We are moving towards a paperless system. We have started with converting search requests and match comparisons records to an electronic format and will be converting testing records in the future. Once complete we will focus on incoming documentation.

Using federal grant funding we have completely upgraded and replaced all CODIS computers (servers and workstations) and all software state wide. (NMDIS, DPS and ABQ PD)

We have grant funding currently allocated towards upgrading all sample tracking software and computers as well as the sample collection website used by the collectors for onsite tracking and confirmation of collections. We have a target completion date of July 2017

We are in the process of converting to a new DNA "megaplex" testing kit to address new requirements put out by the Federal Bureau of investigation. We have a target completion date of January 1, 2017.

Rule changes :

TITLE 10   PUBLIC SAFETY & LAW ENFORCEMENT
CHAPTER 14 CORRECTIONAL SERVICES
PART 200   DNA IDENTIFICATION SYSTEM
- Address the move to paperless
- Clarify the reporting language related to hit and match
- Define the level of training required by collectors
- Clarify definitions of packaging of samples
- Clarify the requirements and restrictions on comparing database records to sample records outside of the database
- Address required testing kit changes specified by the Federal Bureau of investigation.
