BILL SUMMARY

Synopsis of SEC Amendment

The Senate Education Committee amendment to Senate Bill 318 (SB318/aSEC) removes a requirement that charter schools author a five-year facilities master plan complete with an estimate of the gross square footage needed to operate an educational program. The amendment also makes a minor change to align the allowable uses of the charter facility fund and the public project revolving fund.

Synopsis of Bill

Senate Bill 318 (SB318) makes a number of statutory changes to expand charter schools' access to facility funding.

The bill would change the formula for lease assistance funding to be based on the gross square footage of "facilities," rather than "classroom space." The bill defines "facilities" as "the space needed, as determined by the five-year facilities master plan aligned with the statewide adequacy standards, for school activities."

The bill creates two separate funding sources for charter school facility funding: a charter school sub-fund within the public project revolving fund administered by the New Mexico Finance Authority (NMFA), which would allow NMFA to provide loans to charter schools for the purchase, construction, expansion, or renovation of facilities, and a "charter facility fund" administered by the Public School Finance Authority (PSFA) on authorization by the Public School Capital Outlay Council (PSCOC), used to pay off charter school lease-purchase agreements. To be eligible for a disbursement from either fund, a charter school's lease-purchase agreement must meet the requirements of the Public School Lease Purchase Act, a charter school must have renewed its charter at least once, and two audits of the charter school must be reviewed. The bill appropriates \$1 million to the newly created public project revolving fund.

If the bill is enacted, school districts would be required to provide state-chartered and locally chartered charter schools located within their boundaries with the opportunity to lease, purchase,

SB318/aSEC - Page 2

or enter a lease-purchase agreement for all available facilities and land. Land owned by a school district shall not be considered available if the school district has a justified use of the land in its five-year facilities master plan.

Finally, the bill would require school districts to establish a process to collaborate with charter schools inside their geographic boundaries through which charter schools may be included in local bond elections pursuant to the Public School Capital Improvements Act, commonly called "SB9" or "the two-mill levy," and Public School Buildings Act, commonly called "HB33." By June 1 of any year in which a school board will consider a bonding resolution, the school district must name a point of contact responsible for charter school requests and collect a list of the capital improvements each charter school wishes to make.

FISCAL IMPACT

The bill appropriates \$1 million from the general fund to the newly created public project revolving fund for FY22 and subsequent fiscal years. Any unexpended or unencumbered balance remaining at the end of a fiscal year shall not revert to any fund.

SB318/aSEC would increase the amount of funding awarded to some charter schools through the charter school lease assistance program. Currently, lease assistance awards are based on the lesser of two calculations: prior-year student membership (MEM) times a per-MEM rate, or actual reimbursement for *eligible* square footage, calculated as classroom square footage plus administrative square footage plus an additional 20 percent of the square footage. SB318 would amend this second calculation to be based on total square footage, rather than eligible square footage, simplifying the calculation and making some charter schools eligible for a greater amount of funding.

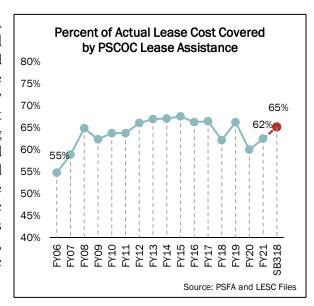

Based on LESC analysis of PSFA data, SB318/aSEC would require an additional \$710.5 thousand to increase lease assistance awards at 27 charter schools. See **Attachment 1, Estimated Impact of SB318/aSEC on Lease Assistance Funding**. Lease assistance awards are certified by PSCOC and made from the public school capital outlay fund, which does not require an appropriation by the Legislature.

SUBSTANTIVE ISSUES

Prior to the 2021 legislative session, charter school advocates explained a significant priority for the legislative session was expanding access to charter school facility funding. The policy levers included in SB318/aSEC address major concerns introduced to LESC, including an overly complicated lease assistance program, a lack of access to vacant school district space, and a need for permanent charter school facility funding.

Charter School Lease Assistance Program. The charter school lease assistance program was established in FY05 to help charter schools cut facility costs by covering a portion of their lease. The program was originally designed to cover approximately 50 percent of each charter school's lease costs, but between FY08 and FY18, the actual funded amount hovered between 60 percent and 70 percent. By basing lease assistance calculation on "facility" square footage rather than "classroom" square footage, the bill would increase the state's share of lease assistance funding to approximately 65 percent of the actual cost of charter school leases.

The bill also includes provisions to allow NMFA or PSFA and PSCOC to "pay off" charter school lease-purchase agreements, which could potentially reduce the need for lease assistance funding as more properties are purchased by charter schools. Analysis by PSFA notes current lease-purchase agreements have an outstanding balance of more than \$50 million, which would require a substantial investment by PSCOC and PSFA to completely pay off the agreements. The bill includes an appropriation to the NMFA public project revolving fund for this purpose but does not include an appropriation to PSFA or PSCOC, requiring the latter two entities to rely on public school capital outlay funds.

SB318/aSEC does not specify a methodology for any agency to pay off a lease-purchase agreement, which will require the agencies to adopt policies and evaluate applications for this type of award. If the award policies between PSFA and NMFA differ, charter schools may have the opportunity to shop between the two agencies for a more favorable award.

Vacant School District Space. SB318/aSEC would require school districts with vacant buildings or land to make those facilities available to charter schools. School districts don't often make vacant space available to charter schools, and turning to the market to find lease spaces appropriate to operate a school tends to be expensive. SB318/aSEC could reduce the cost of charter school leases by affording charter schools access to public buildings owned by charter schools. However, the actual cost of these new leases from school districts remains unclear.

Access to Facility Funding. According to analysis by NMFA, SB318/aSEC would require the finance authority to create a charter school sub-fund within the public project revolving fund to make loans to charter schools for the purchase, construction, expansion, or renovation of facilities or to pay off lease-purchase agreements. According to NMFA, this sub-fund will allow NMFA to adopt policies that afford charter schools greater flexibility than current public project revolving fund policies, which could expand charter schools' access to funding for permanent facilities. The bill appropriates \$1 million to the public project revolving fund, though PSFA notes this is likely not an adequate amount to begin large-scale construction projects.

Additionally, the bill would require school districts to meaningfully collaborate with charter schools to improve access to local property tax mill levy funds. Under current law, charter schools are eligible to receive mill levy funds from the Public School Capital Improvements Act and the Public School Buildings Act, but the onus is on charter schools to contact school districts with facility needs. Anecdotal evidence suggests school districts may not meaningfully engage with charter school mill levy funding requests, which hampers their access to funding for capital improvements. SB318/aSEC would require school districts to establish a point of contact and a process to engage charter schools, removing a potential barrier for charter schools to access mill levy funding.

ADMINISTRATIVE IMPLICATIONS

PSFA would be required to ensure school districts make charter schools aware of facility availability by May 1 of each year. School districts may choose to develop a facility prioritization plan that identifies which charter schools are eligible to lease, lease-purchase, or purchase available facilities.

School districts would be required to establish a process to involve charter schools in the bond resolution process, including, at a minimum, a point of contact who must collect charter school capital improvement requests on June 1 of any year a school district approaches voters with a bond issue.

OTHER SIGNIFICANT ISSUES

The Zuni Capital Outlay Lawsuit. SB318/aSEC amends the Public School Capital Outlay Act and the Public School Capital Improvements Act, two sections of law recently found by the 11th Judicial District Court to be unconstitutional. In December 2020, the court issued a ruling in the Zuni lawsuit, finding the two acts have exacerbated "gross disparities" between property-wealthy and property-poor school districts. The plaintiff school districts, now including only Gallup-McKinley County and Zuni, argue the school districts' lack of taxable property makes it impossible for the districts to fund "outside-of-adequacy" spaces freely available to property-wealthy school districts with enough local revenue to construct them independent of the PSCOC awards project.

The 11th Judicial District Court ruling, however, leaves policymakers without a clear understanding of why the systems were found unconstitutional. The ruling did not cite specific evidence of disparities in the capital outlay funding system and instead adopted wholesale the plaintiff's findings of fact, which contained inaccuracies and inconsistencies. Further, the court did not review appropriations and changes made to the capital outlay system during the 2019 and 2020 legislative sessions attempting to create greater equity. The Legislature has attempted to address the plaintiffs concerns by amending the state- and local-match calculation and appropriating \$53 million for outside-of-adequacy spaces in school districts receiving federal Impact Aid for Native American students, but these efforts were not mentioned in the district court's eight-page ruling.

On January 28, 2021, the Legislature and PSCOC's recent actions were submitted as new evidence in the lawsuit, along with a motion to reconsider the ruling. In the meantime, the Office of the Attorney General worked with plaintiffs to obtain an unopposed stay of the court's ruling, allowing PSCOC and PSFA to continue awarding funds and administering construction projects pursuant to the Public School Capital Outlay Act and Public School Capital Improvements Act. Pending a decision on the state's motion to reconsider, the Legislature will need to continue to focus on policy options and statutory changes that continue to provide for increased equity in the capital outlay system.

Source: LESC Analysis of PSFA Data

¹ Square footage eligible for lease assistance funding is calculated by taking the gross square footage of classroom space and adding 150 sq. ft. plus 1.5 sq. ft. per MEM of administration space. This total is multiplied by 1.2 to add a 20 percent tare to find the total eligible square footage. Schools cannot be eligible for more than the physical square footage of the school.

² Charter schools highlighted in blue are leasing school district-owned facilities. The lease agreements for these facilities require the lease assistance amount be calculated using the per-MEM calculation.
