Partnering with New Mexico's communities to provide quality, sustainable school facilities for our students and educators.

High-Level View

As displayed below, broadband originates from Internet Service Providers (ISP), is distributed to districts/schools and then reaches students via end-user devices. The green area is covered by the BDCP.

FCC goals

GOALS

The FCC has adopted goals for K-12 connectivity. In this report we used the goals as a benchmark for where students are today

Purpose	2014	2018
Internet access	100 kbps per student/staff	1 Mbps per student/staff
District transport (WAN)	*1 Gbps per school	Scalable to 10 Gbps per school

More information: <https://www.fcc.gov/page/summary-e-rate-modernization-order>

*2014 WAN targets were recommended by SETDA, but the FCC did not adopt any short term WAN goals
