

Consensus General Fund Revenue Outlook

New Mexico Department of Finance and Administration

Presented to the
Legislative Finance Committee
December 5, 2016

Overview

- Recent New Mexico economic data has been below expectations and the New Mexico macroeconomic forecast has been revised lower since August
- Declining oil and natural gas prices continue to impact New Mexico's revenues directly and indirectly, as in other states with large energy sectors such as Oklahoma
- US policy uncertainty has increased and global uncertainty remains high.

Historically low Inflation = lower nominal revenue growth

- *FY2015 and FY2016 lowest inflation in 60 years*
- *Had been relatively stable for decades:*
 - *10 year average 2005-2014 = 2.4%*
 - *10 year average 1995-2004 = 2.4%*

Interest Rates begin to increase

- Federal Funds Rate Expected to increase in December

Across the board plummeting commodity prices have hit New Mexico's economy and revenues

- Global supply/demand factors and historic currency movements impacted a range of New Mexico industries
 - Oil
 - Natural Gas
 - Coal
 - Potash
 - Agriculture
 - US dollar priced exports
- Direct impacts on Severance Taxes & Rents/Royalties have been significant
- As energy production becomes more high tech and high capital, direct and indirect impacts on other revenues (GRT, PIT, CIT, etc.) have been historically unprecedented

After years of relative stability oil prices plummeted

- *High: \$113.39/BBL (April 2011)*
- *Low: \$26.19/BBL (February 2016)*

- Losses in the Northwest and Southeast overwhelmed growth in the remainder of the state

Gross Receipts Tax

- Projected decline of 5.4 percent in FY17
- Gross Receipts Tax negatively impacted by Section 7-9-93 healthcare deduction
- Eddy and Lea counties continue to drag on GRT growth due to relative oil and natural gas weakness
- Due to increased efficiencies and cost savings, extraction generates less GRT per rig

Gross Receipts Tax

- Projected GRT revenue increase of 7.5 percent in FY18
- 3.5% growth from improving economic factors such as recovering oil and gas prices
- 4.0% growth from less deductions and credits
- High-wage credits and Medical deductions expected to be significantly lower than FY17 and will contribute to FY18 growth rate

- While volumes remained high, price drops severely impacted oil and natural gas revenue
- Energy sector's reduction in spending, employment, and profits also led to severe direct and indirect impacts to sales and income revenue
- Details in Appendix 1

Private Employment Growth

Increased Diversification

- Historically highly-reliant on federal government and energy sector
- Greater proportion of employment base in other industries
