

100% Community

Replacing childhood trauma and social adversity with resilience and equity

OUR COLLABORATIVE LOCAL PROCESS

Until now, there has been no state or local entity designed to confront and end the collision of trauma and social adversity. There is no system to ensure families have access to the ten services needed for survival and thriving, including trauma-informed behavioral health care.

Phase 1: Assessment

- Form collaboration in each county
- Implement the **Resilient Community Experience Survey**
- **Identify gaps in services** in ten family service areas

Phase 2: Planning and Action

- Develop with local leaders task forces/action teams
- Train action team members with **100% Community** course
- Action teams develop change initiatives focused on gaps
- Increase the quality and quantity of ten services

Phase 3: Evaluation, Scaling, and Sustainability

- Conduct rigorous evaluation of all activities
- Evaluate progress of all change initiatives
- Measure increase in access to ten services
- Support collaboration with local elected leaders

We're working to ensure that **ten services** are accessible so that 100% of New Mexico thrives.

The New Mexico "100% Community" Initiative

To ensure trauma-free and thriving families, students, communities, and local economies

EXECUTIVE SUMMARY

Ending the epidemic of trauma and disparities here and across the US, requires that we address root causes and a collision of two interrelated challenges: **trauma and social adversity**.

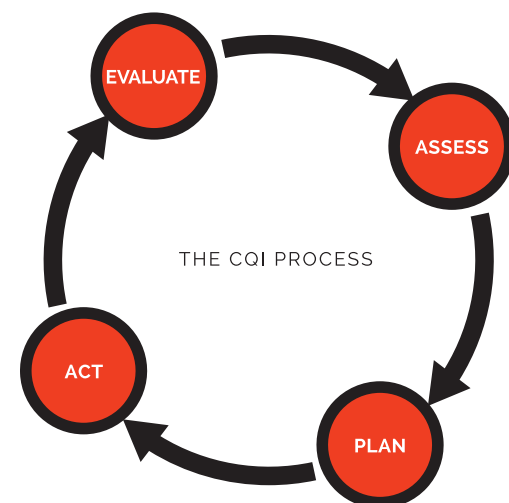

First, we face historical trauma and adverse childhood experiences leading to emotional challenges, violence, and self-medication.

Second, we live in a society that tells our most vulnerable populations to fix themselves without support. Families are trapped in a cycle of addiction, poverty, fear, and disempowerment.

We're implementing **100% Community**, guided by the social determinants of health, creating a systematic way for counties to strengthen resources with the process of Continuous Quality Improvement.

In the spirit of Maslow's Hierarchy of Needs: **we're moving families and communities from surviving to thriving**.

We're community-empowered and data-driven, ensuring that family-friendly services exist. Our goal is a New Mexico where trauma and disparities are replaced with resilience and equity.

Our Framework

We are a data-driven process using the continuous quality improvement (CQI) framework.
