

Yazzie Proposed Remedy Platform

The Yazzie Proposed Remedy Platform, which is rooted in the District Court’s 7/20/18 opinion in *Yazzie/Martinez v. State of New Mexico*, is based on evidence from trial, and statewide input from Native American educational leaders, education experts, educators and community organizations. The Center on Law & Poverty held several individual meetings with experts, superintendents, and community stakeholders to develop the proposed remedies. The Center also held three large events, with hundreds of people in attendance, that focused on gathering input on the proposed remedies from the participants

The Yazzie Proposed Remedy Platform is a working document that will need continuous review and updating as we move forward working with plaintiff groups, experts, stakeholders, the community, and the State. The proposed remedies represent the minimum the state must do to meet its constitutional obligation to provide all children in New Mexico a sufficient education.
