the prior taxable year and the denominator of which is the consumer price index ending in tax year 2022. The result of the multiplication shall be rounded down to the nearest one dollar ($1.00), except that if the result would be an amount less than the corresponding amount for the preceding taxable year, then no adjustment shall be made.

G. For the 2024 taxable year and each subsequent taxable year, the amount of modified gross income shown in the table in Subsection D of this section shall be adjusted to account for inflation. The department shall make the adjustment by multiplying each amount of modified gross income by a fraction, the numerator of which is the consumer price index ending during the prior taxable year and the denominator of which is the consumer price index ending in tax year 2022. The result of the multiplication shall be rounded down to the nearest one hundred dollars ($100), except that if the result would be an amount less than the corresponding amount for the preceding taxable year, then no adjustment shall be made.

H. The tax rebates provided for in this section may be deducted from the taxpayer's New Mexico income tax liability for the taxable year. If the tax rebates exceed the taxpayer's income tax liability, the excess shall be refunded to the taxpayer.

I. For purposes of this section:

(2) "dependent" means "dependent" as defined by Section 152 of the Internal Revenue Code of 1986, as that section may be amended or renumbered, but also includes any minor child or stepchild of the resident who would be a dependent for federal income tax purposes if the public assistance contributing to the support of the child or stepchild was considered to have been contributed by the resident."
