

General Fund Revenue Tracking Report: FY22 Accruals through February 2022

General fund recurring revenues for FY22 through February 2022 were \$6.03 billion, up \$1.26 billion or 26.5 percent, over FY21.

February collections were \$644.3 million, up \$107.1 million, or 19.9 percent, from February 2021. Total gross receipts tax collections for FY22 through February were up \$336.9 million (18.7 percent), energy related revenues to the general fund were up \$452.2 million (49.2 percent), and personal income taxes were up \$268.5 million (29.2 percent), over FY21. Investment income is the only major revenue category tracking lower than FY21, posting a \$7 million fiscal year-to-date decrease (1.1 percent), due to \$52.7 million in losses in the state treasury because of the rising interest rate environment.

FY22 revenues are posting significantly higher than FY21 for several reasons. First, the pandemic suppressed the tax base in FY21 resulting in lower than average receipts for most revenue streams (see Chart 1). Additionally, high and persistent inflation, consistently strong financial markets through the tax year, and a tight labor market are pushing incomes to record levels, bolstering income taxes in FY22. Lastly, oil and gas prices soared and remain elevated due to the geopolitical turmoil in Europe and supply-side constraints outside of the Permian Basin.

As oil-related collections pushed past their five-year averages, large transfers to the early childhood trust fund began in November and December and are not currently contributing to monthly year-over-year revenue growth.

THIS REPORT: This general fund revenue tracking report reflects FY21 revenue accruals as reported by the Department of Finance and Administration.

Chart 1 shows total monthly year-over-year revenues. Table 1 and Chart 2 present the components of fiscal year-to-date (FYTD) revenue through February for FY22 versus the same period in FY21.

Revenue Tracking

The last page of this report provides the general fund revenue tracking chart for FY22. The chart details the actual revenues received year-to-date through February, and preliminary revenues for some revenue sources through March. Generally, projections for revenue collections through the end of the fiscal year are based on historical monthly shares of revenue collections by revenue source.

Total recurring revenues are currently tracking at \$740 million above the December CREG estimate and \$306 million above January's tracking estimate. Most of this is due to higher than expected actual year-to-date revenues through February and preliminary revenues in March for GRT and income tax, tracking \$299 million and \$523 million above December projections, respectively. Preliminary March income tax revenues were the highest on record at \$492.8 million, reflecting April's record-breaking income tax cash payments experienced nationally and in other states. Income taxes alone account for \$236 million of the upward revision in tracking, while GRT accounts for \$47 million.
