

Transportation Infrastructure Revenue Subcommittee

July 15, 2016

Quay County Road Challenges

- We are fortunate to receive the funding we have received but the funding is decreasing and funding for local bridges is no longer available. We cannot keep up with our declining infrastructure.
- Increased regulations requires additional funding and resources and shorten our projects. Requiring environmental and archaeological studies on roads that have been used for many years need to reviewed.
- Slow to respond or no response from FEMA after natural disasters creates funding issues that leaves the County no choice but to address the immediate problem resulting in day to day maintenance being postponed.
- Quay County has 1,113.86 miles of roadway and 11 bridges to maintain.

Quay County Bridges

2 one lane bridges on Historic Route 66
are on County School Bus Routes

Historical Bridges need to be preserved

Airport Road rebuilt in 2007 using GRIP Funding

Traveled by commercial trucks because of GPS directional guides

Flooding and Goliath Snow Storm 2015

We appreciate having the opportunity to discuss these important issues with the committee and look forward to working with you to help find a solution to our needs.
