

A MEMORIAL

REQUESTING THE CARSON NATIONAL FOREST SUPERVISOR TO  
WITHDRAW PROPOSED CHANGES TO THE CARSON NATIONAL FOREST  
MANAGEMENT PLAN FOR THE JICARILLA RANGER DISTRICT.

WHEREAS, the United States depends upon the availability of energy  
supplies to protect the health and safety of its citizens, to provide for the payment  
for services such as education and infrastructure, to provide for economic stability  
and to provide for continued economic progress and growth; and

1

WHEREAS, the state of New Mexico is a national leader in the production of  
natural gas and oil, which has benefited the citizens of this state through the  
payment of taxes and royalties, the creation of jobs and the provision of supplies  
and services used by that industry and has benefited the nation by supplying  
needed energy resources; and

WHEREAS, significant reserves of oil and natural gas are located on federal  
lands controlled by the United States forest service of the department of agriculture  
and the bureau of land management of the department of the interior; and

WHEREAS, lands controlled by the forest service in the San Juan basin of  
northwest New Mexico located within the Jicarilla ranger district of the Carson  
national forest contain more than one trillion cubic feet of recoverable natural gas  
resources; and

WHEREAS, the staff of the Carson national forest is proposing to eliminate  
development access to more than two-thirds of the natural gas resources in the  
Jicarilla ranger district; and

WHEREAS, the bureau of land management has recently completed an  
extensive planning process and has published a revised resource management plan  
for the entire New Mexico portion of the San Juan basin, including the Jicarilla

ranger district; and

WHEREAS, the forest service has recently published its own draft environmental impact statement, which has not adequately addressed the responsible development of energy resources within the Jicarilla ranger district and has not coordinated its regulation of development with the bureau of land management resource plan; and

WHEREAS, the draft environmental impact statement threatens to reduce the available supply of natural gas from the Jicarilla ranger district by more than sixty-eight percent, and this reduction threatens the availability of revenue to fund education, health and safety programs that would benefit the citizens of New Mexico and threatens economic stability and job growth in New Mexico's less advantaged and poorest rural areas; and

WHEREAS, it is possible to regulate the development of natural gas reserves using methods that are prudent for the health and safety of citizens to provide for the multiple use of federal lands; to provide energy supplies for the benefit of the citizens of New Mexico and the nation and to provide needed revenues for governmental operations and economic growth;

NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF NEW MEXICO that the Carson national forest and forest service of the United States department of agriculture be encouraged to withdraw the pending proposal to change the Carson national forest management plan for the Jicarilla ranger district and the draft environmental impact statement issued to support that proposal; and

BE IT FURTHER RESOLVED that the Carson national forest and forest service of the United States department of agriculture be encouraged to study alternatives that will increase the availability of energy resources from the Jicarilla ranger district; increase local, state and federal government revenues from those
