## ACKNOWLEDGEMENTS

The Secretary of Education thanks the following individuals for their contributions to this report:
Alexis Alvarez, Deputy Director, Research, Evaluation and Accountability Bureau
Catalina Block, Business Operations Specialist, Language and Culture Division
Kadriye El-Atwani, Ph.D., Multicultural Education Specialist, Language and Culture Division
Judith Harmon, Statistician, Indian Education Division
Melissa Hernandez, Title III Specialist, Language and Culture Division
Leah Jimenez, Program Support Specialist, Language and Culture Division
Kirsi Laine, Deputy Director, Language and Culture Division
Mary Montoya, Chief Information Officer, Information Technology
Richard Trujillo, Deputy CIO, Information Technology
Mayra Valtierrez, Director of Language and Culture
Elena Valdez, Ph.D., Hispanic Education Specialist, Language and Culture Division

## Statutory Requirements

This section describes the laws and rules that apply to BMEPs in relevant part as follows:

## 22-23-4. Department; powers; duties. (2004)

A. The department shall issue rules for the development and implementation of bilingual multicultural education programs.
B. The department shall administer and enforce the provisions of the Bilingual Multicultural Education Act [22-23-1 NMSA 1978].
C. The department shall assist school boards in developing and evaluating bilingual multicultural education programs.
D. In the development, implementation and administration of the bilingual multicultural education programs, the department shall give preference to New Mexico residents who have received specialized training in bilingual education when hiring personnel.

## 22-23-5. Bilingual multicultural education program plan; evaluation. (2004)

A. The school board may prepare and submit to the department a bilingual multicultural education program plan in accordance with rules issued by the department.
B. At regular intervals, the school board and a parent advisory committee from the district shall review the goals and priorities of the plan and make appropriate recommendations to the department.
C. Bilingual multicultural education programs shall be located in the district and delivered as part of the regular academic program. Involvement of students in a bilingual multicultural education program shall not have the effect of segregating students by ethnic group, color or national origin.
D. Each district shall maintain academic achievement and language proficiency data and update the data annually to evaluate bilingual multicultural education program effectiveness and use of funds. The department shall annually compile and report this data to the appropriate interim legislative committee.

NOTE: Due to the unprecedented circumstances brought on by the COVID-19 pandemic and the closure of schools, the US Department of Education has granted the New Mexico Public Education Department (PED) a waiver to bypass assessment and accountability requirements under the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA). Thus, the student achievement data within this report was not collected during school year 2019-2020. Student data from 2018-2019 has been repeated.

## INTRODUCTION

The Language and Culture Division (LCD) provides accountability with support to districts ${ }^{2}$ that serve students participating in BMEPs so that all participating students achieve the program goals as outlined by New Mexico statute and administrative code, these are: 1) students become bilingual and biliterate in English and a second language, and 2) students meet all academic content standards and benchmarks in all subject areas. The purpose of the Bilingual Multicultural Education Annual Report is to comply with state statute and inform stakeholders regarding the state's BMEPs. The LCD actively works to streamline and provide data that can be used in meaningful and purposeful ways. To that aim, the report focuses on the four key areas listed below.

1. Reports data collected on district, school, and student participation;
2. Reports data collected regarding language proficiency in order to assess progress on the first goal of BMEPs for students to become bilingual and biliterate;
3. Reports achievement data based on the Istation, Partnership for Assessment of Readiness for College and Careers (PARCC) tests, the Transition Assessment in Math and English Language Arts (TAMELA), and on the New Mexico Standards Based Assessment (SBA) for relevant subgroups, to assess progress on the second goal of BMEPs for students to meet all academic content standards; and
4. Evaluates and determines program effectiveness and use of funds for BMEPs.

The following report provides data for the 2019-2020 school year (SY), including some longitudinal data for comparison over time. Not all data is uniform, and where this may factor into the interpretation of data results, it is noted. Due to the unprecedented circumstances brought on by the COVID-19 pandemic and the closure of schools, the US Department of Education has granted the New Mexico Public Education Department (PED) a waiver to bypass assessment and accountability requirements under the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA). Thus, the student achievement data within this report was not collected during school year 2019-2020. Student data from 2018-2019 has been repeated.

## Detailed Report

## State Map of Bilingual Multicultural Education Programs and Title III Sub-grantees by District 2019-2020

The map illustrates, by language, district participation in the state's BMEPs and districts that are recipients of the Title III Subgrant. ${ }^{3}$ In the 2019-2020 SY, $55 \%$ percent of school districts and $26 \%$ of State Charters in New Mexico implemented state-funded BMEPs.

[^2]
## District and School Participation in BMEPs

There are a total of 530 state-funded BMEPs within 429 schools across the state. Many schools offer more than one model to best meet the needs of its BMEP students. Figure 1 below, illustrates the total number of BMEPs by model. For a full list of BMEPs by district and charter school please see Appendix F.

## FIGURE 1: PERCENTAGE OF BMEPS BY MODEL, 2019-2020

SOURCE: Student Teacher Accountability Reporting System (STARS), 80th Day, 2019-2020

Table 1 below, reflects that in school year (SY) 2019-2020, the number of schools participating in BMEPs increased by 9 and the total number of districts and state charter schools with BMEPs only increased by two. Increased monitoring and improved technical assistance has provided much-needed clarification regarding program eligibility requirements that must be met in order for funding to be made available. Reasons for the increase in schools include: student demographic changes, change in parents' desires for their children to participate in programs, and quality of programming offered.

Table 1. District/School Participation in BMEPs SY 2015-2016 to SY 2019-2020

| Year | NM Districts |  | NM Schools |  |
| :--- | :--- | :--- | :--- | :--- |
|  | Total \# of <br> Districts | Total \# of Districts and State Charter <br> Schools with BMEPs | Total \# of <br> Schools*** | Total \# of Schools <br> with BMEPs |

| SY 19-20 | 89 | $62^{* *}(70 \%)$ | 865 | $429(50 \%)$ |

SOURCE: Student Teacher Accountability Reporting System (STARS), 80th Day, 2019-2020
*The total number includes 49 districts and 11 state charter schools.
** The total number includes 49 districts and 13 state charter schools.
***Total number of schools includes all public schools, state and district authorized charter schools, and state-supported schools. For SY 18-19 and 19-20 the number does not include state-supported schools. However, SY 19-20 includes pre-K only schools.

## Student Participation in BMEPs

BMEPs in New Mexico public schools are committed to providing quality services to a diverse student population from different ethnic and cultural backgrounds. The total number of students participating in New Mexico BMEPs in the SY 2019-2020 is 46,606 and represents 15 percent of the student population in New Mexico's public schools.

Student Participation in BMEPs by Ethnicity
The table below illustrates the number of students participating in BMEPs for the last five years.

| Year | Total \# of Students | Total \# of Hispanic Students |  | Total \# of Native American Students |  | Other Students |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| SY 19-20 | 320,581 | 36,030 | 162,938 | 7,246 | 25,257 | 3,330 | 85,780 |

SOURCE: STARS, 80th Day, SY 2019-2020, BEP and Student Snapshot Queries
Hispanic and/or Latino students comprise 62 percent $(198,968)$ of the total 320,581 student population attending the New Mexico public schools. Furthermore, Hispanic students comprised the largest ethnic group participating in BMEPs-with 36,030 students, or 77 percent of all students in the program.

Native American students accounted for 10 percent $(32,503)$ of the total population attending New Mexico's public schools. They comprised 16 percent of the students in BMEPs. In 2019-2020, the number of Other Students (including Caucasian, African American, and/or Asian students) represented 7 percent of students participating in BMEPs.

## Student Participation in BMEPs by English Language Proficiency

In the SY 2019-2020, 38 percent of all ELs participated in BMEPs. In comparing 2019-2020 to the previous year, the participation of EL students in BMEPs increased by 457 students, whereas the total number of ELs in the state increased by 915 students.

Table 3. Student Participation in BMEPs English Language Proficiency SY 2015-2016 to SY 2019-2020

| Year | Total \# of <br> Students <br> In BMEPs | Total Number of ELs |  |  |

## Participation in Spanish Language BMEPs

BMEPs in New Mexico continue to provide instruction in several languages. According to Table 4 below, the total number of Spanish bilingual programs increased, when compared to the previous year. Continued monitoring and improved technical assistance has provided much-needed clarification regarding the state-adopted Spanish Language Arts (SLA) standards and the BMEP models that best meet the needs of students in a school community. The total number of Native American language programs increased as well. 42 schools offered both Spanish and Native American language programs and one school offered a bilingual program in American Sign Language (ASL).

Table 4. District/School Participation by Languages Taught SY 2015-2016 to SY 2019-2020

| Year | \# and (\%) of Districts and State Charter Schools with BMEPs | \# and (\%) of Schools BMEPs | \# and (\%) of Spanish/English Programs | \# and (\%) of Native American/ English Programs |
| :---: | :---: | :---: | :---: | :---: |

SOURCE: STARS, 80th Day, 2019-2020
*Number and (\%) of Schools with Spanish/English and Native American/English programs. Some schools have both Spanish and Native American language programs.

## Native American Language Programs

Of the eight Native American languages spoken in New Mexico, seven were taught in public schools. The only Native American language of New Mexico that was not taught in public schools was Mescalero Apache. The Diné language had the highest number of Native American students enrolled, and the Tiwa language enrolled the smallest number of students. The total number of students participating in Native American language programs increased when compared to the previous year. Table 5 details these figures.

Student Participation in Native American Language Programs SY 2015-2016 to SY 2019-2020

| Year | Language and Number of Students Enrolled |  |  |  |  |  |  |  |

SOURCE: *STARS 80th Day (data in previous years taken out of district self-reported SharePoint Instructional Plans)

## Language Outcomes for BMEP Students

Per New Mexico's Bilingual Multicultural Education Act, and given the first statutory goal for BMEPs-that students become bilingual and biliterate-the PED via the LCD collates district-collected data on language proficiency for students participating in BMEPs. This data is used by the PED to evaluate BMEP effectiveness and use of funds. See Table 6 below.

Table 6 .
Measuring Progress of BMEP Goals
Data
Collected

## Goal 1: Students become bilingual and biliterate in English and a second language

English language proficiency
Language proficiency in the home or heritage language

To evaluate student performance in language proficiency in both English and the second language, various data are collected by school districts and reported to the LCD. The following subsections provide information regarding BMEP Goal 1. Students in BMEPs must be assessed for proficiency in the English language, which applies only to ELs, and in the home or heritage language (second language) until they reach proficiency.

The students who were assessed in the home or heritage language of the BMEP include the following groups:

- ELs
- Reclassified Fluent English Proficient (RFEP)
- Initially Fluent English Proficient (IFEP) students

To determine growth patterns within the language proficiency categories for a particular district, previous Bilingual Multicultural Education Annual Reports; they can be accessed at the LCD website found at:
https://webnew.ped.state.nm.us/bureaus/languageandculture/bilingual-multicultural-education-programsbmeps/resources/.

## English Language Proficiency

New Mexico is a member of the World-Class Instructional Design and Assessment (WIDA) Consortium since 2009 and first administered the English language proficiency test ACCESS for ELLs ${ }^{\circledR}$ in 2009-2010. New Mexico administers the ACCESS for ELLs© to all identified ELs in compliance with the ESEA, as amended, which mandates that all ELs in public schools be tested annually to assess their progress in acquiring English language proficiency. The ACCESS for ELLs ${ }^{\circledR}$ measures students' English language proficiency at six different levels: Entering, Emerging, Developing, Expanding, Bridging, and Reaching.

Table 7 below, details English language proficiency performance for ELs in BMEPs for the SYs 2017-2018 and 2018-2019, based on ACCESS for ELLs ${ }^{\circledR}$ results. In the 2018-2019 school year, the majority ( 43 percent) of ELs in state-funded BMEPs are scoring at the Developing (3) level, with 23 percent scoring at the Expanding (4), and three (3) percent at the Bridging (5) and Reaching (6) levels combined.

English language proficiency performance for ELs in BMEPs for the SYs 2017-2018 and 2018-2019

| Year | \# of ELs Tested | Entering Level 1 |  | Emerging Level 2 |  | Developing Level 3 |  | Expanding Level 4 |  | Bridging <br> Level 5 |  | Reaching Level 6 |  |

SOURCE: ACCESS for ELLs©, 2018-2019. Administered January-March of each year. STARS, BEP Query, 80th Day, 20182019. Note: Alternate ACCESS for ELLs© student data is not included.

Chart 1 below, illustrates slight change over the past year in ELs served in state-funded BMEPs. The ACCESS for ELLs ${ }^{\circledR}$ data reported in Table 7 reflects results after the assessment underwent a standards setting. The results from the 2017 administration of the assessment are regarded as baseline data.

Chart 1
One-Year comparison of English Language Proficiency for ELs in BMEP

## Spanish Language Proficiency

Spanish language proficiency data was submitted by 47 districts and 6 state charter schools, implementing English Spanish BMEPs in 2018-2019. A total of 34,845 students were assessed for Spanish language proficiency using one of the following language proficiency assessments: Woodcock-Muñoz Language Survey (Woodcock), Language Assessment Scales (LAS), the Individualized Proficiency Test (IPT), or Avant STAMP.

The total number of students tested and reported for Spanish language proficiency in 2018-2019 increased by 9,881 from the previous year. According to Table 8, 46 percent of students assessed in 2018-2019 were Non-Spanish Proficient (NSP) and 36 percent were Limited-Spanish Proficient (LSP). While the percentage of students who performed at the NSP level increased by 5 percent, those assessed at the LSP level increased by 2 percent from the 2017-2018 school year. Those students assessed at the Fluent Spanish Proficient (FSP) level was at 18 percent, which is lower than in 2017-2018

| Table 8. Statewide Range of BMEP-Student Spanish Proficiency SY 2014-2015 to SY 2018-2019 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |

| SY 17-18 | 24,964 | 10,275-(41) | 8,484-(34) | 6,205-(25) |
| SY 18-19 | 34,845 | 16,143 (46) | 12,655 (36) | 6,047 (18) |

SOURCE: Spanish language proficiency data reported to LCD by districts. Student who are proficient in Spanish, no longer take the Spanish language proficiency assessment.

Chart 2 below, illustrates little change over the past five years in BMEP students' Spanish proficiency levels between NonProficient and Limited-Proficient categories. In SY 2018-2019 however, 9,881 more students were reported as being assessed than in the previous school year. For Spanish language proficiency data-reported by each district, charter school, and state-chartered schools in 2018-2019—refer to Appendices A-C.

## Chart 2 <br> Five-Year Comparison of Spanish Language Proficiency

## Native American Language Proficiency

Students from Native American communities, who participate in BMEPs, are assessed for proficiency through formative assessments developed by each tribe or Native American community leaders and educators. The languages, for which data was submitted are Jicarilla Apache, Keres, Navajo (Diné), Tiwa, Tewa, Towa, and Zuni. Table 9 lists the range of Native language proficiency for students across the state for the past five years.

Table 9. Statewide Range of Native American Students' Language Proficiency SY 204-2015 to SY 2018-2019

| School Year | \# of Native American Students Reported | Native American Language Proficiency |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | \# of Non Proficient | \% | \# of Limited Proficient | \% | \# of Fluent Proficient | \% |
| SY 2014-2015 | 7,923 | 5,538 | 70 | 1,606 | 20 | 779 | 10 |
| SY 2015-2016 | 6,292 | 3,991 | 63 | 1,577 | 25 | 724 | 12 |
| SY 2016-2017 | 7,446 | 4,948 | 66 | 2,058 | 28 | 440 | 6 |
| SY 2017-2018 | 5,466 | 3,223 | 58 | 1,996 | 37 | 247 | 5 |
| SY 2018-2019 | 4,806 | 2,524 | 53 | 2,024 | 42 | 258 | 5 |

SOURCE: Native language proficiency data reported to LCD by districts.
Note: For SYs 2013-14 and 2015-16, one district did not submit data. For SY 2018-2019 four districts did not report data.
The number of students tested and reported for Native American language proficiency in 2018-2019 decreased by 12 percent (or 660 students) when compared to the previous year. Additionally, there was some variance in test results from 2017-2018 to 2018-2019. The percent of students who performed at the Non-Proficient level decreased by five percent and the Limited-Proficient level increased by five percent. The percent of students with performance at the Proficient/Advanced level remained the same at five percent. The data demonstrates progress in increasing Native American language proficiency. However, since data was not submitted by all districts and the number of students fluctuates, direct comparisons may not be appropriate and must be interpreted with care.

Chart 3 visually depicts the percentage of students scoring at each level of proficiency for the last five years for which data was submitted by districts. For Native language proficiency data reported by each district, charter schools, and statechartered schools in 2018-2019, refer to Appendix D.

## Proficiency in Other Languages

In addition to Spanish and Native American Languages, there is an American Sign Language (ASL) and English BMEP in which students from the deaf community may participate. The Albuquerque Sign Language Academy in Albuquerque is a Charter authorized by the state and employs a dual language model. The data for SY 2016-2017 and SY 2017-2018 reported to the LCD for the ASL Receptive test is below in Table 10. The data for 2017-2018 reflects an expected pattern of movement toward proficiency. Additionally, the number of students reported has decreased which may be due to the requirement to no longer assess students in the home or heritage language of the program once they have reached proficiency.

| Table 10. Statewide Range of American Sign Language Proficiency SY 2016-2017and SY 2017-2018 |
| :--- |
| School Year \# of ASL Students Reported American Sign Language Proficiency   <br>   \% of Non Proficient \% of Limited Proficient \% of Fluent Proficient <br> SY 2016-2017 $<2$ and $>98$ 45 23 32 <br> SY 2017-2018 $<5$ and $>95$ 23 31 46 |

NOTE: Where the number of students in individual cells was too small to report, cells were merged to further comply with FERPA.

## Academic Achievement for BMEP Students

Per New Mexico's Bilingual Multicultural Education Act, and given the second statutory goal for BMEPs—that students meet all content standards in all areas - the PED via the LCD and Accountability Bureau analyses district-collected data regarding the academic achievement data of students participating in BMEPs. This data is used by the PED to evaluate BMEP effectiveness and use of funds and to inform how to best provide relevant and timely technical assistance and support across the state. See Table 11 below.

Table 11. Measuring Progress of BMEP Goals
Data Collected

```
Goal 2: Students meet all academic content standards and benchmarks in all subject areas
    Istation Indicator of Progress (ISIP) early reading and ISIP lectura temprana
    Transition Assessment in Math and English Language Arts (TAMELA)
    Partnership for Assessment of Readiness for College and Careers (PARCC)
    New Mexico Alternate Performance Assessment (NMAPA)
    NM Standards Based Assessment (SBA) Reading
    NM SBA Science
```

The following subsections detail the main components used to evaluate the effectiveness of BMEPs' academic outcomes and effective use of funds generated by BMEPs.

## Academic Achievement Data in Reading

Table 12, presents reading achievement for grades K to 2 for BMEP and non-BMEP students. The results are interpretations of Istation's sophisticated, web-delivered computer-adaptive testing systems that are continuously monitored by frequent assessment and reporting of students' abilities in reading throughout the year. Istation's Indicators of Progress (ISIP) assessment system functions as both a universal screener and progress monitor tool for literacy. It serves by evaluating student progress, assisting teachers and staff with immediate feedback and analysis, providing teacher-directed reinforcing and lessons for students. The 2016-2017 SY was the first year the Istation assessment was administered to students.

## Istation Level Tiers

The tiers used for proficiency in Istation changed from 3 levels to 5 levels. In past years, Level 3 was proficient, and with the change for 2019, only Levels 4 and 5 are considered proficient. In past years the top 60 percent were considered proficient, but this year only the top 40 percent are considered proficient. Therefore, there is a dramatic change in K-2 proficiencies for 2018-2019.

Table 12. Average Statewide Proficiency of BMEP and non-BMEP on Reading Percentage of BMEP Students Scores in Grades K-2 SY 2017-2018 to SY 2018-2019

| Year | \# of Students Tested | Kinder |  | Grade 1 |  | Grade 2 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | NonBMEP | BMEP | NonBME P | BMEP | NonBMEP | BMEP |
| SY 17-18 | 71,526 | 63.1 | 56.6 | 61.4 | 57 | 69.5 | 63.4 |
| SY 18-19 | 69,039 | 27.9 | 33.4 | 30.9 | 29.5 | 41.2 | 37.0 |

Students in grades 3 to 11 took the PARCC assessment in reading in SY 2017-2018 and the Transition Assessment in Math and Language Arts (TAMELA) in reading in SY 2018-2019 that are used as an accountability measure for New Mexico districts and charter schools. The assessments are aligned to the New Mexico Common Core Standards, and New Mexico educators are engaged in the design and development of the tests. Table 13 provides the results from the reading assessments for grades 3 to 8 from the previous two years.

Table 13. Average Statewide Proficiency of BMEP and non-BMEP on Reading Percentage of BMEP Students Scores in Grades 3-8 SY 2017-2018 to SY 2018-2019

| SY 18-19 | 75,440 | 35.0 | 22.2 | 41.1 | 30.2 | 43.7 | 34.0 |

## Academic Achievement Data in Math

Students in grades 3 to 11 took the PARCC assessment for math in SY 2017-2018 and the Transition Assessment in Math and English Language Arts (TAMELA) in 2018-2019 and are evaluated with the NM Common Core State Standards. Table 15 provides PARCC math results from SY 2017-2018 and TAMELA results for SY 2018-2019 in math proficiency for students in grade 3 to 8 for both BMEP and non-BMEP students.

Table 15. Average Statewide Proficiency of BMEP and non-BMEP on Math

## Academic Achievement Data in Science

New Mexico determines student proficiency in science through the Standards-Based Assessment (SBA). The SBA has been in place since 2005 and assesses students in grades 4, 7, and 11. This test measures how well students are learning the New Mexico Content Standards, Benchmarks, and Performance Standards. The data illustrated in Table 17 below represents the 2017-2018 and 2018-2019 SY results on the SBA assessment.

| Table 17. Average Statewide Proficiency of BMEP and non-BMEP on Science Percentage of BMEP Students Scores in Grades 4, 7 \& 11 <br> SY 2017-2018 to SY 2018-2019 |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Year | \# of Students Tested | Grade 4 |  | Grade 7 |  | Grade 11 |  |
|  |  | NonBMEP | BMEP | NonBMEP | BMEP | NonBMEP | BMEP |
| $\begin{gathered} S Y \\ 17-18 \end{gathered}$ | 84,322 | 49.3 | 35.2 | 45.4 | 24.7 | 28 | 20.9 |

## School Accountability

In 2019 New Mexico (NM) Vistas was created to help New Mexico schools provide a great education for New Mexico's students and to help families and others in our communities identify schools that are doing well in relation to their family and the community's values. NM Vistas replaces the A-F school grading system and allows families to review school data, insights, and offerings to make informed school choice decisions. NM Vistas also helps to identify schools that may need extra support. To achieve these goals, NM Vistas provides information on a variety of measures of school quality and success. In addition to these measures, NM Vistas allows schools and districts to describe some of the most important facts about their goals and their approach to achieving them. Together, this information tells a vivid story of how well New Mexico's schools are doing to prepare students for their futures. For more information on NM Vistas, please see https://newmexicoschools.com/.

## BMEP Expenditures by Districts and Charter Schools

The Bilingual Multicultural Education regulation, 6.32.2 NMAC (based on the Bilingual Multicultural Education Act, 22-231 NMSA 1978, as amended) requires districts to report the use of BMEP funds by September $30^{\text {th }}$ of each year. Two aspects of program expenditures are reviewed: total operational and BMEP expenditures by district and total BMEP expenditures by function. All the reported expenditures for BMEPs cited use of BMEP funding for salaries with one exception; six districts reported both the 1000 and 2100 functions. For additional information by district on the expenditures and functions reported please, see Appendix F.

In addition to submitting expenditures from its general ledger, the LCD also requires districts to provide narrative responses to a set of budget-focused questions. The questions are asked with the purpose of better understanding how districts expend funding generated by their BMEPs. The responses are illustrated in Figures 2-5.

| Table 19. <br> Total Bilingual Multicultural Education Program Funds Allocated to Districts |  |  |  |
| :---: | :---: | :---: | :---: |
| School Year | DISTRICTS Receiving BMEP Funding | Charter Schools Receiving BMEP Funding | Total BMEP Funds Allocated to Districts and Charters |
| SY 15-16 | 55 | 29 | \$36.9 million |
| SY 16-17 | 53 | 27 | \$35.1 million |
| SY 17-18 | 50 | 24* | \$34.1 million |
| SY 18-19 | 48 | 23* | \$35.1 million |
| SY 19-20 | 49 | 27* | \$36.9 million |

SOURCE: PED School Budget and Finance Analysis Bureau. Note: *Includes state and locally authorized charter schools
Based on the final funded amount generated by the bilingual cost differential in the funding formula for 2019-2020, districts and charter schools were allocated $\$ 36,869,521.33$ through the state equalization guarantee (SEG) for their BMEPs. The allocated amount is based on student membership and is calculated based on New Mexico's public school funding formula. Above, Table 19 shows the total amount allocated to districts during the last five academic school years. For the district-level list, see Appendix F, Total Operational BMEP Allocations by Districts and Charter Schools.

## Parent Advisory Committees

An important question relates to supporting the parent advisory committees (PACs) required by statute (22-23-6 NMSA) and regulation (6.32.2.10 NMAC). BMEPs are required to establish PACs that are representative of the language and culture of the students to assist and advise in the development, implementation, and evaluation of the program. To better
understand how districts expended BMEP funding to support their PACs, the following question was posed and the responses are illustrated in Figure 2.

What amount of your State Equalization Guarantee funds generated from your BMEP is expended to develop and support Parent Advisory Committee establishment and activities?

## Figure 2: BMEP Funding for Parent Advisory Committees (PACs) Total Responses: 67

17 - No Funds Used for PAC 20 - BMEP Funding Used for PAC 26 - Other Funds Used for PAC 1 - No Response 2 - No PAC Indicated 1 - Not Sure

```
_ No Funds Used for PAC
- No Response
■ BMEP Funding Used for PAC ■ Other Funds Used for PAC
■ No PAC Indicated ■ Not Sure
```

SOURCE: District and charter school annual progress reports submitted to the LCD.

In order for parents to be treated as equal partners and participate actively in accordance with statue and regulation, districts must invest in supporting PACs to ensure meaningful collaboration. District self-reporting, as illustrated in Figure 2, indicates that minimal BMEP funding is expended on PACs with 30 percent of responses indicating that BMEP funding is used to support PACs. However, 39 percent of responses indicated other funds are used to support PACs. It is important to note that in the count for No Funds Used for PAC, some responses indicated that due to the COVID 19 pandemic, PAC meetings were held virtually, thus no funding was expended in the 19-20 school year. It is not clear that parents can meaningfully advise or assist with the evaluation of the BMEPs in which their children are served without robust support of PACs. The LCD continues to work with districts, providing them guidance in establishing effective PACs that will increase family engagement in BMEPs and in their children's education opportunities.

## Professional Development

Another important question relates on professional development (PD), as required in 22-23-5 NMSA and 6.32.2.13 NMAC. To better understand expenditures, the following question was asked and the responses are below in Figure 3.

What amount of your State Equalization Guarantee funds generated from your BMEP is expended to develop and support professional development for teaching in English and the home or heritage (program) language?

Figure 3: BMEP Funding for Professional Development (PD) Total Responses: 67

33 - BMEP Funding Used
23 - Other Funding Used
5- No Funds Used
3 - No Response
3 - Not Clear

SOURCE: District and charter school annual progress reports submitted to the LCD.

State statue and regulation clearly state that districts are required to provide PD for its BMEP staff, including teachers, teachers assistants, principals, bilingual directors or coordinators, associate superintendents, superintendents, and financial officers. Given the importance of PD in supporting teacher capacity building and program implementation, district and charter school self-reporting indicates that only 49 percent use some of the BMEP funding to directly support with PD. Thus, the LCD will continue to provide increased technical assistance and guidance to assist districts and schools implementing BMEPs to better understand their obligations under state law. In addition, the LCD will increase its collaboration with a wider range of partners to support PD through various channels across the state. See Figure 3 for a visual analysis of responses to the PD question.

## Program-funding Alignment

A critical priority for districts implementing BMEPs is to ensure that there is close alignment between the program and the funding. That is, decisions about spending must be informed by program goals. State statue (22-23-1.1 NMSA) and regulation (6.32.2.9 NMAC) are clear about the purposes and goals of BMEPs-students participating in BMEPs must become both bilingual/bilterate and meet all academic content standards and benchmarks. To better understand how districts plan to create better alignment of resources to achieve desired outcomes; the following question was posed to districts:

How do the expenditures proposed on the 2019-2020 submitted BMEP application align to the BME statutory and regulatory goals of BMEPs?

# Figure 4: How Do Expenditures Align with Program Goals? <br> Total Responses: 67 

> 44 - Expenditures Align with Goals
> 10 - Funding Used for Salaries or Stipends
> 7 - Funding Used for Instructional Materials or Supplies or PD or Assessments

3 - No Response
3 - Response Unclear

```
■ Expenditures Align with Goals
■ Funding Used for Salaries/Stipends
\squareFunding Used for Instructional Materials/Supplies/PD/Assessments
|
Response Unclear
```

SOURCE: District annual progress reports submitted to the LCD.
Over the years, districts have self-reported that BMEP funding is primarily used to pay for teacher base salaries and, in some cases, additional compensation. Figure 4 visually provides the range of response to the question on programfunding alignment. District self-reporting indicates that 66 percent of responses specifically address how their expenditures align with BMEP goals by citing resources that directly support the implementation of BMEPs. Another 15 percent of responses specifically cite salaries and teacher compensation. It is reasonable to use funds generated by the bilingual education cost differential to cover the unique costs incurred by implementing a BMEP-such as stipends (bilingual and TESOL endorsements and NALC certification), instructional materials, and professional development in the home or heritage language of the BMEP. However, in the absence of BMEPs, districts would not receive the corresponding bilingual education cost differential and would still be required to provide students with teachers, and thus be required to cover such base salaries. Given the responses, the LCD will continue to work with districts implementing BMEPs by providing further guidance and technical assistance that supports achieving statutory and regulatory goals.

## Program Effectiveness

While BMEP funding is non-categorical and considered discretionary operational monies, it is important to note that such funding is only provided on the basis of providing effective programs that comply with all applicable state statutes and regulations. The State of New Mexico has long prioritized bilingual multicultural education. By choosing to fund BMEPs, the state demonstrates that linguistic diversity is highly valued as both a public resource and personal asset. The state benefits from an educated workforce that is prepared to meet local community needs, such as bilingualism and cultural competency. Parents and families expect that BMEPs will deliver on their promise that students participating in BMEPs will become bilingual/biliterate while meeting all academic content area standards and benchmarks. To better understand how districts leverage their BMEP funding to ensure program effectiveness, the following question was posed:

What amount of your State Equalization Guarantee funds generated from your BMEP is expended to develop and support program effectiveness, on which program renewal depends?

> Figure 5: Amount of BMEP Funding Used to Develop or Support BMEP Effectiveness Total Responses: 67

Used for Developing Effectiveness ■ Used for Salaries, Materials, or PD, etc.

- No Funds for Developing Effectiveness ■ No Response

28 - Used for Developing Effectiveness
30 - Used for Salaries, Materials, or PD, etc.
6 - No Funds for Developing Effectiveness 3- No Response

SOURCE: District annual progress reports submitted to the LCD.
Again, BMEP funding is contingent upon BMEP effectiveness in meeting the two statutory goals and complying with all BMEP statutory and regulatory requirements. Given that BMEP funding is generated by the students participating in (and eligible teachers supporting) BMEPs, it is imperative that such funding be used to ensure program effectiveness and implementation. BMEPs that do not meet program goals or are not compliant with all applicable state statutes and regulations may not be eligible for renewal. See Figure 5 for a visual analysis of responses to the question on funds supporting BMEPs.

## ReCommendations

The LCD conducts desktop monitoring and technical assistance and focused monitoring (TAFM) visits for BMEPs. The LCD also actively engages district leadership and educators to inform the LCD's accountability and support for BMEPs. In addition to those implementing BMEPs, the LCD engages advocates and stakeholders in the state as well as the Bilingual Multicultural Education Advisory Council (BMEAC) and educator Taskforces to consider how to move forward in improving
the quality of instruction and outcomes for students participating in state-funded BMEPs. The following recommendations are a result of all of the aforementioned work and efforts.

| Recommendations for moving districts forward and strengthening BMEPs |  |
| :---: | :---: |
| Indicator | Action |
| Fiscal Monitoring | Continue to work with districts, PED School Budget Bureau, and PED Data Quality Bureau (STARS team) to ensure that reporting for BMEPs is streamlined. This lessens the burden on reporting so that districts can concentrate on BMEP implementation. Further, it ensures that the funding generated is based on accurate information on eligible BMEPs reported by districts. <br> Provide training to district school boards, superintendents and chief financial officers on BMEP statutory and regulatory requirements to inform fiscal support for BMEPs. <br> Proposal from PED to provide additional funding for BMEPs and move from above the line to middle of the line in response to requests from district BMEP directors and educators. |
| Monitoring Programs for Accountability | Continue conducting regular visits to evaluate how districts monitor and support their BMEPs. Focus on program outcomes toward the two goals of BMEPs, compliance with statute and regulation, and program support and resource allocation. <br> Conduct announced and/or unannounced visits to districts and schools to monitor program implementation (instructional time, courses, and daily instruction) as reported for STARS data validation periods and in alignment with the approved BMEP application. <br> Conduct monitoring visits targeting academic rigor in instruction that is aligned to Spanish language arts, Spanish language development and English language development standards or tribal requirements for students in BMEPs. <br> Streamline the process of monitoring districts that is aligned to other efforts under ESSA such as the NM DASH, STARS, and the Operating Budget Management System (OBMS). |
| Professional Development (PD) | As recommended by the BMEAC, continue to offer relevant technical assistance and guidance to district BME directors and other district staff via professional learning sessions that promote effective leadership, instruction, and greater consistency and depth of programs. <br> Continue to collaborate with partner organizations, and encourage districts to do so as well, to provide ongoing technical assistance and PD training opportunities for district staff as required in statute and regulation. |
| Student <br> Academic <br> Language <br> Development and <br> Performance | Support districts with analyzing, monitoring, and disseminating meaningful demographic and academic performance data to educators in BMEPs to ensure all students' academic and linguistic needs are addressed through effective instruction and program implementation. <br> Request funding for and conduct a Request for Proposal (RFP) for a Spanish language arts assessment aligned to the common core, as an accommodation for eligible ELs in the state as allowable under Title I and NM administrative code. <br> Work with the Higher Education Department to ensure graduates that were awarded the State Seal of Bilingualism - Biliteracy receive language credit for college. |
| Teacher Effectiveness | Encourage the recruitment and support of effective teachers working within the BMEPs and promote supplemental language programming as a means for teachers to improve home/heritage language competency for effective classroom instruction in the home/heritage language. <br> Continue to partner with the Educator Growth and Development Bureau on reflective instructional practices and tools-such as the Elevate NM Classroom Rubric-to support rigorous, culturally and linguistically responsive teaching and learning in BMEPs. <br> As recommended by the BMEAC, work on creating a BMEP teacher pipeline in tribal and world languages that can include alternative certification programs, scholarships and students that have received the State Seal of Bilingualism - Biliteracy. |

The above list is not exhaustive, and the LCD will ensure that its work is aligned with current and future PED initiatives. It is imperative that the academic, cultural, and linguistic needs of all students are addressed in a culturally and linguistic responsive manner through rigorous and effective student-centered programming and teaching, integrated instructional planning, and strong program management at all levels.

## Source: 2019-2020 Expenditure Report data from the general ledger, as reported by districts.

NOTE: Not all districts or charter schools submitted data. The final funded bilingual amount is based on the bilingual education cost differential in the funding formula generated by each district. The bilingual education units are largely determined by the full-time equivalent (FTE) factor, which is driven by the reported student membership across program
intensity (number of hours). The student membership counts reported into STARS at the 80th and 120th day from the previous year are averaged. The average of the FTE is multiplied by the bilingual education program factor (which is 0.5 ) and the unit value, which may change annually.

300 Don Gaspar
Santa Fe, NM 87501
