA & NSF Grants
- FCC Grants
 - USF/CAF mobility Fund
 - CAF I & CAF II Broadband auctions 2016-2018
 - E-rate grants
 - Distance learning & telemedicine special grants

CAF Phase I & II “Eligible Locations”

State/Local Broadband Resources

- NM DoIT Broadband grants & projects
- NM PRC Broadband Fund
- Capital outlays & appropriations
- LEDA funding
- Municipal Bonding

Total Rural Broadband Resources

They Ain't Enough!

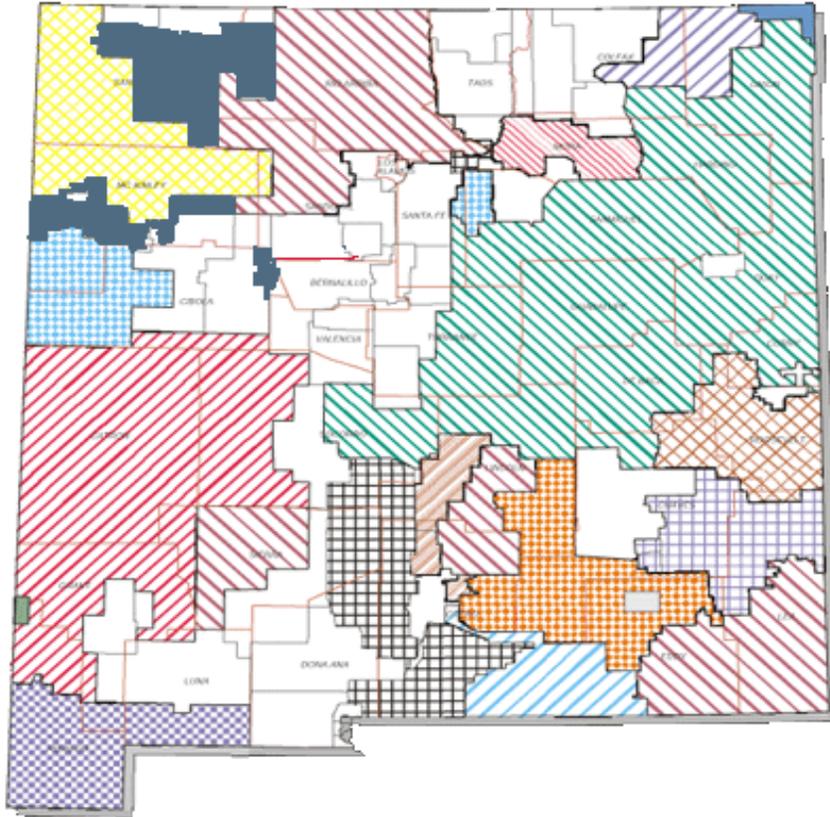

- All Rural NM Areas Covered
 - Landline - \$3-5 Billion
 - Wireless - \$1.5 Billion
 - Alternatives ?

And it can't be done alone and must be planned!

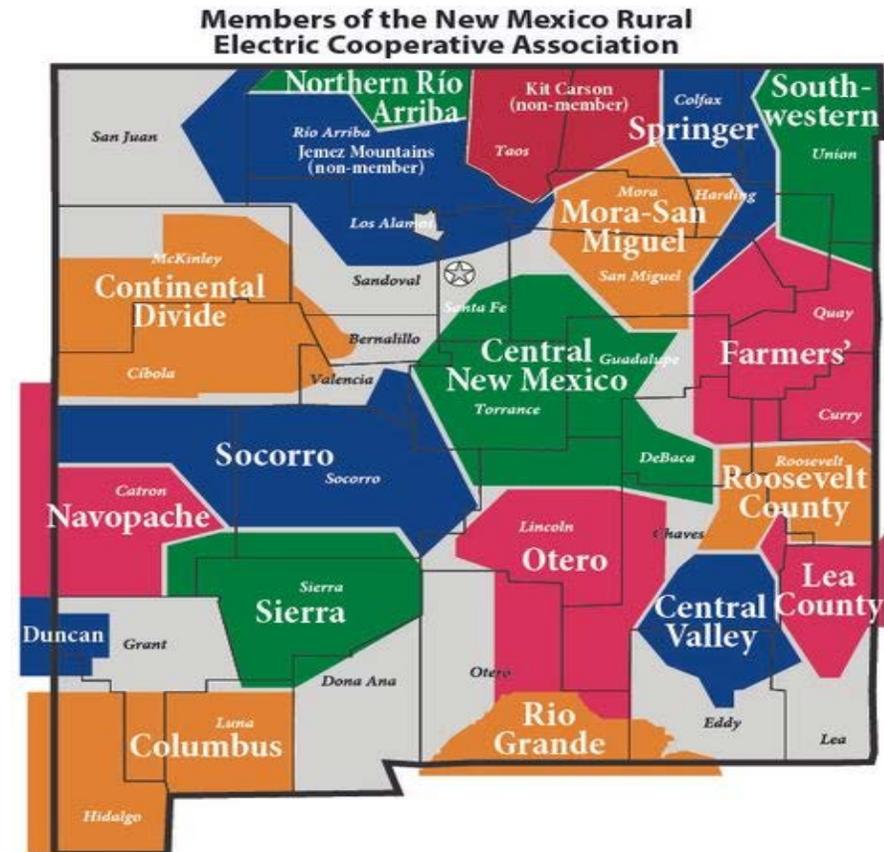

Most Significant State Resources

12 NM Rural Telecoms

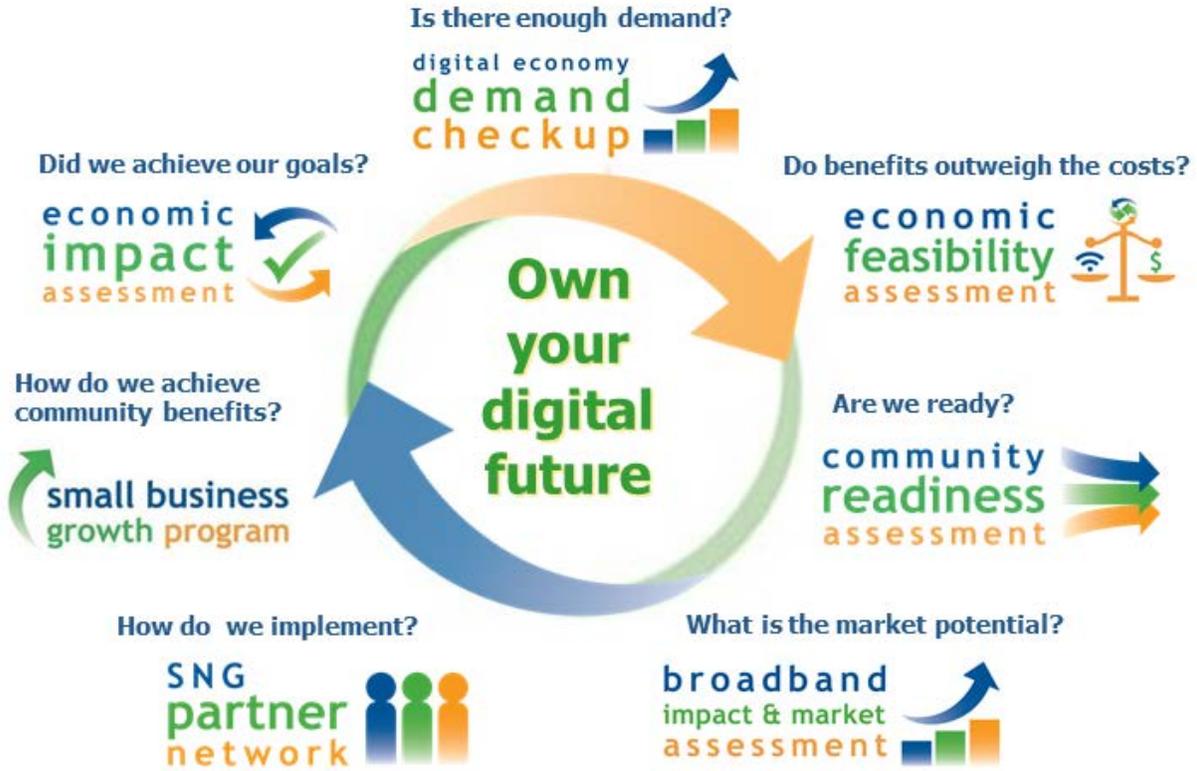

14 NM Rural Electric Cooperatives

Broadband Planning – Identify Our Strengths

The path to your digital future

Our Potential Alternative Broadband Sector

Convert Deficiency to a Growth Opportunity

- CAF II & RDOF auction infrastructure development
 - MW spectrum equipment
 - Tower infrastructure
- Alternative 5g and Middle Mile technologies
 - Research & testing
 - Assembly & manufacturing

Research Resources

- NMSU
- Navajo Technical University

Alternative Broadband Delivery Technology

Middle Mile - Rural

Urban 5G

Rural Broadband Solutions

Collaboration needed

- Providers must partner with local governments
- Providers must maximize federal grant/loan offerings
- State must establish a central broadband plan
- State must increase broadband funding programs
 - Including research sponsorships

Legislative commitment

- Public/Private partnerships incentivized
- State fund for alternative broadband technologies
- Larger State fund for rural broadband projects
- State subsidy for Middle Mile
