The number of local charter schools is included in the total number of schools. This chart does not include the 62 state-chartered charter schools operating in New Mexico in the 2015-2016 school year.

Determinations of school type were made by analysis of grades served by school in the 2015-2016 school year. Schools were classified by where the majority of grades served coincided with a K-5 elementary; a 6-8 middle school or junior high school; and a 9-12 high school. For example, a school only serving third grade was classified as an elementary school for the purposes of this analysis. Similarly, a school serving K-12 was also classified as an elementary school.

Categorical Public School Support

¹ The GAA of 2015 included \$3.1 million in nonrecurring general fund to supplement the recurring instructional materials appropriation, including \$1 million from the education lock box. The LFC recommendation for FY17 replaces the nonrecurring revenue appropriated in FY16. While the overall instructional materials budget is not increased, school districts will see an increase in allocations because PED is prohibited from distributing the instructional materials appropriation to support private school students.

² The GAA of 2015 included \$675.4 thousand in Indian education fund balance and earmarked \$400 thousand in general fund revenues for teaching support for Native American students. The LFC recommendation includes \$500 thousand in Indian education fund balance and continues the earmark for teaching support for Native American students.

Related Recurring "Below-the-Line"

³ The LFC recommendation establishes a pilot program to extend K-3 Plus to fourth and fifth grades in schools that voluntarily implement a school-wide "K-5 Plus" program.

⁴ The GAA of 2015 included \$3.5 million in TANF funds and continues the extended-day pilot. The LFC recommendation includes \$3.5 million in TANF funds and continues the extended-day pilot.

⁵ PED's request and the LFC recommendation earmark the increase in funding for high-poverty, low-performing elementary schools.

⁶ The GAA of 2015 funds breakfast for elementary students only and allows breakfast to be served before the start of the instructional day. PED requested an increase to expand the program to middle and high school students. The LFC recommendation continues 2015 language and funds breakfast for elementary students only.

⁷ The FY16 appropriations for after school and summer enrichment programs included \$750.8 thousand in other state funds, totaling \$1.1 million.

⁸ The FY16 appropriations for incentive pay included almost \$1.8 million in other state funds, totaling \$9 million. The LFC recommendation replaces the nonrecurring other state funds with general fund revenues.

⁹ The GAA of 2015 earmarked \$1 million of the FY16 appropriation for creation of a program like the University of Virginia's School Turnaround Specialist Program and reauthorized the FY15 appropriation for school leader preparation in FY16. The LFC recommendation continues the earmark to create a UVA-STSP like program in New Mexico in FY17.

¹⁰ The FY16 appropriations included \$250 thousand in other state funds, totaling \$500 thousand, the LFC recommendation replaces the nonrecurring other state funds with general fund revenues.

¹¹ The FY16 appropriations included \$2 million in other state funds, totaling \$12.5 million, the LFC recommendation replaces the nonrecurring other state funds with general fund revenues.

¹² The FY16 appropriation included \$1 million in other state funds, totaling \$2 million, the LFC recommendation replaces the nonrecurring other state funds with general fund revenues.

¹³ The LFC compensation recommendation includes general fund revenues for a compensation increase for teachers, school administrators, and mentors and the teacher and school leader programs and supports for training, preparation, recruitment, and retention. The committee's compensation recommendation is appropriated to the Department of Finance and Administration for disbursement to agencies contingent on revenues achieving consensus revenue levels and adequate general fund reserves.

¹ Early Childhood Education (ECE) program units include full- and half-day kindergarten units and 3- and 4-year-old developmentally disabled (DD) units.

² Special Education Units include related services (ancillary) staff units, A/B program units, C program units, D program units, and 3- and 4-year-old DD program units.

³ Size Adjustment Units include elementary/junior high units, senior high units, district size adjustment program units, and rural isolation adjustment units.

⁴ Beginning in FY 07, funding was based on the average of prior- year membership on the 80th and 120th school days.

⁵ In 2007, the funding formula was amended to include elementary physical education units and charter school and home school activity units, beginning in FY 08.

⁶ Beginning in FY 13, 3- and 4-year-olds who required speech-only services were counted as a special education student with an A/B .70 cost index.

⁷ Beginning in FY 15, school districts with less than 200 MEM generate additional program units. These newly generated units are included in column J.

⁸ Beginning in FY 15, school districts generate "Home School Student Program Units." These units are included in column N.

⁹ Preliminary Budgeted

11 2015-2016 (Budgeted)	\$2,548,349,273	632,698	\$4,027.75	\$63,861,243	\$2,484,379,058	0.7%

¹ Funding formula credits include 75 percent of: federal Impact Aid, federal Forest Reserve, and local property tax (0.5 mill levy).

² The FY 06 program cost contained an additional \$51.8 million to implement the third year of the five-year phase-in of the three-tiered licensure system. In FY 06, this funding was distributed based on need; in subsequent fiscal years, it was included in the calculation of the unit value.

³ For FY 10, the unit value comprised \$3,458.06 from the General Fund and \$334.59 from the federal *American Recovery and Reinvestment Act of 2009* (ARRA). The program cost and SEG reflect both sources of funding.

⁴ For FY 11, the unit value comprised \$3,712.17 from the General Fund, \$37.85 from the ARRA, and \$101.98 in Education Jobs funds.

⁵ For FY 11, the SEG did not include the amounts for Excess Cash Balance, Utility Conservation Program Contract Payments, and 90 percent of the Certified Amount (*Energy Efficiency and Renewable Energy Bonding Act*) that the state deducts from the state program cost. Aggregate information for these deductions including ARRA and Education Jobs funds is not readily available.

⁶ NOTE: Effective in FY 00, the law was amended to reduce credits from 95 percent to 75 percent instead of eligible federal and local revenues for operational purposes and to require school districts to budget state funds equal to 20 percent for capital outlay. Effective in FY 06, the law was amended to remove the requirement that school districts budget an amount equal to 20 percent for capital outlay.

2015-2016	\$4,027.75			

¹ The 1982-1983 General Fund appropriation was reduced by 2.0 percent.

² The final unit value includes \$10.87 due to the 0.5 mill redistribution (Laws 1985, Chapter 15).

³ The "floating" unit value went into effect.

⁴ The basis for funding changed to the prior-year average membership of the 40th, 80th, and 120th school days.

⁵ For FY 06, appropriated program cost contains an additional \$51.8 million to implement the third year of the five-year phase-in of the three-tiered licensure system. Although this funding was distributed based on need in FY 06, the \$51.8 million was included in the calculation of the unit value in FY 07.

⁶ The basis for funding changed to the prior-year average membership of the 80th and 120th school days.

⁷ The 2009 legislative session solvency measures resulted in a \$20.68 decrease in the FY 09 unit value.

⁸ FY 10 initial unit value comprises \$3,606.40 in General Fund dollars and \$256.39 in federal funding from the *American Recovery and Reinvestment Act of 2009* (ARRA).

⁹ FY 10 final unit value comprises \$3,458.06 in General Fund dollars and \$334.59 in federal ARRA funding.

¹⁰ FY 11 initial unit value comprises \$3,674.75 in General Fund dollars and \$37.70 in federal ARRA funding.

¹¹ FY 11 final unit value comprises \$3,572.34 General Fund, \$37.85 federal ARRA funding, and \$101.98 in federal Education Jobs funding.

¹² The final FY 13 and FY 14 unit values may be adjusted based on a final decision from the US Department of Education regarding a waiver request from maintenance of effort requirements for state-level funding for special education.

*The salary data presented in this table was provided by the school districts with their 2015-2016 operating budgets. Average salaries are based on estimated contracts.

¹ The subtotal for school districts with charter schools is a weighted average of school district and charter school data. For ranking purposes, the subtotal for school districts with charter schools was used.

AVERAGE TEACHER SALARIES (BUDGETED) BY LEVEL AND DISTRICT, SCHOOL YEAR 2015-2016

¹ According to PED, ASLA petitioned successfully to be considered under alternate Supplemental Accountability Model criteria, which include assessments closely aligned with the school's mission. These assessments are currently collected for an alternate evaluation.

² School grade changed after post-appeal grades were released (includes Career Academic & Technical Academy and Animas High).

³ New school added.

⁴ Ralph J Bunche Academy changed to a state-chartered charter school.

⁵ According to PED, the schools could not be graded because they had no tested students, no exited students, and no prior history. The US Department of Education lets the state excuse these schools until they have some assessment data or history.

EXPLANATION OF CAPITAL OUTLAY FUNDING SOURCES

SOURCES OF NEW MEXICO PUBLIC SCHOOL CAPITAL OUTLAY FUNDING

Public school capital outlay financing is both a local and state responsibility in the state of New Mexico. School districts can generate state revenues through two statutory measures. One measure is through direct legislative appropriations, which provides funding for specific needs. The second is through a standards based process under the Public School Capital Outlay Act. Locally, districts can generate capital outlay revenues from the sale of bonds, direct levies, earnings from investments, rents, sales of real property and equipment, as well as other miscellaneous sources.

The Public School Capital Outlay Act: The funding mechanism was established to ensure that through a standards-based process, for all school districts, the physical condition and capacity, educational suitability and technology infrastructure of all public school facilities in New Mexico meet an adequate level statewide. This process uses a statewide assessment database which ranks the condition of every school building relative to the statewide adequacy standards. The schools with the greatest facilities needs will be addressed first according to the New Mexico Condition Index (NMCI). The database will operate as an objective prioritizing and ranking tool to assist the Public School Capital Outlay Council (PSCOC) in allocating funds to school districts. The standards-based process also requires school districts who receive awards to provide a local match that will be determined by the state match distribution formula.

For allocation cycles beginning after September 1, 2003 the following provisions apply:

1. All districts are eligible to apply regardless of percentage of indebtedness;
2. Funding must be determined by using the statewide adequacy standards and the PSCOC must apply the standards to charter schools to the same extent;
3. The PSCOC must establish criteria to be used in public school capital outlay projects that receive grant assistance from Public School Capital Outlay Act;
4. No more than 10% of the combined total grants in a funding cycle shall be used for retrofitting existing facilities for technology infrastructure;
5. A formula will be used to determine the percentage participation of the state and the districts in the standards-based capital outlay process for projects approved by the council and must be funded within available resources in accordance with the funding formula;
6. Capital outlay grant awards made by the PSCOC will be reduced by a percentage of direct appropriations for capital outlay projects received by a school district. The amount of the reduction will be determined by the state-local match formula, and will equal the direct legislative appropriation percentage amount for the school district multiplied by the amount of the direct appropriations for individual school projects;
 - A) An appropriation is deemed to be accepted, for projects appropriated prior to 2010, unless written notification to reject the appropriation is received by DFA & PED;
 - B) The total offset should exclude any appropriation previously made to the subject school district that is reauthorized for expenditure by another recipient;
 - C) The total shall exclude one-half of the amount of any appropriation made or reauthorized after January 1, 2007 if the purpose of the appropriation or reauthorization is to fund, in whole or in part, a capital outlay project that, when prioritized by the council pursuant to this section either in the immediately preceding funding cycle or in the current funding cycle, ranked in the top one hundred fifty projects statewide;
 - D) The total shall exclude the proportionate share of any appropriation made or reauthorized after January 1, 2008 for a capital project that will be jointly used by a governmental entity other than the subject school district. Pursuant to criteria adopted by rule of the

EXPLANATION OF CAPITAL OUTLAY FUNDING SOURCES

council and based upon the proposed use of the capital project, the council shall determine the proportionate share to be used by the governmental entity and excluded from the total;

- E) Unless the grant award is made to the state-chartered charter school or unless the appropriation was previously used to calculate a reduction pursuant to this paragraph, the total shall exclude appropriations made after January 1, 2007 for non-operating purposes of a specific state-chartered charter school, regardless of whether the charter school is a state-chartered charter school at the time of the appropriation or later opts to become a state-chartered charter school;
7. "Subject school district," means the school district that has submitted the application for funding in which the approved PSCOC project will be located;
8. In those instances in which a school district has used all of its local resources, the PSCOC may fund up to the total amount of the project;
9. No application for grant assistance from the fund will be approved unless the PSCOC determines that:
 - A) The capital outlay project is needed and is included in the school districts five-year facilities plan among its top priorities;
 - B) The school district has used its resources in a prudent manner;
 - C) The school district has provided insurance for building of the district according to provisions of section 13-5-3 NMSA 1978;
 - D) The district has submitted a five-year facilities plan that has been approved by the PSCOC pursuant to section 22-24-5.3 NMSA 1978 and the capital needs of charter schools located in the district as well as projections for enrollment and facilities needed in order to maintain a full-day kindergarten are included;
 - E) The district is willing and able to pay any portion of the project that is not funded with grant assistance from the fund;
 - F) The application includes charter schools or the district has shown that charter schools meet the statewide adequacy standards; and
 - G) The district has agreed, in writing, any reporting requirements imposed by the PSCOC pursuant to sections 22-24-5.1 NMSA 1978.

The fund may be expended annually by the PSCOC for grants to school districts for the purpose of making lease payments for classroom facilities, including facilities leased by charter schools. The grant shall not exceed the annual lease payments owed for leasing classroom space for schools, including charter schools, in the district; or seven hundred dollars (\$700) multiplied by the number of membership using the leased classroom facilities; provided that, in fiscal year 2009 and in each subsequent fiscal year, the amount shall be adjusted by the percentage increase between the penultimate calendar year and the immediately preceding calendar year of the consumer price index for the United States.

All of the provisions of the Public School Capital Outlay Act [22-24-1 NMSA 1978] apply to an application by a state-chartered charter school for grant assistance for a capital project except:

1. The portion of the cost of the project to be paid from the fund shall be calculated pursuant to Paragraph (5) of Subsection B of Section 22-24-5 NMSA 1978 using data from the school district in which the state-chartered charter school is located;
2. In calculating a reduction pursuant to Paragraph (6) of Subsection B of Section 22-24-5 NMSA 1978, the amount to be used in Subparagraph (a) of that paragraph shall equal the total of all legislative appropriations made after January 1, 2007 for non-operating expenses either directly to the charter school or to another governmental entity for the purpose of passing the money through directly to the charter school, regardless of whether the charter school was a state-chartered charter school at the time of the appropriation or later opted to become a state-chartered charter school, except that the total shall not include any such appropriation if, before the charter school

EXPLANATION OF CAPITAL OUTLAY FUNDING SOURCES

became a state-chartered charter school, the appropriation was previously used to calculate a reduction pursuant to Paragraph (6) of Subsection B of Section 22-24-5 NMSA 1978; and

3. The amount to be used in Subsection B of that paragraph shall equal the total of all federal money received by the charter school for non-operating purposes pursuant to Title XIV of the American Recovery and Reinvestment Act of 2009, regardless of whether the charter school was a state-chartered charter school at the time of receiving the federal money or later opted to become a state-chartered charter school, except that the total shall not include any such federal money if, before the charter school became a state-chartered charter school, the money was previously used to calculate a reduction pursuant to Paragraph (6) of Subsection B of Section 22-24-5 NMSA 1978; and
4. If the council determines that the state-chartered charter school does not have the resources to pay all or a portion of the total cost of the capital outlay project that is not funded with grant assistance from the fund, to the extent that money is available in the charter school capital outlay fund, the council shall make an award from that fund for the remaining amount necessary to pay for the project. The council may establish, by rule, a procedure for determining the amount of resources available to the charter school and the amount needed from the charter school capital outlay fund.

A program for assisting charter schools to be located in public buildings or in buildings being acquired by charter schools pursuant to a lease purchase agreement shall be developed under 22-24-6.2 NMSA 1978.

Supplemental Severance Tax Bonds: Supplemental Severance Tax Bonds (SSTB) are bonds issued by the State Board of Finance and paid for by revenue derived from taxes levied upon the natural resource products severed and saved from the soil and other sources as the New Mexico State Legislature may from time to time determine. This authorization does not require legislative reauthorization and may be considered a dedicated funding stream for public school capital outlay.

The Public School Capital Improvements Act: Commonly referred to as SB-9 or the “two-mill levy,” this funding mechanism allows districts to ask local voters to approve a property levy of up to two mills for a maximum of six years. Funds generated through imposition of the two-mill levy must be used to:

1. Erecting, remodeling, making additions to, providing equipment for, or furnishing public school buildings;
2. Purchasing or improving public school grounds;
3. Maintenance of public school buildings or public school grounds, including the purchasing or repairing of maintenance equipment, participating in the facility information management system as required by the Public School Capital Outlay Act [22-24-1 NMSA 1978] and including payments under contract with regional education cooperatives for maintenance support services and expenditures for technical training and certification for maintenance and facilities management personnel, but excluding salary expenses of school district employees;
4. Purchasing activity vehicles for transporting students to extracurricular activities; and
5. Purchasing computer software and hardware for student use in public school classrooms.

An individual school district may only use SB-9 funds for any or all of these purposes as stated in the school district’s individual resolution. The Public School Capital Improvements Act contains provisions that provide a school district with a minimum level of funding. This minimum level of funding or “program guarantee” is calculated by multiplying a school district’s 40th day total program units by the matching dollar amount (currently \$75.58 through fiscal year 2011) and in each subsequent fiscal year equal the amount for the previous year adjusted by the percentage increase between the next preceding year and the preceding calendar year of the consumer price index for the United States, all items, as published by the US Department of Labor.

EXPLANATION OF CAPITAL OUTLAY FUNDING SOURCES

If the local revenue generated by the two-mill levy is less than the program guarantee, the state funds the difference in the form of “matching” funds. State matching funds have some restrictions as to their use. For fiscal year 2011 the amount of state “matching” funds shall not be less than an amount currently equal to \$5.87 and in each subsequent fiscal year equal the amount for the previous year adjusted by the percentage increase between the next preceding year and the preceding calendar year of the consumer price index for the United States, all items, as published by the US Department of Labor.

Direct Legislative Appropriations: Direct Legislative Appropriations for capital outlay project funding are targeted for specific projects within the school district. Specific legislators sponsor these projects. Projects funded from these specific appropriations have become more sparsely used in recent years due to the shortfall. These allocations are funded by the general fund or from the proceeds of the sale of severance tax bonds.

Local General Obligation Bonds: Local school districts may issue general obligation bonds for the purpose of erecting, remodeling, making additions to and furnishing school buildings, or purchasing or improving school grounds, providing matching funds for capital outlay projects funded pursuant to the Public School Capital Outlay Act, or any combination of these purposes. In addition, a school district may also use bond proceeds to purchase computer equipment and software for student use in public school classrooms. The issuance of these bonds is subject to the provisions of Article 9, Section 11 of the Constitution of New Mexico. Prior to the issuance of bonds, several steps must be taken. One of these is the submission of PED form 995-10/89 to the School Budget Planning Unit at the Public Education Department to determine exactly how much bonding capacity remains. This must be accomplished prior to the election. Another step is the actual submission of the question to the voters by the local school board. Upon successful election results, the local school board may, subject to the approval of the Attorney General, proceed to issue the bonds. There are restrictions: (1) the district’s ability to sell bonds is limited to 6% of its assessed valuation; (2) there is a four year period in which the bonds may be sold from a particular approved resolution (6-15-9 NMSA 1978).

This is only a summary of information associated with the issuance of school district general obligation bonds. Each school district should consult with their financial advisor for more specific information regarding elections and the issuance of local general obligation bonds.

NOTE: The tax rate associated with this type of funding is likely to fluctuate every year due to the timing of principal and interest payments as well as changes in assessed valuations.

The Public School Buildings Act: This Act, commonly referred to as HB-33, allows districts to impose a tax not to exceed 10-mills for a maximum of six years on the net taxable value of property upon approval of qualified voters. These funds are to be used for:

1. Erecting, remodeling, making additions to, providing equipment for or furnishing public school buildings;
2. Payments made pursuant to a financing agreement entered into by a school district or a charter school for the leasing of a building or other real property with an option to purchase for a price that is reduced according to payments made;
3. Purchasing or improving public school grounds;
4. Purchasing activity vehicles for transporting students to and from extracurricular activities, provided that this authorization for expenditure does not apply to school districts with a student MEM greater than sixty thousand; or

EXPLANATION OF CAPITAL OUTLAY FUNDING SOURCES

5. Administering the projects undertaken pursuant to items 1 and 3 of this section, including expenditures for facility maintenance software, project management software, project oversight and district personnel specifically related to administration of projects funded by the Public School Buildings Act; provided that expenditures pursuant to this subsection shall not exceed five percent of the total project costs.

There are limitations and restrictions associated with this act: (1) the authorized tax rate made under the Public Buildings Act, when added to the tax rates for servicing the debt of the school district and the rate authorized under the Public School Capital Improvements Act, cannot exceed 15-mills. If it does exceed 15-mills, the rate authorized under the Public School Buildings Act will be adjusted downward to compensate; and (2) the revenues generated from the Public School Buildings Act are only to be used for specific capital improvements (as defined above). This funding mechanism is most useful for districts with high-assessed valuation and low bonded indebtedness.

After July 1, 2007, a resolution submitted to the qualifying electors pursuant to Subsection A of 22-26-3 NMSA 1978 shall include capital improvements funding for a locally chartered or state-chartered charter school located within the school district if;

1. The charter school timely provides the necessary information to the school district for inclusion on the resolution that identifies the capital improvements of the charter school for which the revenue proposed to be produced will be used; and
2. The capital improvements are included in the five-year facilities plan:
 - a. of the school district, if the charter school is a locally chartered charter school; or
 - b. of the charter school, if the charter school is a state-chartered charter school.

The Public School Lease Purchase Act: The purpose of the Public School Lease Purchase Act is to implement the provisions of Article 9, Section 11 of the constitution of New Mexico, which declares that a financing agreement entered into by a school district or a charter school for leasing of a building or other real property with an option to purchase for a price that is reduced according to the payments made by the school district or charter school pursuant to the financing agreement is not a debt if:

1. There is no legal obligation for the school district or charter school to continue the lease from year to year or to purchase the real property;
2. The agreement provides that the lease shall be terminated if sufficient money is not available to meet the current lease payments.

A school district may apply any legally available funds to the payments due on or any prepayment premium payable in connection with lease purchase arrangements as they become due, including any combination of:

1. money from the school district's general fund;
2. investment income actually received from investments;
3. proceeds from taxes imposed to pay school district general obligation bonds or taxes imposed pursuant to the Public School Capital Improvements Act [22-25-1 NMSA 1978], the Public School Buildings Act [22-26-1 NMSA 1978] or the Educational Technology Equipment Act [6-15A-1 NMSA 1978];
4. loans, grants or lease payments received from the public school capital outlay council pursuant to the Public School Capital Outlay Act [22-24-1 NMSA 1978];
5. state distributions to the school district pursuant to the Public School Improvements Act;
6. fees or assessments received by the school district;

EXPLANATION OF CAPITAL OUTLAY FUNDING SOURCES

7. proceeds from the sale of real property and rental income received from the rental or leasing of school district property;
8. grants from the federal government as assistance to those areas affected by federal activity authorized in accordance with Title 20 of the United States Code, commonly known as "PL 874 funds" or "impact aid";
9. revenues from the tax authorized pursuant to Sections 8 through 12 [22-26A-8 through 22- 26A-12 NMSA 1978] of the Public School Lease Purchase Act, if proposed by the local school board and approved by the voters; and
10. legislative appropriations.

A local school board has the option of adopting a resolution to submit to the qualified electors of the school district the question of whether a property tax should be imposed upon the net taxable value of property allocated to the school district under the Property Tax Code [7-35-1 NMSA 1978] for the purpose of making payments under a specific lease-purchase arrangement. The tax rate shall not exceed the rate specified in the resolution. A locally chartered or state-chartered charter school may also enter into a lease purchase arrangement provided that a governing body of a charter school shall not propose a tax or conduct an election. However, a charter school may receive revenue from a tax proposed by the local school board for the district in which the charter school is located and approved by the voters.

Educational Technology Equipment Act: Enacted in 1997, the Educational Technology Equipment Act provides a statutory basis for the implementation of a constitutional amendment approved by voters in the 1996 general election. Passage of the amendment allows school districts to create debt without submitting the question to voters to enter into a lease-purchase agreement to acquire educational technology equipment. Such debt is, however, subject to the Constitutional limitation that no school district shall become indebted in an amount exceeding 6% of the assessed valuation of the taxable property within the school district. The combination of outstanding bonds and lease-purchase principal cannot exceed this limit. If a district is already at this limit, it cannot enter into one of these agreements. A school district should consult with their bond attorney or bond advisor prior to entering into one of these arrangements. The purpose is to acquire tools used in the educational process that constitute learning resources.

EXPLANATION OF CAPITAL OUTLAY OFFSETS

The Public School Capital Outlay Offset for Direct Appropriations can be confusing. Here's a simple, practical explanation.

What It is

The law says that the PSCOC must “*reduce any grant amounts awarded to a school district by a **percent** of all direct non-operational legislative appropriations for schools in that district that have been accepted, including educational technology and reauthorizations of previous appropriations.*”¹

How It Works

The *percent reduction* mentioned in the law is each school district's local match percent for PSCOC award funding.

The offset applies to all PSCOC award allocations after January 2003.

The offset applies to the *district*, so if one school in a district receives a direct appropriation, other projects in the district that receive PSCOC award funding will be subject to an offset.

Offset amounts not used in the current year apply to future PSCOC grant amounts.

The law gives districts the right to reject a direct appropriation because of the effect of the offset. For example, a school district receives a direct legislative appropriation for a specific purpose. The effect of the offset would cause the district to accordingly receive reduced PSCOC award funding for what it considers a higher priority need, and it chooses to reject the appropriation.

An Example

Legislative appropriation to a school	\$ 1,000
PSCOC award to that school's district	\$ 2,000
That district's local match percent	40%
Offset reduction in district's PSCOC award allocation (\$1,000 x 40%)	\$ (400)
District's net PSCOC award amount (\$2,000 - \$400)	\$ 1,600
Total funds received by district (\$1,000 + \$1,600)	\$ 2,600

Fiscal Effects

The most significant effect of the offset is not to reduce total funds that the district receives², but instead to potentially reduce funds available for higher priority needs, in the event that the direct appropriation was for a lower-priority project than projects for which the district had applied for PSCOC award funding. In this case, the higher priority projects would have funding levels reduced by the amount of the offset.

Why An Offset?

The Legislature enacted the offset as one of a number of initiatives it has taken recently to better equalize state funding of capital requests across all of New Mexico's school districts. The 2002 report of the Special Master appointed as a result of the Zuni lawsuit specifically highlighted “*the disequalizing effect of direct legislative appropriation to individual schools for capital outlay purposes.*” The offset was enacted to mitigate this concern.

¹ Section 22-24-5.B(6) NMSA 1978

² The post-offset net amount of a direct appropriation will always be revenue positive for the district, given current local match percentages.

*Bloomfield: The outstanding bonds of the school district were legally issued when the district had sufficient bonding capacity. However, with the new assessed values in the Fall of 2010, the district's assessed valuation dropped by \$400,391,054 or 33.9%.

The 2015-2016 final 40th day membership does not include State-chartered charter schools.
