

ISP Cost By MBPS Per Month 2019

North Central Consortium (NCC) RFP for Broadband Upgrades:

“NCC Broadband Upgrades-Request For Proposal” is a collaboration between twenty schools (districts) and libraries – assisted by the local Regional Education Cooperative - with the goal of leveraging economies of scale to achieve broadband upgrades and lower costs where possible.

The procurement covers an area from Dulce to Counselor, Cuba, Jemez Springs, Los Alamos, Pojoaque, Penasco, Mora, Mesa Vista, Taos, Questa and Chama.

This procurement also has the potential to connect the school and library entities together in a Regional Wide Area Network (WAN) to share Internet service, collaborate on specialized tasks (such as cybersecurity) and eliminate duplication of efforts in procurement, contracting and federal funding applications.

The procurement is expected to increase the broadband capacity in the region. This upgrade may benefit other interests in the area, and presents an opportunity for broader collaboration with anchor institution and other stakeholders.

A copy of the RFP can be found on the Northwest Regional Education Cooperative #2 Website: <https://www.nwrec2.org/>
