

HIGHLIGHTS
OF THE
FORTY-SIXTH LEGISLATURE, FIRST SESSION
2003

Acts carrying an emergency clause become effective immediately upon signature by the governor; all other acts passed during the session and approved by the governor become effective 90 days after adjournment of the legislature, which is the first moment of June 20, 2003, or at a date specified in the act.

Introduction

"Clapping with the right hand only will not produce a noise."

Malay Proverb

The first session of the forty-sixth legislature, marked by newfound cooperation with the executive, moved with unprecedented speed and efficiency on major pieces of legislation. Personal income tax relief, education reform, changes to medicaid and drunken driving and public safety measures were all approved relatively quickly. The efforts to enact these and other measures produced plenty of noise, but the debate centered more on policy and less on politics; communication was frequent and frank.

New Mexico did not face the same budget crisis as other states and a personal income tax cut expected to be worth \$360 million once fully implemented was approved before the session's halfway point — a remarkable feat. By the end of the session, however, measures were approved to deposit all of the money from the state's settlement with tobacco companies for the next four years into the general fund rather than saving half in a permanent fund, increase the cigarette tax by 70¢ a pack, squeeze up to \$22.5 million from the medicaid program and retain 1¢ of the gasoline tax that was set to expire July 1.

A comprehensive education reform package, including higher minimum salaries for teachers, was approved. Two proposed amendments to the constitution — one to give the governor control over state education policy and another to devote more money from the land grant permanent funds for public schools — were approved for submission to the voters at a special election in September. Legislation to deal with public health emergencies, drunken driving, hate crimes and concealed weapons were all enacted. The interstate stream commission was charged with developing a comprehensive state water plan, public employees were once again given the right to collectively bargain and the state investment council was given more flexibility in investing the permanent funds.

As usual, the variety of issues before the legislature was broad. More than a dozen new special license plates were created; the state game commission was given authority to require the use of bear-proof garbage containers; emergency dispatchers are now required to receive calls for help via e-mail; and the Sandia hairstreak, the New Mexico whiptail lizard and the New Mexico spadefoot toad were named the official state butterfly, reptile and amphibian, respectively.

The governor signed 436 bills and allowed three others to become law without his signature, a provision not exercised since 1969. The governor also vetoed 84 bills, including 72 by pocket veto — a number for pocket vetoes not seen since 1957, when Governor Mechem allowed 93 bills to be vetoed without signature.

Even as the legislature adjourned, members expected to return in a special session in the fall to consider the recommendations of the blue ribbon tax reform commission created during the session.

The *Highlights* is an annual publication of the legislative council service summarizing much, but not all, of the legislation approved during the session. Omission of certain bills is not an indication that those bills are not important; any bill introduced and passed is important to someone. As subjective as the selection of bills are the categories into which they are placed. Many bills defy single-topic categorization, and the staff has tried to adequately organize and cross-reference them. Each bill that passed is listed in the *Concordance* in the *Appendix*.

Alcoholic Beverages

As in every legislative session, bills regarding alcoholic beverages fall into two categories, those that would reduce sales or availability of alcoholic beverages and those that would expand the availability and reduce regulation of the sales of alcoholic beverages. Of approximately 30 bills dealing directly with the sale of alcoholic beverages or amending the Liquor Control Act, only the five listed below were enacted into law. Additional bills included measures for dealing with driving while under the influence of intoxicating liquor or drugs (DWI), such as expanded use of ignition interlock devices. Bills addressing boating under the influence and funding treatment programs with a greater share of the liquor excise tax were also introduced. Discussions of DWI bills may be found in the section on *Courts, Corrections and Criminal Justice*.

House Bill 274 (Chapter 117) allows a governmental liquor licensee to sell alcoholic beverages in food service facilities in state museums and also allows sales to skybox owners or their guests at a municipal baseball park. A municipal baseball park is defined so that the only qualifying park is the Albuquerque sports stadium.

House Bill 944 (Chapter 376) amends Section 60-6B-19 NMSA 1978 of the Liquor Control Act to exempt table wine from segregated sales, which means that table wine may be displayed and sold at any location on the licensed premises of a dispenser or retailer. The definition of table wine limits the wine that can be displayed and sold outside of a segregated

alcoholic beverage sales area to: (1) wine containing less than 14% alcohol by volume and wine exceeding that limitation only if the limit is exceeded due to natural fermentation and not artificial fortification; (2) wine sealed by cork closure and aged more than two years; and (3) vermouth and sherry.

Section 60-6A-4 NMSA 1978 is amended by **Senate Bill 57 (Chapter 103)** to authorize the governing body of a local option district to initiate by resolution an election to approve or disapprove the issuance of restaurant licenses in that local option district. Beer and wine may be sold and consumed on the premises of a person holding a restaurant license, but may only be sold when food is also served. Previous law authorized local option elections only by petition of the electors in the local option district.

Senate Bill 574 (Chapter 246) increases by \$50.00 the fees for certain licenses issued pursuant to the Liquor Control Act. The nonrefundable application fee to obtain a liquor license increases to \$200; retailer's, dispenser's and canopy license fees increase to \$1,300 per year; and restaurant license fees increase to \$1,050 per year.

Senate Bill 688 (Chapter 100) amends the trade practices article of the Liquor Control Act by amending the definition of "supplier" for purposes of franchise agreements to include "successors and assigns of the supplier of any or all brands of alcoholic beverages except wine and spirituous liquors".

Appropriations and Finance

The New Mexico legislature entered the 2003 session in the enviable position of *not* facing a budget deficit. According to a January 14, 2003 article in the *New York Times*, New Mexico and Wyoming were the only states not projecting "red ink" for fiscal year 2004. The national governors' association characterized the state of state finances as "the most dire fiscal situation since World War II", and its January quarterly fiscal survey was laced with adjectives like "astonishing", "staggering", "massive" and "spectacular".

Against this backdrop, the New Mexico forecast for tepid revenue growth of about 3.5% for the remainder of fiscal year 2003 and fiscal year 2004 looked positively glowing. However, when measured against historical standards and against the reported budget needs, the outlook appeared less rosy. The January 2003 *Report of the Legislative Finance Committee to the Forty-*

Sixth Legislature, First Session notes that underlying economic growth in New Mexico has continued to weaken during the past several months and, although some improvement is expected, it is still anemic. Thus, the report cites the need for careful budget deliberations for fiscal year 2004 that will tighten budgets in some areas and focus on the three priorities of education, health and public safety.

Governor Richardson's budget plan, which was presented to the legislature on opening day of the session, also notes the limited growth in general funds available for fiscal year 2004, but it calls for "an imaginative use of all available resources and a prudent yet positive view of the potential for future economic growth". The governor challenged the legislature to work with him to provide meaningful tax reduction in order to spur economic development and to make major investments of public money to improve education, expand health care, manage water resources and protect citizens. In the end, the legislature accepted, with some modifications, the bold strategy of the governor. It adopted a variety of financial measures that provide a balanced budget for fiscal year 2004 and that reflect longer term public policies based on the "prudent but positive view of the potential for future economic growth" called for by the governor.

Revenue

There were numerous revenue measures this year, notably the income tax rate reduction, the deposit of tobacco settlement payments into the general fund instead of the tobacco settlement permanent fund, the increase in the cigarette tax and increased revenue from the premium tax. These measures are all discussed in detail in pertinent parts of the *Highlights* but warrant some mention in this revenue section. In terms of the long-term impact of revenue measures, the income tax reduction is most notable. While the first-year cost to the general fund is a moderate \$21.4 million, the out-year costs rise substantially, reaching \$360 million by FY 2008, when it is fully implemented. Other changes to the tax laws will cost the general fund about \$5.2 million in FY 2004. These decreases will be offset by positive revenue measures, including the following:

- ★ taxation and revenue department audit efforts are expected to raise \$13.8 million in FY 2003 nonrecurring, \$21 million in FY 2004 recurring and \$19.5 in FY 2004 nonrecurring revenue;

★ the increase in premium tax revenue is scored by LFC and DFA at \$32 million recurring;

★ the change in the definition of "resident" for Income Tax Act purposes will raise \$4 million recurring;

★ the tobacco settlement payments will add \$42.9 million FY 2003 recurring, \$6.55 million FY 2003 nonrecurring and \$37.2 million FY 2004 recurring revenue; and

★ the cigarette tax increase will provide \$30.7 million in recurring revenue.

See specific *Highlights* categories and the *Appendix* for details of the various revenue bills.

Senate Bill 298 (Chapter 312) was crafted as a compromise measure in response to the governor's proposal to abolish the tobacco settlement permanent fund and the tobacco settlement program fund and put all of the tobacco settlement money into the general fund. The bill maintains the tobacco settlement permanent fund, but designates it as a reserve fund within the general fund and authorizes money to be transferred out of it with legislative authorization if general fund revenues are insufficient to meet expenditures. It transfers 100% of annual settlement revenues into the general fund for FY 2003 through 2006. Beginning in FY 2007, the flow of funds reverts to the current procedures, with 50% being transferred into the tobacco settlement program fund and 50% remaining in the tobacco settlement permanent fund. Finally, the bill transfers the current balance in the tobacco settlement program fund, approximately \$6.5 million, to the general fund for expenditure in FY 2003. This measure was part of the governor's strategy to balance the budget and provide his economic stimulus package; another component of the governor's overall fiscal strategy was to take credit for school district cash balances to offset the use of the state general fund for teacher salaries.

House Bill 137 (Chapter 114) creates the Tobacco Escrow Fund Act to complement the nonparticipating tobacco manufacturers model statute that was designed to have tobacco manufacturers who were not part of the master settlement agreement put in escrow a portion of their sales proceeds in case judgments are entered against them. The act is necessary to ensure enforcement against noncompliant or nonparticipating tobacco product manufacturers.

Other bills that affect state revenue are discussed under *Taxation, Insurance and Health and Public Assistance* and in the *Appendix*.

Appropriations

In a rare occurrence, the Feed bill included funding for the other branches, turning it into a general appropriation act. **House Bill 1 (Chapter 1)**, which is the appropriation bill for legislative session and interim expenses, including the permanent staffs, included supplemental appropriations of \$871.7 for the governor and lieutenant governor and \$50.0 for the jury and witness fund.

This year, the legislature passed its regular general appropriation act, **House Appropriations and Finance Committee Substitute for House Bills 2, 3, 4, 5, 6 & 9 (Chapter 76, p.v.)**, and a "junior" appropriation act, **Senate Finance Committee Substitute for Senate Finance Committee Substitute for Senate Bill 655 (Chapter 83, p.v.)**. House Bill 2 appropriates over \$10.1 billion from all sources for the operation of state government next fiscal year, including almost \$4.1 billion from the general fund and just over \$3.5 billion from the federal government. Specials, from FY 2003 nonrecurring revenue, accounted for another \$19.7 million and supplementals and deficiencies claimed another \$64.6 million in FY 2003 revenue. The total general fund effort for House Bill 2 represents a 4.9% increase over last year.

As has been the case for several years, the two biggest appropriation blocks are medicaid and public schools. Medicaid costs continue to escalate, and House Bill 2 provides almost \$2.184 billion in combined state and federal funding in FY 03 and 04, with approximately 25% of that amount coming from the general fund. Public school support and the department of education special appropriations funding for next fiscal year will be \$2.17 billion in state and reported federal funding, although not all federal funding for public schools is included in House Bill 2. Public school support received a 4% increase in general fund over last year, and other education, including the state department of public education and its Section 4 specials, saw a 24.8% increase in general fund, the largest increase by category. The Section 4 special appropriations more than doubled, with much of that being a \$2 million appropriation for the Indian Education Act, **Senate Finance Committee Substitute for Senate Bill 115 (Chapter 151)**. In addition, appropriations for teacher professional development and student achievement were increased substantially in line with the education reform bill. Public schools received money in House Bill 2 Junior and the capital outlay bill as well.

After going without raises last year, state employees, judges, district attorneys and staff and higher education faculty and staff will receive a 3% raise this year from compensation appropriations in House Bill 2 and House Bill 2 Junior, but not until January, 2004. The legislature provided funding, through direct appropriation and use of school district cash balances, for 6% raises for teachers and other instructional staff and 3% for other school employees. Public school and higher education raises occur earlier.

The legislature also passed a House Bill 2 Junior this year, an increasingly popular legislative device to fund additional programs and projects as current and next fiscal year revenue projections change during the session. **Senate Finance Committee Substitute for Senate Finance Committee Substitute for Senate Bill 655 (Chapter 83, p.v.)**, providing funding for projects in all three branches, qualifies as a general appropriation act and, therefore, does not need an emergency clause to go into effect immediately. The bill provides funding from the general fund of \$43.7 million in fiscal year 2003 and \$18.5 million in fiscal year 2004. Totals for other state funds are \$6.1 million in fiscal year 2003 and \$3.1 million in fiscal year 2004. Highlights of the bill include funding for:

- ★ replacement of federal funds for drug courts statewide, \$1.5 million
- ★ water and wastewater planning fund, \$1 million
- ★ electronic voting system revolving fund, \$1.25 million
- ★ additional tourism advertising and promotion, \$1.5 million
- ★ business recruitment and marketing, \$1.75 million
- ★ in-plant training, \$7 million
- ★ WATERS database, \$1.5 million
- ★ water rights adjudications on Pecos and Rio Grande, \$1.15 million
- ★ HSD applicant link to services assistance program, \$1.1 million
- ★ rape crisis and related programs, \$1 million
- ★ developmental disabilities waiting list reduction, \$2 million
- ★ domestic violence programs, \$1 million
- ★ arts education, \$4 million
- ★ computerized learning system aligned with state standards, \$2 million
- ★ expansion of nursing programs statewide, \$2 million

- ★ higher education endowed chairs, \$3 million
- ★ phreatophyte removal, \$1.2 million

On the last day of the session, legislators attempted another junior, known informally as *El Nieto*, the grandson, to re-fund vetoed Junior projects, with a few new additions, but that bill did not make it through the legislative process. See the *Appendix* for details of the two appropriation bills that did pass.

Capital Outlay

2003 was no different than any other year in terms of capital outlay requests outstripping resources. The legislative council service's capital outlay team processed 4,524 individual project requests, of which legislators introduced 4,349 in 2,795 capital outlay certificates totaling almost \$1.4 billion. When the legislature went into session, the estimated severance tax bonding capacity was \$87.8 million. The legislature passed two capital outlay bills, **House Taxation and Revenue Committee Substitute for House Bill 200 (Chapter 429, p.v.)** and **Senate Finance Committee Substitute for Senate Bill 134 (Chapter 385)**. In addition, there were a couple of capital outlay projects in House Bill 2 Junior. Between the two main capital outlay bills, over \$158 million in state and local capital improvements funding was provided: \$37 million in general fund, \$90 million in severance tax bonds, \$9 million in severance tax sponge bonds and \$22.5 million from other sources. Also, there were 174 changes made to earlier capital projects in House Bill 200. For specific projects, see the capital outlay tables and the reauthorization lists in the *Appendix*. Not listed in the capital outlay lists in the *Appendix*, House Bill 2 Junior included two capital outlay projects for the courts. Funding, from the magistrate and metropolitan court capital fund, included \$711.0 for phase 2 of the magistrate court video arraignment project and a lease versus build study for the Dona Ana magistrate court in Las Cruces and \$1.85 million to finish the Bernalillo county metropolitan court building.

State Funds Investment

Investment of the severance tax permanent fund was liberalized significantly by the enactment of the three bills discussed first under this subheading.

In addition to adding the small business investment corporation to the list of entities for which the state treasurer invests through the short-term investment fund, **House Bill 80 (Chapter 399)** broadens the use of the severance tax permanent fund for investments pursuant to the Small Business Investment Act by enlarging the investments of the small business investment corporation and deleting certain requirements for eligibility for equity investments. Debt or equity investments may be made to support the acquisition or development of land, buildings or infrastructure; create job opportunities; or otherwise enhance the economic development objectives of the state. The membership of the board of directors of the small business investment corporation is changed to delete most ex-officio members and have the governor appoint six members in addition to the state treasurer and state investment officer. Also, directors are considered public employees for the purposes of the Tort Claims Act. Within 30 days of its annual report, the corporation must return to the severance tax permanent fund the net excess of funds, which is defined as the amount of dividends and interest actually received plus any capital gains actually realized, less the operating expenses of the corporation and reasonable reserves for losses.

State investment objectives are changed by the enactment of **House Bill 918 (Chapter 401)** and its duplicate, **Senate Bill 779 (Chapter 406)**. The new law increases to 6% the amount of the severance tax permanent fund that may be invested in New Mexico private equity funds and allows the same investment in New Mexico businesses that create new job opportunities and that support new, emerging or expanding businesses in a manner consistent with the constitution if:

(1) the investments are made in conjunction with cooperative investment agreements with parties that have demonstrated abilities and relationships in making investments in new, emerging or expanding businesses;

(2) an investment in any one business does not exceed 10% of the amount available for investment pursuant to the changes in the law; and

(3) the investments represent no more than 51% of the total investment capital in a business.

The state may own more than 51% of the total investment capital if the additional ownership interest is due to foreclosure by the state investment officer, is necessary to protect the investment and does not require additional investment of the severance tax permanent fund.

Both Chapter 399 and Chapter 406 amended Section 7-27-5.15 NMSA 1978, but in different ways. *Please note:* The rules of statutory construction provide: "[i]f statutes appear to conflict, they must be construed, if possible, to give effect to each. If the conflict is irreconcilable, the later-enacted statute governs." (See the Uniform Statute and Rules Construction Act, Section 12-2A-10 NMSA 1978.)

Senate Bill 380 (Chapter 56) increases from 1/2% to 2 1/2% the amount of the severance tax permanent fund that may be invested in films produced in New Mexico. In addition, the state investment officer may purchase, at a discount, up to 80% of the film production tax credits from eligible New Mexico film projects.

Investment of the PERA fund has also been liberalized with the enactment of **Senate Bill 831 (Chapter 345)**. PERA will be able to make futures and options investments on domestic equity indices and to invest in below investment grade fixed-income instruments if the securities have a minimum credit rating of B under Standard and Poor's or Moody's rating systems or their equivalents. No more than 10% of the funds may be invested in debt obligations of corporations with a credit rating less than Standard and Poor's BBB or Moody's Baa or equivalents. Investing with enhanced index managers using futures and options is permitted solely to add incremental value and control risk, not for speculation.

New Mexico Finance Authority

Each year, the legislature authorizes NMFA to make grants or loans to eligible entities for water, wastewater and other municipal projects. Last year, the legislature appropriated \$12 million to the public project revolving fund but failed to pass the project authorization bill. The department of finance and administration transferred the money to NMFA anyway, but the agency was constrained by law to spend only \$3 million for emergency projects. This year, the legislature authorized public project revolving fund projects in **House Bill 834 (Chapter 74)**, but

did not include an appropriation; presumably, the \$9 million from last year will be used to fund the projects authorized. **Senate Bill 109 (Chapter 105)** appropriates \$1,610,500 from the public project revolving fund to the drinking water state revolving loan fund. **Senate Bill 273 (Chapter 61)** increases the amount NMFA is allowed to lend for water and wastewater emergencies to \$6 million for fiscal years 2003 through 2005; the maximum returns to \$3 million after fiscal year 2005. Emergency loans are made without specific legislative authorization.

The definition of "qualified entity" was broadened by the passage of **House Bill 217 (Chapter 25)** to include acequia associations, public improvement districts, federally chartered colleges and consortia of Indian entities that are already classified as qualified entities. The maximum loan amount was also increased in the bill from \$500.0 to \$750.0.

The State Office Building Acquisition Bonding Act was changed in **House Appropriations and Finance Committee Substitute for House Bill 496 (Chapter 371)** to the State Building Bonding Act. The primary purpose of the change is to authorize NMFA to issue and sell "state museum tax revenue bonds" to renovate and maintain existing structures and develop permanent exhibits at state museums and monuments. The bonds, along with state office building bonds, are backed by a gross receipts tax distribution of \$500,000 a month. **House Appropriations and Finance Committee Substitute for House Bill 594 (Chapter 372)** authorizes NMFA to issue up to \$5.76 million in state museum tax revenue bonds. By senate floor amendment, the law specifies particular projects that will be funded. In addition to that funding source, **House Bill 845 (Chapter 430)** allows for a distribution from the governmental gross receipts tax to the office of cultural affairs for improvements to state museums and monuments. The NMFA may lend the office of cultural affairs money from the public project revolving fund, which shall pledge the tax revenue for repayment of the loan. The tax distribution of 1% is transferred from the portion that had been dedicated to state parks.

Other NMFA-related bills are described in other categories. See *Economic Development*; see *Taxation*; see *Water and Water Facilities*.

Children, Youth and Families

The legislature passed a significant number of bills that address varying aspects of the Children's Code. Those bills, and other measures that affect children and families in New Mexico, are discussed below.

Children's Code

House Bill 46 (Chapter 48) enacts a revised Interstate Compact for Juveniles, which may replace the current compact set forth in the Children's Code. The revised compact provides for the proper supervision of juveniles who are on probation or parole, establishes standards for cooperation in juvenile matters among the compacting states and establishes a system of uniform data collection regarding juveniles subject to the provisions of the compact. The provisions of the compact require the participation of a minimum of 35 states to be effective; the effective date is the later of July 1, 2004 or enactment by the 35th state.

House Bill 247 (Chapter 189) adds clergy members to the list of professionals who have a specific duty to report known or reasonably suspected child abuse or neglect to the proper authorities, although the clergy's duty to report is limited by privilege.

House Judiciary Committee Substitute for House Bill 507 (Chapter 225) makes numerous changes to the Children's Code, primarily concerning placement of children, detention proceedings and parole procedures. The focus of the bill is illustrated in the following new language, which states that the purpose of the Delinquency Act is to "strengthen families and to successfully reintegrate children into homes and communities". To that end, the bill requires the children, youth and families department to perform a detention risk assessment prior to incarcerating a child. As a corollary, the bill expands the possibility of placing a child back in the child's home, under court-approved conditions or placing a child in the home of a fit and willing relative.

Senate Floor Substitute for Senate Bill 624 (Chapter 108) amends a section of the Children's Code that applies to procedures for terminating parental rights. The bill establishes a clearer time line for determining when the children, youth and families department is required to initiate proceedings to terminate parental rights for a child currently in foster care.

House Bill 629 (Chapter 261) requires the children, youth and families department to fingerprint all current and prospective operators, staff and employees of child care facilities and

licensed and prospective foster parents. The fingerprints are to be used to obtain criminal history records and to conduct background checks on those individuals. The bill makes it clear that the criminal history records are to be used solely for conducting background checks; a person who discloses information contained in a criminal history record for any other purpose is guilty of a misdemeanor.

House Bill 736 (Chapter 294) and **Senate Public Affairs Committee Substitute for Senate Bill 397 (Chapter 321)** are identical bills that amend the Children's Code to clarify its application to international adoptions and to ensure compliance with the federal Intercountry Adoption Act. The children, youth and families department is authorized to act as an accrediting entity that approves agencies and persons who provide intercountry adoption services. With regard to all adoptions, the department is now required to perform a nationwide criminal history records check on every person who files a petition to adopt a child.

Other Measures

House Appropriations and Finance Committee Substitute for House Judiciary Committee Substitute for House Bills 16 and 161 and Senate Bill 110 (Chapter 93) enacts the AMBER Alert Law, mandating that the New Mexico state police develop and implement an AMBER alert notification plan to alert the public of a child abduction. The bill requires the state police to work with surrounding states and the Republic of Mexico to establish agreements to execute regional AMBER alerts. This plan would effectuate rapid dissemination of information about child abductions to local law enforcement agencies and citizens around the state.

As a further measure to control cigarette smoking by children, **House Bill 136 (Chapter 364)** amends the Tobacco Products Act to restrict the sale of tobacco products at a retail location to a direct, face-to-face exchange between the customer and the seller. The bill prohibits the sale of tobacco products at a self-service display when the public has access to the tobacco products without the assistance of the seller and prohibits the sale of tobacco products in a vending machine unless the vending machine is equipped with a remote-controlled lock-out device.

House Bill 536 (Chapter 283) exempts child, spousal or medical support collected by the human services department's child support enforcement division from the Uniform

Unclaimed Property Act. The bill also authorizes the human services department to adopt rules for the disposition of unclaimed payments.

House Bill 614 (Chapter 287) amends the Mandatory Medical Support Act to bring New Mexico into compliance with the federally mandated requirements for enforcing medical support of children and the use of the national medical support notice required by the federal Child Support Performance and Incentives Act. The bill requires the use of the national medical support notice, which is a court-ordered notice to an employer that an employee's child must be covered under the company's insurance plan, and requires that an employer notify the human services department of termination of employees with covered children.

Constitutional Amendments

Four amendments to the constitution were approved to be submitted to the electorate. A special election will be held September 23, 2003 to determine if two of the four proposed amendments will be approved by the people of New Mexico. This special election will be held for **Senate Education Committee Substitute for Senate Joint Resolutions 2, 5, 12 and 21 (CA 1)**, which proposes to create a cabinet-level public education department and provide for an elected public education commission, and **Senate Floor Substitute for Senate Joint Resolution 6 (CA 2)**, which increases the distribution of the states's permanent fund to the beneficiaries by 3/10% and provides an additional 8/10% in fiscal years 2005-2012 and 1/2% in fiscal years 2013-2016. The additional distributions from the permanent school fund must be used to implement and maintain educational reforms. There is a circuit breaker in the amendment if the five-year market value average is less than \$5.8 million and the legislature may suspend increased distributions on a three-fifths' vote.

The other two proposed constitutional amendments approved by the legislature will be presented to the voters in the next general election. **House Joint Resolution 1 (CA 3)** allows municipalities to provide for municipal runoff elections. **House Joint Resolution 2 (CA 4)** extends the property tax exemption to all veterans and their widows regardless of when the veteran served. Currently, the exemption applies only to those veterans who served during times of armed conflict and their widows.

The legislative council service publishes an analysis and arguments for and against proposed constitutional amendments prior to the elections in which they are proposed. The publication for the special election on CA 1 and CA 2 will be available this summer; another publication concerning other amendments proposed by the forty-sixth legislature will be available next summer before the 2004 general election.

Consumers, Business and Financial Institutions

When the government regulates business and industry, it tries to balance the needs of consumers, workers and the businesses themselves. Not enough regulation, and consumers and workers are vulnerable to unscrupulous business practices; too much regulation, and the economy suffers because business cannot operate in a free and profitable manner. The actions taken in this legislative session are a further attempt to balance the various parties' interests.

Consumer Protection

In the last couple of years, the legislature has focused on the need to protect consumers from predatory lending practices. The Home Loan Protection Act, **Senate Judiciary Committee Substitute for Senate Bill 449 (Chapter 436)**, is designed to prohibit certain lending practices in the making of home loans. The act defines a "high-cost home loan" as a home loan with either an interest rate or points and fees that exceed a certain level. If a home loan is a high-cost home loan, the act requires counseling and certain notices to the borrower and prohibits creditors from including certain terms relating to increased payments or interest rates, late payment fees, accelerated indebtedness and penalties for prepayments. For all home loans, the act also requires a notice of default and establishes procedures for curing defaults before a foreclosure action may be pursued. The Home Loan Protection Act provides for a civil action to recover damages for violations of that act and declares that any violation of the act is also an unfair or deceptive trade practice pursuant to the Unfair Practices Act. The bill also amends existing law to place consumer finance companies under the provisions of the Mortgage Loan Company and Loan Broker Act.

Senate Bill 253 (Chapter 169) enacts the Privacy Protection Act, which limits the ability of a business to require a consumer to disclose his social security number and requires protection of the number if it is disclosed. Chapter 169 also amends the Credit Card Act to require that

receipts from credit card transactions show no more than five numbers of the cardholder's account number. Both of these provisions are a result of concern about identity theft and the legislature's attempt to protect consumers.

The Unfair Practices Act protects consumers from unfair or deceptive trade practices. **Senate Bill 699 (Chapter 168)** amends the Unfair Practices Act to allow private remedy to a person who receives an unsolicited advertisement by facsimile or email. The injured party may recover actual damages, including loss of profits, or statutory damages and reasonable attorney fees and costs. The law also permits recovery of actual damages or statutory damages by a telecommunications utility or an internet service provider injured by a violation.

The Consumer No Call Act, **Senate Floor Substitute for Senate Public Affairs Committee Substitute for Senate Bill 573 (Chapter 167)** establishes a registry of New Mexico residents who do not want to receive calls or faxes from certain telemarketers. The bill uses the do-not-call database to be set up and maintained by the federal trade commission (FTC) as the New Mexico no-call registry. The FTC will allow New Mexicans to register their home numbers at no cost by either calling a toll-free number or by logging on to the FTC no-call list. Only solicitations for the purpose of encouraging the purchase, rental, investment in or lease of property, goods or services would be banned. The list of New Mexicans on the FTC no-call database is updated quarterly and those who make telephone solicitations may obtain it directly from the FTC at no charge. The bill also requires disclosure of the fact that a call is a telephone solicitation within 15 seconds of the call being answered and prohibits the misrepresentation of the purpose of the call and blocking or circumventing caller identification devices. Violating the do-not-call provisions of the bill is a violation of the Unfair Practices Act. The bill contains a contingent repeal clause that repeals the sections of the bill creating a New Mexico do-not-call registry in the event that the federal communications commission's (FCC) proposed national do-not-call registry goes into effect. The FCC's registry, if implemented, will be applicable to almost all telemarketing activity affecting New Mexicans.

See other categories in the *Highlights* for bills that have a consumer protection component.

Financial Institutions

Substantial changes were made to the Credit Union Act in **Senate Bill 546 (Chapter 28)**. Most significant were the additional powers granted the director of the financial institutions division of the regulation and licensing department to regulate and supervise the affairs of out-of-state credit unions doing business in New Mexico. Included were specific requirements to be met, as determined by the director, before receiving permission to operate in the state. Broad powers to revoke that permission for a variety of reasons are granted to the director. Other specific changes in the existing law include:

- ★ creating two kinds of share accounts, voting and nonvoting, and removing the restriction on the number of shares that may be owned by a member;
- ★ broadening the scope of services that may be provided to persons within the field of membership;
- ★ changing the number of members authorized for a supervisory committee and requiring specific bylaws provisions for the committee;
- ★ adding specific requirements, restrictions and procedures for loans to officers;
- ★ expanding authorized investments; and
- ★ authorizing conversion of other financial institutions to credit unions and vice versa.

Because of problems in obtaining documents of release of recorded security interests when the debt secured has been satisfied, **Senate Bill 570 (Chapter 245)** provides an alternative method for releasing those interests of record, thereby avoiding the necessity for expensive actions to clear title to property in which the security interest was created. A title insurer may record a release of the security interest after notifying the secured party of its intent to do so. The insurer must ascertain that the underlying debt has been satisfied and the release must include this information in addition to other required data. The insurer is liable for damages to the secured party if full satisfaction of the debt has not been made.

Workers' Compensation

The legislature made only a few changes to the Workers' Compensation Act. **House Judiciary Committee Substitute for House Bills 501, 506 and 613 (Chapter 265)** changes the definition of "permanent total disability" to include a brain injury that results in a permanent

impairment of at least 30%, and makes changes in the residual physical capacity table. The bill also increases the amount of costs of discovery that must be advanced by the employer and raises the limit on attorney fees. **Senate Bill 646 (Chapter 259)** removes conflicts and inconsistencies in the law and eliminates the administrative attachment of the workers' compensation administration to the labor department. **Senate Bill 771 (Chapter 258)** creates the uninsured employer fund. This fund is created from fees paid by employers based on a percentage of the amount of compensation benefits and medical benefits paid out. The purpose of the fund is to pay benefits as a payer of last resort within the workers' compensation system to employees whose employer has failed to maintain his insurance. The uninsured employer is liable to the fund for any benefit money paid out.

Unemployment Compensation

Only one bill that dealt with unemployment compensation was enacted, but it was fairly complex and made several important changes that take advantage of changes in the federal law. **House Bill 261 (Chapter 47)** increases weekly benefits, provides for increased payments for recipients with dependents and allows for students and those who are only looking for part-time work to continue to receive benefits. Another change is to include domestic abuse as a good cause for an employee to leave work and, therefore, become eligible to receive unemployment benefits. A reduction in the base rate of contribution for an employer, combined with changes in the rate table for contributions, results in lowering the cost of doing business for employers. Out-of-state employers coming into the state may now use their past history to establish their contribution rate and are not required to pay the higher rates of a start-up company. The base period calculations are changed to increase benefit eligibility and the period of payments are extended if triggered by a downturn in the national economy and unemployment. A unique feature of the new law is that on June 30, 2007, or earlier if the solvency of the fund is threatened as triggered by the fund reaching a prescribed minimum limit, the sections that contain all of the changes previously mentioned, with the exception of the extended payment period, are repealed and replaced by sections in effect prior to those changes becoming effective.

Wages

House Bill 38 (Chapter 262) and **House Bill 325 (Chapter 184)** both deal with wages. House Bill 38 raises the state's minimum wage to \$5.15 an hour for nontipped employees. House Bill 325 creates a task force, with members appointed by the governor, to study the extent, factors and consequences of wage disparities between the sexes and between minorities and non-minorities in the state. The task force will also develop actions that are likely to lead to the elimination and prevention of wage disparities and present it's final report to the governor and legislature by December 15, 2003.

Regulation and Licensing

Senate Conservation Committee Substitute for Senate Bill 79 (Chapter 410) requires dealers in the business of selling boats to be licensed by the motor vehicle division. It also restricts the use of dealer or manufacturer numbers for boats to use on boats that are for test or demonstration purposes only.

Taxicab services and terminal shuttle services that operate between two states are considered to be engaging in interstate commerce and as such are regulated by the federal government and fall outside state regulations. **Senate Corporations and Transportation Committee Substitute for Senate Bill 126 (Chapter 358)** provides that taxicab services and terminal shuttle services that initiate and terminate transportation in this state are not engaged in interstate commerce but in intrastate commerce and are subject to regulation by the public regulation commission.

Courts, Criminal Law, Corrections and Public Safety

The legislature introduced, debated and ultimately passed a large number of bills that will alter the operations of the courts and the criminal justice system in New Mexico. Several new court fees were added and the third, sixth and thirteenth judicial districts will have new judges. Of particular interest is a bill that imposes tougher penalties for habitual DWI offenders and the enactment of a new law that allows the lawful carrying of a concealed, loaded handgun.

Courts

House Judiciary Committee Substitute for House Bill 109 (Chapter 363) expands the rights of a person who is a target of a grand jury investigation. The bill adds two new grounds for quashing an indictment based on procedural error during the grand jury process. An

indictment may be quashed if a member of the jury was not qualified to serve due to a conflict of interest, bias, partiality, inability to follow the law or the likelihood that the grand jury member will be called as a witness at the trial of the target. The bill also provides more opportunity for the target to be informed of, prepare for and participate in the grand jury proceeding. The target's attorney may submit proposed questions and exhibits to the district attorney or attorney general. Furthermore, it is the grand jury's duty to order evidence produced when it has reason to believe that evidence is available that may disprove or reduce a charge. This same standard is used in language permitting the target's attorney to notify the foreman of the grand jury of the existence of evidence. The bill specifies that a target that is in custody may not be compelled to testify sooner than four days following receipt of the notice, and a target that is not in custody may not be compelled to testify sooner than 10 days following receipt of the notice. Finally, the bill allows a target to request the court to release a sealed no-bill without a showing of good cause.

House Bill 181 (Chapter 52) amends and repeals sections of law regarding venue in the courts. It strikes provisions setting time restrictions for requesting a change of venue in any civil or criminal case and repeals Section 38-3-8 NMSA 1978, which did not allow for a change of venue after the first term at which the party might have been heard, unless the causes upon which the motion is founded have intervened subsequent to the term.

Several bills amended or created court-related fee structures. **House Appropriations and Finance Committee Substitute for House Bill 414 (Chapter 94)** and **Senate Judiciary Committee Substitute for Senate Bill 327 (Chapter 387)** are identical bills that impose a domestic violence offender treatment fee on each person convicted of a penalty assessment misdemeanor, traffic violation, petty misdemeanor, misdemeanor or felony offense. The fees are deposited in a domestic violence offender treatment fund, to be used by the children, youth and families department to defray the costs of providing treatment for domestic violence offenders. **House Appropriations and Finance Committee Substitute for House Bills 258, 228 and 334 (Chapter 424)** combines measures concerning an increase of certain court fees and the use of those court fees. **Senate Bill 91 (Chapter 240)** creates a drug court fund for district courts for fees collected from adult drug court participants and establishes a similar magistrate drug court

fund. The drug court fees collected from participants will be deposited into these funds. Each court will administer money in its fund to offset client service costs of the drug court program, consistent with the standards approved by the supreme court. **Senate Bill 106 (Chapter 38)** replaces the skeleton transcript fee for a docket and dismiss fee. Finally, **Senate Bill 114 (Chapter 407)** creates a nonreverting magistrate court mediation fund to pay for voluntary mediation programs in the magistrate courts.

After several attempts in previous years, new district court judgeships were approved by the legislature and the governor. **Senate Finance Committee Substitute for Senate Bill 906 (Chapter 348)** increases the number of judgeships in the third judicial district (Dona Ana) from six to seven and increases the number of judgeships in the sixth judicial district (Grant, Luna and Hidalgo) from two to three. Similarly, **Senate Judiciary Committee Substitute for Senate Bill 917 (Chapter 254)** provides for two additional judgeships for the thirteenth judicial district (Cibola, Sandoval and Valencia), one each in Valencia and Sandoval counties.

Criminal Law and Corrections

House Bill 510 (Chapter 75) creates the New Mexico sentencing commission to replace the criminal and juvenile justice coordinating council. The New Mexico sentencing commission inherits duties formerly assigned to the coordinating council and is also assigned new responsibilities. The new responsibilities include: (1) assessing the impact of any enacted sentencing guidelines on correctional resources and programs and reporting that information to the legislature; (2) providing estimates on the impact that proposed legislation will have on prison population projections; (3) developing proposed sentencing reforms and presenting proposed legislation to the appropriate legislative interim committee; and (4) reviewing proposed legislation that creates a new criminal offense, changes the classification of an offense or changes the punishment for an offense, and assessing the merits of that proposed legislation.

House Bill 813 (Chapter 296) revises the criminal penalties for the offense of tampering with evidence. Whoever commits tampering with evidence when the highest crime committed is a capital felony, first degree felony or second degree felony is guilty of a third degree felony. When the highest crime committed is a third degree felony, a fourth degree felony or is indeterminate, the penalty for tampering with evidence is a fourth degree felony. When the

highest crime committed is a misdemeanor or petty misdemeanor, the penalty for tampering with evidence is a petty misdemeanor.

Senate Bill 31 (Chapter 35) provides for reimbursement by the offender to a victim of the offense of making a bomb scare. A court may order a person convicted of making a bomb scare to reimburse the victim for economic harm caused by that offense. The bill defines "economic harm" as all direct, incidental and consequential financial harm suffered by a victim of the offense of making a bomb scare.

Senate Judiciary Committee Substitute for Senate Public Affairs Committee Substitute for Senate Bills 38 and 249 (Chapter 384) enacts the Hate Crimes Act, which provides for an alteration in a basic sentence of imprisonment when an offender commits a crime that is motivated by hate. The act defines "motivated by hate" as the commission of a crime with the intent to commit the crime because of the actual or perceived race, religion, color, national origin, ancestry, age, handicapped status, gender, sexual orientation or gender identity of the victim, whether or not the offender's belief or perception was correct. The Hate Crimes Act also requires hate crime data collection and law enforcement training regarding crimes motivated by hate.

Senate Floor Substitute for Senate Bill 390 (Chapter 27) enacts a new section of the Criminal Procedure Act establishing procedures for post-conviction consideration of DNA evidence. A convicted felon who claims that DNA evidence will establish his innocence may petition the district court to order the disclosure, preservation, production and testing of evidence that can be subjected to DNA testing. The burden is placed on the petitioner to satisfy certain requirements, by a preponderance of the evidence, before the court will order DNA testing on the evidence. The bill also addresses issues regarding provision of counsel for petitioners and appellate procedures following the issuance of a decision by the district court.

Senate Bill 470 (Chapter 257) provides that the applicable time period for commencing a prosecution for an alleged act of criminal sexual penetration is suspended until a DNA profile is matched with a suspect. This bill, and the increased reliability of DNA testing, will allow prosecutors to pursue cases against rapists who are apprehended long after the commission of criminal sexual penetration.

The following two bills relate to corrections issues. **House Bill 974 (Chapter 237)** directs the corrections department to establish a demonstration, prison-based drug rehabilitation program for inmates. The program will include components that address drug rehabilitation, education, self-respect and life skills. **Senate Bill 653 (Chapter 64)** amends the Privately Operated Correctional Facilities Oversight Act. The operator of a privately operated correctional facility that houses out-of-state inmates is required to pay a fee to the county in which the correctional facility is located. This bill increases the amount of the fee from 75¢ to \$2.00 per inmate per day.

DWI

House Judiciary Committee Substitute for House Bill 117 (Chapter 90) is the major DWI bill of the 2003 legislative session. The bill addresses habitual DWI offenders with a mixture of punishment and treatment. Under prior law, upon a fourth or subsequent DWI conviction, a DWI offender was subject to a term of imprisonment of 18 months, six months of which was mandatory. Pursuant to this bill, the level of punishment is increased as follows: (1) upon a fifth conviction, a DWI offender shall be sentenced to a term of imprisonment of two years, one year of which is mandatory; (2) upon a sixth conviction, a DWI offender shall be sentenced to a term of imprisonment of 30 months, 18 months of which are mandatory; and (3) upon a seventh or subsequent conviction, a DWI offender shall be sentenced to a term of imprisonment of three years, two years of which are mandatory. The bill also requires the corrections department to provide substance abuse counseling and treatment to felony DWI offenders. Additionally, upon second or third DWI convictions, offenders are now required to participate in an inpatient, in-custody or outpatient substance abuse treatment program or a drug court program. Finally, the bill brings New Mexico into compliance with federal law regarding prohibited blood or breath alcohol concentrations for commercial drivers.

House Floor Substitute for House Bill 278 (Chapter 164) authorizes the taxation and revenue department to enter into an intergovernmental agreement with the appropriate governmental entity of a tribe to permit the exchange of information between the tribal court and the motor vehicle division regarding persons who are adjudicated for a motor vehicle offense that

occurred within the jurisdiction of the tribal court. This bill addresses all motor vehicle offenses, including DWI offenses.

Senate Judiciary Committee Substitute for Senate Bill 266 (Chapter 92) makes changes to the administration of the interlock device fund, which was created to provide financial assistance to an indigent person ordered to place an ignition interlock device on a motor vehicle. The bill establishes that vendors who provide ignition interlock devices will pay fees for devices provided to persons whose driver's licenses are revoked pursuant to the Implied Consent Act, in addition to persons convicted of DWI. The imposition of the fee is also expanded to cover 10% of the amount charged by the vendor to lease, install, service and remove an ignition interlock device. Finally, the bill limits the use of money in the fund to help an indigent person with the cost of leasing an ignition interlock device for the initial four months. All of these measures were adopted to ensure the long-term solvency of the interlock device fund.

Senate Judiciary Committee Substitute for Senate Bill 501 (Chapter 239) enacts the Ignition Interlock Licensing Act. The act allows a person whose instructor's permit, driver's license or provisional license has been revoked or denied for DWI to apply to the motor vehicle division for an ignition interlock license. A person who has been convicted of homicide by vehicle or great bodily injury by vehicle while under the influence of intoxicating liquor or drugs will not be eligible for an ignition interlock license. The bill is an acknowledgment by policymakers that many DWI offenders continue to drive illegally after their licenses are revoked or denied. This measure provides a safeguard, in the form of requiring the use of an ignition interlock device in the DWI offender's motor vehicle, and provides a means for offenders to drive legally.

Senate Bill 434 (Chapter 241) is a first cousin to the DWI measures described in this category. The bill enacts the Boating While Intoxicated Act. The act, which emulates statutory provisions for DWI, prescribes penalties for operating a motorboat while under the influence of intoxicating liquor or drugs.

Public Safety

House Bill 30 (Chapter 260) enacts the Law Enforcement Safe Pursuit Act. The act requires training and standards for law enforcement officers who initiate and conduct high speed pursuits. The New Mexico law enforcement academy is charged with developing a four-hour program of instruction that is to be offered to all law enforcement officers during in-service training. The act also creates a new crime known as aggravated fleeing a law enforcement officer. A person who commits aggravated fleeing a law enforcement officer is guilty of a fourth degree felony.

Senate Bill 23 (Chapter 255) enacts the Concealed Handgun Carry Act. A similar law was enacted by the legislature in 2001, but was subsequently struck down by the New Mexico supreme court. In response to that court decision, this 2003 act provides statewide standards for the issuance of concealed handgun licenses. An applicant for a license must be 25 years of age or older. Once issued, a concealed handgun license is valid for a period of two years, when it may be renewed. The act also places limitations on licenses. A licensee is not allowed to carry a concealed handgun on school premises or on the premises of a preschool. Moreover, a concealed handgun license is not valid in a courthouse or court facility, unless the presiding judicial officer decides otherwise. The department of public safety is responsible for administering the act and issuing licenses. The department will begin issuing licenses to qualified applicants on January 1, 2004.

Senate Floor Substitute for Senate Conservation Committee Substitute for Senate Bill 901 (Chapter 253) provides an additional limitation on the Concealed Handgun Carry Act. The bill makes it a criminal offense to carry a firearm on university premises. A person convicted of carrying a firearm on university premises is guilty of a petty misdemeanor.

Senate Conservation Committee Substitute for Senate Bill 105 (Chapter 107) gives state park law enforcement officers express authority to provide assistance to full-time peace officers. The assistance is limited to emergency situations and the provision of assistance is subject to the needs of the park to which the state park law enforcement officer is assigned. Finally, state park officers are imbued with law enforcement powers outside the park so long as they follow specific instructions from a peace officer who requested aid.

Senate Bill 157 (Chapter 256) amends the DNA Identification Act to establish procedures for DNA identification of missing persons, unidentified persons and unidentified human remains. The bill creates a missing persons DNA identification system, to be used for collection, storage and comparison of DNA samples and records for humanitarian purposes.

Senate Bill 339 (Chapter 411) amends the Victims of Crime Act to include four domestic violence criminal offenses within the definition of "criminal offense" set forth in that act. Inclusion of the domestic violence offenses means that victims of those offenses will now have all the rights set forth in the Victims of Crime Act, including notice regarding court proceedings and parole hearings for the offender.

Senate Judiciary Committee Substitute for Senate Bill 683 (Chapter 249) enacts the Crime Stoppers Act. The act creates a crime stoppers advisory council and gives the council the duty to advise and provide training for local crime stoppers programs. The act also addresses the confidentiality of communications made to local crime stoppers programs and records kept by those programs.

Economic Development

The legislature enacted several measures to promote economic development in New Mexico. A new nonprofit corporation is created to carry out activities related to economic development throughout the state. Local governments, school districts, the economic development department and the New Mexico finance authority may now jointly assist in economic development projects. Eligibility for development and in-plant training funds has been expanded to include part-time and film industry employees; matching state funds are available to promote and market local communities to businesses; and local governments may now exempt certain commercial personal property from local property taxes. Three new endowed economic development chairs at the universities were also created and funded. The legislature passed three measures to promote the film industry, including the creation of a film museum in Santa Fe, and created a New Mexico-Chihuahua commission to provide a forum for exploring issues of concern to both New Mexico and Chihuahua, Mexico.

House Bill 8 (Chapter 53) provides that up to two-thirds of development training appropriations made in fiscal year 2004 be expended in nonurban communities and allows up to

\$50,000 of money appropriated to the economic development department for in-plant training to be used to administer the development training program. A related bill, **House Bill 24 (Chapter 352)**, amends the development training program to provide training funds for part-time employees, in addition to full-time-equivalent employees, as long as no more than 10% of the payments for training hours are for part-time positions. This bill and two other bills, **House Bill 919 (Chapter 353)** and **Senate Bill 419 (Chapter 360)** amend the same section of law. *Please note:* The rules of statutory construction provide: "[i]f statutes appear to conflict, they must be construed, if possible, to give effect to each. If the conflict is irreconcilable, the later-enacted statute governs." (See the Uniform Statute and Rules Construction Act, Section 12-2A-10 NMSA 1978.)

The New Mexico-Chihuahua commission, created in **House Bill 213 (Chapter 9)**, will be composed of members from New Mexico and from the state of Chihuahua, Mexico. New Mexico members include the governor, the secretary of economic development, the secretary of tourism, state officials assigned by the governor and up to 10 members of the public appointed by the governor. The commission will provide a forum for discussion and resolution of issues of mutual concern to both governments, including cultural, artistic, economic and industrial affairs. The law repeals the New Mexico Border Act and the New Mexico border commission. Records, contracts, assets and projects of the New Mexico border commission are transferred to the economic development department.

The Economic Development Corporation Act, **House Bill 494 (Chapter 183)**, creates a nonprofit corporation to provide economic development services statewide. The corporation, which is separate and apart from the state, will be governed by a 15-member board of directors consisting of the secretary of economic development and appointees of the governor. The corporation will establish relationships with New Mexico communities in order to understand their economic development goals; work for those communities to recruit targeted businesses and jobs; solicit economic development funds from federal and private sources; participate in economic development conferences and job fairs; and sponsor forums and conferences to assist New Mexico businesses and citizens to develop needed skills.

House Government and Urban Affairs Committee Substitute for House Bill 533 (Chapter 123) amends the Border Development Act to allow the secretary of economic development to designate another person as a member of the New Mexico border authority. The act is further amended to better define the authority's powers to fund, acquire, finance, operate, lease and sell port-of-entry related projects.

With the enactment of **House Bill 659 (Chapter 293)**, the existing short title, the Development Incentive Act, is changed to the Community Development Incentive Act. The law is further amended to allow class A counties and their municipalities to exempt commercial personal property of new business facilities from local property tax. A county or municipality may exempt up to 100% of the value of the property for tax purposes and the exemption may continue for any period of time not to exceed 20 years. The generation of electricity is added as a type of eligible business.

House Bill 756 (Chapter 379) and **Senate Finance Committee Substitute for Senate Bill 466 (Chapter 392)**, which are not duplicate bills, authorize the disbursement of \$3 million from the faculty endowment fund to the commission on higher education to provide for one endowed chair each to the university of New Mexico, New Mexico state university and the New Mexico institute of mining and technology. Each endowed chair is eligible for \$1 million upon notification that the institution has received matching funds for the endowment. Chapter 379 requires that the matching funds be equal to at least two-thirds of the state share, whereas Chapter 392 requires the matching funds to be equal to at least one-half of the state share. Both bills require that each endowed chair be directly related to economic development of New Mexico. House Bill 2 Junior provides \$3 million contingent on the enactment of the senate bill.

Film and multimedia production companies will now be eligible for in-plant training funds under **House Bill 919 (Chapter 353)**. The production companies are exempted from the current statutory limitations on the use of in-plant training funds such as the requirement for full-time permanent employees and the limitation of the training to 1,040 hours. Instead, the industrial training board is required to establish rules for the use of in-plant training by film and multimedia companies in accordance with requirements set forth in a new section of the bill. Reimbursement of 50% of salaries paid to eligible personnel will be made from the development

training fund. This bill, **House Bill 24 (Chapter 352)** and **Senate Bill 419 (Chapter 360)** amend the same sections of law. *Please note:* The rules of statutory construction provide: "[i]f statutes appear to conflict, they must be construed, if possible, to give effect to each. If the conflict is irreconcilable, the later-enacted statute governs." (See the Uniform Statute and Rules Construction Act, Section 12-2A-10 NMSA 1978.)

A 30-member film advisory board is created by **Senate Finance Committee Substitute for Senate Bill 320 (Chapter 97)**. The members will be appointed by the governor for four-year terms. Out of the 30 board members, the governor will appoint a seven-member executive board and a chairperson. The film advisory board will advise the economic development department and the governor on the promotion of the film industry in New Mexico and assist the department in developing a New Mexico media infrastructure and a workforce training program for film production.

Senate Bill 419 (Chapter 360) (conflict noted earlier) requires that certain employers offer health insurance to be eligible for industrial revenue bonds and in-plant training funds.

With the passage of **Senate Judiciary Committee Substitute for Senate Bill 429 (Chapter 325)**, the legislature allows the New Mexico finance authority to make loans without specific legislative authorization for public projects that are designated as urgent economic development public projects. The secretary of economic development must provide documentation that the project is urgent and that an economic benefit will be lost if the funding decision is delayed until the legislature can make specific authorization. In any year, single projects are limited to \$2 million, and total financing is limited to \$20 million.

The New Mexico film museum is created within the tourism department by **Senate Floor Substitute for Senate Bill 701 (Chapter 250)**. The museum will be located in the former state archives building in Santa Fe. The museum will be run by an 11-member board of trustees appointed by the governor with the consent of the senate.

The Statewide Economic Development Finance Act, **Senate Bill 932 (Chapter 349)**, allows local governments, local school districts, the economic development department and the New Mexico finance authority to jointly assist economic development projects. Under the act, an eligible economic development project, approved by the affected local governments and the

economic development department, may receive financing assistance from the New Mexico finance authority in the form of economic development bonds, loan participations or loan guarantees. Under the arrangements, the economic development department will acquire the project property and lease it to the operator. Money from the lease will be used to pay the debt service on the bonds or the payments due under the loan participation agreements. In addition, municipal or county infrastructure gross receipts tax revenues may be used to secure payment on economic development bonds. The local school district, the affected local governments and the operator of an economic development project may enter into agreements under which the school district and local governments will receive annual in-lieu payments as compensation for lost property taxes on the property acquired by the economic development department. The law provides that the annual in-lieu payments will include both state money from the tax impact fund created pursuant to the Statewide Economic Development Finance Act and payments made by the operator of the economic development project. See *Appropriations and Finance* for other NMFA-related bills.

Education

As usual, education, including public schools and higher education, was a major topic for the legislature, and great strides were made in both educational arenas. Last interim's public school reform efforts, led by the legislative education study committee, presented the legislature with a comprehensive revision of public school policy and the Public School Code. The commission on higher education created a blue ribbon task force to look at the higher education funding formula and the fiscal needs of the state's post-secondary schools in several key areas, such as workforce development and economic development.

Public Schools

The legislature has been considering reform of the state's elementary and secondary school system since 1999, when the legislative council appointed the education initiatives and accountability task force. Some progress was made in 2000 with the legislature's adoption of the task force's recommendation to eliminate social promotion. The task force's 2001 education reform bill, Senate Education Committee Substitute for Senate Bill 308, was vetoed, but a few more changes were made in the state's educational policy in that year and in 2002. Meanwhile,

Congress passed the No Child Left Behind Act (NCLB), which mandates drastic shifts in states' accountability for federal education funding. Education reform finally came to fruition this year with the enactment of **House Bill 212 (Chapter 153)**. The legislature also passed two constitutional amendments that will be presented to the voters at a special election this fall.

Senate Education Committee Substitute for Senate Joint Resolutions 2, 5, 12 and 21 (CA 1) proposes to change the state governance structure from the state board of education to a cabinet-level public education department, headed by a secretary. The elected board, renamed the public education commission, will still exist, but the legislature will determine its role by statute.

Senate Floor Substitute for Senate Joint Resolution 6 (CA 2) increases the distribution of the land grant permanent funds to the beneficiaries, which are primarily the public schools, for several years. In accordance with **House Bill 310 (Chapter 154)**, the special election will be held on the fourth Tuesday in September (September 23, 2003). That act also amends a section of the Election Code to allow for municipal elections to be concurrent with general, special and school district elections and provides \$900,000 to the secretary of state for the cost of the special election. A companion bill to CA 1 is **Senate Education Committee Substitute for Senate Bill 911 (Chapter 143)**, which provides for the transition period between adoption of the constitutional amendment and July 1, 2004. To ensure the legislature acts to make the required changes to the governance provisions of the Public School Code during the 2004 legislative session, the law repeals certain essential articles in the code effective July 1, 2004.

House Bill 212 (Chapter 153) is a combination of Senate Education Committee Substitute for Senate Bill 308 of 2001, requirements of NCLB and changes made during the 2002 interim by LESC and its ad hoc subcommittee. The bill also includes a major cleanup of the Public School Code by recompiling sections, repealing unnecessary or contradictory sections and making stylistic and language changes. If the constitutional amendment for the creation of a cabinet-level public education department passes, the Public School Code will require further revision, but this year's compilation changes will provide a "cleaner slate" for that effort. The major changes in the bill include:

- ★ enactment of the Assessment and Accountability Act, which complies with NCLB and its focus on adequate yearly progress of students, schools and school districts;

- ★ measurement of adequate yearly progress by performance-based tests instead of norm-referenced tests;
- ★ development of a professional career-ladder structure for teachers that includes three levels of licensure and requires licensees to demonstrate continued competency;
- ★ changes in local governance that move responsibilities from the local board to the local superintendent and school principals;
- ★ creation of school councils to assist school leadership and to act as advocates for the students in the community; and
- ★ enactment of the Family and Youth Resource Act, which provides a mechanism for a quick response to social and economic problems that restrict a student's ability to achieve in school.

Fine arts education will be funded through the public school funding formula with the enactment of **House Bill 12 (Chapter 152)**. The law enacts the Fine Arts Education Act, which provides the specifics on how fine arts education programs will be established and funded. House Bill 2 Junior provides \$4 million for the program. By amendment in the senate, Section 22-8-18 NMSA 1978, which is the program cost calculation of the public school funding formula, was also amended to include program units for national board certified teachers; another section was added to allow the calculation of program units if a school district pays the board-certified teachers a one-time salary differential. This latter provision is duplicated in **Senate Bill 216 (Chapter 144)**.

Because of the high-stakes nature of education reform on the federal and state levels, it is very important that students are adequately prepared to meet state academic standards. **House Bill 61 (Chapter 130)**, the kindergarten plus pilot project, offers students in high-poverty schools the means to begin first grade ready to learn. "High-poverty school" is defined as a public school in which 85 percent or more of students are eligible for free or reduced-fee lunches. The three-year study will extend the kindergarten year by four months for participating students in high-poverty schools in Albuquerque, Gallup-McKinley, Gadsden and Las Cruces school districts. The pilot project will measure the effect of additional classroom time on literacy, numeracy and social skills development. The purpose of the pilot is to demonstrate that

increased time in kindergarten: (1) narrows the achievement gap between disadvantaged and other students; (2) increases cognitive skills; and (3) leads to higher test scores for all participants. Money for the pilot project was provided in House Bill 2 Junior.

Another bill that follows the education reform trend is **House Bill 68 (Chapter 72)**, which provides the means for kindergarten and elementary teachers to learn more about their students through home visits and to involve their students' parents in the educational process. The law allows 33 kindergarten instructional hours and 22 grades one through five instructional hours to be used for home visits and parent-teacher conferences.

House Bill 186 (Chapter 71) and **Senate Bill 62 (Chapter 37)** duplicate a section in the education reform bill that requires high school curricula and end-of-course tests to be aligned with the placement tests administered by New Mexico two- and four-year public post-secondary educational institutions.

House Bill 305 (Chapter 159) requires each ninth, tenth and eleventh grade student to develop written interim and final next step plans in which the student specifies his post-high school goals. A graduating student will not receive his high school diploma unless he has filed a final plan, signed by the student, the student's parent or guardian and the student's counselor or other school official charged with coursework planning for the student.

There are two new laws important to handicapped students. **House Bill 708 (Chapter 162)** requires public schools and institutions of higher education that offer distance learning and computer-based courses to provide accompanying electronic formats that are usable by a person with disabilities using assistive technology. **Senate Bill 301 (Chapter 313)** is the Braille Access Act, which replaces the Braille Literacy Act. The act requires that instructional materials for public schools and public post-secondary educational institutions be provided in an alternate accessible format, including braille and very large print. The act gives a student and certain organizations a private right of action for injunctive relief and attorney fees and costs if they prevail.

Albuquerque public school district (APS) may become an urban school district under the provisions of **House Education Committee Substitute for House Bill 819 (Chapter 434)**. The Special Urban School District Act, which can only apply to APS, provides the mechanism for the

district to become essentially a charter district. By senate floor amendment, the law requires an election to be held on the question of whether APS should become a special district. No less than 65% of the employees of the district must sign a petition in support of the school district becoming a charter district.

Another bill that relaxes state control over public schools is **Senate Bill 80 (Chapter 104)**, which allows public schools that exceed educational standards to request waivers of certain state board requirements. The state board must waive accreditation review, length of school day, individual class loads, subject areas and instructional materials purchases, and may waive graduation requirements, evaluation standards of school personnel and other requirements that impede innovation in education. The board may only waive state requirements that, if waived, will not result in a conflict with NCLB.

With increased emphasis on student achievement at the state and federal levels, the legislature considered how to improve the performance of Indian students, whose underachievement and low standardized test scores are attributed to linguistic and cultural differences. **Senate Finance Committee Substitute for Senate Bill 115 (Chapter 151)** repeals the current statutes on the Indian education division of the department of education and creates a new division by the same name to be headed by an assistant superintendent. The new law mandates state and tribal partnerships and formal intergovernmental relationships to meet the educational needs of Indian students, including the creation of a 14-member Indian education advisory council. The Indian education fund is created to provide awards to carry out the purposes of the act, such as recruitment and retention of Indian teachers and principals, and to provide professional development.

Senate Bill 394 (Chapter 18) requires school districts to collect and report graduation rates for each high school in the school district, and to indicate contributing factors to nongraduation such as transfer out of the district, pregnancy, dropout and other factors as known. These statistics must be part of the school district's accountability report.

By the enactment of **Senate Bill 416 (Chapter 32)**, high school career centers are funded in fiscal years 2004 through 2007 through an appropriation of \$1.55 million from the federal Reed Act distribution fund, which is money available to the state through the federal Temporary

Extended Unemployment Compensation Act of 2002. The appropriation is to the labor department.

See *Highways and Transportation* for a discussion of the safe routes to school program in the traffic safety bureau, **Senate Bill 556 (Chapter 148)**. See *Higher Education*, in this category, for a discussion of **Senate Bill 691 (Chapter 394)**, which moves the responsibility for adult basic education from the department of education to the commission on higher education.

Public School Finance

House Appropriations and Finance Committee Substitute for House Bill 159 (Chapter 157) creates the teacher professional development fund for public school teachers. **House Bill 169 (Chapter 156)** and its senate duplicate, **Senate Bill 231 (Chapter 386)**, change the calculation for determining enrollment growth program units based on the difference between the current-year fortieth day MEM and the prior-year fortieth day MEM.

A controversial measure within the public school community, **House Education Committee Substitute for House Bill 745 (Chapter 155)**, limits school district and charter school operational cash balances. The intent of the law was to generate approximately \$16.4 million in credits when determining the 2003-2004 state equalization guarantee distribution. Last-minute changes in the bill may result in only \$10.3 million of available cash balances, but the superintendent of public instruction is expected to take credit for the intended amount. School district cash balances were factored into the overall calculations for public school support and the ability to provide a 6% salary increase for teachers and instructional staff and 3% raises for other school employees.

Public School Capital Outlay

Senate Bill 513 (Chapter 147) was brought forth by the public school capital outlay task force. It builds upon the significant progress New Mexico has made over the past five years to design and implement a statewide capital outlay process that meets the constitutional mandate to provide a uniform system of public education to all students in the state. Probably the most significant provisions in this bill are those that address the issue of direct legislative appropriations and the unequal effect these have on the quality of school facilities around the state. The bill requires that capital outlay grant awards made by the public school capital outlay

council after September 1, 2003 be reduced by a proportional amount of direct appropriations for capital outlay needs received by a school district. The amount of the reduction is determined based on a formula that takes into account the relative property tax wealth of the district and the amount of the property tax mill levy imposed by the district. Distributions to school districts from the educational technology fund will be similarly reduced by a portion of the amount of direct appropriations for technology purposes received by the district.

Other major changes in Chapter 147 include:

- ★ strengthening school maintenance programs by providing additional assistance to school districts in developing preventive maintenance plans and by increasing the state's contribution to funding for maintenance and repairs through the Public School Capital Improvements Act state guarantee distribution (a.k.a. SB 9 funding) by providing a minimum distribution amount to all participating school districts. In addition, the bill extends the maximum time for the SB 9 levy to be in effect without a new election from four to six years;

- ★ creating a public school facilities authority under the public school capital outlay council that will provide additional state oversight of the planning, construction and maintenance of school facilities; and

- ★ changing the state-share funding formula for capital outlay projects to provide for a more equitable methodology for calculating the relative wealth of a school district and for rewarding those districts that already tax themselves at a relatively high rate.

The bill also appropriates up to \$3 million from the public school capital outlay fund for the administrative expenses to continue the deficiency corrections program, to initiate the new public school facilities authority and to update and refine the data for the statewide assessment of all schools. In addition, it provides a set-aside for the 2004 critical capital outlay funding cycle of \$15 million for projects in growth districts that are bonded to 90% of capacity and have a property tax base per student of less than one-half the statewide average.

A related public school capital outlay measure, **House Taxation and Revenue Committee Substitute for House Bill 992 (Chapter 238)**, authorizes the issuance of up to \$40 million in supplemental severance tax bonds by the end of the current fiscal year to provide additional funding for the deficiency corrections program administered by the public school capital outlay council. The deficiency corrections program is the 100% state-funded program

initiated in 2001 to fix the immediate life, health and safety deficiencies at all of the schools throughout the state. The additional supplemental severance tax bonds will be funded by intercepting, for this year only, money from severance taxes that would otherwise flow into the severance tax permanent fund.

Senate Bill 847 (Chapter 46) uses a district's state equalization guarantee distribution to guarantee general obligation bond payments. If a school district cannot make its required principal and interest payment, the law requires the state treasurer to do so and to withhold the district's distribution until the amount paid has been recouped by the state treasurer. The department of education is required to conduct an audit of the school district to determine the reason for the nonpayment to the bondholders and to assist in developing and implementing measures to ensure that future bond payments will be made by the district when due. Presumably, this law will help school districts get better bond ratings, thereby reducing the cost of their debt.

Educational Retirement System

There were several measures dealing with educational retirement this session. Of the bills that passed, **House Bill 22 (Chapter 80)** and **Senate Bill 283 (Chapter 145)** are similar, but not duplicate, bills that amend the return-to-work provision in the Educational Retirement Act, in part to remedy a misinterpretation of the law by ERA and to allow return to work without suspending retirement benefits. The return-to-work provision is good until January 1, 2012. Chapter 80 has a 90-day lay-out provision; Chapter 145 does not. ***Please note:*** The rules of statutory construction provide: "[i]f statutes appear to conflict, they must be construed, if possible, to give effect to each. If the conflict is irreconcilable, the later-enacted statute governs." (See the Uniform Statute and Rules Construction Act, Section 12-2A-10 NMSA 1978.)

House Bill 657 (Chapter 227) allows provisional members to acquire earned service credit for periods of employment during which they were exempt from ERA by revoking their exemption from coverage. Such members have until June 30, 2006 to make the revocation, and they must pay both the member and employer contributions at the rates in effect during the periods of employment they are purchasing, together with interest at the actuarial rate set by the

board. The employer may voluntarily agree to pay the employer share. **Senate Bill 609 (Chapter 248)** allows a PERA retiree to work for a local administrative unit without contributing to ERA. The employee will not be eligible for ERA retirement.

Senate Bill 174 (Chapter 39) is a technical bill that, among other things, clarifies the definition of salary; allows the board to determine the interest rate paid on member and beneficiary refunds; limits assignability of contributions and benefits; excepts persons with permanent disability from annual re-examination; provides an exception to mandatory retirement; and requires that a person be employed before he may purchase allowed service. Internal Revenue Code requirements necessitate some of the changes to existing law.

Higher Education

As mentioned earlier, the commission on higher education appointed a blue ribbon task force to look at funding for higher education. Based on the task force's recommendation, the commission on higher education adopted a base-plus-incentive funding model. The legislative finance committee concurred with that recommendation. As part of its funding package, the task force recommended increased funding for endowed chairs and the creation of additional topic-specific state incentive funds. The legislature, in House Bill 2 Junior, provided \$3 million for endowed chairs at the research universities directly related to economic development, contingent on passage of **Senate Finance Committee Substitute for Senate Bill 466 (Chapter 392)**, and provided another \$300,000 for high-skills training. In substantive legislation, the legislature created the funds requested by the task force, although not all were funded and a couple were vetoed by the governor. The technology enhancement fund, **House Bill 391 (Chapter 367)**, is created to provide matching funds to the state research universities to support innovative applied research that advances knowledge and creates new products and production processes in the fields of agriculture, biotechnology, biomedicine energy, materials science, microelectronics, water resources, aerospace, telecommunications, manufacturing science and similar areas. The work force skills development fund is created by **House Bill 394 (Chapter 368)**, and will be used to provide matching funds to community colleges for the development, expansion and support of broad-based entry-level high-skills training programs. House Bill 2 Junior included several appropriations for individual colleges and universities.

In other higher education measures, New Mexico institute of mining and technology requested the statutory creation of two of its long-standing research centers. These requests may have been driven in part by the legislative finance committee's recommendation of a 5% reduction to nonstatutorily authorized research and public service projects under the new higher education funding formula. **House Bill 721 (Chapter 121)** establishes the energetic materials research and testing center and **Senate Bill 490 (Chapter 44)** creates the geophysical research center.

House Appropriations and Finance Committee Substitute for House Bill 259 (Chapter 89) appropriates \$8 million from the state office building bonding fund to New Mexico state university for the acquisition of a university sports facility.

The commission on higher education is authorized by **Senate Bill 247 (Chapter 20)** to enter into a loan-for-service financial aid program with Baylor university in Texas to train dentists to work in New Mexico.

Senate Finance Committee Substitute for Senate Bill 377 (Chapter 390) eliminates the requirement that community colleges and technical-vocational institutes use all other scholarship funds before granting lottery tuition scholarships. The new law is estimated to have a recurring fiscal impact on the program of \$170,000.

The adult basic education program of the department of education is transferred to the commission on higher education by the enactment of **Senate Bill 691 (Chapter 394)**.

Elections

More than 50 bills affecting elections were introduced this session, with bills concerning public campaign financing, reporting of campaign expenditures and contributions, the presidential primary and compliance with federal election law all signed into law. While two senate bills concerning redistricting of the state senate and congressional districts were introduced, neither ended up making it to the house of representatives.

Provisions mandated by the federal Help America Vote Act of 2002 enacted into law by **House Bill 383 (Chapter 356)** include provisional voting standards, identification requirements for first-time voters who register by mail, administrative appeal procedures, reports on the use of absentee ballots for overseas voters and electronic voting system standards. Some provisions

conflict with House Bill 409 (Chapter 354), House Bill 702 (Chapter 355) and House Bill 984 (Chapter 357). Summaries of House Bills 702 and 984 are included in this category. ***Please note:*** The rules of statutory construction provide: "[i]f statutes appear to conflict, they must be construed, if possible, to give effect to each. If the conflict is irreconcilable, the later-enacted statute governs." (See the Uniform Statute and Rules Construction Act, Section 12-2A-10 NMSA 1978.)

Public financing of campaigns for commissioners of the public regulation commission is instituted by **House Bill 420 (Chapter 14)** beginning in 2006. Funding is provided by a distribution of receipts from the utility and carrier inspection fee, the utility inspection and supervision fee and the insurance premium tax. Qualified candidates who accept public financing must limit their campaign spending in compliance with contribution and expenditure limits established in the bill. They may not accept contributions from other sources once they qualify. If a nonparticipating opponent spends more than is allowed, the participating candidate will receive public funding of up to twice the limit to match the opponent's expenditures. The financing provisions of this bill conflict with the premium tax exemption bill, Senate Bill 331 (Chapter 58), discussed under *Insurance*.

House Bill 702 (Chapter 355) allows federally qualified electors and overseas voters to register to vote and apply for an absentee ballot by electronic transmission up to the Friday before an election. They may also electronically transmit their absentee ballots to the county clerk up to 7:00 p.m. on election day. Some provisions conflict with House Bill 383 (Chapter 356) and House Bill 984 (Chapter 357).

Provisions relating to absentee and early in-person voting are revised by **House Bill 984 (Chapter 357)**. For voters other than federally qualified electors or overseas voters, absentee voting will now begin 28 days before election day instead of 40 days before. Voting at alternate locations will begin on the third Saturday before the election, with an increase in the number of alternate locations required in Bernalillo county and in non-class A counties with a population of over 10,000 registered voters. Some provisions conflict with House Bill 383 (Chapter 356) and House Bill 702 (Chapter 355).

House Bill 1039 (Chapter 300) allows a major political party to opt out of participating in the presidential primary and, in the alternative, select its party delegates to the party's national convention in accordance with the party's rules. If a party does opt out, it would be required to pay its own expenses for whatever method of selecting its delegates that it chooses.

Beginning in 2006, individuals required to report campaign contributions and expenditures will be required to file their reports electronically with the secretary of state pursuant to the provisions of **Senate Bill 22 (Chapter 66)**. The bill also requires the secretary of state to provide access to the reports in an easily searchable format via the internet. Funding for the electronic campaign reporting system is provided in House Bill 2 Junior.

Provisions in the Municipal Election Code relating to absentee voting are updated by **Senate Bill 540 (Chapter 244)**. Language distinguishing between early voting and absentee voting is eliminated and put into a form that more closely parallels language in the Election Code. The bill also restores previously repealed language allowing a voter who does not receive his absentee ballot in a timely manner to vote on an emergency paper ballot on election day.

Environment and Natural Resources

Bills relating to the environment that passed the legislature were for the most part "housekeeping" or "cleanup" legislation. Provisions for the department of environment to collect fees or revisions to the department's enforcement authority were typical. However, bills of substance were passed, including measures to provide increased tax incentives for renewable energy activities; authorize a demonstration project for alternative energy generation; make changes in soil and water conservation district statutes; plan for the reduction of forest fire threats; provide regulation of helium and other non-hydrocarbon gases; and change the oil and gas conservation tax provisions. See *Water and Water Facilities* for related bills. Also see *Taxation* for a description of **House Bill 146 (Chapter 419)**, which expands the renewable energy tax credit to include biomass as a qualified energy resource.

House Bill 25 (Chapter 270) increases the annual tire recycling fees on motor vehicle registrations by 50¢ per year. For buses, the fee is increased by 25¢ per wheel. The additional revenue will be deposited to the tire recycling fund to implement the Tire Recycling Act. The existing fee amount will continue to go to the highway infrastructure fund.

House Bill 153 (Chapter 88) amends numerous sections of the Water and Soil Conservation District Act to streamline the role and administration of the soil and water conservation commission. The bill expands the eligibility to vote in a district election from just landowners to all registered voters and provides that owners of nonagricultural lands will no longer be able to petition the district to be deleted from the district tax assessment rolls.

House Bill 172 (Chapter 129) directs the energy, minerals and natural resources department to conduct a solar and fuel cell demonstration project for alternative energy generation. The department is required to analyze systems for their applications, economic and environmental benefits, costs and potential for statewide application. This law will enable New Mexico to be a more active participant in the federal government's million solar roofs program.

House Bill 192 (Chapter 8) amends the Air Quality Control Act and requires the department of environment to issue a construction permit for a cotton gin or other seasonal agricultural operation if the applicant uses "best system of emissions reduction" as specified by rule of the environmental improvement board and the potential emission rate is not more than 50 tons per regulated contaminant per year.

House Bill 209 (Chapter 115) creates an 11-member fire planning task force to work with communities at risk for forest fires to develop standards for building codes and ordinances to reduce the threat of forest fires, recognizing the distinction between altering existing situations and establishing standards for new construction. The task force must consider the benefits of thinning overgrown forests, conducting controlled burns, clearing spaces around homes and other structures, using noncombustible roofing materials and double-pane windows and taking other fire suppression or prevention measures, and must also consider the impact of these measures on wildlife.

House Bill 849 (Chapter 297) modifies the Radiation Protection Act to give the secretary of environment emergency powers to bring suit to immediately restrain a person from violating that act or rules promulgated in accordance with that act when the secretary determines that a violation may present an imminent and substantial endangerment to human health or safety. The secretary may also issue compliance orders to protect human health and safety. Failure to comply with an order may result in an administrative penalty not to exceed \$15,000

per day per violation. A person who violates the Radiation Protection Act or rules promulgated in accordance with that act is guilty of a misdemeanor; a person who makes a false statement on an application, record, report, plan or other document is guilty of a petty misdemeanor.

Senate Bill 202 (Chapter 41) provides the department of environment authority to assess an annual hazardous waste permit management fee for the cost of regulatory oversight of permitted hazardous waste facilities.

Senate Bill 704 (Chapter 335) creates the "water recreation facilities fund", to be used by the department of environment to offset the cost of annual inspections of water recreation facilities. Inspection fees of up to \$150 will be charged to owners or operators of public swimming pools, spas or other public water recreation facilities and will be deposited in the fund.

Oil and Gas

Section 70-2-34 NMSA 1978 is amended in **House Bill 147 (Chapter 12)** to bring helium and other non-hydrocarbon gases under the regulation of the oil conservation division of the energy, minerals and natural resources department.

In **House Bill 967 (Chapter 196)**, the economic development department and the energy, minerals and natural resources department are required to update the 1997 study that evaluated the feasibility of constructing an additional pipeline to carry New Mexico-produced natural gas to other markets. The departments are assigned the additional duties of identifying the economic feasibility and necessity of constructing an additional natural gas pipeline, as well as identifying alternatives to constructing the new pipeline. If construction of a natural gas pipeline is found to be necessary, the energy, minerals and natural resources department is required to notify all interested or affected parties; if, after six months, none of the parties has acted or proposed to act in a manner that will meet the need identified, the departments will report to the legislature on funding alternatives for the pipeline construction.

A natural resource revenue recovery task force is created in the state land office to review the effect of federal laws on the state agricultural economy and extractive industries in **Senate Bill 401 (Chapter 42)**. The federal laws of concern are the Agricultural Adjustment Act and National Industrial Recovery Act. The task force is further required to look at the provisions of

the Treaty of Guadalupe Hidalgo, the Kearny Code and the preservation of private property rights in New Mexico. Members of the task force shall be appointed by the speaker of the house and the president pro tempore of the senate, the governor and the commissioner of public lands. The appointments by the commissioner of public lands and the governor must be county commissioners who have been nominated by rural counties in the New Mexico association of counties.

Senate Corporations and Transportation Committee Substitute for Senate Bill 904 (Chapter 347) amends Section 3-25-3 NMSA 1978 to expand the area that may be covered by a municipal utility for the purposes of transportation, pumping, storage or purification of natural gas or geothermal waters from within 50 miles to within 100 miles of the municipal borders.

See *Taxation* for a discussion of **House Bill 321 (Chapter 433)** related to the oil and gas conservation tax.

Game and Fish

Past sessions have often included controversial legislation involving game and fish. Usually, the battle has been between those who viewed game and fish regulation as being closely tied to recreation, tourism and economic development and those who placed high priorities on preservation, ecology and conservation. This session did not consider endangered species, and only two bills (which were duplicate introductions) surfaced relating to wolf release. Of the small number of bills introduced, only a few became law.

In the past, it has been illegal to fish with more than one rod. **House Bill 516 (Chapter 195)** authorizes the use of a second fishing rod upon application and payment of an appropriate fee.

Section 17-1-14 NMSA 1978, which sets out the powers and duties of the state game commission, is amended in **House Bill 560 (Chapter 124)** to add a new power to respond to the more frequent intrusion of bears into places of human habitation. Pursuant to the new provision, the commission may designate areas in the state where bear-proof garbage containers must be used on both public and private lands.

Pursuant to a new provision in **House Bill 650 (Chapter 290)**, up to two elk licenses must be reserved by the state game commission each year for sale to persons under the age of 21

who have been determined by a licensed physician to have a life-threatening illness and who have been qualified through a nonprofit wish-granting organization approved by the commission.

Senate Judiciary Committee Substitute for Senate Bill 59 (Chapter 301) will enable game and fish enforcement officers to charge a person who spotlights, shoots across roads or hunts without a license based on the person's having taken the prohibited action against artificial game. In short, artificial game animals and birds are considered real for the purpose of prosecuting the indicated offenses.

Two "lieutenant governor's deer enhancement permits" are authorized in **Senate Bill 560 (Chapter 69)**. One of these permits to be issued by the department of game and fish upon direction of the state game commission shall be sold at auction and the other shall be sold by a lottery held by the department or by a commission-designated incorporated nonprofit organization dedicated to the conservation of wildlife. The proceeds from the sales of the lieutenant governor's deer enhancement permits are dedicated to the game protection fund for use exclusively for deer restoration and management.

Gaming

Under the broad ambit of "gaming" fall bills relating directly to gambling and games of chance as well as subjects indirectly associated, such as lottery scholarships, gaming revenues and their use and "race track stall use". However, of the 31 bills introduced only three made it to the governor's desk and one, a study of the effects of gaming, was vetoed.

House Bill 32 (Chapter 112) authorizes the New Mexico lottery authority to enter into contracts for the operation, participation in or marketing or promotion of a joint lottery or joint lottery games with operators of a lottery: "(a) in one or more other states; (b) in a territory of the United States; (c) in one or more political subdivisions of another state or territory of the United States; (d) in a sovereign nation; (e) in an Indian nation, tribe or pueblo located within the United States; or (f) legally operated outside of the United States."

Prior to this session, the Gaming Control Act established requirements for a payback percentage for gaming machines at a minimum of 80% but not more than 96%. **House Bill 86 (Chapter 185)** deletes the upper limitation, thus permitting gaming operators to "loosen" their slots to make them more attractive to patrons.

Health and Public Assistance

Health care and public assistance issues continued to generate a significant number of legislative initiatives this year, as they have in previous years. The legislature continues to struggle to balance the rising costs of health care in general and medicaid specifically with the demands of health care consumers and the dependence of health care providers on the medicaid program. The medicaid reform committee was created in 2002 to make recommendations on ways to control spiraling medicaid costs. The two omnibus bills sponsored by the committee were enacted into law. Similarly, the legislature considered numerous measures designed to control or reduce the rising costs of prescription drugs. New Mexico is one of the first states to pass a disclosure bill that requires drug manufacturers to provide certain pricing information to the human services department similar to the information the manufacturers already provide to the federal government. The legislature dealt with various other legislative initiatives covering health care services, provider licensing and credentialing, health insurance, funding, public health and nursing shortages. Despite efforts over the years to cover more New Mexicans, the state remains second to last among the 50 states in the number of persons insured. A bill was passed for a comprehensive health care study to look at the public and private costs of providing health care to all New Mexicans. See other categories, including *Insurance*, *Local Government* and *Professions and Occupations* for related bills.

In response to nursing shortage issues, the legislature enacted two measures creating medication aides education and certification programs, one for nursing facilities and one for public schools, both to be self-supporting and administered by the board of nursing. **House Education Committee Substitute for House Bill 528 (Chapter 282)** authorizes pilot programs in public schools in a maximum of five regions of the state with a total of 30 aide trainees, who may administer prescription and other medications only under the supervision of a licensed school nurse working on site. **Senate Bill 632 (Chapter 332)** provides for a medication aides program in licensed nursing facilities and is similar to programs created in 1991 for intermediate care facilities for the mentally retarded and for programs for the developmentally disabled created in 1995. The bill limits the program to five regions of the state, but may include up to 100 medication aides and prohibits administration of Schedule I or any injectable drugs.

Medicaid

The medicaid reform committee sponsored numerous initiatives designed to provide savings, cost-effectiveness and additional resources to the medicaid program. **House Bill 412 (Chapter 279)** and **Senate Bill 332 (Chapter 314)** direct the human services department to carry out 12 initiatives in the form of studies, analyses and pilot projects aimed at providing savings and more cost-effective administration of the medicaid program. The department was directed to:

- ★ conduct an analysis of the carve out of prescription drug coverage from managed care contracts;
- ★ conduct a study of the replacement of the managed care system with a primary care case management model and implement a primary care case management pilot project;
- ★ conduct a cost-benefit analysis of the non-emergency transportation models and conduct a non-emergency transportation pilot project;
- ★ complete the analysis of the global funding waiver currently in process;
- ★ conduct a cost-benefit analysis and comparison of consumer-directed and consumer-delegated personal care options;
- ★ identify options for limiting, reducing or eliminating medicaid services;
- ★ conduct an external analysis of medicaid prescription drug use;
- ★ evaluate the feasibility of including under medicaid other persons served by state-only programs;
- ★ work with counties to review the Indigent Hospital and County Health Care Act and its applicability under medicaid; and
- ★ work toward greater use of self-directed care in certain programs.

Senate Bill 338 (Chapter 315) directs the human services department to implement program changes in the administration and structure of the medicaid program. Those changes focus on areas involving prescription drugs, community health promoters, disease and case management initiatives, services for the elderly, fraud and abuse, maximizing the federal share for certain services, reviewing payment methodologies, implementing patient cost-sharing requirements and reducing vision care services for adults. Some program changes may overlap

so the department may combine or coordinate similar initiatives, with an emphasis on those providing significant cost savings.

To ensure increased coordination among the various agencies involved in the medicaid program, **House Bill 668 (Chapter 291)** amends the Medicaid Fraud Act. Specifically, the medicaid fraud control unit and the human services department, department of health, and children, youth and families department are required to develop a joint protocol regarding responsibilities, procedures, referrals and investigations through a memorandum of understanding. The unit is required to report quarterly to the legislative finance committee on the disposition of the recoveries and distributions of proceeds. The unit must approve fraud claims before they are disposed of or settled by any of the departments. Also see *Prescription Drugs* under this heading for other medicaid-related bills.

Hospitals and Health Care Delivery

In response to the emergence of limited-services hospitals in areas previously served by only one hospital, **House Bill 802 (Chapter 426)** instructs the department of health to issue a license to an acute care, general or limited services hospital only under certain conditions. The hospital must: (1) agree to operate an emergency department that provides emergency care; (2) participate in medicaid, medicare and county indigent programs; (3) require disclosure of financial interest on the part of physician owners or other health care providers; and (4) provide emergency services and general health care to nonpaying patients and "low-income reimbursed patients" in the same proportion as patients are treated in acute care and general hospitals in the local community.

House Government and Urban Affairs Committee Substitute for House Bill 955 (Chapter 380) directs the legislative health and human services committee, in consultation with the New Mexico health policy commission, to conduct a comprehensive study on health care in the state, including expenditures, economic impact, compensated and uncompensated costs, results of state and national health care reform efforts and the public and private costs of providing health care to all New Mexicans. A report is to be submitted to the governor and the legislative council by November 1, 2004.

An interagency behavioral health coordinating committee is created in **Senate Bill 295 (Chapter 59)** to develop a master plan for statewide delivery of behavioral health services and to coordinate progress on addressing the priority needs identified in the two-year department of health study completed last year. The committee will lead the effort to integrate the behavioral health work of the state, paying particular attention to reimbursement rates for outpatient services paid in rural and frontier areas of the state.

Senate Bill 476 (Chapter 21) gives a hospital district's board of trustees the power to fix the mileage reimbursement rate for employees traveling in privately owned vehicles on official business; however, the board may not designate a reimbursement rate higher than the internal revenue service standard mileage rate.

To address the shortage of dental services in rural and underserved areas of the state, the legislature passed two measures. **Senate Bill 494 (Chapter 393)** amends the Health Service Corps Act definition of "health professional" to include dentists and dental hygienists. **Senate Bill 247 (Chapter 20)** allows loan-for-service contracts with Baylor university in Texas to train dentists for New Mexico.

Counties now have additional flexibility and opportunity to be more cost-effective in administering the county indigent hospital claims fund under **Senate Bill 524 (Chapter 413)**. Previously, allowable costs reimbursable under the Indigent Hospital and County Health Care Act were based on an accounting system and cost analysis as determined by each county board. Now, allowable costs are based on medicaid fee-for-service reimbursement rates for hospitals, physicians and osteopathic physicians. Prior to the passage of the bill, services provided by physicians, dentists, optometrists and expanded practice nurses were limited to medical conditions where the indigent patient's life was endangered or threatened by permanent disability. Emergency services are now determined by the respective county board. Additionally, counties and hospitals are charged with developing a uniform reporting format that includes the number of indigent patients served and the total cost of uncompensated care provided by the respective hospital. Negotiated agreements between counties and sole community provider hospitals must be in compliance with federal regulations.

Emergency medical preparedness continued to prompt legislative initiatives. **Senate Bill 527 (Chapter 243)** makes broad revisions in the Emergency Medical Services Act to redefine various services and providers, to permit the appropriate functioning during declared emergencies and to revise various rules to keep abreast of current techniques and practices. The act also expands membership on the emergency medical services advisory committee to allow for more participation from private entities and groups that are part of the statewide emergency response system.

Prescription Drugs

The Sexual Assault Survivors Emergency Care Act, enacted by **House Judiciary Committee Substitute for House Bill 119 (Chapter 91)**, requires hospitals that provide emergency care for sexual assault survivors to advise them, orally and in writing, about contraceptives that prevent pregnancy after sexual intercourse and, if requested by the survivor, to dispense the contraceptive at the hospital and for subsequent use as required. Hospitals must provide training to all personnel who provide care to sexual assault survivors, and the department of health is required to adopt rules regulating the hospital-provided training. The act also includes provisions for enforcement and administrative fines for noncompliant hospitals.

House Bill 402 (Chapter 278) and **Senate Bill 391 (Chapter 34)** direct the human services department to create a medicaid waiver program to provide prescription drugs to persons with incomes less than 185% of the federal poverty level who are 65 years of age or older or who are disabled under federal disability rules as applied by the department.

Persons who have other prescription drug benefits may, under **House Bill 513 (Chapter 382)**, participate in the senior prescription drug program. Under the bill, the retiree health care authority must provide an electronic or other form of membership identification as an alternative to membership cards. In addition, the bill specifies that the retiree health care authority board member who is a classified state employee shall be selected by the state personnel board.

The state will receive prescription drug pricing information that until now has been available only to the federal government. **House Bill 666 (Chapter 381)** requires prescription drug manufacturers to report to the human services department the following information: the average manufacturer price; the price paid by a wholesaler or pharmacy benefit manager to the

manufacturer; and the price paid to the manufacturer by an entity that sells or provides prescription drugs without a wholesaler. The information provided to the human services department is considered confidential, and disclosure outside of the department is unlawful and punishable by a fine or imprisonment or both.

Senate Public Affairs Committee Substitute for Senate Bill 754 (Chapter 396)

authorizes the New Mexico medical insurance pool board (formerly known as the comprehensive health insurance pool board) to establish a prescription drug program with eligibility, benefits and cost-sharing criteria. If a prescription drug program is established, assessments for pool members will be determined in the same manner as assessments for the health insurance program except that pool members will be allowed a 50% credit on the premium tax return for the prescription drug program assessment and a 30% credit for the health insurance program assessment.

Senate Bill 822 (Chapter 344) ensures that, under medicaid, atypical antipsychotic medications are treated in the same manner as conventional antipsychotic medications prescribed in the treatment of persons with severe mental illnesses.

Public Assistance

House Bill 35 (Chapter 362) creates the Individual Development Account Act, an economic development initiative designed to help working families build personal assets for starting or expanding businesses, funding higher education, purchasing or improving homes or purchasing a vehicle necessary for employment. An advisory committee is created to provide oversight and recommendations for improvement. If an account owner withdraws money from his account for a use other than an allowable use, he forfeits a proportionate amount of matching funds from the reserve account, unless the amount withdrawn is redeposited within 12 months from the withdrawal date. House Bill 2 Junior funded the program at \$100,000.

House Bill 658 (Chapter 160) provides that beginning in fiscal year 2004, at least 25% of the state's maintenance-of-effort funds appropriated for head start programs for children who are eligible for the temporary assistance for needy families program must be used to contract or

subcontract with private and nonprofit child care providers to provide programs that meet head start performance standards.

Senate Bill 360 (Chapter 317) enacts the Education Works Act designed to establish a state-funded cash assistance program for college students who have not yet earned a bachelor's degree. The students are limited to 24 months of participation in the program. The act establishes criteria for financial standards of need, resources, eligibility, appeals and satisfactory participation.

Senate Bill 663 (Chapter 109) clarifies and expands the records to which the office of the state long-term care ombudsman has access in carrying out its responsibilities and conducting investigations. The files and records of the office of the state ombudsman are considered confidential and are not subject to the provisions of the Inspection of Public Records Act.

Senate Bill 823 (Chapter 207) amends the Public Assistance Act to exempt a fiscal intermediary from vicarious liability as an employer or a principal for a wrongful act committed by a personal attendant hired by the consumer to provide assistance with daily living activities that do not require licensure or certification. The provider may identify a personal care attendant as a covered employee for purposes of workers' compensation coverage, though the provision may not be construed as creating an employer-employee relationship. The provisions do not provide the fiscal intermediary with immunity from a claim for a wrongful act committed by the fiscal intermediary or its employees.

Senate Bill 839 (Chapter 210) enacts the Consumer Direction Act, which requires all state department programs offering personal assistance services to establish rules allowing the consumer or consumer surrogate to direct those services through the hiring, training, supervision and payment of an attendant or attendants, rather than having the services provided by an entity contracted to do so by the state. The new act also requires participation of the consumer in selection of a fiscal intermediary.

Indian and Intergovernmental Affairs

In New Mexico, intergovernmental affairs generally refers to the state's relationship with the Indian nations, tribes and pueblos within its geographical boundaries. The new Indian Education Act, **Senate Bill 115 (Chapter 151)**, the specifics of which are discussed under *Education, Public Schools*, is an example of the efforts taken this year to improve intergovernmental relations. That bill requires that government-to-government relationships between the state and tribes and the state and the BIA be formalized to ensure that the public education offered to Indian students provides equitable and culturally relevant learning opportunities and instructional materials to ensure that Indian students succeed.

Two bills that are more thoroughly discussed under *Taxation* are **Senate Bill 602 (Chapter 414)** and **Senate Conservation Committee Substitute for Senate Bill 874 (Chapter 150)**. Both of these bills authorize the state to enter into intergovernmental agreements with tribes to share tax revenue. **Senate Bill 602 (Chapter 414)** authorizes the taxation and revenue department to enter into a tax credit agreement with a tribe that imposes its own gross receipts tax or other similar tax on transactions that occur on tribal land and are taxable by both the tribe and the state. The tribe may impose its own tax and the taxpayer may take a credit against the tribal tax for a percentage of the state tax and against the state tax in a percentage of the tribal tax. Local gross receipts taxes, except in Espanola, are also included in the tax credit arrangement. Pursuant to **Senate Bill 602 (Chapter 414)**, the state is authorized to enter into tax-sharing agreements with all Indian nations, tribes and pueblos in the state, with the exception of the Navajo Nation, which has its own tax-sharing arrangements with the state. **Senate Conservation Committee Substitute for Senate Bill 874 (Chapter 150)** authorizes the secretary of highway and transportation to enter into a tax-sharing agreement with the Pueblo of Nambe to share gasoline tax revenue if the pueblo agrees to forgo sales of tax-exempt gasoline to retailers not located on the Pueblo of Nambe's tribal lands.

In related efforts, the legislature recognized the need to involve Indian citizens in the work of the state. **House Bill 49 (Chapter 191)** adds the director of the New Mexico office of Indian affairs to the board of the medical investigator and requires the state medical investigator

to use all due diligence to consult with the surviving relatives of a deceased member of an Indian nation, tribe or pueblo regarding the disposition of all the deceased's remains. **House Bill 151 (Chapter 165)** requires that a Native American be appointed to the interstate stream commission and the water quality control commission.

House Floor Substitute for House Bill 278 (Chapter 164) authorizes the motor vehicle division of the taxation and revenue department to enter into intergovernmental agreements to exchange information on motor vehicle offenses with tribal courts. The state may suspend or revoke the driver's license of a person who has been convicted of an offense in a tribal court when, had the conviction been in state court, it would have been sufficient grounds for suspension or revocation of that person's driver's license.

Insurance

Slightly more than half of the insurance-related legislation introduced involved some form of public or private health care coverage. The balance of the bills included a variety of topics ranging from other specific types of insurance to technical amendments of the New Mexico Insurance Code. There were few attempts to reform or revise existing law. An interesting effort was put forth to fund the insurance division of the public regulation commission through earmarking some of the revenues arising from the imposition of existing fees on the insurance industry (Senate Bill 398). It is probable that this "enterprise fund" approach will be seen in future sessions. See *Health and Public Assistance* and *Professions and Occupations* for related bills.

Construction and Workers' Compensation Insurance

House Business and Industry Committee Substitute for House Bill 281 (Chapter 263) amends and enacts new provisions of the Workers' Compensation Act to define and regulate controlled insurance plans. A "controlled insurance plan" is defined as a plan of insurance coverage established by an owner or principal contractor that requires participation by contractors or subcontractors who are engaged in the construction project, including coverage plans that are for a fixed term of coverage on a single construction site. Use of these plans is

limited to projects over \$150 million spent within five years. The plans are regulated in various aspects by the bill, including provisions that:

- ★ prohibit insurance coverage for an ongoing project or series of projects where a common insurance program remains in place indefinitely and contracted work is added as it occurs under the control of an owner or principal contractor;

- ★ require in requests for proposals or bids for projects a notice that participation in a controlled insurance plan is a condition of bid acceptance;

- ★ require an owner or principal contractor using a controlled insurance plan to file the contract and evidence of compliance with the requirements in the bill to the superintendent of insurance 30 days prior to receiving bids or requests for proposals on the project;

- ★ require the owner or principal contractor to distribute a project performance-based refunded premium or dividend to each participating contractor and subcontractor on a proportional basis, if provided in the construction contract;

- ★ require the owner or principal contractor to develop and carry out a health safety program approved by the superintendent of insurance, including a protocol that encourages return to work pursuant to the Workers' Compensation Act; and

- ★ require an owner or principal contractor using a controlled insurance plan to: establish a method for the timely reporting of job-related injuries; provide modifier experienced units statistical rating information and other information required by the superintendent of insurance; provide contractors or subcontractors with actual and specific payroll audit data from the controlled insurance plan; and provide information on injured employees that would be available to the employer from a non-controlled insurance plan.

Since its enactment in 1971, Section 56-7-1 NMSA 1978 has made void and unenforceable certain indemnity contracts made in connection with construction contracts. The language of the statute appears to outlaw a provision that indemnifies a party to a contract for liability for damages arising from that party's negligence. The prohibition is broad and is followed by two specific exceptions. **House Bill 433 (Chapter 421)** and its duplicate, **Senate**

Bill 280 (Chapter 309), revise the provisions. More understandable text appears in the amended section and technical terms are kept to a minimum. Unambiguous definitions of both "construction contract" and "indemnify or hold harmless" aid the reader in figuring out just what the statute covers, a task that was difficult under the previous law. Exceptions are clarified. Also included in the bills are technical amendments to Section 56-7-2 NMSA 1978, which is an anti-indemnification provision relating only to wells and mines. This section had been previously amended and only a minor amendment is made. The changes in both statutes remove some conflicts that existed after the wells and mines statute was last amended. Recent court cases raised questions about the meaning of the two sections. A provision in the general statute permits a requirement that a party purchase a project-specific insurance policy such as "builders risk".

Health Insurance

Additional health care coverage is mandated by **House Bill 289 (Chapter 192)**. An individual or group health insurance policy, health maintenance organization contract, subscriber contract of a health care plan, health care plan, certificate of health insurance or managed health care plan delivered, issued for delivery, renewed, extended or modified in this state on or after July 1, 2003 must provide coverage for the treatment of genetic inborn errors of metabolism that involve amino acid, carbohydrate and fat metabolism for which medically standard methods of diagnosis, treatment and monitoring exist. The complex definitions in the new law should be studied to determine technical aspects of the coverage.

Dependents' health care benefits provided in virtually all types of coverage must cover unmarried dependents until age 25 pursuant to **Senate Finance Committee Substitute for Senate Bill 457 (Chapter 391)**. The new definition of "dependent" removes the current law requirement that in order for an unmarried dependent to be covered after reaching age 18 the dependent must be enrolled in an educational program. Excluded from the application of the new requirement is the medicaid managed care program. Statutory definitions in the Health Care Purchasing Act and the Medical Care Savings Account Act are also amended to accommodate the change.

Senate Bill 508 (Chapter 327) amends the Patient Protection Act to allow the superintendent of insurance to appoint and compensate competent and qualified legal and medical professionals to perform external reviews of grievance appeals.

A change in Section 59A-18-13 NMSA 1978, enacted by **Senate Bill 588 (Chapter 397)**, requires 60 days' prior notice to the policyholder of an increase in health insurance premiums as a condition of the increase becoming legally effective.

Senate Bill 743 (Chapter 337) requires health insurance policies to provide coverage for smoking cessation treatment.

Senate Bill 778 (Chapter 395) changes both the number and representation of the members of the board of the medical insurance pool. The number of members appointed by the superintendent of insurance is increased from five to six with a requirement that the sixth member be a representative of the medical community. Of the four members appointed by the pool, required representation of a nonprofit health care plan is deleted.

Senate Bill 829 (Chapter 252) provides that persons providing health insurance pursuant to Chapter 59A, Article 23 NMSA 1978 as group and blanket health insurance or pursuant to the Minimum Healthcare Protection Act, the Small Group Rate and Renewability Act, the Health Maintenance Organization Law or the Nonprofit Health Care Plan Law must disclose, upon an employer's request, claims experience, including utilization and loss experience. The provider shall not disclose an individual employee's identification in connection with disclosure of this data.

Insurance Code Administration, General Provisions and Premiums

Pursuant to existing law, the state and its political subdivisions purchase insurance, and the premiums paid are **not** subject to the "premium tax" of 3% imposed on gross premiums received by the insurers because the premiums paid are specifically exempted from the tax.

Senate Bill 331 (Chapter 58) limits the exemption from the tax to only those premiums paid for insurance for active and retired employees, thus making the tax applicable to all other insurance premiums paid by the state and political subdivisions, including the payments for medicaid coverage under the Salud! managed care program. The increase in state revenue is estimated by

the LFC in its fiscal impact report to be approximately \$32 million, not taking into account, however, the expectation that insurers will pass on the tax. **House Bill 420 (Chapter 14)** amends the same section of law. *Please note:* The rules of statutory construction provide: "[i]f statutes appear to conflict, they must be construed, if possible, to give effect to each. If the conflict is irreconcilable, the later-enacted statute governs." (See the Uniform Statute and Rules Construction Act, Section 12-2A-10 NMSA 1978.)

Senate Bill 180 (Chapter 305) makes it a misdemeanor for a state employee or a person acting on the employee's behalf to require a bidder or offeror under the Procurement Code to use a specific surety for required performance bonds.

Provisions for new fees, licensing and other relatively technical aspects of insurance were included in amendatory and new sections of **Senate Bill 181 (Chapter 306)**.

Technical cleanup of the New Mexico Insurance Code was accomplished through enactment of **Senate Bill 557 (Chapter 202)**. Areas addressed include:

- ★ distribution of revenue to the law enforcement fund;
- ★ deposit of funds in trust by insurers;
- ★ securities eligible for required deposits;
- ★ licensing procedures, including the removal of denial, revocation and suspension proceedings from the application of the Uniform Licensing Law;
- ★ rate and form filings;
- ★ recordkeeping requirements; and
- ★ changes in requirements for inclusion of contraceptive prescription drug coverage.

Motor Vehicle Insurance

New Mexico has an extremely high rate of state-registered but uninsured vehicles traveling its highways. This problem has existed for years in spite of mandatory financial responsibility laws and the enactment of additional measures for enforcement. **House Transportation Committee Substitute for House Bill 108 (Chapter 171)** addresses

specifically the absence of mandated coverage of "permissive" drivers and nonowner drivers, and the absence of requirements for certain specific coverages in motor vehicle liability policies. Under the new law, made part of the Mandatory Financial Responsibility Act, a motor vehicle insurance policy must:

(1) designate by explicit description or by appropriate reference all motor vehicles to which coverage is to be granted;

(2) insure the person named in the policy and a person using a covered motor vehicle with the express or implied permission of the named insured against loss from the liability imposed by law for damages arising out of the ownership, maintenance or use of the motor vehicle within a jurisdiction, subject to the requirement to provide evidence of financial responsibility pursuant to the Mandatory Financial Responsibility Act; and

(3) insure a person named as insured against loss from the liability imposed upon the person by law for damages arising out of the use, with the express or implied permission of the owner or person in lawful possession, of a motor vehicle that the insured person does not own.

A variety of additional requirements and permitted exclusions and exceptions are specified in the new law but are too numerous to include here.

Legislature and Legislators

Although not usually an active topic of legislation, this year saw a number of bills pertaining to legislators and administrative functions of the legislature. In 2001, Senate Joint Memorial 64 requested that the legislative council review, study and make recommendations on the roles, responsibilities, functions, structure and organization of the committee process and the necessary staff support for that process. With the assistance of the national conference of state legislatures, the legislative council service surveyed New Mexico legislators, staff and others interested in the committee process and surveyed comparable legislatures in other states. The legislative council service also compiled historical and statistical information to present to the committee process study subcommittee that was appointed by the legislative council during the 2002 interim. The subcommittee recommended statutory and rule changes to streamline the

interim and standing committee processes. While no concurrent resolutions passed and the bill to abolish statutory interim committees was severely curtailed by the house floor substitute, some progress was made and the legislative council still has the opportunity to control the number and membership of council-appointed committees. In other legislative matters, former and current legislators will benefit from increased retirement and pension benefits and eligibility to participate in group health insurance plans administered by the state.

Several interim committees were proposed in bills and memorials for creation or continuation; the following are those that passed:

- ★ land grant committee, **House Bill 74 (Chapter 431)**;
- ★ blue ribbon tax reform commission, **House Bill 168 (Chapter 77)**;
- ★ LANL oversight committee, **House Joint Memorial 8**;
- ★ medicaid oversight committee continuation, **House Joint Memorial 73**;
- ★ welfare reform oversight committee continuation, **Senate Bill 289 (Chapter 311)**; and
- ★ judicial system study committee continuation, **Senate Joint Memorial 7**.

On the other hand, several interim committees and task forces are abolished by **House Floor Substitute for House Bill 442 (Chapter 223)**. The eliminated committees and task forces are: the industrial and agricultural finance authority oversight committee, the department of public safety oversight committee, the DWI oversight task force, the legislative workers' compensation oversight committee and a task force established to study and report findings and recommendations to the legislature regarding the future and function, powers and duties of the governor's organized crime prevention commission. The new law also includes a statutory change to allow a member of the revenue stabilization and tax policy committee to designate, from a list of potential designees, a legislator from the same house and party as the member to serve in the member's place when he is absent from committee.

Senate Bill 503 (Chapter 412) allows legislators to participate in and receive benefits from the group benefits self-insurance plan administered by the risk management division of the

general services department, but prohibits the state from making group insurance contributions for legislators. Legislators are required to pay 100% of the cost of the insurance.

The statutorily required ethics course for legislators was changed from an annual to a biennial requirement by **Senate Bill 523 (Chapter 33)**. The change provides for a two-hour course each legislature instead of the former annual one-hour course. Contrary to reports during the session, the change neither increases nor decreases the amount of time required.

In addition to the provision for public employees to purchase an additional year of service credit, discussed in *Public Officers and Employees*, **Senate Bill 378 (Chapter 418)** made a significant change in the legislative retirement program, permitting legislator members to purchase service credit for non-legislative service at a per-year price equal to three times the normal member contribution of the applicable plan, which is \$100 for a plan 1 member, for a total of \$300. This contrasts with the current law requirement of the sum of the member contribution of \$100 per year and an employer contribution of 10 times the yearly pension amount of \$250 for a total of \$2,600.

Senate Bill 620 (Chapter 85) increases retirement benefits from \$250 to \$500 annually for each year of service for former legislators qualifying under plan 1 and creates a new plan 2 for legislators whose terms end after December 31, 2002. To obtain the increased pension, plan 1 legislators must contribute an additional \$100 for each year of service credit by December 31, 2003. The increased benefit applies after January 1, 2004. Qualifications for plan 2 are 65 years of age and five years of credited service or any age with 10 years or more of credited service. Legislators serving on July 1, 2003 must elect to be a member of this plan within 180 days of that date. The member contribution rate is an amount equal to \$500 for each year of credited service. The amount of pension is calculated as 11% of the per diem rate in effect in the calendar year of retirement multiplied by 60 for each year of credited service (at this year's per diem rate, the amount for each year is \$957). Another new provision in the bill provides retiree health care coverage for former legislators who are not retirees and who served for two or more years in the legislature. The person must pay the calculated premium cost to participate. The legislative retirement fund is created and provides that money in the fund is available for appropriation by the legislature to finance the new legislator retirement plan. The distribution to the legislative

retirement fund is provided in another bill, **Senate Corporations and Transportation Committee Substitute for Senate Bill 621 (Chapter 86)**, which provides for a monthly distribution of \$200,000 or 1/12 of the amount necessary to fund legislative retirement, whichever is greater. On a different matter, the new law allows retirees under the Public Employees Retirement Act to return to work after 90 days of retirement while still receiving their pensions.

Local Government

As with so many areas of law and in keeping with the trend of the last few sessions, a number of bills affecting local governments were introduced during the 2003 session. Also see other pertinent categories such as *Appropriations and Finance; Business and Labor Affairs; Banking and Securities; Elections; Environment and Natural Resources; Health and Health Facilities; Utilities and Telecommunications; and Water and Water Utilities.*

Local Government Finances and Taxes

House Bill 58 (Chapter 70) amends the existing statute that allows counties to impose an emergency communications and emergency medical services tax by providing that a county may choose to impose the tax throughout the entire county or only in the area of the county outside municipal boundaries.

House Bill 118 (Chapter 271) allows county and municipal governments to invest in securities of agencies sponsored by the federal government, such as Freddie Mac, Fannie Mae and the federal home loan board securities, all of which tend to deliver better yields than securities that are guaranteed by the federal government. The previous law restricted such investments to securities guaranteed by the federal government.

House Bill 164 (Chapter 188) increases the time limit to issue general obligation bonds from three years to four years for New Mexico school districts, municipalities and counties.

House Bill 214 (Chapter 50) amends the Local Hospital Gross Receipts Tax Act by adding a new definition of "county" to include a class A county with a population of less than 115,000 and a net taxable value of more than \$3 billion. As a result, San Juan county is eligible to impose the local hospital gross receipts tax. Currently, permitted counties may impose the tax

at a rate of up to ½%, one time only and subject to voter approval, for a period not to exceed 40 years. The tax revenue is to be dedicated to the acquisition or construction and maintenance of a county hospital or health clinic.

House Bill 229 (Chapter 217) amends the Small Counties Assistance Act by changing the ceiling valuation calculation and the distribution from the small counties assistance fund. The new law increases the population limits for class B, class C and first class counties that qualify from 45,000 to 48,000. Additionally, the new law changes the distribution formula by using property valuation amounts instead of property tax revenues.

House Bill 308 (Chapter 219) establishes a rate of reimbursement and mandates reimbursement to counties for expenses they incur when the counties extradite, transport and feed state prisoners.

House Bill 322 (Chapter 220) amends the Small Cities Assistance Act to revise the distribution formula for municipalities that qualify for small cities assistance. The law increases the minimum distribution amount to \$35,000 and caps the amount at \$56,000.

House Bill 419 (Chapter 221) adds restrictions and safeguards to the statute regarding notice as it relates to the issuance of industrial revenue bonds (IRBs). For instance, county assessors must now be notified of the contemplated issuance of the bonds. The new law removes the prior 200,000 population requirement, thus subjecting all municipalities to the requirement. The previous 30-year maximum bond maturity is shortened to 20 years.

House Bill 701 (Chapter 292) clarifies existing statute to provide that the county assessor, not the treasurer, is the defendant in certain tax refund claims. Prior to the new law, the statute merely referred to "the county".

House Bill 737 (Chapter 230) amends the Municipal Code to allow municipalities that provide for the collection and disposal of yard waste to charge those who own or control property a yard waste collection and disposal fee.

House Bill 876 (Chapter 374) enacts the Civic Center and Convention Center Funding Act and **Senate Bill 1 (Chapter 87)** enacts the Convention Center Financing Act, both of which authorize certain local government entities to impose a convention center fee on the users of

lodging facilities to finance the design, construction and furnishing of a new civic and convention center and parking garage. Exemptions from the fee are provided for in each new law, including an exemption for small facilities. The bills authorize qualified municipalities that have imposed a convention center fee to issue revenue bonds to defray the costs associated with such things as the construction and equipping of the convention center.

Senate Bill 40 (Chapter 84) amends the section of law dealing with investment of local government permanent funds. Before amendment, local governments, except class A counties, were restricted in their investment options to bonds and government securities; however, Chapter 84 lets larger local governments have a broader range of investments by allowing funds valued at \$10 million or more to be invested as funds of class A counties are invested.

Because federal land is not taxable, the federal government compensates states and local governments for the lost property tax revenue by payments in lieu of taxes, known as PILT payments. **Senate Bill 44 (Chapter 98)** amends existing law to provide that a county may issue PILT revenue bonds to repay all or part of an outstanding loan owed by the county to the New Mexico finance authority. However, PILT, derived from income from offshore oil drilling royalties, are not guaranteed payments as they may be reduced, increased or eliminated at the discretion of the president and congress.

Senate Bill 744 (Chapter 405) amends the Development Incentive Act by first renaming that section of law as the Community Development Incentive Act. The law allows counties and municipalities to exempt certain businesses with commercial personal property from the property tax provisions. The bill raises the exemption from 50% to 100% and allows the exemption for 20 years instead of five. Additionally, the law changes the definition of "new business facility" to include facilities purchased after December 21, 2001.

Land Use

House Judiciary Committee Substitute for House Bill 693 (Chapter 229) authorizes municipalities and counties to provide, by ordinance, a framework for voluntary transfer of all or partial development rights. An adopted ordinance must include the extent, method and rules

regarding the transfer as well as notice to the public. Language in the law specifically encourages the conservation of ecological, agricultural and historical land.

Senate Conservation Committee Substitute for Senate Bill 241 (Chapter 438) is a somewhat controversial new law that affects Albuquerque and Bernalillo county only. Chapter 438 prohibits a municipality from annexing territory within the boundary of another municipality or territory within a class A county with a population of more than 300,000 unless it is approved by the board of county commissioners for that county. The new law also eliminates municipal planning and platting jurisdiction in the unincorporated area of the county and municipal extraterritorial zoning authority.

Two bills were passed that pertain to the New Mexico Subdivision Act. **Senate Conservation Committee Substitute for Senate Bill 410 (Chapter 322)** amends the provision in the subdivision act regarding a county's ability to adopt subdivision regulations that are more stringent than state law. Chapter 322 requires the county's comprehensive plan to contain goals, objectives and policies that identify and explain the need for requirements that are more stringent and requires that the plan specifically identify the more stringent regulations. **Senate Bill 438 (Chapter 326)** enacts a new section of the New Mexico Subdivision Act to limit the power of a board of county commissioners to require the merger of contiguous parcels owned by the same person. Merger of these single-owner contiguous parcels is not required if the contiguous parcels are shown on a plat map or were created by deed or survey, the chain of title clearly demonstrates the parcels were separate prior to transfer into common ownership and the owner has not taken action to consolidate the parcels. The board may require consolidation to enforce minimum zoning or subdivision standards on the parcels.

Senate Bill 286 (Chapter 310) requires counties and municipalities to individually regulate construction in flood and mudslide hazard areas within their respective jurisdictions through the adoption of construction standards that conform to regulations prescribed by the federal insurance administration. The law requires that a county or municipality with an area designated as "flood prone" by the federal emergency management agency participate in the national flood insurance program. Additionally, the law requires buildings built or improved with state appropriations to comply with standards of the national flood insurance program.

Senate Bill 451 (Chapter 435) adds new language to the Public Improvement District Act requiring a governing body to act within 90 days of receiving a petition for the creation of a public improvement district. Prior to the enactment of this new law, public bodies were not required by statute to act on such petitions within a specified time.

Other

House Appropriations and Finance Committee Substitute for House Bill 774 and Senate Bill 797 (Chapter 268) amends the Public Employees Retirement Act by creating a coverage plan for municipal detention officers and by adding adult correctional officers to state police coverage plan 1.

Senate Bill 419 (Chapter 360), which does not become effective until January 1, 2004, will require municipalities to ensure that employers benefitting from the issuance of industrial revenue bonds for certain large projects valued at \$8 million or more offer their employees health insurance and pay at least 50% of the insurance premium, except for dependent coverage. The law will require the economic development department to ensure that the same requirements are met by companies that receive in-plant training funds.

Senate Bill 825 (Chapter 208) clarifies that in municipalities with a mayor-council form of government, the mayor shall vote, unless he has a conflict of interest, to break a tie vote when the council is voting on a measure. Prior to this amendment to the law, a city clerk and the attorney general's office had opposing views on interpretation of the law.

Senate Conservation Committee Substitute for Senate Bill 887 (Chapter 437) creates the Albuquerque-Bernalillo water utility authority. Municipal members of the authority are the mayor and three city councilors and the county members are three county commissioners. The authority will be a joint agency of the two governments, subject to the provisions of the state Procurement Code and other applicable laws. The authority will administer the water and wastewater utility of Albuquerque and Bernalillo county, including determining and imposing rates for service. After an audit by the public regulation commission of the Albuquerque water and wastewater utility, money and other assets of that utility will be transferred to the new

authority. Current Albuquerque water and wastewater utility bondholders' rights will not be impaired.

Miscellaneous

In every session, there are a number of bills that do not fall neatly into the *Highlights* categories. This year was no exception. Categorization, like any other indexing process, depends almost entirely on the mindset of the person establishing the categories; so what is considered "consumer protection" legislation by one reader might be clearly "government regulation" by another. Be sure and read this *Miscellaneous* category; you might be surprised at what ends up here.

Prior to the session, New Mexico enjoyed an official state flower, state bird, state tree, state fish, state animal, state gem, state grass, state fossil, state cookie, state insect, state question and two state vegetables. Noticeably missing from this list were an official state nickname, state butterfly, state reptile and state amphibian. **House Bill 13 (Chapter 182)** rectifies the oversight by designating "Land of Enchantment" as the official nickname of New Mexico and adopting the Sandia hairstreak as the official butterfly, the New Mexico whiptail lizard as the official reptile and the New Mexico spadefoot toad as the official amphibian.

Under the Inspection of Public Records Act, a person has the right to inspect public records in most situations. **House Bill 254 (Chapter 288)** excludes from inspection public records that could be used to facilitate the planning or execution of a terrorist attack. The exception prohibits publication of information that could reveal specific state vulnerabilities, risk assessments or tactical emergency security procedures.

Hispanic culture day recognizes the contributions, sacrifices and accomplishments of Hispanic people. **House Bill 298 (Chapter 3)** changes the observance of Hispanic culture day from the second Tuesday of each year to the second Tuesday of each odd-numbered year.

House Bill 612 (Chapter 286) repeals the current law governing notaries public and replaces it with the Notary Public Act. The bill is a fairly comprehensive measure governing the powers and duties of notaries public. Notaries have the power to perform notarial acts for acknowledgments, oaths and affirmations, jurats and copy certifications and to sign the name of

persons physically unable to do so upon documents presented for notarization in certain circumstances. A notary public is prohibited from performing notarial acts under certain circumstances; from refusing to perform a notarial act unless the notary has good reason to believe that the act or associated transaction is unlawful, if the act is prohibited or if the number of notarial acts precludes completion of all acts at once; and from participating in any of the following acts: certifying or authenticating a photograph; using the official notary public title in endorsement-type testimonials; engaging in the unauthorized practice of law; and performing any official action with the intent to deceive or defraud. A criminal penalty may be imposed on a notary public who notarizes false or incomplete certificates or authenticates documents in absence of the principal.

Although specifically not a substitute for publication of legal notices, **House Bill 667 (Chapter 186)** requires state agencies to post their legal notices and advertisements on their agency web sites. If a local government has a web site, it also must post its legal notices and advertisements. Failure to electronically post does not constitute grounds to challenge, void, set aside or otherwise delay a proceeding that was otherwise properly noticed and advertised.

House Bill 761 (Chapter 231) amends the Human Rights Act to protect volunteers over 60 years of age from discrimination. The bill prohibits the state or its political subdivisions from excluding a person older than 60 years of age from volunteer service as long as the person is physically, mentally and professionally capable of performing the requisite tasks.

House Appropriations and Finance Committee Substitute for House Bill 935 (Chapter 375) creates the task force for financial independence. The purpose of the task force is to recommend and develop effective strategies to help New Mexicans achieve financial independence. The task force is composed of at least 15 members appointed by the governor; the lieutenant governor serves as the chairwoman.

The preservation of significant historic landscapes in the state and the identification of sites in the state deserving of recognition as historic landscapes were also identified as priorities by the legislature. **House Bill 956 (Chapter 234)** creates the historic landscape trust and establishes a board of trustees. The board is charged with the responsibility of seeking private

and public funding for the trust and is authorized to accept gifts and grants. Money accepted by the board is deposited into the historic landscape trust fund and is appropriated to the board.

Several task forces were created to accomplish various goals. **House Bill 973 (Chapter 236)** creates the New Mexico horizons task force, which launches a process to prioritize state benchmarks and future goals. This strategic planning, effective immediately, will help New Mexico take charge of the future by examining the state's opportunities and challenges. **Senate Bill 148 (Chapter 303)** creates the fire planning task force, charged with identifying areas most vulnerable to forest fires. The 12-member task force will also develop standards for buildings to reduce forest fire danger, as well as other fire prevention measures.

Although not a state agency, the mortgage finance authority derives its powers from the legislature. **Senate Corporations and Transportation Committee Substitute for Senate Bill 153 (Chapter 304)** expands the MFA's powers to carry out the purposes of the land title trust fund, which was established to provide accessible housing for low-income New Mexicans. **Senate Bill 393 (Chapter 17)** adds the lieutenant governor as a member of the MFA board of directors.

During the legislative session, the president of the United States declared war on Iraq and deployed thousands of troops, including members of the New Mexico national guard, to the Middle East. In gratitude to the men and women of the armed forces, **Senate Bill 933 (Chapter 136)** provides state benefits to New Mexico residents who are members of the national guard or in the federal armed forces and called to active duty and deployed during the applicable period that ends on the date the president terminates the emergency requiring activation and deployment. The law also entitles the children of those members killed in the line of duty to tuition waivers for four consecutive years at a state post-secondary educational institution. The new law entitles members to:

- ★ a free general hunting and fishing license for the year following the member's return to New Mexico;
- ★ a one-year extension on filing a state personal income tax return if the filing date occurs during the member's deployment;

★ a one-month extension on renewing a driver's license if the renewal date occurs during the member's deployment; and

★ a tuition refund paid to a state post-secondary educational institution during a period when active duty interrupted the member's school attendance.

Motor Vehicles and Transportation

From a record-breaking number of special license plates to a study of a passenger rail system linking El Paso-Juarez to Denver, there were numerous bills related to motor vehicles, highways and transportation. **Senate Bill 556 (Chapter 148)** creates a safe routes to school program within the department of transportation to increase and make safer a student's ability to walk or ride a bicycle to school. Safety measures stated in the bill include installing sidewalks, painting crosswalks, installing traffic signals, making street improvements, providing lighting, providing bus shelters and cutting curbs for handicapped access.

Aircraft and Airports

House Bill 458 (Chapter 224) permits aircraft that are in New Mexico for maintenance, overhaul, storage or repair, but that are permanently based in another state, to register in New Mexico pursuant to the terms of the Aircraft Registration Act. Registration allows the aircraft owner to choose to pay a maximum registration fee of up to \$300 in lieu of personal property tax.

Senate Bill 381 (Chapter 43) changes current law that limits airport landing fees to commercial aircraft in excess of 18,000 pounds to allow airports to charge landing fees for any aircraft used in a commercial activity for compensation. The bill gives airports the ability to charge landing fees to smaller commercial aircraft such as air charter companies, agricultural operations, flight schools, air ambulances and aerial photography companies.

Commercial Drivers and Motor Vehicles

House Bill 250 (Chapter 51) allows the taxation and revenue department to impose sanctions against commercial drivers who have been convicted of railroad highway grade crossing violations and adds driver requirements pertaining to railroad highway grade crossings.

Additionally, the bill increases the penalties for violating out-of-service orders and establishes a DWI violation level of four one-hundredths or more for a commercial driver.

House Bill 311 (Chapter 24) adds a provision to the Motor Transportation Act that exempts a Mexican commercial motor vehicle from New Mexico's vehicle registration requirements, including temporary registration, if the motor vehicle is engaged solely in movement across the international border between New Mexico and Mexico into or from an international border commercial zone, and the motor vehicle is registered and licensed as required by the law of another country. Foreign commercial vehicles must comply with financial responsibility rules adopted by the department of transportation. The bill provides that these rules must be in conformity with federal motor carrier laws.

House Bill 346 (Chapter 173) repeals state statutes that conflict with federal regulations dealing with the transport of explosive or other dangerous materials. **House Bill 347 (Chapter 10)** amends the definitions of "commercial motor carrier vehicle" and "commercial motor vehicle" in the Motor Transportation Act and the Motor Vehicle Code to comply with federal regulations.

House Bill 591 (Chapter 141) amends language in several statutes relating to oversize and overweight permits. Amendatory language recognizes the transfer of the motor transportation division from the taxation and revenue department to the department of public safety. Pursuant to the legislation, the department of public safety may regulate the time periods during which a vehicle or load exceeding the maximum specified by statute may be operated or moved by a motor carrier on a highway.

Senate Bill 698 (Chapter 359) enacts a new Motor Carrier Act and repeals the majority of the provisions of the current act. The legislation changes existing law to comply with the changes brought about by the federal preemption of former public regulation commission responsibilities relating to property carriers, cleans up language in the current Motor Carrier Act, makes the current act consistent with the Public Regulation Commission Act and makes needed revisions to the current act. Specifically, the legislation does the following:

(1) deletes sections of the former act pertaining to regulation of motor carriers of property where authority for such regulation has been preempted by the federal government;

(2) creates a new type of operating authority for motor carriers over which the public regulation commission has limited authority;

(3) gives, in limited cases, authority for the public regulation commission to suspend without notice or hearing the operation authority of a motor carrier for failure to maintain appropriate insurance coverage or for violation of any safety requirement that would endanger public health or safety;

(4) adds authority for the motor transportation division to immediately order a motor carrier, without notice or hearing, to take a vehicle out of service for violation of any safety requirements of federal or state law or rules that would endanger the public health or safety;

(5) simplifies terminology by changing certificates of public convenience and necessity to "certificate" and certificate of registration to "warrant";

(6) clarifies the public regulation commission's authority to issue certificates and permits without a hearing, after notice has been issued, if no person protests the application and staff does not request a hearing;

(7) adds provisions to permit electronic filing of documents and electronic payment of fees;

(8) mandates that motor carriers applying for temporary authority have a complete application for permanent authority or for a change in their authority pending before the public regulation commission;

(9) adds provisions requiring compensation for witnesses appearing before the public regulation commission pursuant to a subpoena; and

(10) mandates that, in compliance with the Motor Carrier Act, the public regulation commission shall not implement safety requirements that are inconsistent with or more stringent than applicable federal safety standards.

Driver's Licenses

House Bill 89 (Chapter 425) creates a section in the Motor Vehicle Code that authorizes personal information from a driver's license application or identification card to be forwarded to the selective service system. The provisions of this bill apply to male New Mexico residents who are between the ages of 18 and 26 on the days fixed for Selective Service Act registration pursuant to the requirements of the federal Military Selective Service Act. The bill supersedes an earlier memorandum of understanding between the motor vehicle division and the selective service. Upon issuance of a driver's license, the name and personal information of a male driver between 18 and 26 will be forwarded to the selective service in an electronic format. Pursuant to the legislation, the applicant's submission of the driver's license application will serve as an indication that the applicant has already registered with the selective service as required by federal law, or that he is authorizing the motor vehicle division to forward his information to the selective service.

House Bill 173 (Chapter 31) permits an individual tax identification number to be used on a driver's license application instead of a social security number. For a foreign national applying for a driver's license, the secretary of taxation and revenue must accept the individual taxpayer identification number as a substitute for a social security number regardless of the applicant's immigration status. In addition, the secretary may establish by rule other documents that may be accepted as a substitute for a social security number or an individual tax identification number.

Motor Vehicle Sales

House Floor Substitute for House Bill 225 (Chapter 216) provides for conspicuous notice to consumers of a vehicle being offered for resale after being returned to the dealer pursuant to judgment or decree and expands the protection of the Quality Assurance Act to purchasers of used as well as new motor vehicles. Specific exemptions are made for vehicles sold by banks and financial institutions, insurance companies, businesses selling to employees and leasing companies selling to lessees. The legislation limits the seller's liability to the amount of the purchase price paid for the used motor vehicle to be refunded to the purchaser or lender in exchange for the return of the vehicle. A purchaser is required to give reasonable notice to a

seller within 30 days of a breach of the implied warranty of merchantability. A consumer or a used motor vehicle dealer may bring a cause of action against a person who removes the notification of replacement or repurchase from the motor vehicle, unless the manufacturer, its agent or its authorized dealer or a used motor vehicle dealer, before completion of the sale, has provided the purchaser with written notification by the manufacturer, dealer or agent of the dealer, that the motor vehicle has been replaced or repurchased.

Senate Bill 240 (Chapter 199) amends the Motor Vehicle Dealers Franchising Act to require the written franchise or sales agreement between a recreational vehicle manufacturer or distributor and a recreational vehicle dealer to include the rates charged by the dealer for performing warranty services along with the warranty service obligations.

Public Transportation

Senate Bill 34 (Chapter 65) authorizes the department of transportation to implement a Regional Transit District Act to serve the public by providing for the creation of regional networks of safe and efficient public transit services; allowing multi-jurisdictional public transit systems to reduce the congestion of single-occupant motor vehicle traffic by providing transportation options for residents; decreasing automobile accidents by reducing traffic congestion on freeways and streets; reducing noise and air pollution produced by motor vehicles; prolonging and extending the life of New Mexico's existing roadways by easing the traffic burden; providing residents with a choice of transportation alternatives so that seniors, youth, low-income and mobility-impaired residents and others unable to drive or afford motor vehicles continue to have full access to the goods, services, jobs and activities of the community; improving the New Mexico economy by increasing workforce and citizen access to education and higher paying jobs; and prolonging and extending petroleum resources. In accordance with the legislation, contracts establishing districts must specify the manner of the appointment, the procedure for filling vacancies, the term of service and the qualifications of district directors. District boards may delegate their powers by resolution except in six circumstances. Notably, only directors may vote on resolutions for the ratification of acquisition of land by negotiated sale and for the issuance of revenue bonds.

Senate Bill 561 (Chapter 68) removes the expenditure cap on funds used by the department of transportation for purposes related to the Public Mass Transportation Act.

Senate Bill 640 (Chapter 106) authorizes a feasibility study regarding a passenger rail system linking the El Paso-Juarez metropolitan area with New Mexico cities along the Rio Grande corridor. The transportation research institute at the university of New Mexico will collaborate with the department of transportation on the study. The transportation research institute will report to the governor and the legislature on passenger rail service's practicality, the cost of labor, state land investment and travel time. The transportation institute will also investigate potential links with the national "Reconnecting America" program. "Reconnecting America", an initiative sponsored by the nonprofit great American station foundation, examines strategies for revitalizing communities through intercity travel. The goal of "Reconnecting America" is integrating state aviation, passenger rail and intercity bus systems into a self-sufficient and nationally beneficial network.

Special Vehicle Registration Plates

2003 might be called the "Year of the License Plate". Legislation in this category covered diverse issues, including numerous bills introduced to recognize different constituent groups in the state, display artwork, commemorate route 66 and indicate the support of spaying and neutering pets via special vehicle registration plates. These bills, with the exception of **Senate Bill 693 (Chapter 204)**, require a standardized special registration plate with a space on the left edge of the plate for a specially designed logo, display of the colors of the New Mexico state flag and display of the phrases "New Mexico USA" and "Land of Enchantment". That law provides that the taxation and revenue department issue special registration plates indicating that the recipient is a retiree of the United States armed forces.

The special registration plate bills requiring the standardized plate and special logo include the following:

- ★ United States armed forces retiree, **House Bill 75 (Chapter 197)**;
- ★ retired firefighter, **House Transportation Committee Substitute for House Bill 201 (Chapter 181)**;

- ★ retired New Mexico letter carrier, **House Bill 378 (Chapter 172)**;
 - ★ retired New Mexico state police officer, **House Transportation Committee Substitute for House Bill 464 and Senate Bill 210 (Chapter 174)**;
 - ★ support for spaying and neutering of pets, **House Bill 566 (Chapter 175)**;
 - ★ retired New Mexico national guard, **House Transportation Committee Substitute for House Bill 602 and Senate Bill 622 (Chapter 176)**;
 - ★ fraternal order of police member, **House Bill 635 (Chapter 177)**;
 - ★ New Mexico wildlife artwork, **House Bill 656 (Chapter 178)**;
 - ★ civil air patrol, New Mexico wing member, **House Bill 704 (Chapter 179)**;
 - ★ route 66, **House Bill 760 (Chapter 180)**;
 - ★ active duty serviceman, **Senate Bill 197 (Chapter 198)**;
 - ★ active or retired United States postal service mail carrier, **Senate Bill 211 (Chapter 211)**;
 - ★ New Mexico high school rodeo association, **Senate Bill 493 (Chapter 212)**;
- and
- ★ search and rescue member, **Senate Bill 549 (Chapter 201)**.

Professional and Occupational Licensure

A variety of laws regulating professions and occupations have been amended this year to update language, increase fees and adjust oversight to meet the changing needs of the professions and the public. A new profession, naprapathy, will be licensed in the state. New Mexico joined 14 other states in an interstate nurse licensure compact allowing nurses a multi-state privilege to practice, and recognized and licensed a new profession, that of naprapathy. A new section of the Uniform Licensing Act was enacted to allow licensing boards to bring disciplinary actions and impose penalties against persons who practice a profession or occupation without the required license.

Senate Bill 101 (Chapter 408) amends several professional and occupational licensing acts to clarify that certain professional boards are administratively attached to the regulation and licensing department. Although administrative control of these licensing boards was transferred to the department through a series of executive orders, their administrative attachment has never been codified until now. Boards included in this bill are optometry, chiropractic, dental health care, dental hygienists committee, podiatry, psychologist examiners, osteopathic medical examiners, pharmacy, occupational therapy, physical therapy, respiratory care, nursing home administrators, acupuncture and oriental medicine, speech language pathology, audiology and hearing aid dispensing practices, landscape architects, interior design, public accountancy, real estate commission, real estate appraisers and social work practice.

Senate Bill 665 (Chapter 334) clarifies that unlicensed activity in an occupation or profession governed by the Uniform Licensing Act is subject to disciplinary proceedings by the board regulating the specific profession. Civil penalties of up to \$1,000 may be imposed as well as administrative and investigative costs. An action must be initiated by the appropriate board no later than two years after discovery of the conduct by the board.

Construction Industries

House Bill 279 (Chapter 366) increases the work experience requirement for certification of journeymen electricians doing commercial work and adds continuing education requirements before a certificate of competence can be renewed for certain journeymen electricians. The bill also amends the work experience requirements for certification of a residential electrician.

The Engineering and Surveying Practice Act is amended in **House Bill 923 (Chapter 233)** to give the state board of licensure for professional engineers and surveyors jurisdiction over all who act in the capacity of professional engineers or surveyors, whether or not licensed. The board will have the authority to investigate, conduct hearings and impose civil penalties for those who act without a license. The bill also expands who may apply for a license based on various levels of education and experience.

Health Care Boards

Sunset dates for the following health-related boards are extended until 2009 in **House Bill 145 (Chapter 428)**: optometry; nursing; chiropractic; dental health care; medical examiners; podiatry; psychologist examiners; osteopathic; pharmacy; respiratory care; and physical therapy. The bill also eliminates certain experience requirements under the Professional Psychologist Act.

House Floor Substitute for House Bill 248 (Chapter 274) updates sections of the Optometry Act and changes definitions to coincide with the American association for optometry's most recent practice guidelines; eliminates statutory language on the renewal of an optometry license, requiring the optometry board to regulate renewal; increases license renewal fees; sets forth requirements for contact lens and replacement contact lens prescriptions and sales and provides civil and criminal penalties for failure to comply; requires registration of contact lens sellers and dispensers with the board of pharmacy; and changes time requirements relating to contact lens prescriptions and sales.

A nursing excellence program is created in **House Bill 376 (Chapter 276)** to enhance recruitment and retention of nurses and to increase career and educational opportunities. The board of nursing may impose a renewal surcharge on nursing licenses of up to \$20.00 to implement and maintain the nursing excellence program. The bill updates language in the Nursing Practice Act relating to examinations; eases license renewal procedures for qualified nurses; provides for the withdrawal of approval for hemodialysis technician and medication aide training programs for failure to contract with the board or pay the administrative fees; allows individuals who have been educated as RNs to take the LPN examination; updates language related to examinations; and allows nurses who are licensed in other states and who travel through or temporarily reside in New Mexico to provide care to patients without the need for New Mexico licensure if the practice does not exceed three months.

House Bill 395 (Chapter 423) exempts peer counselors for 12-step recovery programs or self-help chemical dependency recovery programs from the requirements of the Counseling and Therapy Practice Act if the program does not offer dependency treatment, does not charge program participants and allows program participants to maintain anonymity.

House Bill 679 (Chapter 193) creates a new acupuncture certified auricular detoxification specialist licensure category under the board of acupuncture and oriental medicine to provide licensed specialists trained in the treatment of alcohol, substance abuse and chemical dependency. These specialists must work under supervision of a licensed doctor of oriental medicine.

In **House Business and Industry Committee Substitute for House Bill 714 (Chapter 422)**, the legislature made changes to the Counseling and Therapy Practice Act. The definition section is changed to add, clarify and delete defined terms. The description of "practice" is clarified and licensing requirements for a mental health counselor are added. Technical changes to the other licensing requirements are also made. Other changes include the removal of the requirement that members of the counseling and therapy practice board and the standards committee or other committees of the board not be officers in professional organizations of the different fields and the removal of the one-year limit on the boards placing a licensee on probation.

The Anesthesiologist Assistants Act is amended in **Senate Bill 73 (Chapter 302)** to increase the number of anesthesiologist assistants a supervising anesthesiologist may supervise at one time from two to three and to increase the number of anesthesia providers an anesthesiologist may supervise from three to four, if at least one provider is an anesthesiologist assistant. The bill provides for recognition of foreign certification of an anesthesiologist and allows anesthesiologist assistants to perform physical exams.

The practice of naprapathy is licensed and the naprapathic practice board is created by **Senate Public Affairs Committee Substitute for Senate Bill 255 (Chapter 60)**, which enacts the Naprapathic Practice Act. Naprapathy is considered an alternative medicine that treats connective tissue disorders through the use of special techniques of manipulation; rehabilitative exercise; postural counseling; nutritional counseling; and application or use of heat, cold, light, water, radiant energy, electricity, sound and air and assistive devices. The act describes the practice of naprapathy, education and professional qualifications, exceptions to licensure, application procedures, designation as a naprapath and license display. The board is comprised of three professional and two public members. A naprapathy fund is created in the state treasury

to be funded by licensing fees that shall not exceed \$1,000 per fee. The act also provides for administrative hearings and civil and criminal penalties for those who practice naprapathy without a license or who violate provisions of the act.

New Mexico enters into the interstate nurse licensure compact for registered and practical nurses by **Senate Bill 186 (Chapter 307)**. By virtue of the compact, a nurse is granted a multi-state privilege to practice in any of the compact states. An out-of-state nurse will be required to register and be subject to each state's practice laws, rules, boards and discipline. Practice is permitted across state lines unless the nurse is under discipline or a monitoring agreement that restricts practice across state lines. New Mexico continues to have complete authority in determining licensure requirements and disciplinary actions on a nurse's license.

The Dental Health Care Act is amended in **Senate Public Affairs Committee Substitute for Senate Bill 453 (Chapter 409)** to, among other things, expand licensing provisions and exemptions for dentists and dental hygienists. The bill requires licensure for some nondentist owners of dental practices and corporate entities employing or contracting with dentists or dental hygienists. Some fees are increased and new fees are established. Districts created for the purpose of selecting members of the board of dental health care and the dental hygienists committee are reorganized. The bill allows a licensee to place his license on inactive status, increases the penalties for practicing without a license and extends the sunset date.

Other

House Bill 431 (Chapter 420) amends and clarifies the Thanatopractice Act by giving the board of thanatopractice jurisdiction over unlicensed persons and the authority to impose a fine when a person is found to have acted without a license in violation of the act. The bill gives the board authority to issue temporary licenses and to place limits on licensure based on experience as well as education. The bill adds requirements for crematories and clarifies their scope of practice. The bill also requires proper drainage and ventilation systems, and an office for some establishments.

Real Estate

Senate Bill 43 (Chapter 22) increases the three-year license fee cap for real estate salespersons and brokers from \$180 to \$270 and adds fees for sponsors and instructors of continuing education courses. Obsolete language pertaining to the real estate commission's authority to hire personnel is removed. The bill eliminates the separate category of nonresident broker license but requires nonresident broker licensees to consent to service of lawsuits in New Mexico. The bill requires the transfer of any amount in excess of \$400,000 in the real estate recovery fund to the real estate commission fund.

Senate Bill 45 (Chapter 36) clarifies that no agency relationship is created between a buyer, seller, landlord or tenant and a real estate brokerage unless such a relationship is expressly stated in a written agreement and cleans up language that was a source of confusion. The bill eliminates the requirement that a brokerage relationship disclosure be made at the first substantive contact with a client or customer and instead requires that, at the time of signing a contract, a list of the real estate licensee's duties be given to the client or customer.

The Real Estate Appraisers Act is amended in **Senate Bill 562 (Chapter 328)** to, among other things, change the title of an entry-level appraiser from "registered real estate appraiser" to "apprentice real estate appraiser" to avoid confusion. This bill makes it unlawful to engage in the business or act in the capacity of an appraiser without a license. Appraisers will be required to have experience and education as established by the appraiser qualifications board of the appraisal foundation. Fees and fines are increased and the board is allowed to impose a civil penalty of up to \$1,000 for each violation of the act as well as assess administrative costs for any investigation and administrative or other proceedings against a real estate appraiser or any person who is found to have acted without a license.

An associate broker or real estate salesperson may now apply for a real estate broker's license under **Senate Bill 571 (Chapter 329)** if he has been actively engaged in the real estate business for at least two years and has successfully completed a broker basics course approved by the real estate commission. This bill also eliminates the requirement that a real estate broker be a resident of New Mexico.

Public Officers and Employees

The 2003 legislative session was marked by efforts to improve the plight of public officers and employees. Raises, increased per diem and mileage reimbursements, expanded PERA eligibility and collective bargaining were all successful legislative measures.

The per diem and mileage reimbursement rates for public officers and employees is increased by **House Bill 220 (Chapter 215)**. For nonsalaried officers, the new in-state rate is \$95.00; for salaried employees, the new rate is \$85.00 or up to \$135 in expensive locales such as Santa Fe. The out-of-state rate is \$115, or up to \$215 in expensive locales. The automobile mileage rate is increased from 25¢ per mile to 32¢ per mile; the private airplane rate is increased from 40¢ to 88¢ per mile. Maximum reimbursement amounts for actual meal expenses are also raised, from \$22.50 per day to \$30.00 per day for in-state and \$45.00 per day for out-of-state travel. The changes are welcome news for state employees who must travel on state business; rates have not been increased since the 1980s.

In each session, there are usually several bills introduced to increase, broaden or otherwise change public employee retirement benefits and participation. This year was no different. **House Appropriations and Finance Committee Substitute for House Bills 408, 660 and 730 (Chapter 370)** increases the number of persons who are eligible to receive benefits under the Volunteer Firefighters Retirement Act. Volunteer firefighters who have retired and receive pension benefits from another state system are eligible under the new law to participate in the volunteer firefighters plan. State law previously excluded from membership those volunteers who were already retired or receiving a pension benefit from a state retirement system other than the state police pension fund. The law also previously required the first year of volunteer firefighter service credit to be attained before the age of 45; this act removes that requirement. **House Bill 788 (Chapter 269)** expands eligibility for state police benefits. The bill allows lieutenants and captains not otherwise covered to participate in state police member coverage plan 1, which ultimately increases their credited service by 20%. This legislative action is dedicated to the memory of the late Sergeant Brent H. Bateman and to all other state police officers in recognition of the hazardous nature of their work. With the enactment of **Senate Bill 378 (Chapter 418)**, public employees will be able to buy additional time. The bill

amends the Public Employees Retirement Act to allow a member who has at least five years of service credit to purchase one year of service credit. Finally, **Senate Bill 620 (Chapter 85)**, discussed in *Legislature and Legislators* as a bill dealing primarily with legislative retirement, contains a significant change that applies to public employee retirees. The new law allows a retiree to go back to work for a public employer after staying out of public employment for at least 90 consecutive days. Although the employee must contribute to the retirement fund while reemployed, additional service credit will not be earned and cannot be purchased during the period of reemployment.

In addition to increased benefits, public employees will enjoy increased bargaining power. The Public Employee Bargaining Act enacted by **House Bill 508 (Chapter 4)** and its duplicate, **Senate Public Affairs Committee Substitute for Senate Bill 46 (Chapter 5)**, gives public employees the right to organize and bargain collectively with their employers for wages, work hours and all other terms and conditions of employment. The bill creates a board to administer the act. The board may permit local governments to create their own boards. The bill also delineates board authority, defines the rights of public employers and employees, prohibits strikes and lockouts, defines appropriate bargaining units, outlines procedures for union representation elections, establishes the scope of bargaining, mandates impasse resolution procedures, defines prohibited practices and grants judicial enforcement authority. Courts are allowed to review board actions and hear appeals of arbitrators' decisions in accordance with the Uniform Arbitration Act. Funding of \$327,000 for the public employee labor relations board is contained in House Bill 2 Junior.

Unlike the several changes that favor public employees, **Senate Bill 652 (Chapter 55)** relaxes the protections against removal of state transportation commissioners (formerly state highway commissioners). Previously, state law provided that commissioners could be removed only for incompetence, neglect of duty or malfeasance in office. Now, they will serve at the pleasure of the governor, but the provision requiring senate approval to remove a commissioner who has been appointed by the senate remains.

State Agencies

One of the ongoing topics of discussion for the legislature is what the framework of state government should look like and how best to carry out the government's functions within that framework. In this session, the legislature took action in three basic ways to help establish the framework as defined by state agencies: it created new state agencies, modified existing state agencies and took actions that affect all state agencies.

New Agencies Created:

The legislature created a new office of military base planning and support as well as the military base planning commission in duplicate bills, **House Bill 323 (Chapter 170)** and **Senate Bill 287 (Chapter 166)**. The commission is administratively attached to the economic development department and is to be the primary state agency working in conjunction with local community organizations, the military and the state's congressional delegations on matters relating to federal military base realignment and closure plans and their economic impact.

House Government and Urban Affairs Committee Substitute for House Bill 416 (Chapter 280) moves the office of guardianship from the office of the attorney general to the developmental disabilities planning council. The office of guardianship is charged with contracting for guardianship services to income-eligible incapacitated persons; providing recruitment, training and information regarding guardianship and mental health treatment guardianship; investigation and resolution of complaints against contractors; and contracting for an attorney to petition the court for guardianship or to seek amendment or termination or existing guardianship. The office of guardianship is required to monitor and enforce all guardianship contracts, which are required to include various provisions as defined in the act.

Another new commission, the Fort Stanton development commission, is created by the legislature in **House Bill 926 (Chapter 126)** and is administratively attached to the office of cultural affairs. The members of the commission are local officials and appointees of the governor. They are charged with acquiring furnishings, art, landscaping materials and other decorations for the public areas of Fort Stanton and with developing statewide interest in and a comprehensive use plan for the property.

Senate Bill 541 (Chapter 101) creates a new division in the office of the attorney general to examine issues concerning the Treaty of Guadalupe Hidalgo and its enforcement in light of Article 2, Section 5 of the constitution of New Mexico. Funding for the division is provided in House Bill 2 Junior.

Changes in Existing Agencies:

In **House Floor Substitute for House Appropriations and Finance Committee Substitute for House Bill 585 (Chapter 403)**, the governor is given authority to reorganize the state agency on aging, the office of cultural affairs, the New Mexico office of Indian affairs and the New Mexico veterans' service commission and to make them cabinet-level departments through executive order. If the legislature does not approve the changes in the next session, the reorganization is void. The bill also renames the national Hispanic cultural center by deleting "of New Mexico". House Bill 2 Junior provides funding for the new cabinet departments as well as money to create the office of homeland security.

House Bill 881 (Chapter 142) changes the name of the state transportation commission in the statutes to comply with the constitutional name change approved by the voters at the last general election. The bill also changes the name of the state highway and transportation department and the secretary of highway and transportation to the department of transportation and the secretary of transportation.

House Business and Industry Committee Substitute for House Bill 1005 (Chapter 299) creates the tourism revenue enterprise fund and allows for the earmarking of money raised by the department through the sale of souvenirs and sundries at visitors' centers, web site-related sales, special television programs and other sources. The money in the fund is appropriated to the tourism department to be expended to carry out the duties of the department.

Trade with Mexico is a vital component of the governor's economic package. To that end, the legislature expanded the role of the trade division of the economic development department to include specific functions on developing trade with Mexico in **Senate Corporations and Transportation Committee Substitute for Senate Bill 108 (Chapter 404)**. The division name was changed to the trade and Mexican affairs division and it is responsible for

coordinating the activities of other government agencies as they relate to border development. The division is also the liaison for the state with the Republic of Mexico and the state of Chihuahua.

Relating to All Agencies:

House Appropriations and Finance Committee Substitute for House Bill 67 (Chapter 49) and **Senate Judiciary Committee Substitute for Senate Bill 244 (Chapter 308)** are duplicate bills that consolidate more of the control over the state's information technology into the office of the chief information officer and the information technology commission. The bill requires the information technology commission to review and comment on all information technology appropriation requests and for the office of the chief information officer to approve vendor requests that are subject to the Procurement Code. This bill also provides for penalties for intentional failure to comply with the established purchase procedures.

House Bill 219 (Chapter 273) establishes responsibility and oversight of the procedures of the accounting system for the state and its agencies. The financial control division is given the authority and responsibility of reviewing procedures, budgets and expenditures of state agencies. The division may, on an annual basis, give agencies authority to issue warrants and be exempted from prior submission of purchase vouchers. The division must provide an annual comprehensive audit and report of expenditures and accounting practices used throughout the state. This bill also provides for the reversion of unused funds back to the general fund at the end of each fiscal year by September 30 of each year but allows the financial control division to adjust a reversion within 45 days of the audit report for that fiscal year.

When competitive sealed bids are either not practical or are not advantageous to a state agency, a competitive sealed proposal procurement process is used. **House Bill 573 (Chapter 267)** expands the use of the competitive sealed proposal process to include bids for schools and municipalities. It also outlines the process to be used for construction and facility maintenance, service and repairs and creates an advisory committee to assist in developing rules for the implementation of the competitive sealed proposal process.

Taxation

Despite the call by the governor to form the blue ribbon tax reform commission that will examine New Mexico's tax system and recommend reforms to establish a balanced tax system that provides maximum economic development benefits while maintaining necessary government services at an appropriate level, many tax bills were adopted by the first session of the forty-sixth legislature. The most noteworthy, of course, is the income tax reduction, which reduces the top rate of 8.2% over the next few years to 4.9%. The news during the session was about the huge billboard in Times Square in New York City advertising the reduction and the state as "open for business". All told, tax breaks are being scored by LFC and DFA at \$26.4 million in FY 2004; however, this number may be slightly misleading since it only accounts for the first year of the income tax rate reduction. **House Bill 167 (Chapter 2)** is expected to cost \$360 million when fully implemented. The various tax reductions are partially offset by tax measures that will generate more income, such as the increase in the premium and cigarette taxes and increased audit efforts; these are scored at a positive \$88 million for FY 2004 recurring.

The blue ribbon tax reform commission, which is created as a result of **House Bill 168 (Chapter 77)**, will identify the strengths and deficiencies in the state's tax system and consider a broad range of improvements to modernize the tax system and make it more conducive to economic growth. The commission, composed of 13 public members and 10 legislative members, is required to review personal income tax reductions and any other tax laws adopted during the first session of the forty-sixth legislature to determine if amendments are necessary to comport with the findings of the commission. The commission is to have its first meeting no later than May 1, 2003 and report its findings to the governor and the legislative council by September 1, 2003. The bill includes an appropriation of \$200,000 to the legislative council service for staff and commission expenses.

Tax Administration

As occurs every year, the taxation and revenue department identified technical changes in the state's tax code that need to be implemented and separated those changes into several bills that were endorsed by the interim revenue stabilization and tax policy committee.

House Taxation and Revenue Committee Substitute for House Bill 64 (Chapter 398)

enacts several new sections of the Tax Administration Act as the "New Mexico Taxpayer Bill of Rights". These sections essentially restate existing taxpayer rights and remedies in a more accessible manner. This legislation also amends and enacts sections of the Tax Administration Act to address various topics, including rights of privacy, audits, administrative hearings, refund and credit claims, penalties, interest on deficiencies, awarding of costs in court cases and liability of "innocent" spouses. These provisions address areas that have long been a source of contention between the taxation and revenue department and some taxpayers.

House Bill 283 (Chapter 439) is the taxation and revenue department cleanup of the Tax Administration Act. This bill usually picks up bits and pieces from laws that have been amended over the last several years and amends the Tax Administration Act to reflect those additions or amendments. In the new law, the gaming control board is given access to tax returns of license applicants and their affiliates as required by the Gaming Control Act, thereby creating an exemption to the confidentiality provisions regarding returns and other information provided to the taxation and revenue department for tax purposes.

The secretary of taxation and revenue is given the authority to enter into tax installment agreements for periods up to 60 months, rather than the previous limitation of 36 months; to enter into tax abatements of up to \$10,000 without the prior written approval of the attorney general; and to apply amounts paid by a taxpayer in excess of the amount due on the return or assessment to the taxpayer's other state tax liabilities. In addition, a refund claim will not be necessary to receive a refund of an overpayment if the taxation and revenue department determines that a refund is due.

The law also extends to 15 days the time period in which a court must hold a hearing on an injunction or temporary restraining order for a taxpayer or person other than a delinquent taxpayer to cease doing business until the delinquency is satisfied. The provision regarding interest owed by the department on overpayments was amended to require the department to pay interest on personal and corporate income tax overpayments if a credit or refund is not made within 55 days of the date of the claim for refund. The previous limit was 75 days.

Fuel Taxes

Senate Conservation Committee Substitute for Senate Bill 874 (Chapter 150) confers authority on the secretary of transportation to enter into a gasoline tax-sharing agreement with the Pueblo of Nambe in which the state would agree to pay the pueblo 40% of the gasoline tax collected by the state on 2.5 million gallons of gasoline per month (approximately 30 million gallons per year) if the pueblo agrees not to distribute tax-exempt gasoline pursuant to Subsection F of Section 7-13-4 NMSA 1978 outside of its tribal boundaries. The tribe will still be able to distribute gasoline to a retail outlet on the tribe's land. Distributions to the pueblo and to the state road fund are provided for. The state had expressed concerns about reduced income to the fund, and the Pueblo of Nambe thought that a tax-sharing agreement such as that set forth in the bill could benefit both the pueblo and the state road fund. The law will increase the revenue to the fund by approximately \$2 million per year. The bill is scored as essentially revenue neutral for the state and local governments and as a simple swap from general funds to road funds.

Gross Receipts and Compensating Tax

House Bill 62 (Chapter 214) temporarily increases the gross receipts tax deduction for fuel used in turboprop or jet engines. Currently, 40% of the receipts from sales of such fuel may be deducted from gross receipts. The bill increases the deduction to 55% for four years. On July 1, 2007 the deduction will revert to 40%.

A cleanup bill, **House Bill 126 (Chapter 272)**, reorganizes the definition sections of the Gross Receipts and Compensating Tax Act. This is purely technical legislation, intended to make it easier to use and amend the act in the future.

House Bill 843 (Chapter 232) enacts a new section of the Gross Receipts and Compensating Tax Act that creates a gross receipts tax deduction for the first five years following the location of a trade-support company in New Mexico, if the company locates in New Mexico between July 1, 2003 and July 1, 2008 within 20 miles of a port of entry on New Mexico's border with Mexico. A "trade-support company" is defined as a "customs brokerage firm or a freight forwarder". To claim the tax deduction, the trade-support company must have at least two employees who are not related to the majority interest holders of the company. "Port of entry" is defined to mean Santa Teresa in Dona Ana county.

House Taxation and Revenue Committee Substitute for House Bill 886 (Chapter 125) creates an exemption from governmental gross receipts tax for sales of required textbooks and course materials by a public university or college bookstore to enrolled students. This measure will affect the amount of revenue flowing to the state park and recreation capital improvement fund, the public project revolving fund and the youth conservation corps fund.

Senate Finance Committee Substitute for Senate Bills 213 and 702 (Chapter 350) and Senate Bill 654 (Chapter 351) expand an existing gross receipts tax deduction for certain medical services. The previous provision allowed a deduction for medical services receipts provided to medicare beneficiaries by doctors, osteopaths or hospices. Chapter 350 adds accredited clinical laboratories and home health agencies to those eligible to deduct medicare receipts, but phases in this deduction over three years. Chapter 351 adds podiatrists to those eligible to deduct medicare receipts. It also allows medical doctors and osteopaths to deduct receipts from TRICARE services. TRICARE is a federal managed care insurance program for military personnel.

Senate Bill 586 (Chapter 330) authorizes issuance of a new series of nontaxable transaction certificates (NTTCs) beginning January 1, 2005 and allows the department to refuse to issue NTTCs to a taxpayer who has not filed a return. Provisions are included in the bill to allow all NTTCs from the January 1, 1992 series to be used until December 31, 2004.

Authority to enter into intergovernmental gross receipts tax-sharing agreements was expanded to include 21 of the 22 Indian nations, tribes and pueblos in the state in **Senate Bill 602 (Chapter 414)**. (The Navajo Nation is not included because it already has tax-sharing provisions that it has negotiated with the state.) The goal is to eliminate dual taxation on the same transactions when both the state and a tribe have the authority to tax. The model originally adopted with the Pueblo of Santa Clara was that the credit taken by a taxpayer against the state gross receipts tax would be equal to the lesser of 75% of the tribal tax or 75% of the combined state and local gross receipts taxes. State and local governments receive 25% of the gross receipts tax due and the tribe collects 75%. The pueblos of Isleta, Laguna, Nambe, Sandia and Santa Ana subsequently requested that similar agreement authority be extended to include them. Senate Bill 602 was drafted to eliminate the need for each of the remaining tribes to request

individual legislation to be included in the authorization to enter into gross receipts tax-sharing agreements with the taxation and revenue department.

Senate Bill 623 (Chapter 62) provides additional gross receipts and compensating tax exemptions and deductions for activities related to space vehicles.

Income Taxes

By adoption of the conference committee report, **House Taxation and Revenue Committee Substitute for House Bill 167 and Senate Bill 167 (Chapter 2)** reduces the highest personal income tax rate from the current rate of 8.2% as follows: 7.7% in 2003, 6.8% in 2004, 6.0% in 2005, 5.3% in 2006 and 4.9% in 2007 and subsequent years. Also, the existing deduction for \$1,000 of capital gain income is increased to a deduction that is the greater of \$1,000 or the following percentage of capital gain income: 10% in 2003, 20% in 2004, 30% in 2005, 40% in 2006 and 50% in 2007 and subsequent years. The fiscal impact of these changes, when fully implemented in fiscal year 2008, is estimated at \$360 million annually. This legislation also requires the state to pay interest if personal and corporate income tax refunds are not paid within 55 days of the claim of refund, rather than the 75 days allowed in current law.

House Bill 282 (Chapter 275) amends several sections of the state Income Tax Act. Many of the changes are revisions in wording proposed by the taxation and revenue department as clarifications and do not have substantive implications. However, there are a few substantive changes. The definition of "base income" is changed to include amounts transferred from tax-exempt education accounts to accounts that are not tax exempt or amounts used for purposes other than those approved in the Education Trust Act. The definition of "resident" is changed to add that a person physically present in the state for 185 days or more during a tax year is a resident and that a person who changes residence to outside of the state is not a resident only for that period in a tax year following the relocation. Taxpayers filing and paying electronically may file their returns by the 30th day of the fourth month following the end of the tax year rather than the 15th day of the fourth month following the end of the tax year. Boards of county commissioners are required to include in resolutions authorizing qualified taxpayers to claim low-income elderly homeowners' property tax rebates pursuant to Subsection G of Section 7-2-14.3 NMSA 1978 a statement specifying the period of time for which the rebate provided

may be claimed, since the resolutions may apply to one or more years. Money paid into an education trust fund may not be deducted from a person's adjusted gross income for federal tax purposes and then deducted again for state income tax purposes.

Chapter 275 also includes the same change to the definition of "resident" for income tax purposes as was enacted by **House Bill 920 (Chapter 13)**. The previous definition provided that a person who lives in New Mexico for part of the year but moved out of New Mexico on or before the last day of the year with the intention of living elsewhere would not be considered a resident. This allowed people who were in reality New Mexico residents to avoid being subject to New Mexico income tax on certain income by moving away briefly at the end of the year. The amended definition provides that a person who moves out of the state is considered a non-resident only for the portion of the year after that relocation, and that any person who is physically present in the state for 185 days or more during the year is a resident regardless of any relocation to another state.

House Bill 572 (Chapter 400) enacts the job mentorship tax credit, which allows a qualified employer to claim a personal or corporate income tax credit equal to 50% of wages paid to qualified secondary school students for up to 320 hours of employment per year. There are various restrictions in qualifying for and claiming the credit, including a cap on the credit of \$12,000 for any one employer in a year. A similar job mentorship tax credit was in effect from 1999 through 2001.

New Mexico joins eight other states in extending tax credits for donating conservation easements by passing **Senate Bill 581 (Chapter 331)**, which provides a credit against state income taxes due equal to 50% of the fair market value of the conveyed land. The legislation, aimed at both "land rich, cash poor" and environmentally conscious landowners, provides a tax incentive on lands donated for open space, natural resources, biodiversity conservation, outdoor recreation, farmland and forest land preservation, historic preservation and land conservation purposes. The law also permits the taxpayer a carry-over of any unused tax credit for a maximum of 20 consecutive years.

House Bill 762 (Chapter 295) provides an alternative method of determining estimated tax payments pursuant to the Corporate Income and Franchise Tax Act. A fourth alternative is

added that allows a taxpayer to estimate quarterly taxes, which must be at least 80% of the amount that will actually be due for the quarter. It appears that an amendment anticipated to be made to the bill was not adopted, and the current bill leaves out the first quarter payment for the other allowable methods for calculating estimated taxes.

Property Tax

House Bill 73 (Chapter 78) adds disabled persons to those whose property tax valuation is to be capped at current levels. The original provision, enacted to be applied in property tax year 2001 and in subsequent years, imposed a limitation on increases in the value of a single family dwelling owned and occupied by a person who is 65 or older and whose modified gross income for the prior taxable year did not exceed \$18,000 (to be adjusted for inflation in subsequent years). This bill enacts a similar limitation on value for a single-family dwelling owned and occupied by a person who is disabled and in the prior tax year had a modified gross income not greater than \$18,000 (to be adjusted for inflation). "Disabled" is defined as a person who has been determined to be blind or permanently disabled with medical improvement not expected pursuant to the federal Social Security Act or determined to have a permanent total disability pursuant to the Workers' Compensation Act.

House Bill 299 (Chapter 118) requires that when a deed or real estate contract transferring real property is recorded with a county clerk, an affidavit must also be filed with the county assessor disclosing the price paid for the property being transferred. The information is confidential and is to be used only by the assessor for appraisal purposes.

House Bill 300 (Chapter 26) extends the deadline for claiming an exemption from property taxation. Previously an exemption had to be applied for no later than the last day of February, even though valuation notices are not received by taxpayers until May. The new provision allows a taxpayer 30 days after the mailing of the valuation notices to claim an exemption.

Senate Bill 188 (Chapter 57) creates statutory authority to implement two amendments to the constitution of New Mexico approved by the voters in 2002, both of which concern property tax exemptions for veterans. Section 1 of the bill increases the amount of the veteran

exemption. Previously an honorably discharged veteran was eligible to receive a \$2,000 exemption from the taxable value of his property. This legislation increases the exemption amount in \$500 increments for four years. In 2006 and thereafter, the deduction amount will be \$4,000. Section 2 of the bill expands eligibility for the disabled veteran exemption. Previously, a disabled veteran received a total exemption from property tax on his residence if it had been adapted to his disability using a federal housing grant. With the enactment of this legislation, the adaptation requirements are removed and the principal place of residence of a veteran with a 100% permanent and total service-connected disability is exempt from property taxation. **House Bill 71 (Chapter 29)** is a duplicate of Section 2 of Senate Bill 188.

Senate Bill 631 (Chapter 95) changes certain procedures regarding property omitted from property tax rolls. A 30-day deadline for filing protests on property tax bills for omitted property is established by Section 1 of the bill. This will allow protests on omitted property to be filed in a time period similar to other property tax protests. The bill also changes the manner in which tax payments are applied when a delinquent tax payment is owed due to assessments on omitted property. It protects property owners or, more likely, an owner's title insurance company, from liability for all but the previous year's delinquent taxes, penalties and interest on omitted property when a previous owner of the property made unreported improvements to the property and the current owner had no actual notice that those improvements were omitted. Application of payments by or on behalf of an owner in such a case can only be applied to the current and previous year's amounts due, but not to delinquent taxes, penalties and interest due for years before that time. Previously, the law required that delinquencies be paid first. This allows a new owner to pay only on the current tax liability accrued while the property was in his ownership, a change from prior law that made all tax liabilities the responsibility of the current owner. In addition, the bill exempts property from a lien for delinquent taxes if the tax creating the lien is not due for the current or immediately preceding property tax year and was imposed because of omitted property unreported by a previous owner and of which the current owner was unaware. Those tax liabilities remain the responsibility of the former owner who failed to report the improvement. Chapter 95, according to the department, will put a significant administrative

burden on county assessors and also cause questions to arise as to what liability is being covered by payments of taxes by escrow, mortgage or title companies when there is a delinquency.

Other Taxes

House Bill 146 (Chapter 419) amends the renewable energy tax credit adopted in 2002 to include biomass as a qualified energy resource in addition to solar light, solar heat and wind. "Biomass" is defined as "agricultural or animal waste; thinnings from trees less than 15 inches in diameter, slash and brush; lumbermill or sawmill residues; and salt cedar or other phreatophytes removed from watersheds or river basins". A qualified energy generator is amended to be a facility that has a generating capacity of at least 10 megawatts, reduced from 20 megawatts in prior law. The technology that may be used is expanded by Chapter 419 to include fluidized bed technology or similar low-emissions technology. Previously, the technology eligible for the credit was limited to zero-emissions technologies. The aggregate megawatts on which the renewable energy tax credit may be claimed annually by all qualified energy generators is increased by this bill from 800,000 to two million megawatt-hours of produced electricity. The renewable energy tax credit is allowed on a first-come, first-served basis for qualified energy generators. The potential annual revenue impact of the renewable energy tax credit is increased from \$8 million to \$20 million; however, the impact is unlikely to reach that level. If the renewable energy tax credit due a qualified energy generator exceeds that generator's tax liability, the credit may be carried forward for up to five years.

The Investment Credit Act was amended by **House Bill 179 (Chapter 402)** to revise the employment formula to lower the number of new employees required to qualify for the investment tax credit. This will benefit businesses that make large investments in qualified equipment, but hire few new employees due to the installation of the new equipment.

House Bill 295 (Chapter 127) amended provisions relating to tax credits adopted in 2002 for film production companies making films in New Mexico. Concerns were voiced during the interim by the department and others that the initial bill was too broad and needed to be narrowed to exclude sexually explicit and exploitative films and to limit the credit to activities that are actually taxed in New Mexico. The bill also modifies the language in this tax credit to

parallel the language used in the gross receipts tax deduction available to a film production company.

House Bill 321 (Chapter 433) amended the trigger for automatic reduction of the oil and gas conservation tax. If the unencumbered balance in the oil and gas reclamation fund equals or exceeds \$1.15 million for a month, the oil and gas conservation tax will automatically drop from 19/100% of the taxable value of sold oil and gas to 18/100% of the taxable value of the sold product. The trigger was previously an unencumbered balance of \$1 million. The automatic trigger to increase the oil and gas conservation tax back to 19/100% remains at an unencumbered balance in the oil and gas reclamation fund of \$500,000 or less for a one-month period. The use of the oil and gas reclamation fund is expanded in the bill to include use of up to \$150,000 annually for energy education, as well as the prior use to survey abandoned wells, well sites and associated production facilities and to plug or reclaim those facilities.

Senate Bill 713 (Chapter 205) directs the taxation and revenue department to distribute certain county local option taxes imposed by Cibola county to the city of Grants, not to the county, for the purpose of maintaining and operating a hospital.

Senate Finance Committee Substitute for Senate Bills 804, 336, 717 and 835 (Chapter 341) increases the cigarette tax by 70¢ a pack, effective July 1, 2003. The new tax rate will be 91¢ a pack. The new revenue from this increase is estimated to be approximately \$47 million annually. New distributions of receipts from the cigarette tax are authorized as follows: 14 and 52/100% of receipts (approximately \$9.5 million annually) to the New Mexico finance authority for construction of improvements at the UNM health sciences center; 6 and 11/100% (approximately \$4 million annually) for construction of improvements to department of health facilities; and 15 and 95/100% (approximately \$10.4 million annually) to a credit enhancement account to provide additional coverage for bonds issued for the health sciences center and department of health improvements. The New Mexico finance authority is authorized to issue revenue bonds for the construction of the improvements. The funds in the credit enhancement account are transferred to the general fund monthly if they are not needed for debt service payment. The remainder of the new revenue, approximately \$23.1 million, will go directly to the

general fund. The total impact on general fund revenue in FY 2004 is expected to be \$30.7 million, which includes the transfer from the credit enhancement fund.

See *Insurance* for a description of **Senate Bill 331 (Chapter 58)**, which clarifies that the exemption to the insurance premium tax imposed in that section for premiums for insurance contracts purchased by the state or a political subdivision of the state applies to insurance purchased for active and retired employees only.

Utilities and Telecommunications

This year brought a revisitation of several pieces of legislation enacted in 1998 and 1999 concerning the public regulation commission and electric restructuring. The 1998 enabling legislation for the public regulation commission included a delayed repeal of all regulatory statutes for which the public regulation commission is responsible, including the Public Utility Act and the New Mexico Telecommunications Act. The repeal was to go into effect July 1, 2003. During the session, numerous bills concerning public utilities or telecommunications provided for the repeal of this delayed repeal. Finally, the delayed repeal was repealed by **Senate Bill 350 (Chapter 23)**. See *Insurance* for other laws regarding the powers and duties of the public regulation commission.

Restrictions on the types of business subsidiaries and amount of investments in those subsidiaries by rural electric cooperatives are imposed by **Senate Bill 464 (Chapter 416)**. The bill also exempts from commission approval certain securities issued by utilities if those securities are already subject to approval by the federal government.

The Electric Utility Industry Restructuring Act of 1999 is repealed by **Senate Bill 718 (Chapter 336)**, which also provides for public utility transition cost recovery, allows for public utility acquisition and operation of generating plants for wholesale out-of-state delivery of electric power and voids rules and orders that require functional separation of electric and gas transmission, transportation and distribution operations by public utilities.

Senate Corporations and Transportation Committee Substitute for Senate Bill 903 (Chapter 346) changes provisions governing how the utility division should promote the public interest in hearings before the public regulation commission, requires at least one commissioner

to attend hearings during oral argument if a party so requests and allows ex parte communication between parties in proceedings before the commission and the commission's advisory staff pursuant to commission rules.

Water and Water Utilities

New Mexico has been experiencing a significant drought over the last few years, creating a flood of legislation concerning the use and distribution of water in the state. While the 2002 session saw several bills introduced dealing with interstate compact compliance issues, 2003 saw numerous bills introduced that addressed the need for more efficient water management practices and better water conservation measures. However, several significant bills to those purposes were not extensively discussed before the session and were introduced rather late in the session. Those that succeeded were extensively amended or substituted, and, in the process, probably weakened in the view of their advocates. The issues nonetheless did receive the attention of legislators and the stakeholders, and, perhaps as a consequence, next year may see more progress on water management issues. Also of continuing importance will be financing basic water infrastructure needs as well as water conservation initiatives.

Phreatophyte removal, credited by many as a major water conservation measure, was given substantial funding this year. House Bill 2 Junior appropriated \$1.2 million to NMSU in FY 2003 for removal programs. Also in Junior, NMSU received \$100,000 in FY 2004 funding for a pilot project using goats to remove phreatophytes on the Rio Grande. The university also received funding for water conservation and natural resources restoration technical assistance from the USDA's natural resources conservation service.

Responsibility for weather modification was transferred from the weather control and cloud modification commission to the interstate stream commission by **House Bill 78 (Chapter 194)**, which amends Section 75-3-2 NMSA 1978. All fees collected for weather modification will be used by the interstate stream commission for carrying out the purposes of this act. Provisions of existing statute pertaining to the weather control and cloud modification commission are stricken.

House Bill 114 (Chapter 7) amends the Water Quality Act to permit homeowners to conserve drinking water by using gray water for gardening and landscaping activities if less than 250 gallons per day are used for private residential gardening, composting or landscape irrigation. The office of the state engineer points out that many communities use treated wastewater as return flow in their strategy to maximize consumptive use for ratepayers and that residential gray water use could decrease these return flow volumes. On the other hand, the federal environmental protection agency argues that decreased inflows to wastewater facilities could improve efficiency and infrastructure reliability.

House Bill 235 (Chapter 116) amends the Water and Sanitation District Act to allow water and sanitation districts to be formed in any county instead of in only class A or class B counties with populations greater than 90,000.

House Agriculture and Water Resources Committee Substitute for House Bill 260 (Chapter 131) and **Senate Conservation Committee Substitute for Senate Bill 195 (Chapter 137)** authorize the development of a state water plan by the interstate stream commission, in consultation with the state engineer and the water trust board. The state water plan is to include work plans and strategies for the completion of water rights adjudications and support efforts and the creation of a comprehensive database and electronically accessible information system measuring surface and ground water uses, inventorying water wells and determining the disposition of unused wells. In developing the statewide water plan, the commission and the state engineer are required to consult directly with the governments of Indian nations, tribes and pueblos to integrate water plans and formulate a process for final adjudication of water rights. The interstate stream commission will ensure public participation and input throughout the planning process to provide for participation of stakeholder groups and regional planners. The Water Project Finance Act is also amended to require that the board prioritize projects in accordance with the state water plan and identify opportunities to leverage federal and other funding.

House Bill 302 (Chapter 132) and **Senate Bill 124 (Chapter 54)** will allow acequias and community ditch associations to establish water banks for the purpose of temporarily reallocating water without applying to the interstate stream commission or the state engineer for

a change of purpose of use or point of diversion. The bills incorporate language found in Section 72-1-2.3 NMSA 1978 that provided for acequia and community ditch water banking in the lower Pecos river basin only and repeal Section 72-1-2.3 NMSA 1978.

House Judiciary Committee Substitute for House Bill 303 (Chapter 135) and House Agriculture and Water Resources Committee Substitute for Senate Bill 123 (Chapter 82) prohibit the state engineer from approving an application for a change in point of diversion or place or purpose of use of a water right into or out of an acequia or community ditch if the commissioners of the acequia or community ditch have not approved the change. The bills outline steps applicants must take in processing an application and provide that if the acequia or community ditch commissioners have not issued a denial within 120 days, the request will be approved automatically. It also exempts the new section from applying to water rights or lands owned by or reserved for an Indian pueblo. The bill changes the powers and duties of acequia and community ditch commissioners to clarify their authority to approve requests for changes in point of diversion or place and purpose of use of the members. A request may be denied only if it would be detrimental to the acequia or community ditch. The commissioners must provide a written decision, which may be appealed to the district court within 30 days. The court may set aside, reverse or remand the decision if it determines that the commissioners acted fraudulently, arbitrarily or capriciously, or not in accordance with law. The new law does not take effect until March 1, 2004.

House Bill 403 (Chapter 369) establishes a process for the leasing of water rights from members of irrigation projects organized pursuant to Chapter 73, Article 10 NMSA 1978 to municipalities and other public and semi-public entities that form special water users' associations in cooperation with an eligible irrigation district. A special water users' association may lease water for up to 40 years. Changes in place or purpose of use will be governed by rules established by the state engineer. The two major irrigation districts affected by this legislation are Elephant Butte irrigation district and Carlsbad irrigation district. The leased water may be used for water treatment plants supplying water for municipal and industrial uses or for meeting compact delivery requirements to Texas.

House Bill 910 (Chapter 133) requires the energy, minerals and natural resources department to develop a statewide watershed restoration strategy to reestablish the natural ecology of watersheds throughout New Mexico. The department is required to set guidelines for coordination with other state and federal agencies, political subdivisions of the state, soil and water conservation districts and other stakeholders. The strategy is to include incentives to encourage business formation for thinning projects, incentives to encourage biomass energy use, and the use of inmates in these cleanup efforts.

Senate Judiciary Committee Substitute for Senate Conservation Committee Substitute for Senate Bill 128 (Chapter 67) provides that improved irrigation methods resulting in the conservation of water shall not affect an owner's water rights, thus ensuring that state policy does not create a disincentive for implementing new irrigation methods.

Municipalities, counties and any other person that supplies, distributes or otherwise provides at least 500 acre feet of water annually for domestic, commercial, industrial or government customers for uses other than for agriculture are encouraged to develop comprehensive water conservation and drought management plans by **Senate Bill 554 (Chapter 138)**. Plans may be submitted to the state engineer by December 31, 2005 and must be consistent with regional water plans and accompanied by a program for implementation. The bill requires that loan and grant applications to the New Mexico finance authority or water trust board received after December 31, 2005 be accompanied by a copy of the water conservation plan before an applicant is eligible to receive a loan or grant.

Senate Bill 551 (Chapter 63) creates statutory authority for the state engineer to administer water rights based upon priority dates recorded with, declared to or otherwise available to the office of the state engineer. The purpose of this bill is to remove any ambiguity that might lead to court challenges to the state engineer's authority to enforce priorities in those stream basins where the water rights adjudication process has not been completed, but overuse of water may necessitate priority administration. The bill also requires the state engineer to issue rules based upon hydrologic models to promote expedited marketing and leasing of water in areas affected by priority administration.

Senate Bill 742 (Chapter 206) adds the interstate stream commission to the governmental entities allowed to store water underground pursuant to the Ground Water Storage and Recovery Act. Chapter 206 allows the interstate stream commission a method to store water it purchases for compliance with interstate compacts that would not be subject to evaporative losses.

Senate Conservation Committee Substitute for Senate Bill 832 (Chapter 209) requires the office of the state engineer to purchase, install and study prototypes of alternative devices that accurately measure the flow of river water on a real-time basis. The state engineer is to consult with Los Alamos national laboratory, Sandia national laboratories and the United States geological survey in this effort.

Water Project Financing

Water project financing got a boost this year with the adoption of **House Bill 882 (Chapter 134)**, which authorizes the state board of finance to issue severance tax bonds in an amount equal to 10% of the total amount of bonding capacity available for severance tax bonds each year to fund water projects statewide. The water trust board will certify water projects that need funding, and the New Mexico finance authority will provide the water trust board with a list of recommended projects. In related bills, the Water Project Finance Act is amended by **House Bill 203 (Chapter 365)** to require the creation of a drought strike team for coordinating responses to emergency water shortages and to require that water use efficiency be used as a criterion for financial assistance from the water project fund. The bill also clarifies that the term "endangered species" refers to the term in the federal Endangered Species Act of 1973. **Senate Bill 273 (Chapter 61)** increases the aggregate amount of grants that may be made from the water and wastewater project grant fund for emergency public projects from \$3 million to \$6 million for fiscal years 2003 through 2005. The aggregate amount in fiscal year 2006 and subsequent years authorized for emergency projects shall not exceed \$3 million. **Senate Bill 109 (Chapter 105)** appropriates \$1,610,500 from the public project revolving fund to the drinking water state revolving loan fund to provide a 20% state match for a capitalization grant from the federal environmental protection agency for implementation of the Drinking Water State Revolving Loan Fund Act. **Senate Finance Committee Substitute for Senate Finance Committee**

Substitute for Senate Bill 655 (Chapter 83, p.v.) appropriates \$1 million to the department of finance and administration for the water and wastewater planning fund to provide grants for feasibility studies and planning of local water and wastewater systems.

Senate Bill 841 (Chapter 139) amends the Water Project Finance Act to:

A. expand the definition of a "political subdivision" to include water and sanitation districts or associations organized and existing under the Sanitary Projects Act, including mutual domestic water users' associations;

B. clarify the definition of a "qualifying entity" to include a political subdivision of the state or a recognized Indian nation, tribe or pueblo, the boundaries of which are located wholly or partially in New Mexico;

C. expand the conditions of grants or loans to give priority to projects that are in a regional water plan, are urgent to meet the needs of that area and have matching contributions from federal or local funding sources;

D. require that the appropriate state and federal permits and authorizations be obtained prior to initiating or funding the project;

E. clarify that "endangered species" refers to the federal Endangered Species Act of 1973;

F. require qualifying water projects to include conservation, recycling, treatment or reuse of water;

G. provide that the service area for a project is wholly within boundaries of the state; and

H. require that plans and specifications be approved by the New Mexico finance authority after review and recommendation by the state engineer and the department of environment.

Senate Bill 843 (Chapter 140) authorizes the water trust board to make loans or grants for specified water projects and lists 14 projects as qualifying for grants or loans. The authorizations total almost all of the \$10 million currently available in the water projects fund.
