SUMMARY

Synopsis of Bill

Senate Bill 159 appropriates \$1,000.0 from the general fund to the Board of Regents of New Mexico State University for the New Mexico Department of Agriculture (NMDA) to match expenditures for the eradication of boll weevil by cotton boll weevil control districts established pursuant to provisions of the state's Boll Weevil Control Act.

Significant Issues

NMDA reports that the cotton boll weevil has infested an estimated 70,000 acres of cotton throughout New Mexico and that growers in established control districts in the nine major cotton producing counties in New Mexico contributed approximately \$1.3 million in crop year 2002 for eradication. NMDA further reports that cotton producers will contribute and estimated \$1.9 million toward eradication during crop year 2003.

FISCAL IMPLICATIONS

The appropriation of \$1,000.0 contained in this bill is a recurring expense to the general fund. Any unexpended or unencumbered balance remaining at the end of fiscal year 2004 shall revert to the general fund.

ADMINISTRATIVE IMPLICATIONS

NMDA will administer the program and funding will pass through to established cotton boll weevil control districts. Administrative impact on NMDA will be minimal.

RELATES TO:

HB 94
HB 99
SB 56

SB 159 requests \$1.0 million for the same purposes as this bill, control and eradication of cotton boll weevils in boll weevil control districts.

HB 99 and SB 56 request funding for the control and eradication of pink bollworms.

OTHER SUBSTANTIVE ISSUES

This request for funding was submitted to and approved by the NMSU Board of Regents. However, it is not recommended for funding by the CHE.

POSSIBLE QUESTIONS

1. Is it possible to address the eradication of the two species of boll weevils utilizing one program instead of two programs and two requests for separate funding?
2. Will NMDA coordinate the two programs if they are funded ?
