ASSOCIATION STAFF

Matthew Holmes, Executive Director
Janis Allen, GIS Data Specialist
Lupe Aragon, Circuit Rider
Bill Conner, Deputy Director & Finance Manager
Dominick Donnarumma, Circuit Rider
Susan Maupin, Wastewater Technician
Peter Nathanson, Training Specialist
Sue Sleeper, Board Training Specialist
Andrew Sweetman, Source Water Protection Specialist
Daniel Valdez, Circuit Rider

LETTER FROM THE PRESIDENT

The New Mexico Rural Water Association continues to progress in our mission to provide technical assistance, training and advocacy for the drinking water and wastewater industry in New Mexico. The Association is able to accomplish this by tapping into years of real-life experience, common sense and hard work on the part of our volunteer Board of Directors and the best Rural Water staff in the business! Added to this winning combination is the foundation of an active membership, dedicated to providing safe drinking water, environmentally responsible wastewater systems and protecting our precious water resources.

This past year has been another success as we have continued to strengthen existing partnerships while seeking out new avenues to benefit our members. Our staff provided 91 days of training throughout the state during 2011. NMRWA trained almost 1,000 people in the topics of water, wastewater, management, leadership, financial, and board responsibilities. The staff of NMRWA have 100 years of combined experience as certified water operators!

Each year the difficult job of properly managing drinking water and wastewater utilities becomes more complex... And the rules and regulations governing our operations more stringent. Technical assistance and training from the New Mexico Rural Water Association is a critical resource for small communities to be able to maintain compliance with the increasing number of federal regulations under the Safe Drinking Water Act and the Clean Water Act.

As we struggle to understand and comply with the ever-increasing number of regulations, we all need to take advantage of every opportunity to positively influence the laws affecting our industry:

Stay in close contact with your elected officials.

Participate in the regional planning processes.

Stay abreast of state and federal regulations and involve yourself whenever changes in drinking water and wastewater regulation are proposed.

Most important: Continue to participate in the activities of the New Mexico Rural Water Association!

I have certainly enjoyed and appreciated the past year as President of the Association, and I look forward to the future. My pledge, on behalf of the Board of Directors, is to continue to nurture the old and new partnerships that have contributed to our past success, and continue our efforts to help all of our water and wastewater systems as we roll into the future.

Please call our office if we can be of assistance to you and your system.

Sincerely,

David Kenneke
President

TECHNICAL ASSISTANCE SUMMARY

NMRWA employs professional certified operators that travel New Mexico to provide free technical assistance and hands-on training directly to system personnel at their facility. On-site technical assistance improves the skill level of operators by teaching them how to solve problems as opposed to fixing the problems for them. NMRWA staff help troubleshoot and provide practical solutions for operations, maintenance and regulatory issues faced by drinking water systems every day.

	ON-SITE HOURS	ON-SITE CONTACTS	TRAINING HOURS
Circuit Rider #1	586	494	-
Circuit Rider #2	894	491	-
Wastewater Technician	334	431	81

USDA Sourcewater Specialist	297	36	33
Tribal Sourcewater Specialist*	78	8	17
Totals			

* Program ended midyear due to lack of funding

TRAINING SUMMARY

The New Mexico Rural Water Association is the premier training provider for water and wastewater system operators, providing high quality instruction since 1978. NMRWA staff members have 100 years of combined experience as certified water operators and 105 years of experience training water operators. We focus on increasing the professionalism of system personnel and have built an effective working relationship with operators through our programs and trainings.

Our Training Specialists provide introductory, advanced and specialized trainings and on-site technical assistance to operators and managers of drinking water systems of all sized and complexities. Trainings provide certification exam preparation, certification renewal and continuing education in the technical, operational and management aspects of drinking water systems.

	ATTENDEES	TRAINING HOURS	CREDITS AWARDED
Water System Training	821	511	8,138
Wastewater System Training	151	173	3,268
Totals	972	684	11,406

Total Days of Training	91
-------------------------------	-----------

MEMBERSHIP

NMRWA experienced a significant growth in membership in 2011, our largest single-year increase for decades. Small water systems continue to be largest component, with over 50% of our members serving less than 100 connections. Large systems and municipalities also recognized the value in belonging to the Association in 2011, resulting in a 60% increase in our largest membership category.

In addition to our system members, any business, corporation, organization or individual adhering to the purposes of the Association may join. NMRWA had 106 Associate members and 10 Individual members in 2011.

MISSION STATEMENT

Our mission is to provide the highest quality training and technical assistance to rural water and wastewater utilities throughout New Mexico, and to represent the legislative and regulatory interests of our members.

VISION STATEMENT

Our vision is to be the recognized leader of water and wastewater utilities with emphasis on rural and small systems in New Mexico.
