the alternative procedures for determining competency to test or for taking the testimony of the witness with a developmental or intellectual disability described below, provided that the court finds at the time of the order, by a preponderance of the evidence in the case, that the witness with a developmental or intellectual disability is likely, as a result of submitting to usual procedures for determining competency or as a result of testifying in open court:

(1) to suffer unreasonable and unnecessary mental or emotional harm; or

(2) to suffer a temporary loss of or regression in cognitive or behavioral functioning or communicative abilities such that the witness's ability to testify will be significantly impaired.

C. If the court orders the use of an alternative procedure pursuant to this section, the court shall make and enter specific findings on the record describing the reasons for such order.

D. A court that makes findings in accordance with Subsection B of this section may order any of the following suitable alternative procedures for determining the competency to testify or for taking the testimony of the witness with a developmental or intellectual disability:

person familiar to the witness such as a family member,
clinician, counselor, social worker or friend to sit near or

parties; or

in combination with Paragraph (2), (3) or (4) of this
subsection.

E. Testimony taken by a videotape pursuant to an
order issued as provided in Subsection B of this section
shall be taken in the presence of the judge, counsel for all
parties and such other persons as the court may allow.
Counsel shall be given the opportunity to examine, confront
or cross-examine the witness with a developmental or
intellectual disability to the same extent as would be
permitted if ordinary procedures had been followed, subject
to such protection of the witness as the judge deems
necessary.

F. An order issued pursuant to provisions of Subsection B of this section that the testimony of the witness with a developmental or intellectual disability be videotaped out of the presence of the jury shall provide that the videotape be shown in court to the jury in the presence of the judge, the parties and the parties' counsel. At such courtroom showing, the audio portion of the video shall be entered into the record as would any oral testimony and shall be treated in all respects as oral testimony to the jury.

G. The videotape or giving of testimony taken by an alternative procedure pursuant to an order issued as provided in Subsection B of this section shall be admissible as substantive evidence to the same extent as and in lieu of live testimony by the witness in any proceeding for which the order is issued or in any related proceeding against the same party when consistent with the interests of justice; provided that such an order is entered or re-entered based on current findings at the time when, or within a reasonable time before, the videotape or testimony is offered into evidence, and provided, in the case of a related criminal proceeding, that the requirements of Subsection E of this section were satisfied when the videotape was recorded or the alternative procedure was used.

H. Whenever, pursuant to an order issued as
provided in Subsection B of this section, testimony is recorded on videotape, the court shall ensure that:

(1) the recording equipment is capable of making an accurate recording and is operated by a competent operator;

(5) every voice on the recording is audible and identifiable;

(6) the recording is accurate, undistorted in picture or sound quality and has not been altered except as ordered by the court; and

(7) each party is afforded the opportunity to view the recording before it is shown in the courtroom.

I. The fact that the witness with a developmental or intellectual disability has been found in a court proceeding to be incompetent to make informed decisions of a
personal, medical or financial nature or is under a
guardianship or conservatorship shall not preclude the
witness from testifying if found competent to testify and,
further, shall not preclude a determination of competency to
testify.

J. The use of alternative procedures shall not be
denied because they may take significantly more time than
conventional procedures.

K. Expert opinion shall be admissible at any
hearing held pursuant to this section, including hearings to
determine the competency of a witness with a developmental or
intellectual disability to testify.

L. Nothing in this section shall be deemed to
prohibit the court from using other appropriate means,
consistent with this section and other laws and with the
defendant's rights, to protect a witness with a developmental
or intellectual disability from trauma during a court
proceeding."
