## Topics to Cover

$\triangle$ Purpose of the Study
© Survey Effort
A Economic Development Analysis

$\triangle$ Conclusion and Recommendations

Bohannan $\Delta$ Huston

## Purpose of the Study

$\triangle$ FAST Act

- requires drivers to stop for at least 10 hours after driving 11 hours in a 14-hour period
© Electronic logging devices (ELD)
- ELD enforcement starts December 12, 2017
- HM-96
- recognizes emerging economic development opportunities in NM

## Truck Driver Survey

## Truck Driver Parking Services and Preferences and Needs Survey

## https://www.surveymonkey.com/r/TruckDriverParking

The collected responses will be used to inform a state-wide truck freight-related economic development study in New Mexico, as directed by House Memorial 96, which recognizes a need for better truck stops in the state due to the 11 -hours of service driving limit. The study will serve as a potential economic development tool to improve truck parking and trucker-related services.

The study is being conducted by Bohannan Huston, Inc., with guidance from the New Mexico Economic Development Department, New Mexico Department of Transportation, New Mexico Trucking Association, and New Mexico State University.
*Please complete the survey by September 25, 2016

## Truck Driver Survey

- Assessed truck driver preferences
© Distributed online
- Mesilla Valley Transportation
- NM Trucking Association
- Outwest Express / Wild West Express / Sky Transportation Services
- Real Women in Trucking
a In-person on l-10 west of Las Cruces, NM
© Postcards at l-10 Ports of Entry

## Survey Questions

© Driver Background

- Age, employment type, haul length
^ Current Travel Patterns
- Location preference for long-term rest, importance of amenities, time to find parking
a Future Service Options
- Safety needs, food and dining needs, health and wellness needs, need for a shuttle

## Survey Results

$\triangle 97$ survey responses were received
A Four key services emerged:

- Available, convenient, and safe parking
- Dining options with quality, fresh, healthy food
- Areas for recreational activities and exercise, including areas to walk pets
- Facilities with urgent care and clinics

## Driver Preferences

Bohannan $\Delta$ Huston

## Trucking Center Details

Important Factors for Security Needs

Important Factors for Choosing Where to Eat Meals

Important Factors for Health and Wellness Needs

## Economic Development Analysis

## CAMBRIDGE SYSTEMATICS

Bohannan $\Delta$ Huston

## Methodology

- Phase 1: Truck Flow Analysis
- Screens NM interstate system - existing truck flows
© Phase 2: Major Freight Generators
- Weights key regional freight generators
- Exports and driving distance from NM interchanges
© Phase 3: Truck Parking, Amenities, and Land Use
- Evaluates parking, driver amenities, land ownership
- Recommends potential locations for truck centers

## Phase 1: Truck Flow Analysis

A $\underline{\mathrm{I}-40}$ and $\underline{\mathrm{I}-10}$ are NM's two key freight corridors

A $\underline{\mathrm{I}} 25$ falls below the FHWA's threshold of major truck routes - removed from further consideration in this study

| Interstate Combination Truck Flows |  |
| :---: | :---: |
| Interstate | AADTT (2015) |
| I-40 | Peak: 19,926 ; Average: 7,354 |
| I-10 | Peak: 8,426 ; Average: 5,877 |
| I-25 | Peak: 9,024; Average 2,096 |

Bohannan $\Delta$ Huston

## Phase 2: Major Freight Generators

$\Delta$ Identified major freight-producing metro areas within an 9 to11-hour drive of NM

- Buffer analysis
- 770 linear miles
- Travel time calculation
- Google distance matrix
- $20 \%$ inflated drive time
- Scoring and weighting each origin-to-destination
- drive time
- volume of freight tonnage

## Phase 2: Major Freight Generators

| Total Freight Exports by Origin |  |
| :---: | ---: |
| Metropolitan Area | Kilotons |
| Austin, TX | 53,000 |
| Dallas-Ft Worth, TX | 241,000 |
| Laredo, TX | 34,000 |
| Los Angeles, CA | 397,000 |
| Oklahoma City, OK | 46,000 |
| Phoenix, AZ | 85,000 |
| San Antonio, TX | 126,000 |
| San Diego, CA | 43,000 |
| Tucson, AZ | 28,000 |
| Tulsa, OK | 74,000 |
| Wichita, KS | 25,000 |

## Phase 2: Major Freight Generators

P:I201701844TRANSIStudy:Report-Production:Report Figures:DratiMXDsiMap5_NMMilepostScores.mxd
Author: amavnard

- 7 Sectors Identified
- 3 on I-40, 4 on I-10
- $A B Q$ is well served

| Interstate Segments Emerging from Phase 2 Screen |  |  |  |
| :--- | :---: | :---: | :---: |
| Sector | Interstate | From (exit) | To (exit) |
| Lordsburg | I-10 | 3 | 34 |
| Separ-Wilna-Gage | I-10 | 42 | 68 |
| Las Cruces | I-10 | 116 | 144 |
| Mesquite-Vado-Anthony | I-10 | 151 | 164 |
| Gallup | I-40 | 3 | 44 |
| Clines Corner-Vegas Junction | I-40 | 218 | 256 |
| Santa Rosa | I-40 | 263 | 311 |

Bohannan $\Delta$ Huston

## Phase 3: Parking, Amenities, and Land

© Buffer analysis around each interchange within the 7 prioritized sectors
$\Delta$ Identification of the presence of truck parking, amenities, and land use/ownership
$\Delta$ Ranking within each of the interstate segments

## Phase 3: Summary of All Sectors

## Analysis Results

| Sector | Notes |
| :--- | :--- |
| Lordsburg | Generally rural, with a good mix of facilities and amenities on either side of Lordsburg. A large <br> proportion of land in the western portion is owned by the US BLM. There is an abandoned <br> truck stop at exit 5. Segments of this sector (between mile markers 5 and 15) are prone to <br> repeat closures due to dust events, resulting in a need for truck parking facilities. |
| Separ-Wilna-Gage | A predominately rural sector, with the easternmost truck stop near the town of Deming (which <br> itself lies outside the study area). The westernmost and easternmost segments of this sector <br> (west from mile marker 42 and east from mile marker 68) are prone to repeat closures due to <br> dust events, resulting in a need for truck parking facilities. |
| Las Cruces | A well-served area including a scenic overlook with truck parking. Many amenities in the Las <br> Cruces area, though parking is limited. Two truck-specific complexes. |
| Mesquite-Vado-Anthony | A shorter segment on the north-south portion of l-10 near the Texas border. One truck- <br> specific complex, with a string of small towns to the west just outside of the study area. Exit <br> 164 has a New Mexico visitors' center, with truck parking but no amenities. |
| Gallup | The town of Gallup has full-service facilities on either side. A New Mexico rest stop is located <br> to the west; another truck stop is located at exit 39. Many exits are located in predominately |
| Tribal land. | A few truck stops and facilities appear in this predominately rural stretch. Land is mostly <br> owned privately or by New Mexico. |
| Sunction Corner-Vegas | Santa Rosa has several truck complexes and many amenities. Elsewhere, a few small towns <br> offer services but the sector is otherwise rural. Land is mostly owned privately or by New <br> Mexico. |

## Phase 3: Map for Gallup Area

Bohannan $\Delta \Delta$ Huston

## Conclusions and Recommendations

Bohannan $\Delta$ Huston

## Preferred Services for Any Location

## Trucking Center Preferred Services

| Amenity | Description |
| :--- | :--- |
|  | Parking facilities should have a security presence and safety <br> features, including lighting, surveillance cameras, and a guarded <br> area/designated security. Facilities should also allow for truck <br> accessibility and maneuverability. Diesel fuel availability should <br> also be included in trucking centers. It also assumed that truck <br> drivers will utilize trucking centers to park for long-term rest. |
| Parking Features | Food choices should be high quality, fresh, and healthy. Potential <br> dining options could include salad bars and grocery stores. |
| Food and Dining | Opportunities for recreation and exercise should include informal <br> green space and areas to walk pets, in addition to formal facilities <br> to exercise. |
| Recreation and Exercise | It is beneficial to locate the trucking center in close proximity to <br> both the interstate and an urban area. |
| Proximity | Typical needs for personal care include showers, clinics, and <br> salons for hair and nail services. Trucking centers should also <br> include Internet and Wi-Fi availability. |
| Personal Care and Leisure |  |

## What to do Next

- Evaluate parking capacity
- Evaluate parking demand
^ Support urban areas
- Enhance existing facilities
- Extend public transit
^ Create incentives
- Engage public-private partnerships
^ Coordinate on local, regional, state level
