

Fiscal impact reports (FIRs) are prepared by the Legislative Finance Committee (LFC) for standing finance committees of the NM Legislature. The LFC does not assume responsibility for the accuracy of these reports if they are used for other purposes.

Current FIRs (in HTML & Adobe PDF formats) are available on the NM Legislative Website (legis.state.nm.us). Adobe PDF versions include all attachments, whereas HTML versions may not. Previously issued FIRs and attachments may be obtained from the LFC in Suite 101 of the State Capitol Building North.

### SUMMARY

#### Synopsis of Bill

House Bill 219 appropriates \$100 thousand from the general fund to the New Mexico Institute of Mining and Technology to provide training in computational methods in science, math, engineering and technology to students and to prepare teachers to use computational science techniques in their classroom.

### FISCAL IMPLICATIONS

The appropriation of \$100 thousand contained in this bill is a recurring expense to the general fund. Any unexpended or unencumbered balance remaining at the end of fiscal year 2011 shall revert to the general fund.

### SIGNIFICANT ISSUES

The appropriation contained in this bill is planned to be used to support the continued work of the New Mexico Supercomputing Challenge.

This appropriation would be used to support the continued work of the New Mexico Supercomputing Challenge, a program that takes place during the school year in which teams of students complete science projects using high-performance supercomputers. Each team of up to five students and a sponsoring teacher defines and works on a single computational project of its own choosing. The funding is used partly to train teachers to become supercomputing coaches; part is used to sponsor the events. About 350 students participate in the Supercomputing Challenge annually according to information on the program's web page.

**PEFORMANCE IMPLICATIONS**

Teachers better prepared in computational science techniques can better prepare students for the challenges of college and the 21st Century economy. Students who have had the Supercomputer Challenge experience are particularly prepared to pursue degrees in STEM fields.
